2 PREFACE

Non-Discrimination

Coe College does not discriminate on the basis of race, color, ethnicity, age, religion, national origin, sexual orientation, gender identity, sex, marital status, disability, or status as a U.S. Veteran. All students have equal access to the facilities, financial aid, and programs of the College.

Higher Education Opportunity Act (HEOA)

The College complies with Readmission Requirements for Service Members as outlined in the Higher Education Opportunity Act section 487. This applies to active duty in the Armed Forces, whether voluntary or involuntary, including service as a member of the National Guard or Reserve, for a period of more than 30 days under a call or order to active duty.

The HEOA provides that a prompt readmission of a previously enrolled or admitted student may not be denied to a service member of the uniformed services for reasons relating to that service. In addition, a student who is readmitted under this section must be readmitted with the same academic status as the student had when they attended the college.

Equal Opportunity in Employment

Coe College is an equal opportunity employer in the recruitment and hiring of faculty and staff.

Family Educational Rights and Privacy Act (FERPA)

The provisions of the Family Educational Rights and Privacy Act (FERPA) prohibit the College from releasing grades or other information about academic standing to parents unless the student has released such information in writing. Further information concerning Coe College procedures in compliance with FERPA is available in the Office of the Registrar and included in **?@sec-ferpa-rights** of this catalog.

Solomon Amendment of 1997

Pursuant to the regulations of the Solomon Amendment of 1997, Coe College is required to make student recruiting information available to military recruiters who request it.

Reservation of the Right to Modify

The provisions of this catalog are to be considered directive in character and not as an irrevocable contract between the student and the College. The College reserves the right to make changes that seem necessary or desirable, including course and program cancellations. Responsibility for understanding and meeting graduation requirements as stated in the Coe College Catalog rests entirely with the student. Faculty advisors and the Registrar will assist in every way possible.

3 MISSION STATEMENT OF THE COLLEGE

Coe College is a national, residential liberal arts college offering a broad array of programs in the arts, sciences and professions. Our mission is to prepare students for meaningful lives and fulfilling careers in a diverse, interconnected world. Coe's success will be judged by the success of our graduates.

Coe College admits students without regard to sex, race, creed, color, handicap, sexual orientation, national, or ethnic origin. All students have equal access to the facilities, financial aid, and programs of the College.

Date of publication: 7-13-2026

4 FAST FACTS

COE COLLEGE is a private, four-year co-educational liberal arts college that was founded in 1851 and is historically affiliated with the Presbyterian Church (U.S.A.), yet is ecumenical in practice and outlook.

4.0.1 LOCATION

Coe is located just 225 miles west of Chicago in Iowa's second largest city, Cedar Rapids (metropolitan population 140,000). The city is easily accessible by the interstate highway system, bus services and several airlines.

4.0.2 CAMPUS

Situated on 65 acres in the center of the metropolitan area, the campus is urban but enclosed, with 30 buildings occupying an attractive landscape.

4.0.3 ENROLLMENT

The student body of approximately 1,200 students represents most states and around 15 foreign countries. All students are required to live on campus unless they are residents of Cedar Rapids.

4.0.4 LIBRARY

Stewart Memorial Library is in the very center of the main campus. It contains over 500,000 volumes and 16,000 pieces of media, and subscribes to 3,500 print and online periodical subscriptions providing access to over 100 databases. Coe's library offers students a variety of research assistance, study areas, a small theater, preview room, a media editing room, and a 3D printer and laser cutter. The Library houses the Learning Commons and the College's permanent art collection.

4.0.5 ACCREDITATION

Coe College is accredited by the Higher Learning Commission (hlcommission.org), an institutional accreditation agency recognized by the U.S. Department of Education. Coe College's Bachelor of Music program is accredited by the National Association of Schools of Music; its education program is accredited by the Iowa Department of Education, and the baccalaureate degree program in nursing at Coe College is accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org) and is approved by the Iowa Board of Nursing. Coe College's chemistry program is certified by the American Chemical Society. Copies of accrediting and approval statements are available online at https://www.coe.edu/why-coe/consumer-information.

4.0.6 MEMBERSHIPS

Coe is a charter member of the Associated Colleges of the Midwest, whose other members are: Beloit College, Carleton College, Colorado College, Cornell College, Grinnell College, Knox College, Lake Forest College, Lawrence University, Luther College, Macalester College, Monmouth College, Ripon College, and St. Olaf College. Other memberships include: Phi Beta Kappa, Phi Kappa Phi, the National Association of Independent Colleges and Universities, the American Association of Colleges and Universities, Council on Undergraduate Research, the Association of Presbyterian Colleges and Universities, the American Rivers Conference, and the National Collegiate Athletic Association.

4.0.7 ACADEMIC PROGRAM

Academic areas of study are offered in managerial or public accounting, African American studies, art, Asian studies, biology, business administration, chemistry, communication studies, computer science, creative writing, data science, economics, elementary education, engineering physics (B.S.E.), English, history, interdisciplinary science, interdisciplinary studies, international economics, international studies, kinesiology, mathematics, music, nursing (B.S.N.), philosophy, physics, political science, psychology, social & criminal justice, sociology, Spanish, Spanish studies, and theatre arts. Collateral majors are also available in biochemistry, environmental studies, neuroscience, and public relations. Coe also offers licensure programs in primary and secondary education.

4.0.8 EXTRA-CURRICULAR ACTIVITIES

Students can participate in 11 men's and 11 women's NCAA Division III varsity athletic teams, 5 coed varsity athletic teams, 8 club sports, 7 nationally affiliated men's and women's social fraternities, and more than 65 student organizations including but not limited to student government, newspaper, intramural sports, departmental clubs, and residence hall activities. Various vocal and instrumental ensembles are available for course credit.

4.0.9 FINANCIAL ASSISTANCE

Coe College provides comprehensive need-based and merit-based financial aid programs designed to help qualified students attend Coe regardless of their family financial situation. These assistance programs are based on the premise that students and parents should pay for college to the extent that they are able. Need-based financial aid is used to help make up the difference between the cost of college and what a family can afford. Review the Coe College Financial Aid Handbook for more information.

4.0.10 HISTORY OF COE COLLEGE

Coe College claims the shortest name of any American institution of higher education, but the school has actually carried five titles through its history. When the Rev. Williston Jones founded the college in 1851, he called it The School for the Prophets. Cedar Rapids' first resident minister opened the parlor of his home to a group of young men with the goal of educating them for the ministry to serve churches in the Midwest. Two years later, while Jones was canvassing churches in the East for money to send three of his students to Eastern seminaries, a Catskills farmer named Daniel Coe stepped forward with a pledge of $1,500 and urged Jones to start his own college in the frontier town of Cedar Rapids. Legend has it that the $1,500 raised by Coe was brought west from New York, sewn into the petticoat of a lady visitor traveling by stagecoach to Iowa. Coe gave this generous gift with the stipulation that the proposed institute should be "made available for the education of females as well as males." Accordingly, Coe was coeducational from its founding.

With Jones' blessing, the Cedar Rapids Collegiate Institute was incorporated in 1853 by a group of Cedar Rapids leaders chaired by Judge George Greene. They used Daniel Coe's money to purchase two downtown lots for the school and 80 acres of farmland on what was then the edge of town. The farm evolved into today's campus. In 1868, in a failed attempt to secure the Lewis Parsons estate, the trustees renamed the school Parsons Seminary. After a period of severe financial difficulties, the institution was reestablished in honor of its original benefactor as the Coe Collegiate Institute in 1875.

T.M Sinclair, founder of the Sinclair Meat Packing Company, played the key financial role in the final step toward the firm establishment of Coe College. Sinclair liquidated all the debt from Parsons Seminary and the Cedar Rapids Collegiate Institute. The Sinclair gift made it practical for the property of the Coe Collegiate Institute — including the original land paid for by Daniel Coe — to be transferred to Coe College with the Iowa Presbyterian Synod to assume major responsibility for the institution. Coe College has operated continuously since its incorporation under that name on Feb. 2, 1881. From the first, the College was committed to intellectual excellence. It has continued in this tradition ever since.

The compact campus on the east edge of Cedar Rapids grew with many building projects in its early years, including Old Main (1868), Williston Hall (1881), Marshall Hall (1900), the first gymnasium (1904), and the first T.M. Sinclair Memorial Chapel (1911). In 1907, Coe earned accreditation from the North Central Association of Colleges and Universities. Over the decades, Coe's reputation as a superior liberal arts college has continued to grow. One recognition of this came in 1949, when Coe was granted a Phi Beta Kappa chapter, a distinction reserved for about 10% of American colleges and universities.

Central to the educational philosophy of Coe College is the belief that a liberal arts education is the best preparation for life. Students have the opportunity to experience a variety of subjects outside their respective programs of study. Coe offers 39 areas of study that cover a range of fields. The College awards the following undergraduate degrees: Bachelor of Arts (B.A.), Bachelor of Science in Nursing (B.S.N.), and Bachelor of Science in Engineering (B.S.E.).

There are a number of factors that contribute to Coe College's strong academic quality. The key to Coe's tradition of excellence in academic quality relates directly to small class sizes and the interest shown by professors to make learning a personalized experience. At Coe, the average class size is 16, and the student-faculty ratio is 11:1. Classes are taught by our involved and committed faculty, 80% of whom hold the highest degree in their field. This means classes are taught by experienced professionals who have in-depth knowledge of their subjects. To provide students with a well-rounded experience and solid preparation for the future, Coe offers, along with quality instruction from superb faculty, an abundance of out-of-class opportunities which include student-faculty collaborative research, honors projects, service learning, and internships. Within one year of graduation, according to the annual survey results from the Center for Creativity and Careers, nearly all of Coe graduates are engaged in post-graduate activity such as employment, graduate school, military, or travel/adventure.

With the addition of the east campus, Coe has nearly doubled in size since 1989. New facilities on the east side of College Drive include Athletic Recreation Center (2017), Clark Racquet Center and athletic fields (1989), Clark Alumni House (1993), Nassif House (1999), and four student apartment buildings (Morris House and Schlarbaum House in 2000, Brandt House and Spivey House in 2002). McCabe Hall (2005), named in honor of former Coe President Joseph E. McCabe, houses the offices of the president, provost, advancement and alumni relations, and the Center for Creativity, Careers and Community (C3) making way for the remodeling of Coe's oldest building, Stuart Hall, and the first significant addition of classroom space since Peterson Hall was built in the 1960s. In 2012 and 2013, Peterson Hall of Science was completely renovated to support Coe's science programs.

To further enhance the campus environment, Coe completed the largest capital project in its history in 2017. Make Your Move – the Campaign for Eby and Hickok – included $24 million in essential enhancements, including an Athletic and Recreation Complex project as well as the renovation and expansion of Hickok Hall, one of the College's main academic buildings. The result is vastly improved academic, recreational, wellness and competition facilities to benefit future generations of students. In the fall of 2022, the David & Janice McInally Center for

Health & Society was dedicated as a hub for immersive health care education and connections to providers in the MedQuarter Regional Medical District.

During the 2025–2026 academic year, the college offered its first online undergraduate degree as well as an aviation studies and flight operations program operating out of Coe's Aeronautical Field Station at the Eastern Iowa Airport (CID).

5 2026–2027 RESIDENTIAL ACADEMIC CALENDAR

5.0.1 FALL TERM 2026

August 26	Classes Begin
September 7	Labor Day Holiday (No Classes)
October 15–16	Fall Term Recess (No Classes)
October 19	Begin Second-Half Term Courses
November 23–27	Thanksgiving Recess Holiday (No Classes)
December 11	Last Day of Fall Term
December 14–17	Final Exams

5.0.2 SPRING TERM 2027

January 13	Classes Begin
January 18	Martin Luther King Jr. Day Holiday (No Classes)
March 4	Begin Second-Half Term Courses
March 15–19	Spring Term Recess (No Classes)
April 22	Student Research Symposium (No Day Classes, Evening Classes Meet)
April 30	Last Day of Spring Term
May 3–6	Final Exams
May 8	Honors Convocation / Baccalaureate
May 9	Commencement

5.0.3 MAY EXPERIENTIAL TERM 2027

May 12	Classes Begin
May 31	Memorial Day Holiday (No Classes)
June 4	Last Day of May Experiential Term
June 5	Residence Halls Close

5.0.4 SUMMER TERM 2027*

June 7	Classes Begin
June 18	Juneteenth Holiday (No Classes)

July 5	Independence Day Holiday (No Classes)
July 12	Last Day of Block A Courses
July 13	First Day of Block B Courses
August 13	Summer Term Ends: Last Day of Block B and Full-Term Courses

For a full listing of dates, please visit www.coe.edu: https://www.coe.edu/why-coe/events/calendar. This website provides a list of all upcoming events

6 THE EDUCATIONAL PROGRAM

6.1 GRADUATION REQUIREMENTS

All students granted an undergraduate degree from Coe must complete the specific requirements for one of four bachelor degrees (Bachelor of Arts [B.A.], Reduced-credit Bachelor of Arts [RC-B.A.] (Online Only), Bachelor of Science in Nursing [B.S.N.] or Bachelor of Science in Engineering [B.S.E.]). Students must complete the 5 General Education Requirements (Divisional Requirements, First-Year Experience, Writing Emphasis courses, Diversity Across the Curriculum courses and a Practicum), complete an area of study appropriate for their chosen degree with at least a 2.0 grade point average (GPA), earn at least 32 course credits (cc) (or 24 cc for the RC-B.A.) with grades leading to a cumulative GPA of 2.0 or higher, and comply with additional graduation policies listed in this section. No more than a total of two course credits from courses which are less than 0.5 credit can be used to meet the 32-credit (traditional B.A., B.S.N. or B.S.E) or 24-credit (RC-B.A.) graduation requirement.

6.2 GENERAL EDUCATION REQUIREMENTS

A liberal arts education at Coe College prepares students to engage with the challenges they face as active participants in the twenty-first century. Coe graduates are informed by the knowledge acquired in the liberal arts tradition and equipped with the skills and knowledge that ground meaningful lives and fulfilling careers. Coe graduates are connected and accountable to local, national, and global communities and are prepared to engage with unfamiliar situations, emerging technologies, and diverse perspectives.

Completion of all General Education Requirements is required for all students earning a first B.A., RC-B.A., B.S.N., or B.S.E. degree at Coe College. An appropriate transferred course, determined by the Office of the Registrar, with a grade of "C" (2.0) or better may be accepted to meet an individual requirement. The Office of the Registrar will be responsible for assessing how transfer courses will be applied to the General Education requirements.

Advanced Placement and International Baccalaureate courses may not be used to meet any part of these requirements. No more than two course credits with the same prefix may be used to fulfill the Divisional Requirements. A given course may be able to simultaneously contribute to more than one general education category, as these categories do not mutually exclude each other: Divisional Requirements, First-Year Experience, Writing Across the Curriculum, Diversity Across the Curriculum, and Practicum.

6.2.1 Divisional Requirements

Students must complete each of the following requirements. No course can count in more than one divisional requirement.

1. Fine Arts Requirement – A total of at least TWO course credits with a prefix of ARH, ART, CRW, MU, MUA, or THE. Students may also satisfy this requirement by completing NYT-250 Fine Arts in New York City, a component of Coe's New York Term, described on page 56.
2. Humanities Requirement – A total of at least TWO course credits with a prefix of AAM, CLA, COM, ENG, HIS, JPN, PHL, REL, or SPA.
3. Natural Sciences and Mathematics Requirement – A total of at least ONE course credit with a prefix of BIO, CHM, CS, DS, ENR, MTH, PHY, or STA.

4. Lab Science Requirement – A total of at least ONE course credit from courses with a lab component. Students must enroll in and pass both the lab and corresponding lecture to complete this requirement. Lab sections are denoted with an L at the end of their course codes.
5. Social Sciences Requirement – A total of at least TWO course credits with a prefix of ANT, ECO, GS, POL, PSY, or SOC.

6.2.2 First-Year Experience

Students who have not yet completed a full-time college term after high school graduation are required to complete a First-Year Experience in their first term at Coe.

The student's First-Year Experience at Coe is a deliberate strategy to engage first-year students across multiple dimensions of college life in the first year. Components of the First-Year Experience include writing exercises, various campus events, and the First-Year Seminar (FYS), described in detail in this section of the catalog. Students who drop or fail their First-Year Seminar are required to complete a replacement course designated by the Registrar the following term. The completion of this Spring Term course makes it possible for the student to fulfill the FYS graduation requirement. For students who fail the Fall Term First-Year Seminar, successful completion of the Spring Term course also allows the grade in the FYS to be changed from "F" to "NP" on the transcript.

Students who begin their college enrollment in the Spring Term must also complete a course designated as a replacement.

6.2.2.1 FS-110 First-Year Seminar (WE)

Required of all first-year students who have not yet completed a full-time college term after high school graduation. The First-Year Seminar introduces students to college-level study with emphasis on critical thinking, writing, speaking, and research skills. Faculty offer first-year-only topics courses exploring issues from multiple perspectives within or across disciplines. Students in all sections prepare portfolios of their written work and attend a variety of cultural events on and off campus. Seminar instructors also serve as the primary academic advisors for first-year students in their respective sections. First-Year Seminars are writing emphasis and cannot fulfill any distributional, cultural perspective, or major requirements.

6.2.3 Writing Emphasis (WE) Courses

Only designated WE courses in which a student earns a grade of "C" (2.0) or better count toward fulfillment of this requirement.

Only designated courses taken at Coe College count toward fulfillment of this requirement.

Undergraduate degree-seeking* students

- who start at Coe College or who transfer fewer than 8 course credits earned after graduation from high school must complete at least 5 writing emphasis courses. Of these 5, one will usually be the FYS. Of the remaining 4, it is recommended (but not required) that at least 1 be taken outside the student's intended major(s).
- who transfer at least 8 but fewer than 16 course credits to Coe, earned after graduation from high school, must complete at least 3 writing emphasis courses.
- who transfer 16 or more course credits to Coe, earned after graduation from high school, must complete at least 2 writing emphasis credits.

For all students, regardless of transfer credit, it is recommended (but not required) that at least one writing emphasis course be taken in the upper division within the student's intended major(s). "Upper division" courses are defined in this case as those numbered 300 and above; upper division writing emphasis courses could include both scheduled classroom courses and arranged writing-based capstone projects (such as a thesis). See Departmental Writing Plans for more information on writing in the major(s).

*Students seeking a second undergraduate degree from Coe should see Second Baccalaureate Degree p. 26

Writing Across the Curriculum: Statement of Guiding Principles

As stated in the Coe College Mission Statement, our reason to exist as an institution is to ready students intellectually, professionally, and socially to lead productive and satisfying lives in the global society of the 21st century. In accordance with this mission, our curriculum requires that students undertake "a series of intensive writing experiences, spread across four years of study." This requirement is known as Writing Across the Curriculum, the guiding principles of which are detailed below.

As a philosophy, Writing Across the Curriculum asserts that writing is most effectively learned in context: to varied audiences, with varied purposes. In adopting this philosophy, Coe College has committed to making writing-intensive experiences available to students in all disciplines. Known as "Writing Emphasis" credits, these courses are divergent in subject matter but aligned in their commitment to giving students content-rich and context-specific writing experiences that foster a critical flexibility in transferring knowledge about effective writing to multiple, even unknown, contexts.

Therefore, students who complete the requisite number of writing emphasis courses will graduate from Coe knowing that writing is both a means and an end: a method for exploring ideas and deepening one's knowledge as well as a tool for sharing that knowledge and expressing one's point of view. Similarly, graduating students will know that the practice of writing is a recursive process rooted in revision, which refers both to the reconsideration of one's ideas and to the refinement of prose, and this process unfolds over a lifetime. Understanding that students will encounter innumerable writing situations in their lives, many of which may be unfamiliar to them, they will graduate from Coe having developed the confidence and self-efficacy necessary to adapt or draw from their existing knowledge in order to navigate new contexts.

Although many courses at Coe may include writing activities, courses endorsed by Writing Across the Curriculum are those in which:

- Students are given opportunities to practice revision, whether via multiple drafts of a single project or multiple iterations of the same type of assignment;
- Students receive instructor feedback on written work to facilitate revision; and
- Writing assignments are frequent enough that they are integral to the learning throughout the course, enabling students to develop in one or more of the following learning outcomes, as appropriate to discipline and course objectives:
  - How to write for specific purposes and audiences
    - *Including attention to the ways purposes and audiences shape form, mode, voice, method, organization, engagement with and citation of research, and/or creativity and imagination*
  - How to engage in critical thinking
    - *Particularly how to conduct analysis, how to synthesize information, how to interpret and/or use evidence and data, and how to present one's ideas coherently and stylistically*
  - How to practice, assess, and develop effective habits for writing
    - *Specifically, how to read deeply, how to begin and later practice selection in research, how to be a skilled reader of one's own and others' in-process writing, how to accept and interpret feedback, and how to revise writing, all of which are parts of the process of learning how to have and develop ideas*
  - How to engage in writing as a method for learning and discovery

    - *For deepening knowledge, thinking through questions and problems, and reflecting on connections and growth*
  - How to name and describe one's own knowledge for others
    - *For example, in the form of personal statements for application to graduate study, cover letters and resumes for entering and advancing in the workforce, or other forms of self-summary that facilitate transition from the baccalaureate environment through the broader public.*

Many writing emphasis sections are offered each year. First-Year Seminars (all of which are Writing emphasis), Divisional requirements, Diversity across the Curriculum, or major courses that are also designated as writing emphasis courses may be used to satisfy both requirements.

In this catalog, writing emphasis courses are designated by a (WE) after the course title, e.g. "COM-141 Introduction to Journalism (WE)." In other contexts, the course code may end with a "W" or "WE" (e.g. COM-141-W or COM-141-WE). All sections of such a course, regardless of instructor, will carry writing emphasis credit.

6.2.3.1 Writing Emphasis Course Listing

AAM-137 African American Literature

6.2.4 Diversity Across the Curriculum

Students are required to complete at least TWO courses from the Diversity Across the Curriculum course list, where a term-long study away may count as the two required courses as approved by the Registrar. An essential part of a liberal arts education is to prepare students to live and work in a diverse and interconnected world. Diversity Across the Curriculum courses, offered at all levels across the curriculum, are designed to equip students to engage in effective and respectful civil dialogue in global and local contexts.

6.2.4.1 Diversity Across the Curriculum: Course Listing

6.2.5 PRACTICUM

All Students, except those earning a second degree, must complete at least ONE practicum experience. A practicum experience that integrates academic learning with significant educational experiences beyond the classroom is typically completed in the student's junior or senior year. A practicum experience can consist of an internship, off-campus study, community-based project, honors project, or some other kind of independent activity. Depending on the type selected, some practica are graded A–F, while others are P/NP. Some practica are credit bearing, while others are not.

The following list includes acceptable practicum experiences:

1. Full-Term Off-Campus Study
2. May Experiential Term Courses
3. Wilderness Field Station or Archaeological Field School Summer Courses
4. Departmental Honors Project, if transcripted with an appropriate course code
5. Independent Study
6. Student Teaching
7. Internships (All course codes ending in 494 and 499)
8. Research (All course codes ending in 454 and 459)
9. Community-Based Project

- Supervised work on service projects proposed by external constituencies such as non-profit institutions, community agencies, and government organizations. Students learn about the issues, problems, and techniques associated with developing, organizing, and participating in projects that address and solve real-world problems, as well as provide services and benefits to community and project sponsors. Authorization for the community-based project is determined by the supervising faculty member. May be taken more than once. A minimum of 140 hours of work is required. P/NP basis only. A maximum of two course credits earned through any combination of Internships and Community-Based Projects may be included in the 32 course credits required for graduation.

10. Additional practicum courses:

- ART-474 Seminar in Art and Visual Studies II & Thesis Exhibition
- BIO-115 Marine Biology
- BIO-462 Advanced Biology Laboratory I
- CFP-401 Action Research I plus CFP-402 Action Research II
- CRW-112 Advanced Literary Magazine Editing (two terms)
- CRW-492 Manuscript Workshop (WE)
- ECO-454 Research in Economics
- EDU-215 Practicum in Education (WE
- MUA-490 Senior Recital
- NUR-455 Leadership and Contemporary Issues in Nursing/Clinical Application (WE)
- PHL-490 Philosophy Colloquium (WE) (0.0 credit)
- PHY-255 Introduction to Physics Research I
- PHY-355 Introduction to Physics Research II
- THE-442 Advanced Projects in Design and Technical Production
- THE-452 Advanced Projects in Acting
- THE-462 Advanced Projects in Directing

6.3 AREAS OF STUDY

The four undergraduate degrees have areas of study associated with them. The Bachelor of Science in Nursing's area of study is nursing; the Bachelor of Science in Engineering's area of study is engineering physics. The Bachelor of Arts' areas of study (residential or online), commonly referred to as majors, are listed below. The Bachelor of Arts degree has two options for completion—the traditional program and the reduced-credit program (online only), with each requiring an area of study, commonly referred to as a major. A student earning an RC-B.A. must complete an area of study approved for this particular degree. A student earning a traditional B.A. must complete at least one area of study approved for the traditional degree, but may also complete an area of study approved for a RC-B.A., earning the traditional B.A. Students may matriculate from a residential to online program or vice versa but cannot be simultaneously in both degree programs.

All students are required to complete at least one area of study associated with their degree. Students should declare a major by the end of their sophomore year. All students must earn at least a 2.00 GPA in courses required to complete their areas of study, as well as meet specific requirements set forth for the area of study.

6.3.1 Areas of Study (Majors) for B.A. (Residential Only) 32 Credit Program

Accounting, Managerial
Accounting, Public
African American Studies
Art
Asian Studies
Biology
Business Administration
Chemistry
Communication Studies

International Studies
Kinesiology
Mathematics
Music
Philosophy
Physics
Political Science
Psychology
Social & Criminal Justice
Sociology
Spanish
Spanish Studies
Theatre Arts

6.3.2 Collateral Areas of Study

In addition to the majors listed above, the following collateral majors are offered, which require a student to satisfy the requirements of a major from the list above in addition to the selected collateral major.

Biochemistry
Environmental Studies
Neuroscience
Public Relations

[1] A coherent interdisciplinary sequence of courses devised by the student, in consultation with faculty, suited to the student's individual goals and approved by the Academic Policies Committee.

6.3.3 Concentrations within Areas of Study

Offered as an option to students completing specific areas of study, but not as a requirement for any, is the completion of one of the concentrations listed below.

Art - Multimedia Graphic Design

Biology - Environmental and Ecological Science - Molecular Biology - Pre-Health Sciences

6.3.4 Area of Study (Major) for Reduced Credit-B.A. (RC-B.A.) 24 Credit Program (Online Only)

Certain majors at Coe College are offered in online modality and as reduced credit. The area of study here is offered exclusively online and is available only to non-residential students. Students may matriculate from a residential to online program or vice versa but cannot be simultaneously in both degree programs.

Business Administration with a concentration in Strategic Leadership

6.3.5 Area of Study (Major) for B.A. (Online Only) 32 Credit Program

Certain majors at Coe College are offered in online modality. The area of study here is offered exclusively online and is available only to non-residential students. Students may matriculate from a residential to online program or vice versa but cannot be simultaneously in both degree programs.

6.3.6 Area of Study (Major) for B.S.N.

Nursing

6.3.7 Area of Study (Major) for B.S.E.

Engineering Physics

6.3.8 Minors

Offered as an option to all residential program students, but not a requirement for any, is the completion of one or more minors in the areas listed below. To earn a minor, a student must earn a 2.00 GPA in the courses required for the minor as well as meet specific requirements set forth for the completion of the minor.

African American Studies
Applied Mathematics
Art
Art History
Asian Studies
Biology
Chemistry
Communication Studies
Computer Science
Creative Writing
Data Science
Economics
English
Environmental Studies
Gender and Sexuality Studies
Health & Society Studies
History
International Economics
Mathematics
Music
Museum Studies
Philosophy
Physics^BSE
Political Science
Religion
Secondary Education
Sociology
Spanish
Theatre Arts

6.4 TOTAL COURSE CREDITS

Students must earn at least 32 course credits (cc) with grades leading to a cumulative grade point average (GPA) of 2.0 or higher to earn a traditional B.A., B.S.N. or B.S.E degree. Students must earn at least 24 course credits with grades leading to a cumulative grade point average (GPA) of 2.0 or higher to earn a RC-B.A. degree. Courses are one credit (equal to 4 semester hours or 6 quarter hours) unless otherwise indicated. Students are expected to complete 180 hours of work to earn one course credit, although class times vary from course to course. No more than a total of two course credits from courses which are less than 0.5 credit can be used to meet the 32-credit (traditional B.A., B.S.N. or B.S.E) or 24-credit (RC-B.A.) graduation requirement. No more than eight course credits earned through Advanced Placement and International Baccalaureate may be counted towards the earned credits for any degree.

6.5 ADDITIONAL GRADUATION POLICIES

For B.A., B.S.E., and B.S.N. degrees, students must meet one of the following requirements: - Complete at least the final academic year of required courses registered through Coe as a residential student. - Earn a total of 16 course credits or the equivalent at Coe. The last eight course credits needed for graduation must include at least four earned at Coe as a residential student. Approved off-campus study programs and internships can be used to fulfill this requirement.

For RC-B.A. degrees, students must meet the following requirement: - Earn a total of 8 course credits or the equivalent at Coe. The last eight credits needed for graduation must include at least four earned at Coe. Approved internships can be used to fulfill this requirement.

A student earning an RC-B.A. who reaches the 32-credit threshold and meets all other graduation requirements (excluding taking residential courses) will automatically be granted a B.A. A student may be simultaneously awarded two traditional degrees (B.A., B.S.E., B.S.N.) after satisfactorily complete at least 40 course credits and the requirements for both degrees. However, a student may not earn both a Bachelor of Science in Engineering and a Bachelor of Arts with a physics area of study.

To participate in Commencement exercises, students must submit a completed Intent to Graduate form to the Office of the Registrar, preferably three terms prior to Commencement and no later than the first business day of March in the current academic year.

Graduation audits are conducted by the Registrar's Office in coordination with Department Chairs and Administrative Coordinators only after a student has submitted their Intent to Graduate form, and during the final term of a student's academic program, typically a few months before commencement. Graduation audits are not intended to be advisory, but rather to allow the Registrar's Office to verify that the student has completed all the necessary coursework and requirements to comply with awarding a degree. Students should maintain their own academic record and monitor their overall progress toward completion in consultation with an advisor to ensure all graduation requirements are met.

6.6 Online Program Information

Coe College offers an online program that is separate from the residential programs. The areas of study and available degrees are different for each modality/program and only open to students currently enrolled in the designated program. Students may only be enrolled in one program at a time. Students wishing to switch between programs must withdraw from the college and reapply to join the other program. Coe scholarships and for financial aid compliance grants will not carry forward to future terms following a program change and will be canceled from the date of withdrawal. Eligibility for state and federal financial aid will be reevaluated based on the student's new enrollment status and applicable regulations. Students should consult the Financial Aid Office before making any changes to their program to understand the financial aid implications fully. Students may switch their program modality once during their enrollment at Coe without a delay in enrollment. If a student returns to their original modality after switching programs, eligibility for Coe scholarships and grants will be re-evaluated based on transfer scholarship criteria in effect at the time of re-enrollment. All subsequent switches will require one academic year away from the college before returning in the new program.

6.7 SARA STUDENT COMPLAINT PROCESS

(Copied from NC-SARA's webpage on student complaints.)

Every student deserves a positive educational experience. Sometimes a student's experience may not be what they anticipate, and the student may have a concern or a complaint. SARA consumer protection provisions require the institution's home state, through its SARA State Portal Entity, to investigate and resolve allegations of dishonest or fraudulent activity by the state's SARA-participating institutions, including the provision of false or misleading information. A student has the right to lodge a complaint or grievance. The institution should ensure that all concerns and complaints of students are addressed fairly and are resolved promptly. Student complaints relating to consumer protection laws offered under the terms and conditions of the State Authorization Reciprocity Agreement (SARA), must first be filed with the institution to seek resolution. The student should begin the complaint process with the institution and if resolution is not found, the student would contact the institution's home state SARA Portal Entity. NC-SARA maintains a directory of State Portal Entity (SPE) Contacts (https://nc-sara.org/state-portal-entity-contacts) and SARA Student Complaint Process Information by State (https://nc-sara.org/sara-student-complaints-process-information-state).

6.8 STUDENT TUITION RECOVERY FUND DISCLOSURES

In compliance with BPPE code, Coe College provides the following regulations regarding STRF.

5 CCR §76215(a) "The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the

institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition. You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program." 5 CCR §76215(b) "It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 1747 N. Market Blvd #225 Sacramento, CA 95834, (916) 574-8900 or (888) 370-7589. To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following: 1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau. 2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued 3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure. 4. The institution has been ordered to pay a refund by the Bureau but has failed to do so. 5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs. 6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution 7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans. To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF. A student whose loan is revived by a loan holder or debt collector after a period of non collection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law. However, no claim can be paid to any student without a social security number or a taxpayer identification number."

6.9 Transfer Student Information

A transfer student is any student who has completed at least one semester of higher education, enrolled full time, since graduating from high school, before transferring to Coe College. A full-time Coe student who has not yet completed one full-time semester of higher education since graduating from high school is instead considered a Full-Time First-Year (FTFY) student.

To honor its mission and to preserve its academic integrity as a liberal arts institution, the College accepts a course in transfer if that course meets the spirit of the College's mission and is from a regionally accredited institution.

All students must complete at Coe at least 40% of the total course credits required for each declared major or minor or three course credits, whichever is greater. Transfer students are not required to fulfill the requirements of the First-Year Experience, if they have completed at least one full-time college term since graduation from high school. All other general education requirements (Divisional Requirements, Diversity Across the Curriculum, Writing Emphasis courses, and Practicum) are in effect as described in the General Education Section of this Catalog but may be fulfilled with a transferred degree or coursework. Transfer students with an associate's degree (AA, AS, or AAS with articulation agreement) are exempt from all General Education requirements except for

the practicum experience. The Office of the Registrar will be responsible for verifying the associate's degree and for assessing how any transfer courses will be applied to the General Education requirements. (See Transcript Evaluation Policies, p. 50)

One course credit at Coe equals 4 semester hours or 6 quarter hours. Courses transferred to Coe for at least 0.75 course credit that meet the required learning outcomes (as approved by the Registrar and any relevant departments) can be applied towards graduation requirements. Transfer credits earned after high-school graduation and before Coe matriculation count towards the eight-term, full-time residence requirement (see p. 221). Full-time enrollment may include participation in Coe College exchange programs and other approved off-campus study programs.

Exceptions to the above requirements may be granted to students who are transferring to Coe from other institutions due to the closure of the institution or termination of a student's major field of study. In such circumstances, the Provost and Dean of Faculty may, in writing, grant a waiver for the student if transferring credit from an accredited institution that Coe considers to be of similar quality and nature to other institutions with which Coe previously sought or entered into formal teach-out agreements.

For more information on transfer coursework and transcript evaluation policies, see p. 50.

6.10 REVERSE TRANSFER CREDIT

Students transferring to Coe from community colleges before completing their associate's degrees may start classes at Coe and transfer credits back to their community college in order to complete their two-year degrees. This policy applies to A.A., A.S., and Coe-approved A.A.S. degrees and could be affected by the transfer policies of the community college from which the associate's degree will be earned. A student must have earned at least 48 semester hours (12 Coe credits) that count at their most recent community college in order to be eligible for reverse credit transfer. Transfer students opt into this reverse credit transfer process by (1) working with their prior-existing community college advisors and (2) indicating their intent to complete reverse transfer while filling out the admission application. It is the responsibility of the student to work with their community college advisor and communicate all pertinent information. By indicating their intent for reverse transfer, the student is granting permission for the Office of the Registrar to send their official transcript (at no cost to the student) from Coe to their previous community college for reverse credit transfer purposes.

Once enrolled at Coe, the student has one fall or spring term to complete their associate's degree, for which they may transfer up to 4 Coe credits, equivalent to 16 semester hours, back to their community college, pursuant to the community college's policies. The Office of the Registrar will send one official transcript at the end of the fall or spring term the student indicated for the anticipated completion of their associate's degree. Upon receiving a final official transcript from the community college indicating a conferred A.A., A.S., or approved A.A.S. degree, Coe will recalculate previously transferred coursework from the community college as a block credit (16 credits minus Coe coursework contributing to the reverse transfer, as that has already been counted in the student's course history), awarding all the benefits thereof, listed above under Transfer Student Information.

Reverse transfer does not reclassify First-Time First-Year students who took dual enrollment; that is, it does not make them transfer students after they've already started at Coe. As such, using reverse transfer to complete an associate's degree otherwise consisting of dual enrollment does not waive general education requirements, by the same principle that completing an associate's degree during high school does not waive said requirements, as a student who completes their associate's degree during high school is not thereby defined as a transfer student.

6.11 Second Baccalaureate Degree

A student who holds a baccalaureate degree from another institution may earn a second baccalaureate degree at Coe, if the following criteria are met: - The first degree must be from a nationally recognized institutional

accredited institution as recognized by the US Department of Education or another appropriate accrediting body. - The first degree must be completed (not in progress) before beginning the second degree at Coe.

Students accepted at Coe to pursue a second degree are granted a maximum of 24 course credits in transfer credit towards the 32 course credits required for graduation for the B.A., B.S.E. and B.S.N. Students pursuing an RC-B.A. are granted a maximum of 16 course credits in transfer credit toward the 24 course credits required for graduation. To graduate, at least eight course credits must be earned at Coe College and all requirements for any major area of study must be met with at least 40% of the major course credits taken at Coe. Students must earn a cumulative GPA of at least 2.0 as well as meet any GPA or grade requirements in their area of study.

Second baccalaureate students are exempt from all five general education requirements. They are not eligible to graduate with Latin Honors or for induction in Phi Beta Kappa or Phi Kappa Phi.

6.12 Academic Advising

The role of the academic advisor is to acquaint students with their academic options at Coe and assist them in selecting courses that reflect individual interests and abilities. Advisors also help students create a four-year education plan that allows students to make connections between disparate areas of study, and between academic and non-academic areas. Students may change advisors at any time upon request to the Registrar.

First-Year Seminar instructors serve as the primary academic advisors for first-year students in their respective sections. Students thus see their advisors frequently during their first term at Coe and have the opportunity to work closely with them in developing overall programs of study and long-range goals. After the first term, students may decide to choose departmental faculty for academic advising or they may continue to be advised by their First-Year Seminar instructors. Students are free to speak at any time with professors in their major departments to answer specific questions regarding requirements and courses in those departments.

6.13 The Academic Calendar

The academic year consists of four terms (see Academic Calendar, p. 10). Students normally take four course credits in the Fall Term and four course credits in the Spring Term. Thus, eight course credits are completed in an academic year. During May Experiential Term, students may enroll for up to one course credit in one of the limited selection of courses. During Summer Term, students may enroll in no more than one course credit per session.

6.14 MAY EXPERIENTIAL TERM (OPTIONAL)

Students may enroll for up to one course credit during May Experiential Term from a rotating but limited selection of courses offered. All May Experiential Term courses require consent of instructor prior to registration. These courses provide students the opportunity to make connections between knowledge gained in the classroom and experiences beyond it.

The May Experiential Term courses are expected to have the same amount of contact time and academic rigor per course credit as courses which meet over a Fall or Spring Term. For every 1 course credit of May Experiential Term, students are expected to complete 150 hours of work. Such contact time includes class meetings, lectures by the instructor, supervised course-related activities, and independent out-of-class activities. May Experiential Term courses fulfill the College's general education practicum requirement and provide certain educational benefits through site visits, guest lectures, etc., which also contribute to the contact time for the course.

6.15 SUMMER TERM (OPTIONAL)

While summer term has a number of offerings, it is limited in scope and is not considered a regular term. Summer Term courses are intensive in nature and require a substantial student commitment.

In addition to selected regular course offerings, summer term may include experiential opportunities and online courses that are not offered in the academic year. Summer Term courses taught online may be synchronous or asynchronous and are structured in a way that students receive the same academic content as courses offered face-to-face, with the same academic rigor, expected student learning outcomes, assessment of student learning activities, and opportunity for students to complete a course evaluation.

Residential students must complete at least one Fall or Spring term at Coe College before enrolling in a summer term offering. Students may enroll in any combination of summer courses as long as they do not exceed 4.9 credits during a single Summer Term. Not all courses offered in Fall and Spring term are offered in summer.

A residential student may complete no more than three course credits of Online Summer Term courses during their time at Coe College. For every one course credit of Online Summer Term, students are expected to complete 150 hours of work. Such contact time includes class meetings, lectures by the instructor, course related activities, and independent student work outside of class activities.

6.16 Crimson Fellows Program

Westberg (Program Director)

To graduate as a Crimson Fellow, a student must earn at least a 3.3 cumulative grade point average for all courses taken at Coe College and complete all of the following: 1. CFP-104 Topics in Crimson Fellows Program (0.2 cc) 2. CFP-205 Introduction to Engaged Scholarship (WE) 3. CFP-301 Communicating Across Disciplines I (WE) (0.5 cc) 4. CFP-302 Communicating Across Disciplines II (WE) (0.5 cc) 5. CFP-401/402 Action Research: A Project for the Local Good (0.5 cc)

Applications to the Crimson Fellows Program are accepted and reviewed on a rolling basis.

Completed applications are assessed on ACT/SAT score, the high school transcript, teacher recommendations, and the student essay. Although there are no minimum thresholds, the historical average ACT score has been over 27 with an average high school GPA above 3.70. Emphasis will be placed on the student essay.

CFP-104 Topics in Crimson Fellows Program

Reading and discussion of one or more classic texts from across intellectual disciplines. Students are expected to demonstrate mastery of the material and actively engage in class discussions. P/NP basis only. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: consent of instructor. (0.2 course credit)

CFP-145 Culture and Revolution

Designed to examine cultures that subsequently undergo revolutionary change. The first part is devoted to giving a sense of the culture that is destroyed by the revolution, and the second part to the forces that lead to the revolution. This course focuses on masterworks in history, political science, philosophy, and literature. Counts as a humanities divisional requirement.

CFP-155 Style and Transformation in the Arts

Focuses on periods during which the arts undergo a major transformation. The class studies both the artistic ideas that are being changed and the characteristic styles that result from these changes. The scope of this course may include literature, painting, music, and architecture. Counts as a humanities divisional requirement.

CFP-175 Continuity and Transition in Non-Western Societies

Focuses on the great traditions in non-western cultures. By selectively dealing with the major traditions present in such cultures, the class deals with the dynamics of continuity and transition, which are crucial to understanding non-western societies. Counts as a humanities divisional requirement.

CFP-184 Topics in Scientific Inquiry

Designed to lead students to an intimate understanding of how the scientific process works and how scientific thought develops. Historical readings and discussions develop students' understanding of the course topic sufficiently for them to focus on particular scientific questions. Experimental approaches to these questions are discussed and developed into research projects. Results are shared and integrated, providing group members with greater knowledge of the course topic and an acute awareness of the process and limitations of science. Counts as a non-lab science divisional requirement. This course does not satisfy any of the requirements for a major in biology.

CFP-205 Introduction to Engaged Scholarship (WE)

Establishes the foundation of the Fellows experience. Fellows write essays on a series of connected subjects designed to encourage critical thinking and reflection. The course includes discussions on education reform ideas, action research, student-driven education, the passion of life-long learning, global citizenship, community advocacy and civic engagement. Grounded in critical pedagogy, the course introduces students to the ideas of engaged scholarship. Students take command of their own education, developing their sense of agency, self-discipline, initiative, and self-direction. Prerequisite: admission to the Crimson Fellows Program or consent of instructor. (Offered Spring Term)

CFP-301 Communicating Across Disciplines I (WE)

Focuses on developing competencies in communication across multiple audiences and perspectives. Students engage content/material related to their understanding and development of a year-long research project. The central objective of the course is to enhance student collaboration and communication skills. Prerequisite: Introduction to Engaged Scholarship (CFP-100) or consent of instructor. (0.5 course credit)

CFP-302 Communicating Across Disciplines II (WE)

Students work in multi-disciplinary teams to address a topic of local and/or global social interest. Prerequisite: Communicating Across Disciplines I (CFP-301) or consent of instructor. (0.5 course credit)

CFP-401 Action Research I

Students work in multi-disciplinary teams to conduct a year-long project that addresses a specific challenge/issue for a local/regional community partner (e.g. sustainability, water quality, soil degradation, health care, partner violence, refugees, immigration, civil rights, etc.). Faculty provide specific content related to working with community groups/agencies at the onset of the course. Prerequisite: Communicating Across Disciplines II (CFP-302) or consent of instructor. (0.5 course credit)

CFP-402 Action Research II

Students work in multi-disciplinary teams to conduct a year-long project that addresses a specific challenge/issue for a local community partner (e.g. sustainability, water quality, soil degradation, health care, partner violence, refugees, immigration, civil rights, etc.). Prerequisite: Action Research I (CFP-401) or consent of instructor. (0.5 course credit)

6.17 Crimson Fellows Projects & Graduating with Distinction

To graduate with Distinction, at the time of graduation a student must have: 1. earned at least a 3.2 cumulative grade point average for all courses taken at Coe College, 2. earned at least a 3.5 GPA (or higher if set higher in the program in which you are pursuing distinction) in the courses taken toward the major or minor in which distinction is sought, 3. earned at least 14 course credits of graded courses at Coe College, 4. satisfactorily completed a Crimson Fellows project in a major or minor, 5. completed the "Graduating with Distinction Form" found on My.Coe and submitted it to the Office of the Registrar no later than March 15 of the Spring Term before graduation, 6. submitted a thesis or project artifact, approved by the majority of the student's Crimson Fellows Program examining committee, to the Director of Library Services no later than Reading Day of Spring Term.

6.18 Latin Honors

Summa cum laude, *magna cum laude*, and *cum laude* are awarded to graduating seniors who have completed at least 16 credits at Coe College. To receive *summa cum laude*, the student must have a minimum cumulative GPA of 3.90; *magna cum laude*, 3.75; *cum laude*, 3.50.

6.19 President's List

The highest recognition given to students who show exceptional academic performance during Fall and Spring Terms. The designation "President's List" is awarded a student if, at the end of a given grade reporting period, the student: 1) was enrolled as a full-time, degree-seeking student; 2) earned a GPA in the top 10% of students for the grading period, having in that term no incomplete marks, no repeat courses, no NP grades, and at least 3.0 course credits of letter-graded courses. Students who appear on the President's List will not appear on the Dean's List as priority is given to the higher honor.

6.20 Dean's List

Special recognition is given to students who show exceptional academic performance during Fall and Spring Terms. The designation "Dean's List" is awarded a student if, at the end of a given grade reporting period, the student: 1) was enrolled as a full-time, degree-seeking student; 2) earned at least a 3.75 GPA for the grading period, having in that term no incomplete marks, no repeat courses, no NP grades, and at least 3.0 course credits of letter-graded courses.

6.21 Cross-Registration with Mount Mercy University

This agreement: 1. Covers only courses that are not offered at Coe College in the same term unless a time conflict exists that cannot be resolved. 2. Is permitted on a space-available basis two weeks after the regular registration at Mount Mercy. 3. Holds students subject to administrative rules of the host institution for the courses taken. 4. Requires the student to register at both institutions. 5. Requires that a student be full-time and degree seeking in the term of the request and for at least one previous term at Coe College.

Coe students wishing to enroll at Mount Mercy University may not be on academic probation (see p. 47) and may not have been dismissed from Coe College. Students may only cross register for one course in a term at Mount Mercy. Prior to registering, students must submit a cross-registration request form to the Registrar, who grants approval to students wishing to register at Mount Mercy University. If the course is to be counted toward a major or minor, the approval of the appropriate Coe department chair is also required. Declarations of Pass/Not Pass options are made at Coe according to Coe policies. Both course credit and the letter grade given at Mount Mercy are recorded in the student's permanent record, as well as the fact that the course was taught at Mount Mercy. Under the agreement no additional fees are charged for cross registration, although the sum of the credits registered

at both institutions are used to determine full-time status and/or the need to petition to take 5.0 course credits or more.

A cross-registered student missing a class at a cooperating college because of calendar differences shall not be penalized for missing the class. The student, however, is responsible for making up any work missed in the class.

Before registering for a course at Mount Mercy under this agreement, a student must complete the Mount Mercy–Coe College Cross Registration Form to be processed to ensure that all stipulations of the agreement are met.

6.22 Rize Education Online Courses

Coe College offers online courses and programs through participation in a consortium of other Title IV accredited institutions that is enabled and supported by Rize Education. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Rize courses are formally adopted by Coe College and taught by a partner institution within the consortium. All courses are instructor-led in an online, asynchronous format. Scheduled time is available weekly with instructors, as are office hours by appointment, providing both flexibility to students and the ability to engage live. Courses are available to students as part of their program of study, or as electives (if applicable) as part of a residential student's full tuition. Students are responsible for required books, when applicable. Oversight of courses offered through the consortium are reviewed and approved by Coe College and its accreditor. Students register through Coe College and receive academic credit from Coe College. If you have questions about these programs, please contact the Office of the Registrar.

6.23 English as a Second Language Programs

Drexler (Director)

English as a Second Language (ESL) programs at Coe College are designed to support nonnative English-speaking students assimilate into the College and local community through English language instruction.

Coe College offers the following programs: - English Academic Bridge (ELAB) program. The ELAB program accepts students whose TOEFL score falls below the Admissions requirement of 68 iBT/520 IPT. To be accepted into the ELAB program students must have a minimum TOEFL score of 55 iBT/480 IPT. ELAB students are admitted as undergraduates with the following course requirements in their first term at the College: two ESL courses, First-Year Seminar, and another course of their choice of another Coe-credit course. After their first term, ELAB students work with the program director to create a language support plan. - Short English Language program (SELP). SELP accepts study abroad students for five to seven weeks during the Spring Term. SELP students enroll in 18 hours of English language course per week, live on campus, and participate in campus and community activities.

In addition to these programs, Coe students who are not enrolled in an ESL program may register for ESL courses and work with ESL faculty on a one-on-one basis to support their language needs.

ESL-180 Topics in Listening

Develops academic listening and note-taking skills with a focus on micro listening such as listening for numbers, word stress, thought groups, and accent differences as well as macro listening like listening for headings, transition words and phrases, and distinguishing main ideas from details. May be taken more than once with consent of the program director provided the topics are substantially different. Prerequisite: enrolled in ELAB or undergraduate program with appropriate TOEFL score or consent of instructor.

ESL-185 Topics in Speaking

Develops speaking fluency through vocabulary building by using language in authentic contexts and practicing pronunciation by studying language prosody (intonation and rhythm) and morphemes (minimal parts of language). May be taken more than once with consent of the program director provided the topics are substantially different. Prerequisite: enrolled in ELAB or undergraduate program with appropriate TOEFL score or consent of instructor.

ESL-190 Topics in Structure

Develops grammar with the goal of using accurate grammar in presentations and written work. Students study various grammar points, practice grammar interactively, and integrate learned grammar into presentations and written work on a wide spectrum of topics. May be taken more than once with consent of the program director provided the topics are substantially different. Prerequisite: enrolled in ELAB or undergraduate program with appropriate TOEFL score or consent of instructor.

ESL-195 Reading Writing Workshop (WE)

Strengthens critical reading, academic writing, and reasoning skills by engaging with a variety of texts. Students identify, challenge, and write arguments by practicing summary, analysis, paraphrase, and response to published work as well as work of their peers. May be taken more than once with consent of the program director provided the topics are substantially different. Prerequisite: enrolled in ELAB or undergraduate program with appropriate TOEFL score or consent of instructor.

ESL-210 Seminar in Culture

Develops language skills and explores American culture through texts, art, film, and community engagement. May be taken more than once with consent of the program director provided the topics are substantially different. Prerequisite: enrolled in ELAB or undergraduate program with appropriate TOEFL score or consent of instructor.

6.24 Pre-Professional Programs

6.24.1 PRE-LAW

J. Christensen (Program Director)

The cooperative 3+3 program allows qualified undergraduates from Coe College to earn both a bachelor's degree and a law degree in six years through partnership with the University of Iowa College of Law ("Iowa Law"), Drake University Law School ("Drake Law"), or the Northern Illinois University College of Law ("NIU Law").

If eligible, students admitted under the 3+3 program will receive three years of financial aid and pay Coe College tuition for the first three years. Qualified undergraduates from Coe must have satisfied all graduation requirements with the exception of the 32-course credit requirement by the conclusion of their junior year at Coe for admission into Iowa Law, Drake Law, or NIU Law. Students are not eligible for campus housing or extracurricular activities at Coe during their fourth year. During the fourth year of the program, which is the first year of law school, students will pay tuition only to Iowa Law, Drake Law, or NIU Law and apply for financial aid through the University of Iowa, Drake University, or Northern Illinois University. Credits earned during the first year of law school, which would have been their senior year at Coe, will also apply to their undergraduate degree to complete the final credit requirements at Coe. At the end of their fourth year of study, students in the program will receive their bachelor's degree from Coe College, while also having a year of law school completed at the University of Iowa College of Law, Drake University Law School, or Northern Illinois University College of Law.

There is no prescribed curriculum for students intending to enter law school after graduation. Law schools report that their most successful students are those who have acquired a broad academic background in the liberal arts, developed a capacity for logical analysis, and mastered the ability to write clearly.

Study in one or several of a variety of disciplines will prepare students to undertake legal training. Students interested in law should consult their department advisor and the pre-law program director.

6.24.2 HEALTH PROFESSIONS

Storer (Program Director)

Coe's program for those interested in the health professions, such as medicine and dentistry, is a flexible one based on the requirements of the health professions' schools. Students interested in a health profession usually major in one of the sciences, but all majors offered by the College are acceptable.

6.24.3 Clinical Laboratory Sciences/Medical Technology

In cooperation with the St. Luke's Methodist Medical Laboratories in Cedar Rapids, or upon arrangement with other accredited laboratories and the approval of the College, Coe offers a four-year course leading to a Bachelor of Arts degree and registration as a Clinical Laboratory Scientist/Medical Technologist.

The first three years are spent in residence at Coe, where candidates must complete all of the requirements for the B.A. degree, including General Education requirements and an approved major. The minimum requirements of the Clinical Laboratory Sciences/Medical Technology program in biology and chemistry are five course credits in each field and at least one course in mathematics. The fourth year is a full calendar year spent at St. Luke's or another accredited medical laboratory approved by Coe.

The St. Luke's Hospital Medical Laboratory is approved as a school of clinical laboratory sciences/medical technology by the Committee on Allied Health Education and Accreditation of the American Medical Association. Candidates completing the course are eligible to take the certification examinations of the American Society of Clinical Pathologists and the National Certification Agency and, if approved, may practice anywhere in the United States.

6.24.4 Professional School Degree Completion Plan

Students who complete three years of course work at Coe (24 course credits), including General Education and area of study requirements, and who enter a college of architecture, engineering, or a physical therapy program, can receive a baccalaureate degree from Coe. Required for satisfactory completion of this program are (1) approval of the program by the Provost and Dean of the Faculty before transferring to the professional institution and (2) one year of full-time acceptable study there.

6.24.5 Cooperative Degree Program with the University of Iowa's College of Public Health

This combined undergraduate and graduate 5-year program allows students to earn a Bachelor of Arts degree from Coe College and a Master of Public Health (MPH) degree from the University of Iowa. This program is available to students electing any undergraduate major offered by Coe. The first four years in the program are spent in residence at Coe College. Interested students take one University of Iowa undergraduate course in the spring of their second year (Fundamentals of Public Health). In their third year, students take the GRE and apply to the Master's program in Public Health. If accepted, the student completes up to four graduate-level MPH courses during the fourth year at Coe College (*Introduction to Biostatistics, Introduction to Health Promotion and Disease Prevention, Global Environmental Health, and/or Epidemiology*). UI Public Health courses are accepted in transfer to Coe College as elective credit.

6.25 Off-Campus Study

The College endorses a wide variety of off-campus experiences for students and believes that students can benefit from study in Washington, New York, and the Wilderness Field Station, as well as in programs around the world. Students maintain their eligibility for federal and state financial aid; however, Coe financial aid availability is subject to approval by the Committee on Internationalization.

Numerous domestic and international study programs are available to Coe students. The four programs sponsored by Coe College are Asia Term, New York Term, Washington Term and Wilderness Field Station courses. In addition, Coe participates in several exchange programs in America and abroad. Students who wish to study off-campus on Coe's sponsored programs must apply to the individual program's director. Student proposals to study on exchange programs must be submitted to the Director of Off-Campus Studies at least six weeks before the end of the term just prior to the off-campus experience. Student proposals to study on all other off-campus programs must be submitted to the Director of Off-Campus Studies by the last day of classes of Fall Term of the academic year prior to the program.

Credits earned on off-campus programs are applied toward graduation on the same basis as credits earned on campus. Any academic credit earned from programs not sponsored by Coe may be transferred back to the College in accordance with the College's general policy on transfer credit. Application is open to sophomores, juniors, and seniors who have a minimum 2.25 GPA at both the time of application and of enrollment for the off-campus study.

NOTE: *International students may not receive Coe College financial aid for off-campus study outside the U.S.*

6.25.1 DOMESTIC PROGRAMS

6.25.1.1 New York Term

Carson (Program Director)

The New York Term is open to all students who meet the basic requirements for off-campus study. Offered in odd-numbered years in the Spring Term, this program provides abundant opportunity for experiences in the performing and visual arts, as well as internship opportunities for students from any major.

The central course, Fine Arts in New York City (NYT-250), which includes attendance at concerts, theatre, and dance productions as well as tours to art exhibits and film screenings, consists of five components: art, music, theatre, dance, and film. Five resident New York Term faculty members, specialists in each of the subject areas, curate the events and teach their portion of the course. An internship (or other project approved in advance by the College) completes the program.

There is an extra fee for New York Term. All Coe financial aid applies, and students are eligible to apply for additional financial aid based on the additional costs of the term.

(See p. 56 for descriptions and course offerings.)

6.25.1.2 Washington Term

McNabb (Program Director)

The Washington Term is open to all students who meet the basic requirements for off-campus study. Students accepted for Washington Term spend Fall or Spring Term in the nation's capital. Washington provides an unusual opportunity to study national politics and government and to enjoy a variety of cultural activities in the fine arts.
(See p. 57 for descriptions and course offerings.)

6.25.1.3 Wilderness Field Station

Ellis (Program Director)

The Coe College Wilderness Field Station, located on remote Low Lake in Minnesota's Superior National Forest, offers students a unique and unparalleled opportunity for off-campus study. Courses take advantage of the serene surroundings for field observation, wilderness study, and outdoor learning. Biology courses are at the heart of the field station and often include aquatic biology, animal behavior, ornithology, and behavioral ecology of vertebrates. Students use the base camp's laboratories, herbarium, and library to supplement their field work. Non-science electives, such as nature writing and wilderness and the law, are also offered. There is an independent study option as well. Participants take one course during a four-week session.

The program runs from mid-June to mid-July, mid-July to mid-August, or both. Each course is limited to eight students. Each course offered at the field station is one course credit. Particular courses satisfy General Education requirements and can be used as major elective credits. Any course taken at the field station satisfies the College's practicum requirement. The regular application deadline is March 1; the final deadline is April 15, with rolling applications after that date. For more information and application materials, visit [The Field Station Webpage] (www.coe.edu/academics/coe-difference-centers-and-programs/off-campus-study/wilderness-field-station).

6.25.2 INTERNATIONAL PROGRAMS

6.25.2.1 Asia Term

Nordmann and Carstens (Program Co-Directors)

The Asia Term is open to all students who meet the basic requirements for off-campus study. Usually offered in the Spring Term, this program provides students an opportunity to experience a variety of Asian cultures in such countries as Thailand, Vietnam, and Cambodia. At each site, students study language, read works in English about the culture, engage in service learning, and work with students at the host universities to gain a functional understanding of how each culture works. Students are accompanied to Asia by Coe faculty members.

Students take four credits of course work, typically one credit of Asian Tonal Languages, one credit of Asian studies, and two credits of independent study. In some iterations of the program, students take an elective course in art, English, history, sociology, education, or another discipline, depending on the field of the instructor leading the program, and one credit of independent study. (See p. 54 for descriptions and course offerings.)

6.25.2.2 Exchange Programs

Coe College sponsors a number of programs with cooperating foreign universities, offering Coe sophomores, juniors and seniors each year the opportunity to study in a foreign setting. Coe College accepts in return junior-level students from the foreign institution. Applications of the recommended students are sent to the host institution, with the host reserving the right to admit or reject each student nominated.

Any student who applies for one of these programs must have completed at least one year of continuous study at their home institution. Students may apply to any appropriate academic program offered at the host institution as full-time, non-degree seeking, or unclassified students. Any academic credit earned at the host institution is transferred back to the home institution in accordance with the rules of that institution. The length of stay may not exceed one academic year. Upon completion of the time period specified at the host institution, the participating students must return to their home institution. Any extension of stay must be approved by both cooperating institutions. The exchange student must abide by all rules and regulations of the host institution.

An exchange student must register and pay tuition and required fees at his or her home institution. In return, the student receives a tuition waiver at the host institution. The host institution helps arrange the necessary visa documents and also provides appropriate advising and other assistance to the incoming students from Coe College. Please see individual program descriptions for information regarding mechanisms for paying costs of living. The host institution assists in finding housing on the foreign university campus; Coe College assists in finding residence housing for students from the foreign university. At the end of the school year, the host institution submits to the home institution official transcripts of grades and credits earned. Grades from exchange programs transfer to Coe as P/NP.

Beyond tuition and fees, the participating student is responsible for the following expenses: meal expenses; transportation to and from the host institution; medical insurance and/or medical expenses; textbooks, clothing, and personal expenses; passport and visa costs; and all other debts incurred during the course of the year.

OCC-003 — COE/PALACKY UNIVERSITY (CZECHIA) Kuennen (Program Director)

Students choose from courses in English in many areas, including History, Religion, Philosophy, Psychology, and Art History. Students pay costs of living at the destination. Credits earned on the Czech exchange program are evaluated on a P/NP basis.

OCC-004 — COE/UNIVERSITY OF MODENA AND REGGIO EMILIA (ITALY) Affatigato (Program Director)

Courses in English only in electrical engineering. Students pay costs of living at the destination. Credits earned on the Italy exchange program are evaluated on a P/NP basis.

OCC-006 — COE/AMERICAN UNIVERSITY OF SHARJAH (UNITED ARAB EMIRATES) Buckaloo (Program Director)

Students choose from courses in English in Business, International Studies, Communications, Political Science, Business, and Middle Eastern Studies at this US-accredited institution. Students pay costs of living at the destination. Credits earned on the UAE exchange program are evaluated on a P/NP basis.

OCC-007 — COE/PECS UNIVERSITY (HUNGARY) McNabb (Program Director)

Students take courses in English in the natural sciences or Psychology. Students pay costs of living at the destination. Credits earned on the Hungary exchange program are evaluated on a P/NP basis.

OCC-205 — COE/KONGJU NATIONAL UNIVERSITY (SOUTH KOREA) Nordmann (Program Director)

Course offerings in Business, Economics, and Asian studies. Summer short courses may be available. Students pay costs of living at the destination. Credits earned from the Kongju exchange program are evaluated on a P/NP basis.

OCC-210 — COE/CHIANG MAI UNIVERSITY (THAILAND) Chaimov (Program Director)

Coe students usually pursue an independent research project based on prior study in Thailand, as CMU offers no courses in English. Students pay costs of living at the destination. Credits earned from the Chiang Mai exchange program are evaluated on a P/NP basis.

OCC-213 — COE/RANGSIT UNIVERSITY (THAILAND) Chaimov (Program Director)

Rangsit University offers English language bachelor's degree programs in communications, international business, and international political economy. Students pay costs of living at the destination. Credits earned from the Rangsit University exchange program are evaluated on a P/NP basis.

OCC-215 — COE/MID SWEDEN UNIVERSITY (SWEDEN) Carstens (Program Director)

Courses in English are available in such areas as business, social sciences, and environmental studies. Students pay costs of living at the destination. Credits earned from the Mid Sweden exchange program are evaluated on a P/NP basis.

OCC-220 — COE/NAGOYA-GAKUIN UNIVERSITY (JAPAN) Nordmann (Program Director)

One year of Japanese language study is recommended for students applying for this program. Exchange students from Coe pay room expenses at Coe College. In return, students receive a room expense waiver. Other costs of living are paid at Nagoya-Gakuin University. Credits earned from the Nagoya-Gakuin exchange program are evaluated on a P/NP basis.

OCC-225 — COE/NORTHERN IRELAND SCHOLARS PROGRAM (NORTHERN IRELAND, UK) Farrell (Program Director)

Students with a high GPA may be selected to study at one of several universities in Northern Ireland, including Queens University Belfast and the University of Ulster. Applications for this consortial exchange are due in December of the year before study. Students pay costs of living at the destination. Credits earned from the Northern Ireland exchange program are evaluated on a P/NP basis.

OCC-230 — COE/UNIVERSITY OF JAUME I (CASTELLO, SPAIN) Rodríguez Moreno (Program Director)

Courses in Spanish in a wide range of topics. Students pay costs of living at the destination. UJI requires Coe students to have completed two Spanish courses at Coe. Spanish language courses are available at additional cost. Credits earned from the Jaume I exchange program are evaluated on a P/NP basis.

OCC-235 — COE/SOOKMYUNG UNIVERSITY (SOUTH KOREA) Nordmann (Program Director)

Courses offered in English on areas including the arts, linguistics, international studies, business, biology, and political science. Students pay costs of living at the destination.
Credits earned from the Sookmyung exchange program are evaluated on a P/NP basis.

OCC-240 — COE/UNIVERSITY OF LANDAU (GERMANY) Chaimov (Program Director)

Courses in English are available in art, English literature, linguistics, and other topics. Also, a wide range of subject areas taught in German. Students pay costs of living at the destination. Credits earned from the Landau exchange program are evaluated on a P/NP basis.

OCC-250 — COE/IZMIR INSTITUTE OF TECHNOLOGY (TURKEY) Akgun (Program Director)

Coe may send a student of Chemistry and a student of Physics to study those subjects in an English-language setting at a science university in Turkey. Students are responsible for housing, food, and all other costs of living. Credits earned on the Izmir exchange program are evaluated on a P/NP basis.

OCC-255 — COE/POLYTECHNIC UNIVERSITY OF UPPER FRANCE (FRANCE) Janca (Program Director)

Students choose from courses in English on business, communications, and marketing or a wide range of courses in French. Students pay costs of living at the destination. Credits earned from the France exchange program are evaluated on a P/NP basis.

OCC-260 — COE/NATIONAL UNIVERSITY OF VILLA MARIA (ARGENTINA) Rodríguez Moreno (Program Director)

Students with a good command of Spanish can take courses in Spanish in a wide range of areas, including literature, rural development, social sciences, environmental studies, communication, and computer science. Students pay cost of living to Coe before departure and must transfer at the same time as an incoming student from UNVM. Credits earned on the Argentina exchange program are evaluated on a P/NP basis.

OCC-265 — COE/ALTINBAS UNIVERSITY (TURKEY) Duru (Program Director)

Teaches entire majors in English in psychology, sociology, international relations, political science, economics, business. Students pay costs of living at the destination. Credits earned from the Altinbas exchange program are evaluated on a P/NP basis.

OCC-270 — COE/ASHESI UNIVERSITY (GHANA) Eichhorn (Program Director)

Courses in African studies (sociology, anthropology, political science, history, arts), computer science, business. Coe students pay room and board expenses at Coe College and receive a waiver of these expenses in Ghana. They must exchange at the same time as an Ashesi student. Credits earned on the Ashesi exchange program are evaluated on a P/NP basis.

OCC-275 — COE/UNIVERSITY OF SALFORD (ENGLAND) Kuennen (Program Director)

The University of Salford offers courses in business, contemporary European history, psychology, and many other areas. Students pay costs of living at the destination and must arrange their own housing. Credits earned from the Salford exchange program are evaluated on a P/NP basis.

OCC-285 — COE/UNIVERSITY OF NEUCHATEL (SWITZERLAND) Janca (Program Director)

Coe students take courses at the Institute of French Language and Civilization. Students pay costs of living at the destination. Credits earned from the Neuchatel exchange program are evaluated on a P/NP basis.

OCC-290 — COE/JINAN UNIVERSITY (CHINA) Nordmann (Program Director)

Located in southern China, this international university offers courses in English in international economics and business, journalism, computer science, and Chinese studies as well as the study of Chinese language. Students pay costs of living at the destination. Credits earned from the Jinan exchange program are evaluated on a P/NP basis.

OCC-291 — COE/ISTANBUL KULTUR UNIVERSITY (TURKEY) Duru (Program Director)

Offers English curriculum in psychology, business, economics, international relations, and other areas. Students pay costs of living at the destination. Credits earned from the Istanbul Kultur University exchange program are evaluated on a P/NP basis.

OCC-292 — COE/UNICOLLEGE (ITALY) Keenan (Program Director) Offers courses in English in arts management, business, criminology, English, and international studies. Students pay costs of living at the destination. Credits earned from the Unicollege Exchange are evaluated on a P/NP basis.

7 CAMPUS RESOURCES

7.1 Libraries

The college library—Stewart Memorial Library, located at the center of the campus, contains over 200,000 volumes and 10,000 pieces of media. Current subscriptions to some 9,000 periodicals and serials are maintained in print or electronic format, and over 500,000 electronic resources with books and journal volumes added annually.

Media services to the campus are provided through the Media Technologies Department in the library. These services include a circulating collection of over 10,000 DVDs, a media-equipped auditorium styled classroom, and an innovation studio that houses a 3D printer and laser cutter.

The main library houses the Learning Commons (see description below) and the college archives. The library provides an outstanding research collection consisting of both print and electronic books, journals, and reference resources. The Reference Services Team assists students with their research needs through one-on-one research assistance, evaluating resources and websites, citation assistance and multimedia evaluation. In addition to library orientations, research classes are offered on specific course related topics. The library offers computer stations and study areas for individual and group study, including technology enhanced study rooms. These resources are greatly augmented by providing access to over 90 scholarly databases and an extensive webpage: coe.edu/library.

The George T. Henry College Archives includes a research room and a climate-controlled vault located on the lower level of the Stewart Memorial Library. It houses and preserves the institutional records of Coe College and the papers of staff, students, and alumni of the college. Archive staff is available to aid students, faculty, and scholars in navigation and use of more than 900 linear feet of primary source documents. The Archives maintains the papers of journalist, author, and World War II broadcaster William L. Shirer, Coe class of 1925 author of *The Rise and Fall of the Third Reich*; the literary works and selected private papers of Iowa poet Paul Engle, Coe class of 1931; and the photographs of longtime Coe College photographer George T. Henry.

7.2 Office of Student Success & Persistence

The Office of Student Success & Persistence (OSSP) provides oversight on retention efforts for all Coe students, with the goal of eliminating barriers and helping students persist to graduation. OSSP prioritizes efforts focused on the first-year transition to help new students acclimate to the college. Success Coaches provide proactive outreach to ensure that students are aware of important information, find community and a sense of belonging, as well as provide connections to resources on campus and in the Cedar Rapids community. The staff in the Office of Student Success and Persistence are available to help first-year students navigate Coe and connect with the people, tools, and resources needed to be successful.

7.3 Learning Commons

The Coe Learning Commons in the Stewart Memorial Library integrates all of the College's academic support resources in a single location at the heart of campus delivered through peer education and by professional staff. Services and resources include academic coaching, supplemental advising, Writing Center, TRIO Student Support Services, tutoring, accessibility support and accommodations, academic technology, Office of Off-Campus Study, and fellowship and graduate school advising.

7.4 Art Collections

Selections from the College's Permanent Collection of Art totaling over 800 works by 200 artists are displayed in and near many of the campus buildings. Most visible are the large outdoor sculptures on the campus, yet almost every building features selections from the Permanent Collection. For example, the Ella Poe Burling collection of nineteenth-century American and French art and antiques is exhibited in the upper lobby of Voorhees Hall.

A large portion of the Permanent Collection can be found in Stewart Memorial Library. Four special galleries contain works by renowned American painters Grant Wood, Marvin Cone (Coe class of 1914), and Conger Metcalf (Coe class of 1936). Six large farm murals by Grant Wood constitute the heart of the Permanent Collection's Regionalist works. These murals are supplemented by nine smaller yet significant works by Wood, including Daughters of Revolution, a charcoal, pastel, and pencil on paper drawing of Wood's painting of the same name.

Another signature feature of the Regionalist collection is the work of Marvin Cone. A 1914 Coe graduate, Cone later became a faculty member who founded the College's Art Department. Cone personally selected many of the paintings and drawings in the collection as representative of his own artistic development, underscoring the historic role of art as a core element in Coe's teaching mission.

In addition to the works by native Iowans Cone and Wood, Coe College has acquired a distinguished collection of 70 works by Conger Metcalf, an American modernist painter, as well as paintings, drawings, and prints by notable artists such as Milton Avery, Mauricio Lasansky, Henri Matisse, Pablo Picasso, and Andy Warhol.

More information about the Permanent Collection can be found on either the Permanent Collection's website, http://picovado.com/jrogers/#-h2-introduction-h2-, or the library's webpage, www.coe.edu/academics/stewart-memorial-library.

7.5 Information Technology

The Information Technology Office provides a wide range of technology support to students, faculty and staff. This includes management of computer labs, classroom technology, college-wide software licensing, wi-fi/internet, printers, sound equipment, My Coe (my.coe.edu) and more. Coe's technology facilities include over 3,000 ethernet ports, full ethernet and wi-fi internet services within all campus buildings, 200 public/lab computers available for student use and full access to Google Workplace services. The Office of Information Technology is located in Voorhees Hall. Assistance from the IT staff can be requested through a Help Desk ticket (link found on my.coe.edu).

7.6 Public Events and Artists-in-Residence

Guest lecturers and artists provide an essential dynamism to the educational climate at Coe. Programs are free to Coe students. In addition to hearing speakers of national and international note, students may have the opportunity to talk with them during a carry tray lunch, to attend special issues dinners with the speakers, or to have them as guests in a class. Performing groups appearing as artists-in-residence often stay two or three days on campus to work with students.

7.6.1 Marquis Lecture & Performance Series

The Marquis Lecture & Performance Series hosts performances and presentations throughout the academic year. The Marquis Series is endowed by a gift from Sarah Marquis, Coe class of 1918, in honor of her father, John A. Marquis, who was president of Coe from 1909 to 1919.

7.6.2 Coe College Contemporary Issues Forum

The Coe College Contemporary Issues Forum brings to audiences of the College community the presence and views of distinguished professionals whose work has received national recognition. The forum is normally presented during the month of February.

7.6.3 Phi Beta Kappa Visiting Scholar

When possible, the Coe chapter of Phi Beta Kappa sponsors a Phi Beta Kappa Visiting Scholar who, in addition to presenting a public lecture, meets with individual classes as appropriate to the scholar's area of expertise.

8 STUDENT LIFE

Student Life provides personalized support to students, enabling each to gain the best possible undergraduate education adding substantially to the educational program. Residence accommodations, along with living and learning values, an attractive campus social life, a sound health program, good recreational facilities, and a program of co-curricular activities are among the opportunities offered Student Life.

8.1 Campus Civility Statement

This statement was written by students in order to address standards of civility and respect within the Coe College community. This statement is a living document and is intended to evolve over time.

We, the members of the Coe College community, expect our campus climate to be safe, mutually supportive, academically encouraging, egalitarian, and tolerant of all its members:

we expect the academic experience to extend beyond the classroom into our living environment.

we expect a campus free of incidents that create a hostile living environment.

we expect a healthy and responsible attitude to accompany all social gatherings.

we expect that intoxication will not be an excuse for incidents that occur while under the influence.

we expect that diversity of opinion should be cultivated and encouraged as well as respected within our community.

we expect that everyone will have the right to be respected for his or her individuality.

we expect all campus community members to respect the rights of other persons regardless of their actual or perceived age, color, creed, disability, gender identity, national origin, race, religion, sex, or sexual orientation.

A community is made up of individuals who model these standards and hold each other accountable. In order for the community to encompass the goals outlined above, each individual must be responsible and accountable for her or his own actions and words.

8.2 Student Contribution to College Policy

Coe is proud of its traditions and its ability to change. While cognizant of the past, the College is also sensitive to the changing nature and needs of students. Coe students play an integral part in the initiation of change by utilizing available channels and by the creative development and use of new ones. The Student Senate is a frequent forum for the resolution of student concerns.

8.3 Student Senate

Student Senate is the representative government of Coe students and coordinates many co-curricular activities. Through the student activity fee, the Senate funds the weekly newspaper, the Cosmos, and other student publications. The Student Activities Committee (SAC) of the Student Senate sponsors bands, comedians, multicultural programming, and other kinds of entertainment and activities.

8.4 Student Handbook

The *College Policies and Student Handbook* outlines the College's expectations for responsible behavior reflecting maturity, mutual respect, and cooperation among all members of the Coe community. Student Life develops policies for conduct procedures, residence hall living, student organizations, and other areas of student affairs for approval by the Board of Trustees. The *College Policies and Student Handbook* is available online at https://www.coe.edu/student-life/community-standards-expectations/student-handbook

8.5 Committee Participation

Students serve on various committees, which aid in making educational policy at the college. Most committees (Academic Policies, Assessment, Athletics, Belonging, Campus Technology, Enrollment, Financial Aid and Academic Progress, Executive, Finance and Facilities, First-Year Program, Internationalization, Marquis Series, Petitions, Wellness, and Writing) include students appointed by the Student Senate as voting members.

9 STUDENT SERVICES

9.1 Residence Life

Coe is a residential college, in that the residence experience is an integral part of the educational process. Students are expected to live on campus for four years and take meals in the College hall (see *On-Campus and Off-Campus Resident Students*, p. 221). The residence halls and apartments vary in style, size, and personality. All of the residential facilities have generous visitation policies, and campus life functions around the concept of the living units.

Residence hall and apartment regulations are published in the *Student Reference Book*. As room charges do not include Winter Break or Summer Break, when residential facilities and the dining hall are closed, an additional fee is assessed to students staying on campus during those times. Information regarding housing is sent to students who have accepted admission to the College.

9.2 Health and Wellness Office

At Coe, we believe that a strong foundation of health and well-being is essential to academic success and personal growth. The Health and Wellness Office is your on-campus resource for comprehensive, student-centered care designed to support your physical, mental, and emotional health throughout your college journey.

Our office brings together three key areas of support:

- Health Clinic: Staffed by qualified medical professionals, the clinic provides routine medical care, preventive services, treatment for minor illnesses and injuries, and support for managing chronic conditions. We are here to help you stay healthy so you can thrive academically and personally.
- Mental Health and Counseling Services: Our licensed counselors offer short-term, confidential mental health support to help students navigate personal challenges, stress, and emotional concerns. We also offer crisis intervention, group counseling, and workshops. For students needing ongoing or specialized care, we provide referrals to trusted off-campus providers.
- Wellbeing Promotion: We take a proactive approach to student wellness by offering programs, events, and resources that encourage healthy lifestyles, stress management, and self-care. From wellness workshops to peer-led initiatives, our goal is to empower students with the tools and knowledge to maintain their well-being.

Whether you're feeling under the weather, need someone to talk to, or want to build habits for a healthier life, the Health and Wellness Office is here for you. We are committed to providing inclusive, compassionate care that meets the unique needs of our campus community.

9.3 Religious Life

Coe College believes that it is important to foster an environment that accepts and respects the religious faith and beliefs of all its students, staff, and faculty. The Coe community is diverse in its religious makeup, and all members of the community are encouraged to express and practice their particular religious traditions. To this end, the College Chaplain seeks to provide and create an atmosphere that is rooted in the Presbyterian heritage and values of the College, as well as reaching out to the various spiritual, religious and faith groups on campus.

Opportunities for worship, interfaith dialogue, Bible study, retreats, small groups, theological study, outreach, mission, meditation, and fellowship are offered throughout the academic year. There are also several active religious student organizations on campus and a specialized leadership program for students who would like to assist the Chaplain in the programming throughout the year. The Chaplain is available for pastoral care, prayer, theological dialogue, marriage counseling, and other spiritual needs.

9.4 Student Development & Support

The Office of Student Development & Support is comprised of the Dean of Students, Coordinator of Student Development & Support, and the College Chaplain. This team works closely with students with the goal of fostering an environment where all Kohawks will thrive in an inclusive learning environment. Students interested in getting involved with Coe's development and support efforts are encouraged to stop by the Student Life Office in Upper Gage to speak with a team member.

9.5 Campus Activities

There is much to do on the Coe campus and in the Cedar Rapids community. Programming of campus activities is designed to meet the educational and recreational needs of the Coe community in a creative way. The needs of the student body is considered in the scheduling of recitals, plays, exhibits, lectures, films, and concerts, as well as all school events and relaxing evenings in Charlie's PUB. The Director of Campus Life coordinates the events organized by the Student Activities Committee (SAC).

9.6 Student Activity Groups

Students earn credit for their participation in Coe's music ensembles (the Jazz and Concert Bands, the Symphony Orchestra, the Concert Choir, and the Crimson Singers), several of which have completed study/concert tours of Europe, Great Britain, and Asia in the past. Coe drama and forensics activities have received local and national recognition for their presentations. Special interest organizations are also represented on campus, as are national social fraternities and sororities and honor societies (Phi Beta Kappa, Phi Kappa Phi, Mortar Board, Alpha Lambda Delta, and Alpha Sigma Lambda).

9.7 Athletics

Gage Memorial Union is the center of student interest and activity. Offices of the Student Activities Committee and other student organizations are there, plus the College dining hall, and mailroom. Informal programs and lectures are given there, and it serves as the College's "open house" for students, faculty, and visitors. "Charlie's" P.U.B. is home to a coffee shop (serving Starbucks coffee), and a convenience store. Charlie's is a relaxing place to meet friends, study, or take in one of the many performances.

The brand-new Coe College Athletics and Recreation Center includes two pristine courts for basketball and volleyball, a wrestling room that boasts three oversized mats, strength and conditioning room with brand-new equipment, and a fitness center that overlooks the campus. This is where Coe's basketball, volleyball, and wrestling teams host their home events.

Moray Eby Fieldhouse includes three recently renovated courts for basketball and volleyball. Eby also has a natatorium, athletic training rooms, indoor baseball/softball batting cages, and a rock-climbing wall. All outside playing fields and tennis courts are also available to Coe students.

The Clark Racquet Center offers a state-of-the-art facility for runners, racquet enthusiasts, and everyone wanting to stay in shape. An aerobic room, dance studio, and classrooms complement the indoor track, tennis courts, and racquetball and squash courts. Professional staff manage the Center and offer instruction to students.

10 COLLEGE REGULATIONS AND POLICIES

10.1 Effective Catalog

Students ordinarily are graduated under the provisions of the catalog of their matriculation date. A student's matriculation date is the day of first enrollment following admission. If the student is readmitted, the matriculation date becomes the day of first enrollment following readmission. However, students will be expected to satisfy, to the extent practical, the graduation requirements of the catalog in effect at the anticipated date of graduation. Any necessary modification of general degree requirements will be worked out by the Provost and Dean of the Faculty, the Registrar, the appropriate department chair, and the Academic Policies Committee. Modification of major or minor requirements will be worked out by the department chair involved, the Registrar, and the student's advisor. A student has the right of petition to the Committee on Petitions.

10.2 Course Numbering

- Courses numbered 100–199 are introductory to the subject.
- Courses numbered 200–299 assume a capacity for the independent acquisition of material and generally build on the methods and subject matter of 100-level courses.
- Courses numbered 300–399 are typically oriented toward a major or minor. They require a strong foundation of knowledge specific to the discipline.
- Courses numbered 400–499 are courses in the major or minor that are designed to challenge students to integrate discipline-specific knowledge in advanced ways. These courses typically contain advanced disciplinary coursework, capstone projects, and/or independent research.

10.3 Grading

GRADES

A	Excellent	4.0 grade points per course credit
A-		3.7 grade points per course credit
B+		3.3 grade points per course credit
B	Above average	3.0 grade points per course credit
B-		2.7 grade points per course credit
C+		2.3 grade points per course credit
C	Satisfactory, minimum expectation credit	2.0 grade points per course credit
C-		1.7 grade points per course credit
D+		1.3 grade points per course credit
D	Passing, below expectation	1.0 grade points per course credit
D-		0.7 grade points per course credit
F	Failure	0.0 grade points per course credit
WF	Failure	0.0 grade points per course credit
P	Pass	Credit awarded, no grade points given
NP	Not Pass	No credit and no grade points

10.3.1 Status Marks

- **W** Approved withdrawal from a course.
- **X** Course extends beyond term. An "X" status grade is given in courses designated in the Catalog as having coursework that extends beyond the end of the term. Under no circumstances can an "X" grade remain unresolved for more than one calendar year.
- **O** No mark had been reported by the instructor by the time academic reports were processed.
- **I** Incomplete. An "I" status grade is reported only for students who are unable to complete the work in the course due to extenuating circumstances. The normal length of time for resolution of an incomplete is within four weeks of the next Fall or Spring term in which the student enrolls. If the instructor believes the resolution of the incomplete will take longer, the instructor will note the later deadline when reporting the incomplete status grade. An unresolved incomplete will automatically become a failing grade after the deadline, unless the instructor notes otherwise when reporting the incomplete. Under no circumstances can an "I" grade remain unresolved for more than one calendar year.
- **R** The prefix "R" to a grade (i.e., RA, RB, RC, RD, RF) indicates a grade of repeated course. A student may repeat a course previously taken, and registration must indicate this repeat. Failure to register for a repeat course properly results in no recognition of the second attempt. Only the grade earned when the course is retaken is used in computing the GPA. Credit may be earned only once for a given course. Courses may be repeated only once, although, students may petition for a second repeat if extenuating circumstances exist.
- **EQ** Equivalent credit recognized; no credit given. Does not increase courses attempted. For a student who has completed four course credits of student teaching and who has high school or life experience equivalent to a regular catalog course, the said course, upon recommendation of the Education chair and the chair of the department in which equivalent credit is being recognized, may be listed on the student's transcript with the appropriate credit and a status mark of "EQ."

10.3.2 Audited Courses

Students may audit courses with the consent of the instructor. In doing so, they attend class but are not required to take tests or submit papers. Audited courses receive no credit and do not appear on transcripts.

10.3.3 First Course Grading For Non-Traditional Students

Individuals who have been away from the collegiate routine for several years may register on an audit basis in their first course while paying half tuition for this one course, participate fully in the class (including tests, papers, etc.), and decide at the conclusion of the course if they wish to pay the other half of the tuition and receive credit for the course. This policy applies only to the first course—not to succeeding courses.

10.3.4 Courses Graded as Pass/Not-Pass

Courses are graded A–F unless otherwise indicated in the course description that only P/NP is an option (e.g., student teaching, internships). Courses graded P/NP count as credits towards graduation but do not affect the student's GPA. In addition, students may opt to take up to four A–F graded courses on a P/NP basis. When students opt for P/NP grading, the Office of the Registrar converts any grade a faculty member provides of D- or better to a P, and any grade of F to an NP. In order to count for Writing Emphasis credit, a submitted grade of C or higher must be earned.

The following regulations apply:

1. Students are permitted to change the method of grading for a course from a letter grade to P/NP. This change is allowed from the start of the term of enrollment through the last day to withdraw from courses during that term. See Academic Calendar Section 3.0.1 for official dates.
2. Students may elect to take up to four graded courses during their undergraduate career on a P/NP basis. However:
    a. Students cannot use a course for which they elected P/NP grading to satisfy the requirements for a major or minor.
    b. Students cannot elect P/NP grading while on academic probation, though provisionally-admitted First Year students are allowed the option of P/NP grading.
3. The Registrar will not inform the instructor of the student's request for P/NP grading and the instructor must provide the Registrar with an appropriate letter grade.
4. A student's request for P/NP grading may be nullified at any time before the end of the third business day after grades are due in the student's final term. A written notice must be sent to the Office of the Registrar to communicate the student's intent to replace the P or NP grade with the instructor's letter grade.
5. A student's request to change their method of grading to P/NP in lieu of a letter grade counts as one of the four P/NP elected courses during the student's undergraduate career, regardless of whether it is later nullified.
6. Ordinarily a student is limited to one course credit per term on an elected P/NP basis. A student wishing to exceed this limitation must present a convincing rationale or significant mitigating circumstances to the Committee on Petitions.

10.3.5 Midterm Grades

Midterm grades are not official evaluations and are not part of the official transcript. The goal of midterm grades is to help students take responsibility for their academic progress. Faculty submit midterm grades of A-F for students in all full-term courses. Midterm grades are not intended to be a guarantee, promise, or contract regarding the final grade a student will earn in the class. Instead, they provide information for students about their academic performance.

10.4 Class Designation

Class Designation is determined by the number of course credits earned following the Fall and Spring Terms.

First-year student: Fewer than 8.0 course credits earned

Sophomore: 8.0–15.9 course credits earned

Junior: 16.0–23.9 course credits earned

Senior: 24.0 or more course credits earned

10.5 Registration

Before being allowed to register, students must have been admitted for study by the Office of Admission, must have settled their account with the Business Office, and must meet with their Academic Advisor. Registrations are canceled for failure to pay fees on time.

Students are encouraged to develop a four-year comprehensive educational plan with the help of their advisor or with other members of the faculty.

Students who will not graduate during the current academic year register online during the Spring Term for the Fall Term of the following academic year during times specified by the Office of the Registrar. Registration for the Spring and May Experiential Terms takes place during the preceding Fall Term. Once the online registration period is over, all changes to registration must take place in the Office of the Registrar using accurate, legible, and completed registration forms. Entering first-year students and transfer students receive instructions with their orientation materials, and readmitted students receive instructions from the Office of the Registrar concerning their registrations. Registrations are not accepted for a term without successful petition after the end of the first week of classes of that term.

10.5.1 Changes in Registration

1. Unless a course is registered by a student online during the registration period, they must intentionally file a registration form with the Office of the Registrar in order to be registered for a course. Registration forms for course additions must be approved by the student's advisor and instructor of the course.
2. Courses may be added or dropped during the first five days of the Fall, Spring, or Summer Term, including 7-week courses. Students may add a May Experiential Term course during the first three days of said term. If a student needs to add a course after these deadlines due to extenuating circumstances, the student must petition the Committee on Petitions by completing the appropriate forms. For courses spanning a fraction of a Term, the last date to add or drop without a "W" will be calculated as a proportionate time frame comparatively as full-term courses. Students can withdraw from a course without a WF during the first two-thirds of the term.
3. A student may withdraw from one or more courses with the following results:

- If a student withdraws from a course when 2/3 or less of the Term is completed, a "W" (withdrawal) grade will be entered on the student's permanent record. This grade will not affect the student's GPA. This is the date listed in the academic calendar as the Last Day to Withdraw from a course.

- For courses spanning a fraction of a Term, the last date to withdraw with a "W" will be calculated using the 2/3 fraction. See Academic Calendar (p. 10) for official dates for full-term and half-term courses.
- If a student officially withdraws from a course after 2/3 of the Term is completed, a "WF" will be entered on the student's permanent record. This will affect the student's GPA.
- A withdrawn course, regardless of the date withdrawn, counts as attempted credits on the transcript. Therefore, it also counts when calculating academic standing and satisfactory academic progress (see p. 229) for financial aid.

10.5.2 Course Load

A student is full-time for the Fall or Spring Term when enrolled for three or more course credits. A student enrolled for fewer than three course credits is a part-time student. For financial aid purposes, half-time is defined as enrollment in no fewer than two course credits in each of the Fall and Spring Terms; three-fourths is defined as enrollment in no fewer than 2.5 course credits in each of the Fall and Spring Terms. Students who have earned a cumulative GPA of 3.4 or above, or have earned both 23 credits and a cumulative GPA of 2.5 or above, may take above 4.99 credits without the need for a petition, but approval must be secured from the Office of the Registrar. Other students must submit a petition to the Committee on Petitions and obtain approval in order to register for five or more course credits. No student shall be permitted to register for over 5.99 credits in each of the Fall and Spring terms. The Committee on Petitions will only consider petitions for above 4.99 credits from those students who have completed at least one term as a full-time student. Students may not register for more than one course credit during May Experiential Term.

10.6 Administrative Withdrawal Policy

Students must be registered for courses and abide by add/drop and late registration changes according to all existing procedures in the Coe College Academic Catalog.

Under extreme circumstances, a student may be administratively withdrawn from their courses. While the college reserves the right in each instance to determine when administrative withdrawal appears appropriate, normally this process can be initiated after the following conditions have occurred: - The student has not completed any work for their current term courses in three weeks (21 days) and has not communicated with any of their faculty in said period of time. - The student is not responding to reasonable requests from their faculty, the Dean of Student Success and Persistence, the Dean of Students, the Provost and/or other college personnel related to student support. - In the case of the above circumstances, the Dean of Student Success and Persistence will reach out to the student a final time offering them 48 hours to respond and start attending class. - If the student responds within 48 hours, the Dean of Student Success and Persistence meets with the student to determine whether the student desires to withdraw from enrollment with the college, and if not, any conditions for the student's continued enrollment with the college. - If the student does not respond, their case will be reviewed by CAPE, and a recommendation for withdrawal may be forwarded to the Provost Office. The Provost will review the material and make a final determination and then instruct the Registrar accordingly. - The student will be notified by letter. If the student has authorized disclosure of educational records to their parent(s)/guardian(s) under FERPA, the college will notify the student's parent(s)/guardian(s).

10.7 Academic Integrity Policy

At Coe College, we expect academic integrity of all members of our community. Academic integrity assumes honesty about the nature of one's work in all situations. Such honesty is at the heart of the educational enterprise and is a precondition for intellectual growth. Academic dishonesty is the willful attempt to misrepresent one's work, cheat, plagiarize, or impede other students' academic progress. Academic dishonesty interferes with the mission of the College and will be treated with the utmost seriousness as a violation of community standards.

10.7.1 Forms of Academic Dishonesty

- *Cheating* is the attempt to deceive an evaluator by claiming credit for work one has not done or by knowingly assisting such an attempt. It includes (but is not limited to) the use of unauthorized sources of information on in-class or take-home exams, or other assignments; copying from other students on exams, assignments, or lab reports; fabrication of data, research, quotations, or other information; and taking credit for collaborations to which one has not contributed.
- *Plagiarism* is the use of someone else's words or ideas without acknowledgement and, when intentional, is a form of academic dishonesty. The unacknowledged use of words or ideas from *any* published or unpublished sources, including Internet resources or other student papers, constitutes plagiarism. Plagiarism may occur intentionally or unintentionally through the omission of appropriate citations. *Any* ideas or information the student adopts from a source, whether or not directly quoted, must be acknowledged by specific reference in notes or the text.
- *Any* words or phrases that are taken from a source must be quoted and cited. *Any* paraphrase—the restatement of an idea in your own words—must be cited. The methods of citation and documentation vary from discipline to discipline. Students are responsible for determining the appropriate method for any given assignment or, in the absence of a clearly stated protocol, using any accepted academic method. Guidelines can be found on the library website and in the Writing Center.
- *Other forms of academic dishonesty* include (but are not limited to) deliberately impeding other students' work and misuse of common academic property, in the libraries, labs, and elsewhere.

10.7.2 Statement on Generative Technology

Use of generative writing technology (such as ChatGPT or similar) without express permission from your instructor is a form of academic dishonesty. If specific parameters of use are not outlined by an instructor, students should assume use of said technology is prohibited, and that unauthorized use of it will be subject to disciplinary action. Coe College faculty may set parameters for when and how the use of such technology is permissible, as well as how students should document their use of it.

10.7.3 Sanctions

Instructors have responsibility for determining whether academic dishonesty has occurred. Instructors shall proceed with sanctions accordingly. Any act of academic dishonesty that results in one of the sanctions below shall be detailed in a formal report filed with the Provost and Dean of the Faculty.

Cases of unintentional plagiarism may be dealt with through educational procedures such as further assignments requiring the student to practice documentation and citation methods, or other means determined by the instructor.

Acts of academic dishonesty will be subject to one or more of the following sanctions: 1. failure of the assignment, i.e. exam, paper, lab report, etc. 2. other sanction as determined by the instructor, within the framework and grading rubric of the class 3. failure of the class 4. suspension or expulsion

An instructor may impose the first three of these penalties. Suspension or expulsion may only be carried out by the Provost and Dean of the Faculty.

Repeated acts of academic dishonesty will result in suspension or expulsion. When academic dishonesty has been determined to have occurred a second time, the Provost and Dean of the Faculty shall decide on the student's status at the College.

10.7.4 Procedure

When an instance of academic dishonesty is suspected, the instructor will meet with the student to discuss the incident and will decide which, if any, of the above sanctions is appropriate.

If warranted, the instructor will send a report to the Provost, with a copy given to the student, which details the nature of the violation and the steps taken to address it. The Provost will send a letter to the student within ten business days of receipt of the faculty member's report. The letter will reiterate the incident, describe the sanctions, and inform the student of their right to appeal. The report and letter from the Provost will remain on file in the Academic Affairs Office until five years after the student's graduation or severance from Coe. The Vice President for Student Life will be notified that a report has been filed. Information in the file will be confidential, to be shared only at the discretion of the Provost and Dean of the Faculty for a legitimate educational or legal purpose.

10.7.5 Appeals Process

The student may appeal the charge and/or the sanction within ten business days of receiving the Provost's letter of notice by emailing the Provost and Dean of the Faculty requesting an appeals hearing. Students wishing to appeal are strongly encouraged to consult with the Associate Dean for Student Academics, who has been designated by the College to help explain the appeals process and work with the student if they choose to appeal.

The Provost's Office will convene an Academic Integrity Appeals Board within ten business days of receipt of the request for appeal to hear the appeal. The Academic Integrity Appeals Board will be chaired by either the chair or co-chair of the Academic Policies Committee. Additional members of the board will include: one additional faculty member on the Academic Policies Committee, a senior Student Life officer, one faculty member from the Committee on Academics, Persistence and Enrollment, and the Associate Dean for Faculty Development. In any hearing the Provost may replace the Associate Dean for Faculty Development, or other member of the board to avoid conflicts of interest. The student may choose to have a faculty or staff member present as an observer. The student and the instructor will each appear as witnesses and each may request that other pertinent witnesses appear.

A majority vote of the Appeals Board is necessary to uphold or overturn a sanction. If a sanction is overturned, the Appeals Board may impose a lesser sanction. The Appeals Board will submit a written finding which will be sent to the student and the faculty member(s) involved in the case and which will become part of the student's file. If the appeal's outcome is to overturn the dishonesty charge, the report in the Academic Affairs Integrity file will be removed.

10.8 Academic Standing

All students are expected to meet the College's standards for academic performance (see chart in this section). These are in place to keep students on track towards meeting the graduation requirements of the college (32 credits with a cumulative GPA of 2.0). Students who do not meet Coe's academic standards may be put on probation or suspended from the College.

To make sure that students are aware when their academic standing is in jeopardy, a series of communications are issued throughout an academic term including D/F notices, academic warnings, and notices of academic probation. Unless otherwise stated, these communications will be sent to the student by email sent to the student's Coe email address. Additionally, advisors may be contacted about their advisees' performance.

10.8.1 D/F Notices

Academic notices are issued at midterm to students who earn a D, F, or NP in one or more courses. Students receiving these notices are expected to meet with their academic advisor to identify appropriate support.

10.8.2 Academic Warnings

Academic warnings will be issued to students who earn a term grade point average below 2.0 while retaining a cumulative grade point average of 2.0 or higher. Students receiving academic warnings are strongly encouraged to re-evaluate their current approach to their studies and/or their academic plans. They are expected to meet with their academic advisor.

10.8.3 Academic Probation

The Academic Standing Committee reviews academic records of all students at the conclusion of both the Fall and Spring Terms. A student is placed on academic probation if the cumulative GPA falls below the minimum GPA levels listed below:

Total Course Credits Attempted	Minimum GPA Levels
0.0 – 4.99	l.50
5.0 – 7.9	l.75

Total Course Credits Attempted	Minimum GPA Levels
8.0 – 11.9	1.80
12.0 – 15.9	1.90
16.0+	2.00

Students who are placed on probation for academic standing reasons will receive a letter via their Coe email address notifying them of their probation status. To return to good standing and be removed from academic probation, a student shall earn a cumulative GPA greater than the threshold for academic probation as specified above. Students who are placed on academic probation have a maximum of two (2) consecutive terms, excluding May and Summer, to return to good standing before they are subject to academic suspension. In the first probation term, a student on probation is required to enroll in SKD-145 Strategies for Academic Success.

A student on probation is also subject to academic suspension if their cumulative GPA decreases at the end of any term on probation.

Students who are on academic probation: - Are expected to comply with any requirements outlined by the Academic Standing Committee. - May not elect P/NP grading in lieu of a letter grade. - May not be excused from attending class to participate in extra-curricular activities.

The status of academic probation is noted on a student's transcript.

Students on probation who are not meeting the conditions of their probation and not performing at a passing level in their courses may be withdrawn from the College during the term on the recommendation of the Academic Standing Committee. If the student had previously appealed a suspension, the suspension is reinstated. Otherwise, the student will be exited from the College and is eligible to return on probation the following term. Students may appeal this decision to the Provost.

10.8.4 Academic Suspension

Students who do not meet the conditions of their academic probation or who fall below retention thresholds (see below) will be considered for academic suspension by the Academic Standing Committee, and, if suspended, will be unable to take courses at Coe College for a period of at least one academic year. (One academic year is defined as a Fall and Spring Term, and does not count May or Summer Terms.) A registration hold preventing registration will be placed on the student's account. A student already registered for the following term will be dropped from those courses.

Total Course Credits Attempted	Minimum GPA Levels
0.0 – 4.99	0.50
5.0 – 7.9	1.00
8.0 – 11.9	1.50
12.0 – 15.9	1.70
16.0 – 19.9	1.80
20.0 – 23.9	1.90
24 +	2.00

Students who are placed on suspension for academic reasons will receive a letter via their Coe email address notifying them of their suspension status. Suspended students have the right to appeal for immediate readmission

if they can provide evidence of circumstances that would warrant reconsideration by the deadline indicated in their suspension letter.

To appeal for immediate readmission: - A suspended student appealing for readmission must submit a written form that offers an explanation of any circumstances that affected the student's academic performance, as well as a detailed plan with specific actions that the student will take to improve their academic standing, including how the student will overcome the obstacles that affected their academic performance. The form will be made available to eligible students online, and must be completed by the deadline communicated in the suspension letter in order to be considered. Student appeals will not be considered if required materials are not received by the deadline. - Following submission of the appeal form, the student must also schedule a hearing with the Academic Standing Committee At this meeting the student will have the opportunity to respond to questions the Committee may have on the circumstances outlined in the student's appeal materials. - A suspended student appealing for readmission is encouraged to request a letter of support for immediate readmission from a faculty advisor or other faculty or staff member at Coe, if the letter can shed light on the student's ability and motivation to do well in future academic endeavors. Similarly, the student is encouraged to consult with one or more faculty or staff members to prepare a strong case for readmission.

Students who have been suspended for academic reasons from the College once, can return to the College either through a successful appeal for immediate readmission or through readmission after leaving for at least one academic year. A student who is suspended for academic reasons more than once cannot appeal for immediate readmission and must leave the College for at least one academic year.

10.8.5 Interim Suspension

Interim Suspension is a situation where it is determined that a student's continued presence at the college constitutes an immediate threat of harm to the student, other individuals, or to the stability and continuance of normal College functions. The Provost and Dean of Students or their designee may suspend a student pending disciplinary proceedings. Such suspension may become effective immediately and without prior notice.

Interim suspension shall be considered an excused absence until the conclusion of formal hearings. The student will be offered the opportunity to make up any academic work missed during the time in which the interim suspension was imposed. It is the student's responsibility to make specific arrangements with faculty members to complete academic work. The Dean of Students will initiate communication with the appropriate faculty.

10.8.6 Readmission Following Suspension

Coe College's academic suspension policy allows students, who are not readmitted immediately through appeal, to apply for readmission after at least one academic year has passed.

To be considered for readmission, the student must file a request to return with the Associate Dean for Student Academics. In the appeal documentation, the student must present evidence that demonstrates how the circumstances that led to the student's academic suspension have been addressed, and how the student plans to be successful in his or her academic future. Readmission is determined by the Associate Dean for Student Academics, in consultation with other campus officials as necessary. These officials reserve the right to conduct its own investigation, review the case, and make a final decision concerning the student's reinstatement to the College. When appropriate, certain academic stipulations may be applied. If a suspended student provides evidence of successful course completion elsewhere and/or written evidence of motivation and maturity necessary to be academically successful at Coe, the student may be readmitted on probation at Coe.

10.9 Exiting the College

The exit process at Coe College, whether through withdrawing or taking a leave of absence, is initiated by the student. Students must contact the Dean of Student Success & Persistence to conduct an exit interview. At the interview, the student is given an official exit checklist that provides information that students should collect from other offices on campus, including the Student Financial Services Office, to verify a balance due or a credit to be refunded; Student Loan information, to be aware of financial aid adjustments; the Library, to ascertain that all materials have been returned; and the Director of Residence Life, to arrange for room checkout. All exiting students will also be asked to complete an exit survey, which can be completed electronically after the exit interview.

If a student withdraws from all courses during a period of enrollment for which they received financial aid, the Student Financial Services Office will determine how much, if any, of the student's financial aid proceeds must be returned to the College, based on a federally mandated refund formula (see *Return of Title IV Funds/ Institutional Refund Policy*, p. 223).

Special consideration is given to students who withdrew due to a call to active duty. Coe's "Military Call Up/Refund" and "Readmission of Service Member" policies are published on the Admission/Financial Aid webpage. Copies of these policies can be requested from the Student Financial Services Office.

10.10 Leave of Absence

A student may find it necessary to interrupt a program of study at the College. Under this condition, the student may apply for a leave of absence. A leave of absence may be granted for a period not to exceed 12 months. Students may extend a leave of absence to up to a total of 36 months by contacting the Office of the Registrar via email at o-registrar@coe.edu. Students are officially withdrawn from the College upon beginning a Leave of Absence, but they may return to the College without reapplying. Students who neither renew their leave of absence nor return to Coe will have to reapply should they wish to return to the College. Coursework completed while on leave from the College is subject to the same conditions as work in transfer.

10.10.1 Requesting a Leave of Absence

Students planning to take a leave of absence from the College should first consult their academic advisor and then **must declare** their intent. Students should contact the Dean of Student Success & Persistence to initiate the process. Please refer to the previous section on exiting the College for the steps that follow.

10.10.2 On Leave of Absence

The Coe community is committed to supporting students while they are away from the College. Thus, the Associate Dean for Student Academics may assign a designee who will be the point of contact to each student on a leave of absence. This designee will stay in contact with the student during their time away from the College, as appropriate, and will assist with the return process once the student is ready to resume coursework.

10.10.3 Returning to Coe after a Leave of Absence

Students planning on returning to the College from a leave of absence do not need to apply for readmission, but must submit a statement of intent to re-enroll to the Office of the Registrar and the Associate Dean for Student Academics, or designee, who will assist with the return process. Students are strongly encouraged to schedule a consultation with the Associate Dean for Student Academics, or designee, by December 1 for returning the Spring Term, or August 1 to return the Fall Term. If a student wants to register during the regular registration time

(November for Spring Term or late March / early April for Fall Term), they will need to submit their statement of intent and contact the Associate Dean for Student Academics, or designee, at least two weeks before Registration. The exact date of Registration can be found on the Academic Calendar on the Coe website under the Academics tab.

10.11 Withdrawal from the College and Readmission

Admission for work toward a degree terminates and the student is considered withdrawn from the College if: 1. A full-time student does not enroll at Coe for the next term (excluding May Experiential Term and Summer Term) and has not completed a Leave of Absence form. This does not apply to students in College-approved off-campus study programs. 2. A part-time student does not enroll for a course at Coe in a 12-month period and has not completed a Leave of Absence form.

Students wishing to resume work toward a degree, once admission status has terminated, must apply for readmission.

10.12 Transcript Evaluation Policies

Official transcripts for courses taken at Coe College can only be issued by the Office of the Registrar and only after the office has received a written request and payment from the student.

10.12.1 General Policy on Transfer Credit

To honor its mission and to preserve its academic integrity as a liberal arts institution, the College accepts a course in transfer for the equivalent earned credit (4 semester hours = 6 quarter hours = 1 course credit), if that course meets the spirit of the College's mission and is from a regionally accredited institution. The College can only enter transfer work upon receipt of an official transcript with final grade(s) for the coursework in question. Departments will accept transferred 100- and 200-level course equivalencies toward fulfilling major or minor requirements, unless otherwise noted in a respective department's section of the Catalog. In cases where it is unclear whether the course would be acceptable for transfer credit, the Registrar and the appropriate department chair will consult. Other exceptions are referred to the Committee on Petitions. First-year seminars may transfer in for elective credit but will not fulfill other requirements. Neither remedial nor skill-development courses may transfer in. Practicum and Writing Emphasis options may not be transferred in and must instead be taken at Coe except in cases of transfer students with approved degrees. Mathematics courses may only transfer in if they are Calculus I or higher. Coursework of a technical/professional/vocational nature generally will not transfer into Coe.

10.12.2 Evaluation of Credits in Transfer

The Office of the Registrar is responsible for the evaluation of transfer credit. Credits accepted in transfer do not affect the cumulative GPA. Grades for the credits accepted are not recorded on Coe's transcript. Thus, transfer credits increase only the total courses attempted and the total course credits earned. Credit is not accepted for course work earning a grade below "C" (2.0 on a 4.0 scale), nor for courses on a Satisfactory/Unsatisfactory or Pass/Not Pass basis, unless the institution where the course was taken provides verification that the student earned at least the equivalent of a "C" in the course.

Accepted transfer credit appears on a student's Coe transcript with a grade of "P" (Pass), which does not influence GPA. If an equivalent course is repeated at Coe College, the transfer credit no longer counts toward graduation. In the reverse situation, if the equivalent to a Coe course is taken as a repeat at another institution and transferred in, the original Coe course, and any earned credit associated with it, is forgiven and the transfer work takes its place.

10.12.3 Junior or Community College Credit

A maximum of 16 credits (junior standing) will be accepted as transfer credit from the sum of 2-year regionally accredited institutions plus AP/IB scores. Transfer students who complete a regionally accredited A.A. degree program or a regionally accredited college-parallel A.S. degree program will be accorded junior status (16 course credits) at Coe. Transfer students who complete an A.A., A.S., or A.A.S. degree from a regionally accredited institution with which Coe has a specific articulation agreement will be awarded credit consistent with that agreement. A transferred A.A, A.S., or approved A.A.S. degree fulfills the General Education Distribution, Diversity Across the Curriculum, and Writing Emphasis requirements but not the Practicum requirement. See p. 25 for information on reverse credit transfer for transfer students who have not yet finished their associate's degrees at time of beginning coursework at Coe.

10.12.4 Four-Year College Credit

For students pursuing a B.A, B.S.N. or B.S.E, a maximum of 24 credits (senior standing) will be accepted as transfer credit from the sum of 4-year regionally accredited institutions, plus 2-year regionally accredited institutions, plus AP/IB scores. For students pursuing a RC-B.A, a maximum of 16 credits will be accepted as transfer credit from the sum of 4-year regionally accredited institutions, plus 2-year regionally accredited institutions, plus AP/IB scores. For information on second-baccalaureate degree students, see p. 26.

10.12.5 European Credit Transfer System (ECTS)

ECTS credits are a relative rather than an absolute measure of student workload. They specify how much of a year's workload a course unit represents at the institution or department allocating the credits. ECTS is thus based on a full student workload and not limited to contact hours only.

In ECTS, 60 credits represent the workload of a normal undergraduate academic year of study and normally 30 credits for a semester and 20 credits for a term. Thus, ECTS credits will normally be transferred to Coe College at a rate of 7.5 ECTS credits: 1 Coe credit.

10.12.6 Occasional Transfer Credit for Degree-Seeking Students

Degree-seeking students sometimes wish to transfer credit from another institution toward their degree at Coe. Such credit must be approved in advance of completion of the course by the Registrar. Departments must approve in advance any courses counting toward a major, a minor, or teacher certification requirements.

10.12.7 Evaluation of Credits for Graduation

The Office of the Registrar certifies the completion of area of study and General Education requirements. Credits toward a major, minor, endorsement, license, authorization, etc. are approved by the appropriate department chair, administrative coordinator, or by Academic Policies Committee for interdisciplinary majors. Departments will accept transferred 100- and 200-level course equivalencies toward fulfilling major or minor requirements, unless otherwise noted in a respective department's section of the Catalog.

10.12.8 Credit by Examination

A maximum of eight course credits (sophomore standing) in satisfaction of degree requirements may be applied from credit earned through the sum of the Advanced Placement (AP) Program and International Baccalaureate (IB). Students may not receive college credit for both AP and IB in areas of similar content.

10.12.9 Updating Course Work

In the natural course of reviewing academic records, a student may be required to repeat certain courses (or appropriate substitutes) taken more than four years prior to the review to bring studies in those areas up to date. Review cases may be brought to the Academic Policies Committee by any member of the faculty, and this committee makes the final decision.

10.12.10 Advanced Placement (AP)

Coe College's Advanced Placement code is 6101.

Coe College grants college credit for approved Advanced Placement examination scores of 4 or 5. AP credit cannot be used to fulfill any General Education requirement. Each AP exam may earn 1.0 course credit up to a maximum of eight total course credits towards graduation from AP and IB. Credit is granted upon receipt of the results of the examination, which must be received directly from the Educational Testing Service. Further information regarding Advanced Placement examination reporting to the College may be obtained in the Office of the Registrar and on Coe's website. If an equivalent course is taken after matriculation to Coe College, the AP credit is removed from the transcript.

10.12.11 International Baccalaureate (IB)

Coe College credit may be awarded for International Baccalaureate work. Students may earn 1.0 course credit for each higher-level examination score of 5, 6, or 7 to a maximum of eight total course credits from AP and IB. No credit is granted for standard-level examinations. IB credit cannot be used to fulfill any General Education requirement. Credit is granted upon receipt of the results of the examination, which must be received directly from the International Baccalaureate Organization. Further information regarding International Baccalaureate examination reporting to the College may be obtained in the Office of the Registrar and on Coe's website. If an equivalent course is taken after matriculation to Coe College, the IB credit is removed from the transcript.

10.13 Class Attendance

Regular class attendance is expected, although the instructor of each course sets the standard expected to be met by the students. The College expects attendance on all scheduled days, including the first and last day of a term, as well as the class days immediately preceding and following College holidays. Students officially representing the College are excused as necessary prior to the absence. Students on academic probation are not excused from attending class to participate in extra-curricular activities.

10.14 Final Exams

The final exam schedule is published by the Registrar. It is expected that final exams will be given during the time scheduled for each course. There may be extraordinary cases when an individual student has a compelling reason for taking an exam at a time other than that scheduled. In such cases the instructor may properly decide to let that individual take the exam at another time. Having more than two exams scheduled on one day would justify allowing a student to take a third exam on another day. The instructor of the course with the highest course number will move the exam, for that student only, to a mutually convenient time.

10.15 Participation in Commencement

Students can participate in Commencement when they have met all the requirements for graduation for one of Coe's degrees, they have completed their Intent to Graduate form, and it has been fully processed and approved by the Registrar's Office. (Intent to Graduate forms will be processed in the order they are received. Submissions past the deadline have no guarantee of being processed for Commencement participation.) In addition, all students, unless excused in writing by the Provost, must complete a survey assessing their educational experience at Coe. All pending graduates must participate in Commencement exercises unless excused in writing by the Registrar.

10.15.1 Pending Graduates

Students who need to earn no more than 2.0 course credits to complete all graduation requirements may be permitted to participate in one Commencement exercise provided the remaining course credits are scheduled to be completed within one academic year of their Commencement ceremony. In these instances, a plan for completion must be submitted in writing to the Registrar's Office and approved by the Registrar prior to Commencement. Coe graduates may participate in Commencement no later than one academic year following the conferral of their degree. Pending graduates will be listed in the Commencement booklet, but will not receive their diploma until all graduation requirements are met. Final Latin honors (see p. 28) are bestowed only after all graduation requirements are met, and will be listed on a student's final diploma and transcript.

10.16 STUDENT NOTIFICATION OF RIGHTS UNDER FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are:

- the right to inspect and review the student's education records within 45 days of the day the College receives a request for access. Students should submit to the Office of the Registrar written requests that identify the record(s) they wish to inspect. The Registrar will make arrangements for access and notifies the student of the time and place where the records may be inspected. If the records are not maintained by the Office of the Registrar, the Registrar shall advise the student of the correct official to whom the request should be addressed.
- the right to request the amendment of the student's education records that the student believes are inaccurate or misleading. Students may ask the College to amend records that they believe are inaccurate or misleading. They should write the College official responsible for the records, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. FERPA was not intended to provide a process to be used to question substantive judgments which are correctly recorded. The rights of challenge are not intended to allow students to contest, for example, a grade in a course because they felt a higher grade should have been assigned. If the College decides not to amend the record as requested by the student, the College will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

- the right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorized disclosure without consent. One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the College in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the College has contracted (such as an attorney, auditor, collection agent, or official of the National Student Clearinghouse); or a student serving on an official committee, such as an admission, petitions, retention, honors recognition, disciplinary, or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
- the right to file a complaint with the U.S. Department of Education concerning alleged failures by the College to comply with the requirements of FERPA.

A student is a person who attends or has attended Coe College, as determined by matriculation and enrollment by the first date of an academic term. Coe College obtains written permission from the student before releasing any information from a student's educational record in most cases. However, as the law allows, on a case-by-case basis, appropriate parts of a student record may be disclosed, without consent of the student, to the following parties:

- college employees who have a legitimate need to know.
- persons who need to know in cases of health and safety emergencies.
- accrediting organizations to carry out accrediting functions.
- appropriate parties in connection with financial aid to a student.
- federal, state, and local governmental officials for purposes authorized by law.
- individuals who have lawfully obtained court orders or subpoenas.
- organizations conducting educational studies for the College.
- courts during litigation between the College and the student or parent.
- victim of crime of violence after final results of a disciplinary hearing.
- public after disciplinary proceedings determine student committed crime of violence.

In many situations, complaints relative to FERPA can be resolved with the College on an informal basis by contacting the Registrar, in the lower level of Voorhees Hall.

To file a FERPA complaint with the U.S. Department of Education, contact the office that administers FERPA at: Family Policy Compliance Office, U.S. Dept. of Education, 400 Maryland Avenue SW, Washington, DC 20202-4605.

11 INDIVIDUALIZED STUDY

11.1 Independent Study

The one-credit independent study is a student-driven initiative that requires the completion of a minimum of 140 hours of academic work, including meeting with a faculty advisor and performing independent work between meetings. Developed and outlined by the student, an independent study supplements the existing departmental program through more intensive study of a present topic or through examination of topics not comprehensively covered in an existing course. An existing course taken by arrangement does not constitute an independent study. Independent studies are only offered at the 300- and 400- levels and are meant to foster a student's pursuit of career and/or personal goals outside of the classroom. A proposed independent study must receive approval from the respective department chair and be registered through the Office of the Registrar in order to receive credit and count toward the practicum requirement. A student may receive a total of no more than 2.0 credits from independent studies. A student may only repeat an independent study with the same course code if approved by the relevant department chair.

11.2 Directed Learning

The one-credit directed learning is an instructor-driven initiative that requires the completion of a minimum of 140 hours of academic work, including meeting with a faculty advisor and performing independent work between meetings. Developed and outlined by the instructor, directed learning helps students specialize in a major or minor. A proposed directed learning must receive approval from the respective department chair and be registered through the Office of the Registrar to receive credit and does not count toward the practicum requirement. A student may receive a total of no more than 2.0 credits from directed learning. A student may only repeat a directed learning with the same course code if approved by the relevant department chair.

12 ACADEMIC PROGRAMS

12.1 Asia Term

Carstens (Co-Program Director), Nordmann (Co-Program Director)

ASC-195 Asian Tonal Languages
An introduction to Thai, Vietnamese, and other tonal Asian languages. Emphasis is on basic communication as well as the distinguishing features of languages that use tones as part of their linguistic system.

ASC-196 Modern South East Asia
An introduction to several Asian cultures such as Thai, Cambodian, and Vietnamese. This course varies depending on the field of the supervising Coe faculty member.

ASC-444 Independent Study
A student-designed study of some feature of Asian culture, arranged in consultation with the supervising Coe faculty member. May be taken more than once for a maximum of 2.0 credits. Prerequisite: consent of instructor.

12.2 World Language

Rodríguez Moreno (Program Director)

FSA-100 Foreign Study Abroad
Study abroad during May Experiential Term supervised by a Coe College faculty member, with site visits to places of historical and cultural interest. When appropriate, may count as a course in the major. May be taken more than once if offered in different locations. Prerequisite: consent of instructor. (Offered May Experiential Term only)

FSA-146 Turkey: History and Culture
Study abroad course on the history and culture of Turkey. An exploration of a unique secular-Muslim society. Particular historical focus is on Istanbul and ancient cities on Aegean coast. Prerequisite: consent of instructor. (Offered May Experiential Term only)

WLC-108 Cultural Studies and Literature in Translation (WE) A topics course, taught in English, that explores shared historical, literary, and cultural themes and experiences in the French and Spanish-speaking worlds. Topics may include the history and literature of slavery and colonization, environmental humanities, contemporary films and graphic novels, and social justice in globalized contexts. It may be counted for credit toward a Spanish or French and Francophone Studies majors and minors.

12.3 Internships

The internship is a work or volunteer experience in the context of an independent academic investigation of site-related issues and personal aptitudes, values, and goals. Internships include a minimum of 140 hours of on-site or remote experience and the required documentation and/or academic journal or paper as determined by the faculty member. The details of the academic component are determined by prior arrangement with the faculty internship advisor.

Internships are completed during the academic year for 1.0 credit, or during Summer Term for either 1.0 credit or 0.0 credit determined by the course registration. In unusual circumstances where an internship presents an opportunity to extend the educational component of the experience significantly, an internship may earn 2.0 credits. Application for non-departmental, two-credit internships requires consultation with the Internship Faculty Advisor and approval of the Committee on Petitions; departmental two-credit internships, when permitted, are overseen by the department.

A combined maximum of 2.0 course credits may be counted toward the 32 credits required for graduation through Internships or Community-Based Project. Many internships are completed in the Cedar Rapids area; however, it is permissible to complete an internship outside of the area during the summer, or done remotely if authorized by the Internship Faculty Advisor.

Students interested in internships should consult with their Career Specialist in C3: Creativity, Careers, Community, as well as with the appropriate academic department who will be overseeing the internship experience.

Each internship must include the consent of an Internship Faculty Advisor and completion of the internship request form housed on the College's online platform for internships.

XXX-494 Internship in Departmental Area Explores a career area related to the sponsoring department. Application is submitted through C3: Creativity, Careers, Community, and supervision is provided by a faculty member in the department. A minimum of 140 hours on-site experience is required. P/NP basis only. Prerequisites: Consent of faculty supervisor and Career Services registration.

XXX-499 Summer Internship in Departmental Area Explores a career area related to the sponsoring department. Application is submitted through C3: Creativity, Careers, Community, and supervision is provided by a faculty member in the department. A minimum of 140 hours on-site experience is required. Offered in the Summer Term on P/NP basis only. Prerequisites: Consent of faculty supervisor and Career Services registration. (0.0 course credit)

12.4 RESEARCH

Research is completed during the academic year for 1.0 credit, or during the Summer Term for either 1.0 credit or 0.0 credit determined by the course registration. Research courses may be taken more than once with departmental approval. Departments will determine whether research credits count towards their majors, minors, and concentrations.

XXX-454 Research in Departmental Area Engages students in a research program designed and directed by a faculty member in the department. A minimum of 140 hours experience is required. P/NP basis only. Prerequisite: Consent of faculty supervisor.

XXX-459 Summer Research in Departmental Area Engages students in a research program designed and directed by a faculty member in the department. A minimum of 140 hours experience is required. Offered in the Summer Term on P/NP basis only. Prerequisite: Consent of faculty supervisor (0.0 course credit)

12.5 New York Term

Carson (Program Director)

New York Term is offered every other Spring Term in odd-numbered years. There is an extra fee for New York Term. All Coe financial aid applies, and students are eligible to apply for additional financial aid based on the additional costs of the term.

NYT-250 Fine Arts in New York City
Consists of five components: art, film, music, theatre, and dance. Students attend approximately 35 concerts, plays,

and dance performances and make frequent visits to museums, galleries, and artists' studios. Each of these events is accompanied by discussion and seminar sessions with members of the resident New York Term faculty. (Total of 2.0 course credits upon completion of the five components.)

NYT-444 Independent Study
A plan of study designed by the student in consultation with the student's faculty advisor, and supervised by the on-campus faculty advisor. Subject must be particularly appropriate for study in New York City. Prerequisite: consent of instructor. (Corequisite: NYT-394 for 1.0 credit.)

NYT-494 Internship in New York City Investigates a student's career interests through work or volunteer experience. The internship is supervised by a faculty member of the relevant department, in consultation with Coe's Center for Creativity and Careers. Normally earns 2.0 credits, but may be taken for 1.0 credits when combined with NYT-444.

12.6 Occasional Courses

Additional courses, not found in the Catalog, may be offered occasionally and serve one or more of the following purposes:

1. to provide the opportunity for research, creative, or other scholarly activity for an instructor jointly with interested students;
2. to explore and develop intellectual pursuits which are attractive to members of the faculty;
3. to respond to student requests for courses which are distinctive, unusual, or meet specific needs;
4. to bridge between two or more disciplines or curricular categories;
5. to serve as one means of developing and testing a possible permanent course.

The approved occasional courses include, but are not limited to, the courses listed under their respective departments and described as occasional. Additional approved occasional courses exist that are not listed in this catalog. Students should note that occasional courses do not necessarily count toward a given major or minor.

12.7 Skills Development

SKD-115 Summer Bridge Engages students in a one-week course that takes place prior to Fall Orientation. Students participate in two mini-classes taught by college faculty. Each mini-class is followed by small group discussions regarding course content, learning strategies, college expectations, etc. Additional workshop sessions are held throughout Summer Bridge on topics such as: financial literacy, campus resources, goal setting and academic planning. Summer Bridge also offers opportunities to make social connections through a variety of informal and planned activities. P/NP basis only. Prerequisite: admission to TRIO Student Support Services. (0.3 course credit)

SKD-120 Concepts of Individualized Learning Provides a weekly engagement with an academic coach to identify interests and explore strengths, applying this knowledge to the development of a personal academic plan. Topics include: learning strategies, self-regulation, personal and professional growth, goal setting, campus engagement and self-reflection. P/NP basis only. (0.0 course credit)

SKD-125 Learning Lab Focuses on developing constructive learning habits and techniques to achieve academic pursuits and foster lifelong learning. Units highlight a variety of study strategies, which students experiment with and apply to other courses in which they are concurrently enrolled. Results are presented through written, oral, or graphic reports that encourage collaboration and participation in educational communities. Designed for all levels of learners but may be particularly beneficial for first-year students and sophomores. P/NP basis only. (0.5 course credit)

SKD-130 Personal Finance for College Students A study of managing finances and making financial decisions that college students encounter. Areas of study for this project-oriented course include student loans, credit cards, savings and investments, cars, living on campus versus apartment living, savings needed for life immediately following graduation, and travel. Prerequisites: Admission to TRIO Student Support Services and consent of instructor. (0.5 course credit)

SKD-135 Library Research Methods Examines how students currently find, evaluate and use information, critically reflecting on how that information is shaped by political, cultural, and social forces. The course covers the following (1) selecting a manageable, research topic; (2) finding relevant background information on chosen topic using legitimate reference sources; (3) using databases: choosing an appropriate database; identifying keywords; effective search strategies; standardized (controlled) vocabulary; (4) evaluating print and electronic sources for impact, credibility, and point of view or bias; (5) understanding peer review and its role in scholarly communication; (6) Google and the free web; (7) YouTube and podcasts; (8) intellectual property and copyright; (9) visual literacy (10) academic integrity and plagiarism. Appropriate for all students who are interested in improving their research skills. (0.20 credits) (Offered an on occasional basis)

SKD-145 Strategies for Academic Success Connects students to college resources geared to individual academic goals. Through individualized assignments, students investigate and practice academic habits and skills that lead to academic success: time management, identifying and using resources, understanding academic expectations, applying effective study skills, and mastering college technology. Required for students on academic probation. Offered each term. Prerequisite: academic probation or provisional admission. (0.5 course credit)

SKD-150 Transfer Advisory Introduces transfer students to resources across Coe College, including digital tools, C3, Academic Tutoring and Coaching, the Writing Center, the Center for Health and Society, and Health and mental health resources. P/NP basis only. Prerequisite: first-term transfer student status. (0.2 course credit)

INT-100 Professionalism and Self Presentation Introduces students to the fundamentals of job-seeking strategies and professional expectations. Students are guided through development of professional materials, networking techniques, and interviewing skills. This course does not satisfy Coe's practicum requirement.

12.8 Washington Term

McNabb (Program Director)

WSH-284 Topics in Washington, D.C. Experiential learning, study, writing, and discussion dealing with various subjects related to the nation's capital. Examples of recent and proposed topics include Art and Architecture, Campaigns and Elections, Congressional Relations, and Politics and Communications.

WSH-286 Topics in Washington, D.C.: Non-Western Perspectives Same as Topics in Washington, D.C. (WSH-284) except the course focuses on topics related to non-Western cultures. Examples of recent and proposed topics include Globalization and the U.S.; and People, Politics and Cultures of the Middle East.

WSH-464 Washington Term Internship Seminar Group discussion of internship experiences. Students are exposed to various research methodologies, readings and guest speakers for understanding Washington politics. The goal of the course is to expose students to generalizations about politics and how their internships are either confirming or challenging those generalizations.

WSH-494 The Washington Experience Internship with an organization related to national or international politics in Washington, D.C., supervised by one of the resident staff of the Washington Term. Students establish learning goals and prepare a portfolio that documents their learning and places it in the larger context of the literature on American or international politics. P/NP basis only. One course credit may be counted toward a major in political science with consent of department, if credit has not already been received for Internship in Political Science (POL-494). (2.0 course credits)

13 DEPARTMENTAL PROGRAMS

13.1 Accounting, Managerial

See **?@sec-accounting**

13.2 Accounting, Public

See **?@sec-accounting**

13.3 African American Studies

Rodgers (Administrative Coordinator).

The African American Studies major offers students the opportunity to study African American culture through an interdisciplinary approach. Students take courses in areas such as literature, history, and sociology in order to gain a more complete understanding of the major figures and movements that helped define the culture.

13.3.1 African American Studies Major

A major in African American studies requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. AAM 107 Intro to African American Studies
2. AAM/ENG 137 African American Literature (WE)
3. HIS 347 African American History
4. **One** of the following:

    - HIS 145 History of United States to 1865
    - HIS 155 History of United States since 1865
    - HIS 227 American Civil War

5. **Five** additional courses, at least three of which are numbered 200 or above, chosen from the following:

    - **a.** Elective courses:
        - AAM 217 Sport and Black Culture
        - AAM 287 Topics in African American Studies
        - AAM 367 Studies in African American Lit
        - AAM 387 Adv Topics in African American Stud
        - AAM 447/457 Directed Studies in African American Studies
        - AAM 467 Seminar in African American Lit
        - AAM 494 Internship in African Am Studies
        - COM 236 Intercultural Communication
        - COM 257 Sex, Race, and Gender in the Media
        - EDU 187 Human Relations

  - HIS 145 History of United States to 1865
  - HIS 155 History of United States since 1865
  - HIS 227 American Civil War
  - MU 157 Introduction to Jazz History
  - SOC 247 Sociology of Race
- **b.** Elective courses (when topic is appropriate):
  These courses can count toward the major or minor as determined by the African American Studies administrative coordinator.
  - ARH 297 Topics in Art History: US Pluralism
  - COM 157 Introduction to Media Analysis
  - COM 161 Visual Rhetoric
  - COM 377 Language, Power, and Social Change
  - ENG 107 Exploring Literature:US Pluralism
  - ENG 207 Gender & Literature: US Pluralism
  - ENG 347 Modern/Contemp. American Literature
  - ENG 394 Directed Learning in English
  - HIS 297 Women in America
  - HIS 444 Independent Study
  - HIS 472 Seminar American History I
  - HIS 473 Seminar American History II
  - SOC 237 Topics in Sociology:U S Pluralism
  - SOC 464 Sociology Capstone
  - THE 488 Special Topics in THE/ FLM:DWP

6. AAM 444 Independent Study (completed during the senior year)

13.3.2 African American Studies Minor

1. AAM 107 Intro to African American Studies

2. AAM/ENG 137 African American Literature (WE)
3. HIS 347 African American History

4. **One** of the following:

- HIS 145 History of United States to 1865
- HIS 155 History of United States since 1865
- HIS 227 American Civil War

5. **Two** additional courses from either list **5a** or, when appropriate, **5b** as listed above for the major

13.3.3 COURSES IN AFRICAN AMERICAN STUDIES

AAM 107 Intro to African American Studies
What is African American culture, and what accounts for its cultural distinctions? This course introduces students to the study of African American culture and the field of African American Studies. through an interdiciplinary approach (literature, history, music, art and film) students will examine central themes and key debates pertinent to African American culture and history from its beginning to present.
AAM 137 African American Literature

Reading and discussion of the writings of African Americans, with emphasis on the 20th century. May include some relevant writings on African Americans by other groups. Study of the artistic values and of the social and cultural significance of these writings. May be taken more than once, with consent of African American Studies administrative coordinator, provided the topics are substantially different.

AAM 197 Tupac Shakur & Hip Hop Revolution Introduces students to Tupac Shakur. This course will examine one of the most influential personalities in Hip Hop music and Cultural History. Students will engage in his legacy (Son of a Black Panther) and the culture of Hip Hop, analyze poetic lyrics, and explore his life and death.

AAM 217 Sport and Black Culture

Examines through cultural analysis the complex relationships between sport and Black culture. This course addresses the way sport has evolved from being merely a physical activity to a cultural expression in Black communities. This course emphasizes the historical patterns and current conditions of Blacks; participation in sport through various articles, videos, and books. The course also examines how many Black people have used sport as a means of resistance, survival, and social mobility. Students learn to analyze cultural expression, to understand race and its continuing impact in American life, and to understand how various sports pursuits by Black athletes are invested with multiple meanings. Major topics and themes covered include: the concept of race, Black culture, the historical presence of Black athletes in sport, their current impact, and their dominance in certain sports.

AAM 227 Blackness & Identity in America

Gathers a wide range of scholarship about race and identity to explore what race is, why it matters, racial dynamics in organizations, and how best to address them. Students will explore questions of identity, privilege, ethnicity, gender, and class. In this course, "race" is reviewed as a shorthand for the interconnected complexity of race, ethnicity, culture, and color, and will be carefully analyzed to distinguish among such terms and ideas. Students will critically analyze the social construct and the popular understandings of race and identity as reinforced through cultural institutions. Students will understand and evaluate the foundational concepts and theories of race and identity and synthesize their knowledge through research, presentation, and writing.

AAM 287 Topics in African American Studies

Examines an important theme or subject specific to African American experiences and culture. Content varies and is determined by the instructor. Students learn to understand African American experiences in context, to analyze texts and events from multiple disciplinary perspectives, and to write in clear, analytical prose. May be taken more than once for credit, provided the topics are substantially different.

AAM 367 Studies in African American Lit

See also English (ENG-367), **?@sec-courses-in-english**

Course focuses on specific literary genres or time periods and functions as an intermediate course between the introductory African American Literature (AAM-/ENG-137) and the advanced English seminar (particularly Seminar in Literature: United States Pluralism (AAM-/ENG-467)). Students read and discuss both primary and secondary sources in an effort to gain a fuller understanding and appreciation of the artistic values and of the social and cultural significance of these writings. Specific topics vary from year to year. Possible topics include: African American Historical Fiction, African American Speculative Fiction, Literature of the Civil Rights Era, and the African American Bildungsroman. May be taken more than once, with consent of African American Studies administrative coordinator, provided the topics are substantially different. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or consent of instructor.

AAM 387 Adv Topics in African American Stud

Examines an important theme or subject specific to African American experiences and culture. Content varies and is determined by the instructor. Students learn to understand African American experiences in context, to analyze texts and events from multiple disciplinary perspectives, and to write in clear, analytical prose. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Introduction to African American Studies (AAM-107) or consent of instructor.

AAM 444 Independent Study

Study of individually chosen research topics in African American studies under the direction of a faculty member in the area. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites:

Introduction to African American Studies (AAM-107) or African American Literature (AAM-137); consent of African American Studies administrative coordinator and submission of a written proposal for a project.

AAM 447/457 Directed Studies in African American Studies

Study of selected topics and primary texts not available within the regular offerings. Prerequisite: two courses in African American studies. Registration by consent of instructor, after submission of a written project proposal. Conferences with instructor and papers are required. May be taken more than once for credit with consent of African American Studies administrative coordinator.

AAM 467 Seminar in African American Lit

Intensive study of selected works and subjects in African American literature. May be taken more than once, with consent of African American Studies administrative coordinator, provided the topics are substantially different. Prerequisites: junior standing and The Art of Literary Research (ENG-301). May be taken more than once.

AAM 494 Internship in African Am Studies

Exploration of a career area related to African American studies supervised by the African American Studies administrative coordinator in cooperation with the Internship Specialist. A minimum of 140 hours on-site experience is required. P/NP basis only. This course may count toward elective credit for a major or minor in African American studies with consent of African American Studies administrative coordinator. Prerequisite: junior standing.

13.4 Anthropology (Courses Only)

Fairbanks (Administrative Coordinator), Ziskowski

13.4.1 Courses in Anthropology

ANT 116 Cultural Anthropology

An introduction to cultural anthropology, presenting its place within the broader discipline of anthropology and outlining its characteristic methodological and theoretical approaches to the study of human life. The course emphasizes the diversity of approaches to common human experiences in a variety of cultural contexts.

ANT 125 Art & Archaeology Classical World

A survey of the art, architecture, and archaeological remains of the Greek and Roman civilizations from early Aegean Bronze Age cultures to the fall of the Roman empire.

ANT 208 Archaeological Field School

ANT-208 Archaeological Field School Engages in two key components in an interdisciplinary framework: 1) archaeological fieldwork and 2) study of Greece's history and culture through visits to sites in the region. The course takes place in Greece for four to six weeks (late May into early July). Students learn the methodological principles of archaeological fieldwork by participating in activities such as excavation, geophysical survey, and artifact analysis. In addition to work in the field, students receive an introduction to the history and culture of Greece through visits to major archaeological sites in the region. Prerequisite: consent of instructor.

13.5 Art and Visual Studies

Escobedo, Kunau, Morrow, Rogers (Chair)

A major in art or a minor in art, art history, or museum studies provides a foundation in theory and practice. Students focus on making, meaning, and gaining an understanding of visual and contextual history and analysis. In studying the formal, technical and conceptual aspects of art, students learn to communicate effectively with broad and diverse audiences.

An Art major may also complete an Art History minor or a Museum Studies minor, but only two courses may count toward both the major and the minors.

13.5.1 Art Major

A grade of "C" (2.0) or higher must be earned in all courses counted toward a major in art.

1. ARH 128 Introduction to Art History
2. **Two** 100-level ART- courses
3. ART 206 Professional Practice
4. **Two** of the following 300-level ART courses:
    - ART 340 Advanced 2D Research I
    - ART 345 Advanced 2D Research II
    - ART 350 Advanced Digital Research I
    - ART 355 Advanced Digital Research II
    - ART 360 Advanced 3D Research I
    - ART 365 Advanced 3D Research II
5. **One** additionl 200-level Art History course
6. ARH 307 Modern and Contemporary Art
7. ART 464 Seminar in Art & Visual Studies I
8. ART 474 Seminar in Art and Visual StudiesII **NOTE:** *Scheduling may be planned to allow at least one term of study off-campus at one of the approved foreign or domestic programs. With departmental approval, courses from these programs may count as 100- or 300-level courses.*

Students completing a major in Art may elect also to complete a Multimedia Graphic Design concentration. Courses taken to fulfill requirements in the Multimedia Graphic Design concentration.

To complete the Multimedia Graphic Design concentration, a student must meet the following requirements: 1. Completion of a major in Art. 2. Completion of five additional Multimedia Graphic Design courses. 3. A cumulative 2.0 GPA must be earned. 4. At least three of the five courses must be completed at Coe.

13.5.1.1 Multimedia Graphic Design Concentration in Art

Recommended courses in the art major: ART-104 Digital Photography, ART-145 Digital Studio, ART-350 Advanced Digital Research I and ART-355 Advanced Digital Research II, ARH-270 History of Design*

1. ART 363 Graphic Design Studio
2. ART 371 Typography and Design
3. ART 305 Advanced Topics in Graphic Design
4. ART 306 Branding for Non-Profits
5. ART 307 Motion Graphics

13.5.2 Art Minor

A grade of "C" (2.0) or higher must be earned in all courses counted toward a minor in art.

1. ARH 128 Introduction to Art History
2. **Two** 100-level ART- courses
3. **Two** of the following 300-level ART- courses
    - ART 340 Advanced 2D Research I
    - ART 345 Advanced 2D Research II
    - ART 350 Advanced Digital Research I

- ART 355 Advanced Digital Research II
- ART 360 Advanced 3D Research I
- ART 365 Advanced 3D Research II

4. **One** 200-level ARH- course

Further information for all these requirements and programs is available from the Art and Art History Department.

13.5.3 Courses in Art

100-level courses (*except ART-130, see below*) are open to any student and may offer the opportunity to explore two or more areas of art making in a studio environment. ART-130 Art in the Elementary Classroom does not satisfy any of the requirements for a major or minor in Art or Art History. It also does not count as a 100-level art course needed for some courses as a prerequisite.

ART 102 Sculpture: Material Investigations
Focuses on how material choices inform meaning. Students will use a variety of traditional and non-traditional materials to make sculptural art objects.
ART 103 Ceramic Sculpture
Provides instruction on the creation of hand-built ceramic sculptures. Projects will utilize pinch, coil building, soft and stiff slab construction, and additive and subtractive processes.
ART 104 Digital Photography
Introduces foundational techniques and processes of digital photography. Students explore the expressive potential of light, composition, and perspective while examining both the historical and contemporary issues associated with the practice. Course includes studio projects, lectures, assigned readings, class discussions, and critiques plus introductory-level instruction in DSLR cameras, light kits, Adobe Creative suite software.
ART 110 Installation Art
Creates art environments that offer a unique experience for the viewer. Projects will include research, planning, drafting, and exhibiting artistic creations in spaces across campus and throughout the local community. **ART 112 Screenprinting**
Utilizes silkscreen printing as a medium that can be integrated with photography, digital imagery, and three-dimensional objects. The course offers an exploration of the formal elements of design with an emphasis on the use of color. Coursework includes studio production, lectures, demonstrations, and critiques. **ART 115 Drawing**
Introduces a variety of drawing media, including graphite, charcoal, brush and ink, pastels, and collage. Students are challenged to observe the visual world around them and to respond to that observation with interpretive choices in mark-making and composition to produce visual expression. Media may include graphite, charcoal, brush and ink, pastels, and collage.
ART 125 Painting
Introduces paint media to represent, amplify, and interpret the world. Students are also encouraged to discover the possibilities of color, shape, texture and mark-making.
ART 135 Ceramics: Wheel-Throwing
Introduces a variety of ceramic wheel-throwing techniques utilized to design and produce ceramic arts. Includes an introduction to clay, glazes, and kilns.
ART 145 Digital Studio
Explores contemporary digital imaging and design. Students produce a series of studio projects ranging from digital photography, collage, gif animation, vector graphics, and two-dimensional design. Includes introductory-level instruction of digital cameras and Adobe Creative Suite: Lightroom, Photoshop, Illustrator.
ART 150 Time Based Media
Explores the aesthetic and experiential qualities of time. The course includes readings, discussions, and screenings of historical and contemporary works plus hands-on studio projects using video, sound, performance, installation, and more. Includes introductory-level instruction in digital cameras and Adobe Lightroom and Premiere Pro.

Through media production, students cultivate a range of technical skills plus a critical understanding of media culture.

ART 175 Printmaking

Focuses on traditional and contemporary printmaking techniques, introducing students to the fundamentals of materials including paper, ink, presses, and image processing. This course explores the development of technical, compositional, and conceptual skills through the evolution of printmaking's history of multiplicity.

ART 191 Topics in Studio Art

Focuses on a specific theme or topic. Topics vary. May be taken more than once for credit, provided the topics are substantially different.

ART 206 Professional Practice

Prepares students for advanced work in ART-464 Seminar in Art and Visual Studies. Art Majors will prepare portfolio materials, including an artist's statement, biography, and resume. Students will also learn how to exhibit and photograph their artwork, create an artist's website, price artwork, and manage an artist's inventory. This course is offered yearly in the fall. Prerequisites: Art Major and Sophomore or Junior Standing, consent of instructor.

300-level courses offer students the opportunity to expand their technical and conceptual skills at a more advanced level.

ART 305 Advanced Topics in Graphic Design

Focuses on a specific advanced theme or topic in graphic design. Topics vary. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: ART-145 Digital Studio or consent of instructor.

ART 306 Branding for Non-Profits

Branding for Non-Profits Introduce students to the process of creating brand identity for non-profit organizations. Through class assignments, client interactions, readings, and discussions, students will develop effective design solutions using design principles. Prerequisite: Digital Studio (ART-145) **ART 307 Motion Graphics**

Motion Graphics Students learn how to combine animation, graphic design, and typography to create dynamic, time-based visual content. After Effects will be used to teach students how to animate logos, create kinetic typography, and create motion graphics for advertising. Prerequisite: ART-145 Digital Studio **ART 330 Methods of Teaching Art K-12**

Includes discussion, lecture, and studio work on campus, as well as experience in public school classes off-campus. Designed principally for prospective art teachers. This course does not satisfy the College's general education fine arts core group requirement nor does it satisfy major or minor requirements or prerequisites for Art or Art History. Prerequisite: art major or minor and admission to the Education Program. **ART 340 Advanced 2D Research I**

Focuses on the conceptual, aesthetic, and technical skills necessary to create more advanced and sophisticated artworks. Designed to build upon the foundations provided in beginning-level work in one of the following prerequisite courses: ART-115 Drawing, ART-125 Painting, ART 175 Printmaking. **ART 345 Advanced 2D Research II**

Focuses on the conceptual, aesthetic, and technical skills necessary to create more advanced and sophisticated artworks. Designed to build upon the foundations provided in ART 340 Advanced 2D Research I. Prerequisite: ART 340 Advanced 2D Research I. **ART 350 Advanced Digital Research I**

Focuses on the conceptual, aesthetic, and technical skills necessary to create more advanced and sophisticated artworks. Designed to build upon the foundations provided in beginning-level work in one of the following prerequisite courses: ART 145 Digital Studio, ART 150 Time-Based Media, ART 104 Digital Photography. **ART 355 Advanced Digital Research II**

Focuses on the conceptual, aesthetic, and technical skills necessary to create more advanced and sophisticated artworks. Designed to build upon the foundations provided in ART 350 Advanced Digital Research I. Prerequisite: ART 350 Advanced Digital Research I. **ART 360 Advanced 3D Research I**

Focuses on the conceptual, aesthetic, and technical skills necessary to create more advanced and sophisticated artworks. Designed to build upon the foundations provided in beginning-level work in one of the following prerequisite courses: ART-135 Ceramics: Form, Function, and Meaning; ART-103 Ceramic Sculpture; ART-102

Sculpture: Material Investigations; ART-110 Installation Art. **ART 363 Graphic Design Studio**
Introduces foundational concepts and practices applied in the visual communications industry. Students design projects using both traditional materials and Adobe Creative Suite software Prerequisite: Digital Studio (ART-145), or Workshop, or consent of instructor. **ART 365 Advanced 3D Research II**
Focuses on the conceptual, aesthetic, and technical skills necessary to create more advanced and sophisticated artworks. Designed to build upon the foundations provided in ART 360 Advanced 3D Research I. Prerequisite: ART 360 Advanced 3D Research I **ART 371 Typography and Design**
Investigates the history, theory and practice of letterforms and typography in graphics, advertising, design and visual communication. Projects address principles of typography, letter structure, typeface selection, fundamentals of computer typesetting, and typographic layout. Prerequisite: Digital Art (ART-145), or Workshop:Digital Toolbox (WKS-204), or Workshop: Vector Graphics (WKS-213), or consent of instructor. **ART 391 Advanced Topics in Studio Art**
Focuses on a specific advanced studio art specific theme or topic. Topics vary. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: any 100-or-200 level ART-course or consent of instructor. **ART 394 Directed Learning in Art**
Investigates a topic in studio art selected by the student and instructor to fit the student's particular interests and educational needs. May be taken more than once for credit. Prerequisites: junior standing and consent of department chair. **ART 444 Independent Study in Art**
Focuses on a topic for independent work on a selected project under the direction of a faculty member of the department. Prerequisite: consent of instructor. **ART 464 Seminar in Art & Visual Studies I**
Prepares students for advanced research in studio art. Emphasis is on preparation of work toward the senior exhibit. Only art majors are admitted to this course. Materials fee (where applicable) should be discussed with instructor. Prerequisite: declared major in art and successful completion of two 100-level ART courses, two 200-level ART courses one of which could be the ART/MS Arts Advocacy course, and one 300-level ART course. **ART 474 Seminar in Art and Visual StudiesII**
Seminar in Art and Visual Studies II & Thesis Exhibition

Prepares students for advanced research in studio art. Emphasis is on the preparation of work toward the senior exhibit. Only art majors are admitted to this course. Materials fee (where applicable) should be discussed with instructor. Prerequisite: successful completion of Seminar in Art and Visual Studies I (ART-464). **ART 494 Internship in Art**
Investigates an area of interest related to the major, through voluntary field placement supervised by a faculty member of the art and art history department. A minimum of 140 hours on-site experience is required. P/NP basis only. Prerequisites: declared major in art, junior standing, and consent of department chair.

13.5.4 Art History Minor

A grade of "C" (2.0) or higher must be earned in all courses counted toward a minor in art history. An Art History minor may also complete an Art major, Art minor, or Museum studies minor, but only two courses may count toward both the major and the minors.

1. ARH 128 Introduction to Art History
2. **Three** additional Art History courses. One must be ARH-200 or above. One may be a course from the following list:

    - ANT 125 Art & Archaeology Classical World
    - HIS 318 Topics in History :Div West Persp
    - COM 161 Visual Rhetoric
    - COM 257 Sex, Race, and Gender in the Media
    - MS 105 History of Museums

3. ARH 307 Modern and Contemporary Art
4. **One** 100- or 300-level ART- course

13.5.5 Courses in Art History

ARH 106 World Art
Traces key themes in art from a global perpective, focusing on the ways that cultures and civilizations across time have visually expressed social, religious and political values. Cross-cultural themes may include: religion and spirituality, word and image, violence and death, power and propaganda, gender and society, parks and memorials, and ritual and body decoration. **ARH 107 Gender and Art**
Explores of the ways in which visual culture reflects and projects cultural biases and issues related to gender from prehistory to the modern era. Analyzes how gender identities can be shaped by politics, religion, and culture, as well as the effect of an artist's sex and/or sexual preferences on subject choices, media, and market values. **ARH 128 Introduction to Art History**
Examines Western art and architecture from prehistory to the later 19th century, with emphasis on the ways in which visual culture both reflects and shapes societies and civilizations. Explores how works of art create and sustain meaning for their original audiences, and how some objects or visual solutions transcend their historical moment and surface throughout time as familiar cultural icons or references. **ARH 191 Topics in Art History**
Focuses on a selected topic or theme in art history or visual culture. Topics vary. May be taken more than once for credit, provided the topics are substantially different. **ARH 201 Art of the Middle Ages**
Explores the art and architecture of the medieval world both chronologically and thematically. The course examines issues such as patronage of the arts, pilgrimage, the cult of saints, the arts as a medium of cultural exchange, and the role of the artist in the Middle Ages. Prerequisite: Introduction to Art History (ARH-128) or consent of instructor. **ARH 218 The World of Renaissance Art**
Explores the visual culture of Europe from the 14th through the 16th centuries, focusing on topics such as competition, display, devotion, portraits, the printing revolution, death, and gender issues. Prerequisite: Introduction to Art History (ART-128) or consent of instructor. **ARH 231 Romanticism, Realism, Impressionism**
Focuses on the sweeping transformations in the creation, production and consumption of visual culture in the 19th century. The rapidly changing aesthetics of the dawning modern era generated passionate debates about the creation and reception of art during this period. This course uses these debates as a series of touchstones for understanding the visual and social landscape of the times. Prerequisite: Introduction to Art History (ARH-128) or consent of instructor. **ARH 248 Baroque, Rococo, and Neoclassicism**
Focuses on a thematic exploration of the major art movements in the 17 th and 18th centuries, emphasizing the pendulum swings of artistic practice, exploration, and institutional hierarchies. Inclusion of cultural phenomena—the Grand Tour, the Enlightenment, revolutions, and the establishment of academies—factor heavily in this course. Prerequisite: Introduction to Art History (ARH 128) or consent of instructor. **ARH 268 History of Architecture**
Investigates major monuments of architectural history from prehistory to the present day, with an emphasis on formal and conceptual concepts. Key figures, theories, innovations, and functions (both original and altered throughout time) are also discussed. Prerequisite: Introduction to Art History (ARH 128) or consent of instructor. **ARH 270 History of Design**
Discusses the who, what, and when of design practice from the eighteenth century to the present day. Good and innovative design produces creative solutions for a variety of complex social situations; therefore, works by major designers of applied, industrial, and the craft arts will be studied within their historical and cultural contexts. **ARH 296 Topics in Art History:Global Persp**
Focuses on a selected topic or theme in art history. Topics vary. May be taken more than once for credit, provided the topics are substantially different. different. Prerequisite: Introduction to Art History (ARH-128) or consent of instructor. **ARH 297 Topics in Art History: US Pluralism**
Examines a selected topic or theme in art history. Topics vary. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Introduction to Art History (ARH-128) or consent of instructor.

ARH 307 Modern and Contemporary Art
Traces the development of major artistic movements in the 20th centrury to the more contemporary trends of the 21st century. Topics include: Post-Impressionism, Cubism, Futurism, Surrealism, German Expressionism, Dada, Pop Art, Minimalism, Conceptual Art, Postmodernism, installation, new media, performance, and digital production and distribution. Prerequisite: Introduction to Art History (ARH-128) and a 200-level ARH- course or consent of instructor. **ARH 391 Advanced Topics in Art History**
Focuses on an advanced study of a selected topic or theme in art history. Topics vary. May be taken more than once for credit, provided the topics are substantially different. Prerequisites: Introduction to Art History (ARH-128) and a 200-level ARH- course or consent of instructor. **ARH 394 Directed Learning in Art History**
Investigates topics in art history selected by the student and instructor to fit the student's particular interests and educational needs. May be taken more than once for credit. Prerequisites: junior standing and consent of department chair. **ARH 444 Independent Study: Art History**
Focuses on independent work on a selected project under the direction of a faculty member of the Art and Art History department. Prerequisite: consent of instructor. **ARH 494 Internship in Art History**
Investigates an area of interest related to the major, through voluntary field placement supervised by a faculty member of the Art and Art History department. A minimum of 140 hours on-site experience is required. P/NP basis only. Prerequisites: declared major in art history, junior standing, and consent of department chair.

13.6 Asian Studies

Nordmann (Administrative Coordinator)

The Asian Studies program is designed to acquaint students with the great cultures of Asia, primarily those of China, India and Japan.

13.6.1 Asian Studies Major

A major in Asian studies requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

The major is interdisciplinary and requires that the students take courses in the areas of art history, history, literature, and religion, and suggests that they also take courses in economics, music, and political science.

1. **One** of the following:

- ASC 186 Modern South Asia
- HIS 136 East Asian Civilization

2. Participation in one overseas study program in Asia:

- a Coe foreign exchange program (Chiang Mai University or Rangsit University of Thailand, Nagoya-Gakuin University of Japan, Kongju National University or Sookmyung University in South Korea, or Jinan University in China)
- Coe's Asia Term (see **?@sec-asia-term**)

3. **Four** courses, chosen from the following, in consultation with the Asian Studies administrative coordinator:

- ASC 106 May Experiential Term in Asia
- ASC 176 China and Japan
- ECO 436 Econ Development **or** ECO 446 International Econ
- HIS 217 American War in Vietnam
- HIS 246 History of Modern China
- HIS 256 History of Modern Japan

- HIS 316 Topics in History:Non-Western Persp (when appropriate)
- HIS 466 Seminar Modern East Asian History
- JPN 115 Elementary Japanese I
- JPN 125 Elementary Japanese II
- JPN 215 Intermediate Japanese I
- JPN 225 Intermediate Japanese II
- PHL/REL 206 Buddhist Thought (WE)
- POL 286 Asian Politics
- REL 106 Eastern Religions
- A second term of an overseas study program

13.6.2 Asian Studies Minor

1. **One** of the following:

- HIS 316 Topics in History:Non-Western Persp
- ASC 186 Modern South Asia

2. **Five** courses, chosen from the following, in consultation with the Asian Studies administrative coordinator:

- ASC 176 China and Japan
- ECO 436 Econ Development **or** ECO 446 International Econ
- HIS 217 American War in Vietnam
- HIS 246 History of Modern China
- HIS 256 History of Modern Japan
- HIS 316 Topics in History:Non-Western Persp (when appropriate)
- HIS 466 Seminar Modern East Asian History
- JPN 115 Elementary Japanese I
- JPN 125 Elementary Japanese II
- JPN 215 Intermediate Japanese I
- JPN 225 Intermediate Japanese II
- PHL/REL 206 Buddhist Thought (WE)
- POL 286 Asian Politics
- REL 106 Eastern Religions

13.6.3 Courses in Asian Studies

ASC 106 May Experiential Term in Asia
Examines experientially the fast-changing nation of Vietnam through three weeks of study and travel in the country. Students will investigate and evaluate the contemporary nation, as well as the history and memory of its wartime experiences, through readings, written work, class discussions, and visits to important historical and cultural landmarks. Through these varied experiences, students will deepen their understandings of the cultural skills involved in overseas travel, the cultural differences and commonalities that shape human experiences, and the specific knowledge of Vietnam's culture and history.
ASC 176 China and Japan
An interdisciplinary examination of themes and ideas central to understanding the cultures of China and Japan. Materials used include primary texts in Taoism, Confucianism, and Buddhism, as well as works of poetry, fiction, and visual art.
ASC 186 Modern South Asia
India, Pakistan, Bangladesh, and Sri Lanka from a modern perspective. The preoccupation with identity, the

reemergence of caste and religious conflicts, the strengths and weaknesses of political and economic development, and the implication of trends for the future. Includes selected topics on culture and history that provide insights to understanding the present.

ASC 216 History of Modern Korea (WE)

See **?@sec-history**

13.7 Aviation Studies and Flight Operations (Courses Only)

Carstens (Administrative Coordinator)

Coe's aviation program includes flight operations courses and aviation studies courses. Students wishing to become qualified as professional pilots will complete a Business major with a Flight Operations concentration (see p. 82). These students will earn pilot certificates and ratings as part of their four-year degree. The flight operations courses may be taken by only those students who have been admitted into Coe's aviation program. (Please contact the Coe College Office of Admission to learn how to apply to Coe's aviation program and for more details about the program and its requirements.) Students wishing to learn about the aviation industry with a goal of working in an aviation-related field such as aviation studies or safety and compliance may choose to complete a Business major with an Aviation Studies concentration (see p. 82).

13.7.1 Aviation Studies Courses

See the Aviation Studies Concentration and the Flight Operations Concentration, Business Administration (p. 81)

AVS 101 Introduction to Aviation

Introduces a variety of aviation topics ranging from the development of air transportation to the complexities of the aviation industry today. Students study the structure of and the players in the industry, along with specific operational areas and the macro- and microenvironmental factors that affect these operations. Specific topics include the birth of the aviation industry, aircraft manufacturing and maintenance, aviation operations, aviation regulation, aviation safety and security, air traffic control, contemporary challenges facing the commercial aviation sector, and careers in aviation. Prerequisite: admission into the aviation program.

+++MISSING INFO: c.avs201_201L.long +++

+++MISSING INFO: c.avs201_201L.desc +++

AVS 250 Topics in Aviation

Focuses on a major topic related to aviation and flight operations. in aviation management. Example topics: crew resource management, air traffic management, aviation security, crisis management, and advanced meteorology. May be taken more than once for credit, with consent of aviation management & flight operations administrative coordinator, provided the topics are substantially different. Prerequisite: Introduction to Aviation Management (AVS-101) or consent of instructor.

AVS 301 Applied Aerodynamics

Examines the principles of aerodynamic forces and their impact on aircraft performance and limitations. This course covers a broad spectrum of topics, including longitudinal, lateral, and directional stability and control, as well as low-speed and high-speed aerodynamics. The course also explores how these principles relate to transport design characteristics. Upon successful completion of the course, students will have a solid understanding of aerodynamic principles and their application in the field of aviation. They will be able to analyze and interpret aerodynamic forces and their effects on aircraft performance, stability, control, and design, preparing them for further study or roles within the aerospace industry. Prerequisite: Introduction to Aviation (AVS-101).

AVS 302 Human Factors

Focuses on management principles as they relate to effective decision-making and safety issues in aviation. Topics include decision-making theory, contingency theory, group dynamics, teamwork, communication, workload management, crew resource management, and risk management, all in aviation settings. This course counts as an

elective in the Business Administration major. Prerequisites: Introduction to Aviation (AVS101) and Principles of Management (BUS-250).

AVS 315 Aviation Law

Provides a strong foundation for understanding the legal and regulatory framework governing civil aviation in the United States legal system, including FAA regulations regarding pilots and flight operations across all certificate levels. The course includes constitutional, administrative, liability, criminal, contract and international law. It covers topics such as safe operating practices, airport operations, NTSB accident reporting, and procedures in the National Airspace System. Basic principles of tort law and risk management as related to aviation operations and organizations are covered. Prerequisite: Introduction to Aviation (AVS-101) or consent of instructor.

AVS 394 Directed Learning in Aviation

Examines a topic in aviation not regularly offered through existing courses. Students work independently with a Coe instructor in aviation. Registration only after the student and instructor have agreed on the topic and goals of the course. Prerequisite: consent of administrative coordinator of aviation management & flight operations.

AVS 401 Aviation Seminar

Provides aviation students with the opportunity to synthesize and apply their learning to real-world aviation issues. This course builds on the information learned in earlier courses, particularly aviation law, aviation safety, and human factors. This course counts as an elective in the Business Administration major. Prerequisite: senior standing in the aviation program or consent of instructor.

AVS 402 Aircraft Systems

Introduces students to basic study of aircraft systems and components at the technical level. The course examines reciprocating and turbine engines; avionics systems; anti/de-icing systems; propellers; landing gear; pressurization; and the electrical, fuel, hydraulics, lubricating, cooling, instrumentation, and flight control systems associated with today's aircraft. Prerequisite: Introduction to Aviation (AVS-101) or consent of instructor.

AVS 403 Aviation Safety

AVS-403 WE Aviation Safety Examines a variety of aviation safety topics and the roles of pilots, other aviation professionals, various agencies such as the Federal Aviation Association and the National Transportation Safety Board, and others in aviation safety. Specific topics include risk assessment and management; incident/accident prevention, causes, investigation procedures, analysis, and trends; air traffic control; and the use of technology in safety systems. Students learn relevant terminology, procedures, and regulations/codes, aided by discussion of real world examples and case studies. Prerequisite: Introduction to Aviation (AVS-101) or consent of instructor.

AVS 494 Internship in Aviation Studies

Investigates a career area related to aviation studies. Supervised by a faculty member of the department. A minimum of 140 hours of on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a concentration in aviation studies or a concentration in flight operations. Prerequisites: junior standing and consent of supervising instructor.

13.7.2 Flight Operations Courses

All flight operations courses require admission into Coe's aviation program and a minimum grade of C (2.0) in each flight operations course before beginning the next level course. Students pursuing the Flight Operations concentration in Business Administration must complete all of the courses listed as Required Flight Operations Courses. Students may opt to take courses listed as Additional Flight Operations Courses.

Require Flight Operations Courses:

- AVI-111
- AVI-121
- AVI-131
- AVI-211
- AVI-221

- AVI-231
- AVI-311
- AVI-321
- AVI-331
- AVI-341
- AVI-411
- AVI-421

Additional Flight Operations Courses:

- AVI-240
- AVI-394
- AVI-431
- AVI-441
- AVI-494

AVI 111 Private Pilot Ground
AVI-111 Private Pilot Ground Prepares students for the Federal Aviation Administration knowledge exam for a private pilot certificate. The course provides a minimum of 35 hours of ground instruction, consistent with Part 141 requirements. Topics include aerodynamics, airplane systems, airspace communications, Federal Aviation Regulations, navigation, aircraft performance, aeronautical decision-making, flight planning and flight physiology. Prerequisites: Admission into the aviation program and current medical certificate. (0.75 course credit)
AVI 121 Private Pilot Lab 1
AVI-121 Private Pilot Lab 1 Provides, along with AVI-131: Private Pilot Lab 2, the knowledge and skills necessary to prepare for the Federal Aviation Administration private pilot practical exam. This lab begins students' Part 141 private pilot flight training which requires a minimum of 35 hours of flight training, with a minimum of 20 hours of dual instruction, with an FAA certificated flight instructor. P/NP basis only. Prerequisites: Private Pilot Ground (AVI-111) (or concurrent registration), current medical certificate, and airport security clearance. (0.5 course credit)
AVI 131 Private Pilot Lab 2
AVI-131: Private Pilot Lab 2 Continues students' Part 141 private pilot flight training which, combined with AVI-121, provides a minimum of 35 hours of flight training, with a minimum of 20 hours of dual instruction, with an FAA certificated flight instructor. This course continues students' preparation for the Federal Aviation Administration private pilot practical exam. P/NP basis only. Prerequisites: Private Pilot Ground (AVI-111), Private Pilot Lab 1 (AVI-121), current medical certificate, and airport security clearance. (0.25 course credit)
AVI 211 Instrument Pilot Ground
AVI-211 Instrument Pilot Ground Prepares students for the Federal Aviation Administration knowledge exam for an instrument rating. The course provides a minimum of 30 hours of ground instruction, consistent with Part 141 requirements. Topics include Federal Aviation Regulations, air traffic control procedures, instrument navigation and approach procedures, weather considerations, and others needed to understand safe instrument navigation. Prerequisites: Current private pilot certificate, current medical certificate, and airport security clearance. (0.75 credit)
AVI 221 Instrument Pilot Flight Lab 1
AVI-221 Instrument Pilot Flight Lab 1 Provides, along with AVI-231: Instrument Pilot Flight Lab 2, the knowledge and skill necessary to prepare for the Federal Aviation Administration instrument rating practical exam. This lab begins students' Part 141 instrument flight training which requires a minimum of 35 hours of flight training with a certificated flight instructor. P/NP basis only. Prerequisites: Instrument Pilot Ground (AVI-211) (or concurrent registration), current private pilot certificate, current medical certificate, and airport security clearance. (0.5 course credit)
AVI 231 Instrument Pilot Flight Lab 2
AVI-231 Instrument Pilot Flight Lab 2 Continues students' Part 141 instrument rating training which, combined

with AVI-221: Instrument Pilot Flight Lab 1, provides a minimum of 35 hours of flight training with an FAA certificated flight instructor. This course continues students' preparation for the Federal Aviation Administration instrument rating practical exam. P/NP basis only. Prerequisites: Instrument Pilot Ground (AVI-211), Instrument Pilot Flight Lab 1 (AVI-221), current private pilot certificate, current medical certificate, and airport security clearance. (0.25 course credit)

AVI 240 Career Explor: Flight Operations

Explores career opportunities in aviation. Students learn about the skills, experiences, and certifications needed to pursue different career paths. May involve networking or job shadowing. P/NP basis only. Prerequisite: Introduction to Aviation Management (AVS-101) (.25 course credits)

AVI 311 Commercial Pilot Ground

AVI-311 Commercial Pilot Ground Prepares students for the Federal Aviation Administration knowledge exam for a commercial pilot certificate. The course provides a minimum of 35 hours of ground instruction, consistent with Part 141 requirements. Topics include commercial pilot Federal Aviation Regulations, advanced meteorology, advanced airplane systems, advanced radio navigation, advanced weather, aeronautical decision making, and other advanced aeronautical topics needed for commercial privileges. Prerequisites: Current private pilot certificate with instrument rating, current medical certificate, and airport security clearance.

AVI 321 Commercial Pilot Lab 1

AVI-321 Commercial Pilot Lab 1 Provides, along with AVI-331: Commercial Pilot Lab 2, the knowledge and skill necessary to prepare for the Federal Aviation Administration commercial certificate practical exam. This lab begins students' Part 141 commercial flight training which requires a minimum of 120 hours of flight training, with at least 55 hours of dual instruction, with a certificated flight instructor. P/NP basis only. Prerequisites: Commercial Pilot Ground (AVI-311) (or concurrent registration), current private pilot certificate with instrument rating, current medical certificate, and airport security clearance. (0.5 course credit)

AVI 331 Commercial Pilot Lab 2

AVI-331 Commercial Pilot Lab 2 Continues students' Part 141 commercial pilot training which, combined with AVI-321: Commercial Pilot Lab 1, provides a minimum of 120 hours of flight training flight training, with at least 55 hours of dual instruction, with a certificated flight instructor. This course continues students' preparation for the Federal Aviation Administration commercial certificate practical exam. P/NP basis only. Prerequisites: Commercial Pilot Ground (AVI-311), Commercial Pilot Lab 1 (AVI-321), current private pilot certificate with instrument rating, current medical certificate, and airport security clearance. (0.5 course credit)

AVI 341 Commercial Multi-Engine Lab

AVI-341 Commercial Multi-Engine Lab Provides students with the training needed to prepare for the Federal Aviation Administration multi-engine commercial rating practical exam. This lab includes instruction in multi-engine operation, emergency procedures, airplane systems, and other topics needed to prepare for the multi-engine rating. Flight instruction with an FAA certificated flight instructor helps students gain the level of proficiency required to pass the practical test. P/NP basis only. Prerequisites: Current commercial certificate, current medical certificate, and airport security clearance. (0.5 course credit)

AVI 394 Directed Learning: Flight Lab

AVI-394 Directed Studies: Flight Lab Provides an opportunity for aviation flight operations students to complete fight hours that are not associated with other more specific flight lab courses. Students work independently with a Coe instructor. Registration only after the student and instructor have agreed on the flight-related goals of taking the course. May be taken more than once for credit with consent of Aviation Management & Flight Operations administrative coordinator. P/NP basis only. Prerequisite: consent of administrative coordinator of aviation management & flight operations. (0.0-1.0 course credits)

AVI 411 Flight Instructor Ground

AVI-411 Flight Instructor Ground Prepares students for the Federal Aviation Administration knowledge exam for a flight instructor certificate. This course includes instruction on teaching strategies, learning styles, evaluation techniques, and flight instructor responsibilities as well as relevant aeronautical knowledge. Prerequisites: Current commercial pilot certificate, current medical certificate, and airport security clearance.

AVI 421 Flight Instructor Lab

AVI-421 Flight Instructor Lab Provides the knowledge and skill necessary to prepare for the Federal Aviation Administration flight instructor certificate practical exam. This lab includes flight instruction in teaching techniques, evaluation techniques, and other relevant areas. P/NP basis only. Prerequisites: Current medical certificate, airport security clearance, Flight Instructor Ground (AVI-411) (or concurrent registration), and consent of instructor. (0.5 course credit)

AVI 431 Flight Instructor Instrument

AVI-431 Flight Instructor Instrument Designed to prepare students for the Federal Aviation Administration (FAA) instrument instructor rating knowledge and practical exams. Students acquire the knowledge and skills needed to teach others how to fly in instrument meteorological conditions. P/NP basis only. Prerequisites: Current flight instructor certificate, current medical certificate, and airport security clearance. (0.5 course credit)

AVI 441 Multiengine Instructor

Designed to prepare students for the Federal Aviation Administration (FAA) multi-engine instructor rating practical exam. Students acquire the knowledge and skills needed to teach others how to fly multi-engine airplanes. P/NP basis only. Prerequisites: Current flight instructor certificate, current medical certificate, and airport security clearance. (0.5 course credit)

AVI 494 Internship in Flight Operations

AVI-494 Internship in Flight Operations Investigates a career area related to flight operations. Supervised by a faculty member of the department. A minimum of 140 hours of on-site experience is required. P/NP basis only. Prerequisites: junior standing and consent of the supervising instructor.

13.8 Biochemistry (Collateral Major)

Stead (Administrative Coordinator).

13.8.1 Collateral Major in Biochemistry

A major in biochemistry requires a minimum cumulative 2.0 GPA in all courses counted toward the major. Concurrent completion of a primary major in chemistry, including Calculus II and two General Physics courses is required. Students choosing a collateral major in biochemistry may not select a concentration in molecular biology.

1.BIO 145/145L Cellular and Molecular Biology and Laboratory (WE)
2.CHM 431/431L Biochemistry and Laboratory
3.CHM 432/432L Protein Biochemistry and Laboratory
4.**Two** of the following: - BIO 325/325L Microbiology (WE) and Laboratory
- BIO 345/345L Techniques in Molecular Biology and Laboratory
- BIO 405 Current Topics in Molecular Biology
- BIO 435/435L Cell Physiology and Laboratory

Genetics (BIO-235) and Laboratory (BIO-235L) and all of the courses under #4 are strongly encouraged, especially for those planning graduate study.

13.9 Biology

R. Christensen, Cozine, Ellis, Heintzman, Keyes, Leonardo (Administrative Coordinator, Molecular Biology), Leveille, Mitchell, Storer (Chair)

In addition to a major or minor in biology, the department also offers a collateral major in **Neuroscience (see p. 169) along with Concentrations in Environmental and Ecological Science, Molecular Biology, and Pre-Health Sciences**. The biology program provides students with an early introduction to experimental design

and use of instrumentation to investigate properties of cells and organisms. Opportunities to work one-on-one with faculty, in honors and independent study work or in research participation, is also available to students.

13.9.1 Biology Major

A major in biology requires a minimum cumulative 2.0 GPA over courses counted toward the major.

1. BIO 145/145L Cellular and Molecular Biology and Laboratory (WE)
2. BIO 155/155L Organismal and Ecological Biology and Laboratory (WE)
3. BIO 202 Topics in Evolution
4. BIO 235/235L Genetics and Laboratory
5. **Four** biology electives with the associated laboratories
6. CHM 121/121L General Chemistry I and Laboratory
7. CHM 122/122L General Chemistry II and Laboratory
8. **One** of the following:
    - MTH 135 Calculus I (strongly recommended for students considering attending graduate school)
    - STA 100 Statistical Reasoning I-Foundations **and** STA 110 Stats IIA: Inferential Reasoning
    - STA 100 Statistical Reasoning I-Foundations **and** STA 130 Stats IIB: Experimental Design
9. Attendance at research seminars in junior and senior years

Strongly recommended:

One of the following sequences:

- PHY 165/165L Basic Physics I & Laboratory and PHY 175/175L Basic Physics II & Laboratory
- PHY 185/185L General Physics I & Laboratory and PHY 195/195L General Physics II & Laboratory

With consent of the department chair, other chemistry or mathematics courses may be substituted.

13.9.2 Concentrations in Biology

Students completing a major in Biology may elect to also complete a concentration of courses within a specific discipline in the major. Courses taken to fulfill requirements in the biology major may be used to also fulfill requirements in an area of concentration. Students may declare only one concentration.

Concentrations are offered in environmental and ecological science, molecular biology, and pre-health science. To complete a concentration, a student must meet the following requirements: 1. Completion of a major in Biology 2. Completion of, at most, six additional courses in which a cumulative 2.0 GPA must be earned. At least three of the additional courses must be completed at Coe.

Environmental and Ecological Science Concentration
1. CHM 211/211L Analytical Chemistry and Laboratory (WE)
2. MTH 135 Calculus I
3. **Three** of the following (with two being at the 300 level or higher):
- BIO 104 Biodiversity
- BIO 111/111L Urban Ecology
- BIO 115 Marine Biology
- BIO 203 Northwoods Ecology
- BIO 205/205L General Botany and Laboratory (WE)
- BIO 275/275L Aquatic Ecology and Laboratory
- BIO 285/285L Animal Behavior and Lab
- BIO 295/295L Spatial Ecology and Laboratory (WE)
- BIO 303/303L Advanced Topics in Ornithology and Laboratory
- +++MISSING INFO: c.bio335_335l.long +++
- BIO 355/355L Animal Physiology and Laboratory
- BIO 365/365L Comparative Chordate Anatomy and Laboratory
- BIO 385/385L Behavior and Ecology of Vertebrates
- BIO 425/425L Ecology and Laboratory (WE)
- BIO 455/455L Molecular Neurobiology and Laboratory
- BIO 454 Research Participation

Molecular Biology Concentration *
1. BIO 345/345L Techniques in Molecular Biology and Laboratory
2. CHM 221 Organic Chemistry I
3. **Three** of the following:
- BIO 325/325L Microbiology (WE) and Laboratory
- BIO 405 Current Topics in Molecular Biology
- BIO 415/415L Developmental Biology and Laboratory
- BIO 435/435L Cell Physiology and Laboratory
- BIO 455/455L Molecular Neurobiology and Laboratory
- BIO 465/465L Integrated Human Anatomy and Laboratory
- BIO 454 Research Participation
- CHM 321 Organic Chemistry II*
- CHM 431/431L Biochemistry and Laboratory*
- CHM 432/432L Protein Biochemistry and Laboratory*

Pre-Health Sciences Concentration *
1. BIO 375/375L Integrated Human Physiology and Laboratory
2. BIO 315/315L Conservation and Ecology of Mammals and Laboratory
3. HSS 300 Learn Strategies Health Profess
4. **Three** of the following:
- BIO 325/325L Microbiology (WE) and Laboratory
- BIO 415/415L Developmental Biology and Laboratory
- BIO 435/435L Cell Physiology and Laboratory
- BIO 455/455L Molecular Neurobiology and Laboratory
- BIO 465/465L Integrated Human Anatomy and Laboratory
- CHM 221 Organic Chemistry I*
- CHM 321 Organic Chemistry II*
- CHM 431/431L Biochemistry and Laboratory*
- CHM 432/432L Protein Biochemistry and Laboratory*
- HSS 494 Health Professions Externship*

- *Students interested in either the Molecular Biology or the Pre-Health Sciences Concentration are strongly encouraged to meet with a member of the Biology Department faculty for informal advising as soon as they have chosen this concentration. Additional coursework may be needed for those students pursuing admission to a graduate program in Molecular Biology or professional program in the Health Sciences. Check the required courses for admission for each school to which you are interested in applying.*

13.9.3 Laboratory Study in Biology

Laboratory and field experiences are essential to scientific understanding. They offer an introduction to the processes of science, emphasizing student participation in hypothesis formulation, experimental design, data collection, data analysis, and the composition of papers in a format conventional to science. Biology majors must complete the requisite laboratory courses for the major. Students not majoring in biology should enroll in a laboratory section of any course they plan to apply to the laboratory science requirement in general education.

13.9.4 Biology Minor

A minor in biology requires a minimum cumulative GPA of 2.0 over courses counted toward the minor.

1. BIO 145/145L Cellular and Molecular Biology and Laboratory (WE)
2. BIO 155/155L Organismal and Ecological Biology and Laboratory (WE)
3. **One** of the following series:

- **Two** additional biology electives with the associated laboratories (one must be at least a 200-level)
- **One** additional biology elective with the associated lab **and** BIO 202 Topics in Evolution

4. CHM 121/121L General Chemistry I and Laboratory
5. CHM 122/122L General Chemistry II and Laboratory

13.9.5 Courses in Biology

BIO 100 Human Biology
Studies Homo sapiens applying the same tools biologists use to study other organisms. Topics may include an overview of human evolution, reproduction, genetics, population genetics, adaptations of selected organs and organ systems, humans' relationship to and impact on their environment, and other contemporary issues in human biology. This course does not satisfy any of the requirements for a major in biology.
BIO 100L Human Biology Lab
Three hours per week. Corequisite registration in BIO-100. This course does not satisfy any of the requirements for a major in biology. Nursing majors are not required to take BIO-100L. (0.2 course credit)
BIO 103 Anatomy & Physiology
Introduces the student to the structure, function, and organization of the human body. Designed for non-majors as well as students with health-related career interests. Corequisite registration in BIO-103L. This course does not satisfy any of the requirements for a major in biology or nursing.
BIO 103L Anatomy and Physiology Lab

Three hours per week. Corequisite registration in BIO-103. This course does not satisfy any of the requirements for a major in biology or nursing. (0.2 course credit)

BIO 104 Biodiversity

Introduces students to the current state of terrestrial and aquatic biodiversity, the origin and extinction of species, the value of biodiversity, human effects on biodiversity, biodiversity hotspots, and policies and approaches to conserve biodiversity for the future.

BIO 105 Introduction to Environmental Studies

Examines interactions between human population density and natural resources, biodiversity, and human health; emphasizing the ecological concepts that underlie selected environmental problems, but also drawing methods and viewpoints from the social sciences. The focus of the course is global and uses case studies reflecting diverse political, economic, and cultural perspectives. Sustainability is a central theme. Three hours per week. Counts as a non-lab science course. (This course does not satisfy any of the requirements for a major in biology.)

BIO 111 Urban Ecology

Introduces the ecology of urban systems, investigating how humans and their built environments interact with and form ecosystems. Two main points of view will be represented: the city as an ecological system, and the responses and adaptations of organisms to this ecosystem. We will also investigate how humans respond to and interact with this biotic and abiotic environment. Labs will visit relevant areas of Cedar Rapids. One three hour workshop and one four-hour lab per week. (Offered alternate years.)

BIO 111L Urban Ecology Lab

Three hours per week. Labs will visit relevant areas of Cedar Rapids. Corequisite with Urban Ecology (BIO 111). (0.2 course credit).

BIO 115 Marine Biology

Surveys marine organisms and communities with emphasis on tropical systems. In class components focus on an introduction to marine biology, oceanography, and taxonomy, while the primary field analyses focus on the dynamics of coral reefs, mangroves, and turtle grass meadows. An off-campus course taught at an appropriate site and involving extensive field work. Includes lecture and laboratory. Prerequisite: consent of instructor. (Offered May Experiential Term only)

BIO 120 Biology, Health, & Society

Introduces the basic principles, terms, and technologies needed to understand the role of biology in our lives. This course centers around answering questions in healthcare and in contemporary society, using the application of biological knowledge. Study skills for mastering college biology are also taught. Three lectures and one co-curricular skills workshop per week. Counts as a non-lab science course. This course does not satisfy any of the requirements for a major in biology.

BIO 145 Cellular & Molecular Biology

Studies biology at the cellular and molecular level, including structure and function of cell components, metabolism and energy, and Mendelian genetics. Three lectures per week.

BIO 145L Cellular and Molecular Biology Lab

Introduces students to common biological techniques including enzyme assays and DNA studies. Students are also introduced to experimental design, collection of data, and statistical analysis of data. Instruction in writing of scientific papers is also provided. Three hours per week. Concurrent or previous registration in Cellular and Molecular Biology (BIO-145). Nursing majors are not required to take BIO-145L. (0.2 course credit)

BIO 155 Organismal & Ecological Biology

Studies tissues, organ systems, and reproduction in animals with an emphasis on human biology. Principles of ecology, environmental science and animal behavior are also studied. Three lectures per week.

BIO 155L Organismal & Ecological Biology Lab

Introduces dissection, field biology, and selected statistical analysis of data. Instruction in writing of scientific papers is also provided. Three hours per week. Concurrent or previous registration in Organismal and Ecological Biology (BIO-155). (0.2 course credit)

BIO 165 Introduction to Ornithology

Introduces the behavior, ecology and biology of birds, emphasizing identification of local species and such species'

adaptations to their biotic and abiotic environments. Binoculars furnished. This course satisfies the lab science course requirement. Credit is given for Introduction to Ornithology (BIO-165) or Advanced Topics in Ornithology (BIO-303), not both. Offered Spring Term on campus and Summer at the Wilderness Field Station. (This course does not satisfy the requirements for a major in biology.)

BIO 165L Introduction to Ornithology LAB

Four hours per week. Corequisite with Introduction to Ornithology (BIO-165). (0.3 course credit)

BIO 175 Field Botany

Investigates tree and wildflower species encountered in Iowa's forests, fields and prairies. Emphasizes hands-on description of structural characteristics, identification of species using a dichotomous key and characteristics of flowering plant families. A basic understanding of the distribution of plants within communities is also developed. A collection of local plants is required. (Offered in May Experiential Term)

BIO 185 Entomology

Introduces the biology of insects and related arthropods, focusing on how homeostatic problems common to all organisms have been solved. Topics include physiology, morphology, systematics, and the relationship among insects, plants, and humans.

BIO 185L Entomology Lab

Three hours per week. Consists of both in-class study as well as field trips emphasizing the ecology and behavior of local forms. A representative insect collection is made. Corequisite registration in BIO-185. (0.2 course credit)

BIO 195 Introduction to Microbiology

Studies elementary level principles of microbiology. Special attention is given to the medical aspect of the subject. Three lectures per week. Designed for students with allied health career interests. This course does not satisfy any of the requirements for a major in biology. Prerequisite: Human Biology (BIO-100) or Cellular and Molecular Biology (BIO-145).

BIO 195L Introduction to Microbiology Lab

Three hours per week. Corequisite registration in BIO-195. (0.2 course credit)

BIO 202 Topics in Evolution

Investigates selective and non-selective evolutionary mechanisms operating on populations, especially as they affect adaptation, speciation, and extinction. Selected aspects of the fossil record and current theories of hominid evolution may also be part of the course. Instruction in presentation of scientific papers is also provided. Counts as a non-lab science course. Prerequisites: Cellular and Molecular Biology (BIO-145).

BIO 203 Northwoods Ecology

Examines relationships between organisms and their biotic and abiotic environment with a focus on the near-boreal communities surrounding the field station. Field work augmented by readings, lectures, and discussion covers ecology at the population, community and ecosystem levels. Applications to human ecology in the Boundary Waters Canoe Area Wilderness is integrated into the course as appropriate. Prerequisite: 1 college class that includes ecological topics. (Offered on occasional basis)

BIO 205 General Botany

Explores the biology of plants at the cellular, tissue and whole plant levels. The influence of environment on metabolism, growth, development and reproduction are themes. Three lectures per week. Prerequisites: Cellular and Molecular Biology and Laboratory (BIO-145/-145L), and Organismal and Ecological Biology (BIO-155)

BIO 205L General Botany Laboratory

Provides the opportunity for hands-on observations of plant cells, tissues and whole plants, flowers and fruits and to perform experiments related to basic principles of plant biology introduced in lecture. Instruction in library database searches and writing annotated scientific reports is provided. Three hours per week. Concurrent or previous registration in General Botany (BIO-205). (0.2 course credit)

BIO 215 Human Anatomy

Surveys microscopic and gross human anatomy, providing necessary background for students in physiology and body mechanics. Three lectures per week. Prerequisites: Human Biology (BIO-100) or Cellular and Molecular Biology (BIO-145) or Organismal and Ecological Biology (BIO-155). This course does not satisfy any of the requirements for a major in biology. Credit is given for Human Anatomy (BIO-215) or Integrated Human Anatomy

(BIO-315), not both. Concurrent registration in Human Anatomy Laboratory (BIO-215L).

BIO 215L Human Anatomy Laboratory

Unites the physical structures with written material to help students conceptualize the intricacies of the human body. Three hours per week. Concurrent registration in Human Anatomy (BIO-215). (0.2 course credit)

BIO 225 Human Physiology

Studies the various systems of the human body, including the application of physiological principles to the health professions. Three lectures per week. This course does not satisfy any of the requirements for a major in biology. Prerequisites: Human Anatomy (BIO-215) and either Human Biology (BIO-100), Cellular and Molecular Biology (BIO-145), or Organismal and Ecological Biology (BIO-155).

BIO 235 Genetics

Explores the three main branches of heredity: transmission (classical), molecular, and population genetics. Transmission genetics examines probabilities and pedigrees of genetic traits passed from generation to generation. Molecular genetics probes the structure, function, and regulation of genes. Population genetics investigates through mathematical models the distribution and behavior of genes in populations. Three lectures per week. Prerequisites: Cellular and Molecular Biology and Laboratory (BIO-145/-145L), and Organismal and Ecological Biology (BIO-155).

BIO 235L Genetics Laboratory

Three hours per week. Concurrent with Genetics (BIO-235). (0.2 course credit)

BIO 275 Aquatic Ecology

Study of the biota of lakes and streams in northern Minnesota and adjacent Ontario, and their abiotic environment. Extensive field sampling enables students to study predation, diel vertical migration, stream drift, induced morphological defenses, and food-web interactions. Regional and North American lake and stream biodiversity and the effects of introduced species and human intervention on aquatic ecosystems are reviewed. Prerequisites: Cellular and Molecular Biology and Laboratory (BIO-145/-145L), or Organismal and Ecological Biology Laboratory (BIO155/-155L). (Offered summers at the Wilderness Field Station)

BIO 275L Aquatic Ecology Lab

Field work at the Wilderness Field Station. Corequisite with Aquatic Ecology (BIO-275). (0.2 course credit)

BIO 285 Animal Behavior

Considers principles and methods in ethology with emphasis on temporal and spatial patterns, adaptive significances, communication, aggression and territoriality, social organization, and the nature of regulatory mechanisms. Prerequisites: One of the following: Cellular and Molecular Biology and Laboratory (BIO-145/-145L); Organismal and Ecological Biology and Laboratory (BIO-155/-155L); or Statistical Methods and Data Analysis (PSY-300). (Offered summers at the Wilderness Field Station)

BIO 285L Animal Behavior Laboratory

Field work at the Wilderness Field Station. Three hours per week. Corequisite registration with Animal Behavior (BIO-285). (0.2 course credit)

BIO 295 Spatial Ecology

Investigates spatial patterns of organisms in natural, agricultural, and urban landscapes. Emphasis is on how the arrangements of organisms both reflect and feedback on underlying resources and geography. Students learn how to capture spatial characteristics of individuals, populations, species, communities, and landscapes sampled in the field, integrate them with satellite imagery, and analyze them statistically. Use of global positioning system hardware to provide spatial reference for field ecology surveys and use of ArcView as a data management, display, and analysis tool are important features of the course. Three lectures per week. Prerequisites: Organismal and Ecological Biology and Laboratory (BIO-155/-155L).

BIO 295L Spatial Ecology Laboratory

Four hours per week. Corequisite registration with Spatial Ecology (BIO-295). (0.3 course credit)

BIO 303 Adv Topics in Ornithology

BIO 303 Advanced Topics in Ornithology An in-depth investigation of the behavior, ecology, evolution and biology of birds, emphasizing identification of local species and such species' adaptations to their biotic and abiotic environments. Binoculars furnished. Prerequisites: One college biology course. Credit is given for Ecology and

Biology of Birds (BIO-165) or Advanced Topics in Ornithology (BIO-303), not both. Offered Spring Term on campus and Summer at the Wilderness Field Station.

BIO 303L Adv Topics in Ornithology Lab

BIO 303L Advanced Topics in Ornithology Lab Four hours per week. Corequisite with Advanced Topics in Ornithology (BIO-303). (0.3 course credit)

BIO 315 Integrated Human Anatomy

Integrates macroscopic human anatomy at the organ and organ system levels with microscopic study of histology and development from a clinical perspective. Three lectures per week. Prerequisites: Organismal and Ecological Biology and Laboratory (BIO-155/155L). Credit is given for Integrated Human Anatomy (BIO-315) or Human Anatomy (BIO-215), not both.

BIO 315L Integrated Human Anatomy Lab

Studies human anatomy using dissection, models, histological slides, and cadaveric specimens. Students learn to integrate written, verbal and visual material to master anatomical and histological terminology. Three hours per week. Concurrent or previous registration in Integrated Human Anatomy (BIO-315). (0.2 course credit)

BIO 325 Microbiology

Studies major fields of microbiology with emphasis on bacteria and viruses. Topics include bacterial cell structure, genetics, and pathogenesis as well as immunology and epidemiology. Three lectures per week. Prerequisites: Cellular and Molecular Biology and Laboratory (BIO-145/-145L), Organismal and Ecological Biology (BIO-155), Organic Chemistry I (CHM-221) and Organic Laboratory (CHM-322) or Genetics (BIO-235).

BIO 325L Microbiology Lab

Four hours per week. Concurrent with Microbiology (BIO-325). (0.2 course credit)

BIO 335 Conservation and Ecology of Mammals

Studies mammals of Minnesota and the natural history, form/function relations, behavior, distributions, and interaction with their environment and other organisms. Investigation of how these variables impact conservation. Class activities include direct observations, reading tracks and "sign." Live-trap mark and recapture studies supplemented by readings, lectures, and discussions. (Offered summers at the Wilderness Field Station)

BIO 335L Conserv & Ecology of Mammals LAB

Field work at the Wilderness Field Station. Corequisite registration with Conservation and Ecology of Mammals (BIO 335). (0.2 course credit)

BIO 345 Techniques in Molecular Biology

Introduces students to biological molecular techniques. Methods include RNA, DNA and protein expression analysis and cell culture techniques. On completing the course, students should have a working knowledge of most methods used in molecular biology research. Two sessions per week. Prerequisites: Genetics and Laboratory (BIO-235/-235L), and General Chemistry II and Laboratory (CHM-122/-122L).

BIO 345L Techniques in Molecular Biology Lab

Six hours per week. Concurrent with Techniques in Molecular Biology (BIO-345). (0.5 course credit)

BIO 355 Animal Physiology

Studies how organ systems in animal species solve the fundamental problems of staying alive. This includes how to obtain energy, how to procure the raw materials necessary for constructing their bodies, how to gain oxygen from the environment, how to get rid of unneeded substances and toxic materials. The course addresses how these ends are achieved through the cooperation of cells, tissues, organs, and organ systems in a variety of organisms including mammals, birds, reptiles, amphibians, and fish as well as selected invertebrates. Three lectures per week. Prerequisites: Cellular and Molecular Biology and Biology Laboratory (BIO-145/-145L), and Organismal and Ecological Biology (BIO-155).

BIO 355L Animal Physiology Lab

Three hours per week concurrent with Animal Physiology (BIO-355). (0.2 course credit)

BIO 365 Comparative Chordate Anat

Surveys the chordates and the development and evolution of form in vertebrates, using primarily the shark, mudpuppy, and cat in laboratory. Two lectures, one discussion recitation per week. Prerequisite: Cellular and Molecular Biology (BIO-145), Organismal and Ecological Biology (BIO-155) and Topics in Evolution (BIO-202.

BIO 365L Comp Chordate Anat Lab
Four hours per week. Corequisite registration with Comparative Chordate Anatomy (BIO-365). (0.2 course credit)
BIO 375 Integrated Human Physiology
Studies physiologic functions in terms of basic physical and chemical processes; an introduction to the principles of physiology using the human organism as a model. Three lectures per week. Prerequisites: Cellular and Molecular Biology and Laboratory (BIO-145/-145L), and Organismal and Ecological Biology (BIO-155).
BIO 375L Integrated Human Physiology Lab
Three hours per week. Concurrent with Integrated Human Physiology (BIO-375). (0.2 course credit)
BIO 385 Behavior/Ecology of Vertebrates
Explores the identification, evolutionary history, and behavioral and ecological relationships of local mammals, birds, reptiles, amphibians, and fish. Students learn and apply survey techniques appropriate for particular groups to understand species/habitat relationships, diversity within groups, and the impact of humans on diversity. Three lectures per week. Prerequisites: Cellular and Molecular Biology (BIO-145) and Topics in Evolution (BIO-202).
BIO 385L Behavior/Ecology Vertebrates Lab
Three hours per week. Concurrent with Behavior and Ecology of Vertebrates (BIO-385). (0.2 course credit)
BIO 405 Current Topics in Molecular Biology
Explores primary literature in the field of molecular biology, focusing on recent advances in DNA, RNA and protein manipulation, characterization, and control. Students read research articles, critically evaluate published data, and communicate technical information in several forms. Three lectures per week. Prerequisites: Techniques in Molecular Biology (BIO-345).
BIO 415 Developmental Biology
Explores the developmental processes and changes that occur as an organism grows from fertilized egg to adult organism. The actions and interactions of cells and tissues are examined in the living, growing, and rapidly changing environment of the body. Classical embryology is examined through modern genetic techniques, with special emphasis on how differential gene expression makes us who we are. Survey of research methodologies are a prominent topic. Three lectures per week. Prerequisites: Genetics and Laboratory (BIO-235/-235L).
BIO 415L Developmental Biology lab
Three hours per week. Concurrent with Developmental Biology (BIO-415). (0.2 course credit)
BIO 425 Ecology
Studies the interrelationship among organisms and their environments. The structure and dynamics of populations, communities, and ecosystems are examined through lectures and laboratory or field investigations. Three lectures per week. Prerequisites: General Botany (BIO-205) or consent of instructor.
BIO 425L Ecology Lab
Three hours per week. Concurrent with Ecology (BIO-425). (0.2 course credit)
BIO 435 Cell Physiology
Studies the content, organization, and function of the cell and its components. Other topics include the relationship of the cell to its environment, the cell membrane, enzymes, conversion of matter and energy, cell growth, and cell division. Three lectures per week. Prerequisites: Genetics and Laboratory (BIO-235/-235L), and General Chemistry II and Laboratory (CHM-122/-122L).
BIO 435L Cell Physiology Lab
Three hours per week. Concurrent with Cell Physiology (BIO-435). (0.2 course credit)
BIO 444 Independent Study
Offers students the opportunity to do independent work on a selected project under direction of a member of the department. May be taken more than once for a maximum of 2.0 credits. Prerequisites: Courses providing appropriate background for the project selected and consent of department chair.
BIO 445 Environmental Microbiology
Examines the role of microbes in the environment. Topics include microbial diversity, nutrient cycling including biogeochemistry, bioremediation, and biodegradation. The use of molecular methods and microscopy to study microbes in situ are special emphases of the course. Three lectures per week. Prerequisites: Cellular and Molecular Biology and Laboratory (BIO-145/-145L), Organismal and Ecological Biology (BIO-155), Organic Chemistry I

(CHM-221) with Organic Laboratory (CHM-322) or Genetics (BIO-235).

BIO 445L Env Microbiology Lab

Application of theory through developing the technical skills necessary to conduct experiments in modern microbial ecology. Students learn how to select a proper sampling site, collect samples without contamination, and the process of both molecular and culture-based techniques used to study microorganisms from their natural environment. Six hours per week. Corequisite registration with Environmental Microbiology (BIO-445). (0.5 course credit)

BIO 454 Research Participation

Engages students in a research program designed and directed by a biology department faculty member, including some or all of the following: library research, research design, and field or laboratory investigations. Scheduled by arrangement with sponsoring professor with a time requirement of 10 hours per week minimum per course credit. P/NP basis only. May be taken for an X status grade with consent of instructor prior to registration. May be taken more than once for credit for a maximum of 2.0 credits. Research participation credit does not satisfy any of the requirements for a major in biology. (0.2–1.0 course credit)

BIO 455 Molecular Neurobiology

Studies the organization and function of the nervous system, focusing on both cellular physiology and functional neuroanatomy. Topics include the cellular and molecular properties of brain cells, the neurological basis of behavior, and disorders of the nervous system. Three lectures per week. Prerequisites: Organismal and Ecological Biology and Laboratory (BIO-155/-155L), and Genetics and Laboratory (BIO-235/-235L).

BIO 455L Molecular Neurobiology Lab

Develops technical skills needed to conduct experiments in modern neurobiology. Students learn how to perform laboratory techniques that look at gene expression and cellular function and acquire an understanding of the process and rationale behind the methods used in neurobiology research. Three hours per week. Corequisite registration with Molecular Neurobiology (BIO-455). (0.2 course credit)

BIO 462/463 Advanced Biology Laboratory I and II

Offers an extensive independent or group investigations of a particular topic in biology. Designed to be a research experience in preparation for teaching, graduate school or direct entry into a technical field after graduation. Advanced Biology Laboratory I (BIO-462) may be repeated as Advanced Biology Laboratory II (BIO-463). P/NP basis only. Prerequisites: Genetics and Laboratory (BIO-235/-235L), and consent of instructor. (Offered May Term only)

BIO 465 Immunology

An integrated series of lectures designed to familiarize students with cellular, molecular and biochemical aspects of the development of the immune system and the immune response, including B-and T-cell function, antibody structure and function, complement, and major histocompatibility complex formation, with special emphasis on the integration of these parts during the response to infectious agents. Special topics include immunomodulation, vaccination, autoimmunity, and neuro-immune interactions. The laboratory component utilizes existing instrumentation in the biology department and cell culture to explore different aspects of the immune system. Three lectures and one three hour laboratory period per week. Prerequisites: General Chemistry II (CHM 122/122L), Genetics (BIO-235), and Integrated Human Physiology (BIO-375) (or concurrent enrollment in BIO-375).

BIO 465L Immunology Laboratory

Three hours per week. Corequisite registration with Immunology (BIO-465). (0.2 course credit)

BIO 494 Internship in Biology

Investigates an area of interest through voluntary field placement supervised by a faculty member of the department. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a major in biology. Prerequisites: declared major in biology, junior standing, and consent of department chair.

13.10 Business Administration and Economics

Baranowski, Calman, Carstens (Administrative Coordinator, Aviation Studies & Flight Operations), Chen, J. Christensen, Eichhorn (Co-Chair), Hayes, Kuennen (Co-Chair), Lensing, Lutz, Melcher, Nguyen, Perry, Westberg

The Stead Department of Business Administration and Economics offers majors in **ACCOUNTING, BUSINESS ADMINISTRATION, ECONOMICS, and INTERNATIONAL ECONOMICS,** and minors in economics and international economics. Students pursuing one or more of these are strongly encouraged to consult with departmental faculty to develop specific plans of study.

13.10.1 Business Administration

The study of business administration is designed to develop in its students a high degree of competence in the application of business theories and sound judgment to the solution of business operating problems. Graduates are able to contribute effectively to the activities of their organizations by applying business skills required to plan, analyze, and control company activities. Beyond enhancing the value of a firm, the graduate should have a firm knowledge from which to achieve professional growth in the workplace and/or graduate school. The business major is designed to prepare students in the core areas of business administration, with specific focus on management, finance, and marketing. Students are also provided the opportunity to specialize in a particular area through selection of elective courses.

13.10.2 Business Administration Major

A major in business administration requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. ACC 171 Principles of Accounting I
2. ECO 175 Principles of Macroeconomics
3. BUS 190 Statistical Analysis
4. ACC 215 Principles of Accounting II
5. ECO 215 Prin Microeconomics
6. BUS 315 Business Law I
7. **One** of the following Management courses:
   BUS 250 Principles of Management
   BUS 300 Human Resource Management
   BUS 387 Adv Top:Human Res Mgt
   BUS 470 Strategic Management

8. **One** of the following Marketing courses:
   BUS 330 Principles of Marketing
   BUS 460 Advertising
   BUS 465 Advanced Topics in Marketing
   BUS 467 Consumer Behavior

9. **One** of the following Finance courses ECO 225 Money & Banking
   BUS 350 Principles of Finance
   BUS 352 Corporate Finance
   BUS 495 Investment Analysis

10. **Two** additional business courses numbered 200 or above

Students planning to attend graduate school in business are strongly encouraged to take calculus, additional statistics courses, intermediate level macro/microeconomics, quantitative management courses, and strategic management. Students should also discuss their graduate school plans with a member of the department to determine other courses that may be expected for admission to specific graduate programs.

13.10.3 Concentrations in Business

Students completing a major in Business Administration may elect to also complete a concentration of courses within a specific discipline in the major. Courses taken to fulfill requirements in the business major may be used to also fulfill requirements in an area of concentration. Students may declare only one concentration.

Concentrations are offered in aviation studies; flight operations; finance; international business; management; marketing; risk management/insurance; healthcare administration; supply chain management; and sports management. To complete a concentration, a student must meet the following requirements: 1. Completion of a major in Business Administration 2. Completion of **five** additional courses in which a cumulative 2.0 GPA must be earned. At least three of the five courses must be completed at Coe.

13.10.3.1 Aviation Studies Concentration in Business

(This concentration is intended for Coe students who do not plan to complete the flight operations courses.)

1. AVS 101 Introduction to Aviation
2. AVS 201/201L Principles of Meteorology and Laboratory
3. AVS 301 Applied Aerodynamics
4. AVS 302 Human Factors
5. AVS 401 Aviation Seminar

13.10.3.2 Flight Operations Concentration in Business

(This concentration is intended for only those Coe students who have been admitted into Coe's aviation program and who plan to take the flight operations courses.)

1. AVS 101 Introduction to Aviation
2. AVS 201/201L Principles of Meteorology and Laboratory
3. AVS 301 Applied Aerodynamics
4. AVS 302 Human Factors
5. AVS 315 Aviation Law
6. AVS 402 Aircraft Systems
7. AVS 403 Aviation Safety
8. **All** courses listed under Required Flight Operations courses (See course descriptions starting on p. 68.)

13.10.3.3 Finance Concentration in Business

1. BUS 350 Principles of Finance
2. BUS 472 Advanced Topics in Finance
3. BUS 495 Investment Analysis
4. **Two** of the following: ECO 225 Money & Banking ACC 301 Intermediate Accounting I ECO 375 Econometrics ECO 435 Time Series Analysis BUS 454 Research in Business ECO 457 US Econ History BUS 472 Advanced Topics in Finance (if the topic is substantially different from when taken to fulfill requirement #2)

13.10.3.4 Healthcare Administration Concentration in Business

1. ECO 247 Health Economics **or** HSS 200 Comparative Health Systems
2. BUS 300 Human Resource Management
3. **One** of the following: DS 100 Introduction to Data Science PHL 200 Bio-Medical Ethics COM 332 Health Communication (WE) POL 350 US Social Policy Process
4. **Two** of the following through an online partnership with Rize Education: BUS 312 Healthcare Justice, Law, and Ethics BUS 342 Data-Driven Healthcare BUS 353 Healthcare Finance BUS 390 Strategic Healthcare Operations

Students planning to attend graduate school in Healthcare Administration are strongly encouraged to take more than the five required courses to complete the concentration. Students should discuss their graduate school plans with the program director.

The Healthcare Administration concentration is offered online through a consortium of accredited colleges and universities. All courses within the program are delivered by faculty employed by partner institutions in the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through the consortium are reviewed and approved by Coe College. Students register through Coe College and receive academic credit from Coe College.

13.10.3.5 International Business Concentration in Business

1. BUS 446 International Business Management
2. **Two** of the following: BUS 456 Advanced Topics in Global Business ECO 336 Divergent Economic Growth ECO 436 Econ Development ECO 446 International Econ
3. **One** of the following: One course in a world language numbered 115 or above COM 236 Intercultural Communication IS 116 Intro to International Studies POL 258 World Politics One course with an international focus outside of the department, with approval of the department chair
4. **One** of the following: A semester abroad A May Experiential Term abroad A capstone project in international business, supervised by a business faculty member An internship in international business, supervised by a business faculty member

13.10.3.6 Management Concentration in Business

1. BUS 250 Principles of Management
2. **Four** of the following:
   BUS 300 Human Resource Management
   BUS 375 Business Ethics
   BUS 387 Adv Top:Human Res Mgt
   BUS 395 Organizational Behavior
   BUS 446 International Business Management
   BUS 454 Research in Business BUS 464 Seminar in Management BUS 470 Strategic Management

13.10.3.7 Marketing Concentration in Business

1. BUS 330 Principles of Marketing

2. **Four** of the following: BUS 280 Business Websites **and** BUS 281 Social Media in Business
   BUS 420 Sports Marketing and Communications
   BUS 460 Advertising
   BUS 461 Marketing Decision Making/Analysis
   BUS 465 Advanced Topics in Marketing
   BUS 470 Strategic Management
   BUS 454 Research in Business (when topic is appropriate to marketing concentration) PR 205 Public Relations

13.10.3.8 Risk Management/Insurance Concentration in Business

1. BUS 350 Principles of Finance
2. DS 100 Introduction to Data Science
3. BUS 310 Insurance Company Operations
4. BUS 311 Personal and Business Risk Manageme
5. **One** of the following: ECO 247 Health Economics BUS 341 Introductory Business Analytics BUS 411 Adv Topics:Risk Management/Insuranc BUS 454 Research in Business (when topic is appropriate to Risk Management/Insurance concentration) BUS 494 Internship in Business (when internship is appropriate to Risk Management/Insurance concentration) BUS 495 Investment Analysis

13.10.3.9 Sports Management Concentration in Business

1. SMT 100 Introduction to Sports Management

2. **Four** of the following:
   DS 120 Sports Analytics BUS 400 Legal Issues in Sports
   BUS 420 Sports Marketing and Communications
   BUS 454 Research in Business (when topic is appropriate to sports management concentration)
   SMT 300 Sport/Recreation Event Management
   SMT 450 Seminar in Sports Management
   SMT 494 Internship in Sports Management

13.10.3.10 Supply Chain Management Concentration in Business

1. **One** of the following data analysis courses: BUS 340 Applied Regression Analysis BUS 341 Introductory Business Analytics ECO 375 Econometrics DS 260 Data Analysis and Visualization
2. **One** of the following global strategy courses: BUS 446 International Business Management ECO 446 International Econ
3. **Two** required courses through an online partnership with Rize Education: BUS 346 Forecasting & Logistics BUS 381 Sourcing & Operations
4. **One** of the following through an online partnership with Rize Education: BUS 442 Supply Chain Mgmt Technologies BUS 459 Supply Chain in Action BUS 463 Capstone in Supply Chain Management

The Supply Chain Management concentration is offered online through a consortium of accredited colleges and universities. All courses within the program are delivered by faculty employed by partner institutions in the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through the consortium are reviewed and approved by Coe College. Students register through Coe College and receive academic credit from Coe College.

13.11 Accounting

Students majoring in accounting have two options: the managerial accounting major and the public accounting major. The managerial accounting major is designed for students interested in pursuing a career in private industry or the not-for-profit sector. The public accounting major is designed for students interested in practicing public accounting and those desiring the Certified Public Accounting (CPA) designation. Because of the identical core course requirements in the managerial accounting and public accounting majors, only one of the two majors can be elected by a student. A student receiving a managerial accounting major may pursue a post-baccalaureate major in public accounting, but when completed, the public accounting major would replace the managerial accounting major in the student's records.

Requirements for becoming a CPA differ from state to state. All states require that students pass the Uniform CPA examination and many require the completion of 150 semester hours of education prior to certification. The 150 hours can be completed in undergraduate or graduate programs. To become a CPA in Iowa, the Iowa State Board of Accountancy requires that students pass the CPA examination, complete 120 semester hours of education, and complete specified course work in accounting and business subjects. Students majoring in accounting, business, or economics are required to have a minimum of 24 of their 120 semester hours in financial accounting, auditing, taxation, and management accounting courses above the elementary level. If students majoring in any other field wish to become a CPA in Iowa, they must, in addition, complete at least 24 semester hours in business-related courses (not including internships). (One course credit completed at Coe is counted as four semester hours.)

Accounting students at Coe should work closely with faculty in the department to determine their plan of study. Students wishing to become a CPA should also check the state board's education requirements for the state in which they wish to practice.

13.11.1 Managerial Accounting Major

A major in managerial accounting requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. ACC 171 Principles of Accounting I
2. ECO 175 Principles of Macroeconomics
3. BUS 190 Statistical Analysis
4. ACC 215 Principles of Accounting II
5. ECO 215 Prin Microeconomics
6. ACC 301 Intermediate Accounting I
7. ACC 315 Managerial Accounting
8. BUS 315 Business Law I
9. ACC 334 Computer Applications - Accounting
10. ACC 351 Intermediate Accounting II
11. ACC 413 Auditing
12. ACC 415 Adv Managerial Accounting
13. ACC 422 Tax Accounting

13.11.2 Public Accounting Major

A major in public accounting requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

Students wishing to prepare for the examination to become a Certified Public Accountant should select the Public Accounting major, which meets the guidelines for the breadth of business and accounting courses recommended

by The American Institute of Certified Public Accountants. Students at Coe can meet the 150-semester hour requirement by completing 37.5 credits.

If degree requirements are not completed by the end of four years, students pursuing a major in public accounting, who are in good academic standing, and who are full-time students, receive a 60% discount on tuition in the consecutive fifth year. They continue to be eligible to apply for student loans and any available federal and state government grants.

1. ACC 171 Principles of Accounting I
2. ECO 175 Principles of Macroeconomics
3. BUS 190 Statistical Analysis
4. ACC 215 Principles of Accounting II
5. ECO 215 Prin Microeconomics
6. ACC 301 Intermediate Accounting I
7. ACC 315 Managerial Accounting
8. BUS 315 Business Law I
9. ACC 334 Computer Applications - Accounting
10. ACC 351 Intermediate Accounting II
11. ACC 413 Auditing
12. ACC 422 Tax Accounting
13. ACC 463 Advanced Auditing
14. **One** of the following: BUS 410 Business Law II BUS 412 Entrepreneurship & New Business Frm BUS 464 Seminar in Management BUS 470 Strategic Management
15. **Three** of the following: ACC 313 Fraud Examination ACC 401 Fund Acctg & Adv Top ACC 451 Advanced Accounting ACC 472 Advanced Tax Accounting

13.11.3 Courses in Accounting

ACC 171 Principles of Accounting I
A study of the accounting process and preparation of financial statements, primarily for external reporting purposes. Includes analyses of asset and liability accounts and owners' equity accounts of corporations.
ACC 215 Principles of Accounting II
Continuation of the study of financial accounting, including the statement of cash flow. A study of managerial accounting and the analysis of financial information for management decision making. Prerequisite: Principles of Accounting I (ACC-171).
ACC 301 Intermediate Accounting I
An in-depth study of financial accounting topics. Emphasis is on income determination, evaluation, and presentation of assets, liabilities, and owners' equity. Prerequisite: Principles of Accounting II (ACC-215).
ACC 313 Fraud Examination
An examination of real world cases that represent the many types of accounting fraud in order to gain an understanding of the behavioral and social factors that motivate offenders. Emphasis is placed on understanding the exposures to loss and the appropriate prevention, detection, and investigation approaches, including legal requirements for testifying as an expert witness. Prerequisites: Principles of Accounting II (ACC-215) or consent of instructor. (Offered alternate years)
ACC 315 Managerial Accounting
A study of the principles of managerial accounting and the methods of analyzing financial information. Includes analyses of accounting for the costs of production and the use of various decision models for planning and control. Prerequisite: Principles of Accounting II (ACC-215).
ACC 334 Computer Applications - Accounting
An introduction to specialized accounting software used in financial accounting, tax accounting, and auditing.

Application of generalized software to topics covered in managerial accounting and financial accounting. P/NP basis only. Prerequisites: Computers in Business (BUS-125) or knowledge of Excel, junior standing, and completion of at least three upper-level accounting courses or consent of instructor. (0.5 course credit)

ACC 351 Intermediate Accounting II

An in-depth study of financial accounting topics. Emphasis is on income determination, evaluation, and presentation of liabilities and owners' equity. Prerequisite: Intermediate Accounting I (ACC-301).

ACC 401 Fund Acctg & Adv Top

Accounting for governmental entities, accounting for not-for-profit entities, and other related topics. Prerequisite: Intermediate Accounting II (ACC-351).

ACC 413 Auditing

A study of the audit function primarily as it relates to the independent CPA. An integration of auditing theory and practice in an environment of legal liability and professional responsibility. Prerequisites: Principles of Accounting II (ACC-215) and junior standing, or consent of instructor. (Offered alternate years)

ACC 415 Adv Managerial Accounting

A continuation of the study of managerial accounting and the methods of analyzing financial information. Topics covered include management control systems, pricing decisions, operations management, and regression analysis. Prerequisite: Managerial Accounting (ACC-315) or consent of instructor.

ACC 422 Tax Accounting

A study of the federal income tax system with an emphasis on individual taxation. Development of a basic understanding of gross income, exclusions from gross income, and deductions which pertain to individuals, corporations, and partnerships. Prerequisite: Principles of Accounting II (ACC-215). (Offered alternate years)

ACC 451 Advanced Accounting

A study of business combinations, international business transactions, international subsidiaries, fund accounting, and accounting for partnerships. Prerequisite: Intermediate Accounting (ACC-301/-351). (Offered alternate years)

ACC 463 Advanced Auditing

A continuation of Auditing (ACC-413) with emphasis on special reports, compilation and review services, and additional current auditing topics. Auditing theories and practices are presented in a manner which enables the student to conceptualize the entire audit process. Prerequisite: Auditing (ACC-413). (Offered alternate years)

ACC 472 Advanced Tax Accounting

A continuation of Tax Accounting (ACC-422) with an emphasis on taxation of corporations, "S" corporations, partnerships, estates, and trusts. Development of a basic understanding of tax research methodology. Prerequisite: Tax Accounting (ACC-422). (Offered alternate years)

13.11.4 Courses in Business

BUS 105 Colloquium in Business

A study of the dynamic world of business, with emphasis on the role of the individual as a consumer, a manager, an employee, and an investor. Such topics as the social responsibility of business, business environment, and the relationship of business to governments and to people are included.

BUS 113 Intro to Mgmt Info Systems (MIS)

Familiarizes students with management information systems (MIS) used by businesses and organizations to help meet their goals. Students explore the extensive role of information technology in the professional workplace, including technical and managerial aspects. This course does not, on its own nor in combination with another 0.5 credit course, count as one of the two business electives required for a business major. (0.5 course credit) (Offered on an occasional basis)

BUS 115 Business and Society

Introduces students to the role of business in modern society. Topics include various forms of business organizations, the major functional areas of business, relationships between businesses and their internal and external stakeholders, and how businesses adapt to current issues such as changing societal expectations, diversity in the workplace, influencer culture, generational differences, and technology changes. This course does not satisfy any of the

requirements for a major in Business Administration.

BUS 125 Computers in Business

An introduction to computers in business. Topics covered include the most commonly encountered software used for word processing, database management, and spreadsheets.

BUS 130 Personal Finance for College Studen

Introduces college students to managing personal finances and making financial decisions that they encounter. Areas of study for this project-oriented course include student loans, credit cards, savings and investments, cars, living on campus versus apartment living, savings needed for life immediately following graduation, and travel. Students who have received credit for taking SKD-130 Personal Finance for College Students are not eligible to enroll in this course. (0.5 course credit)

BUS 145 Personal Financial Analysis & Plan

A study of important personal financial decisions made over an individual's lifetime. This course provides the perspective and tools needed to make intelligent personal financial decisions. The course also challenges students to look at current events affecting personal finance from a public policy perspective, allowing them to develop informed opinions. Topics covered include understanding personal income taxes, buying a home, using credit wisely, and planning for retirement, among others. Open to all students. This course does not satisfy any of the requirements for a major in Business Administration.

BUS 170 Bus Sustainability & Environment

See Environmental Studies, p. 141.

BUS 190 Statistical Analysis

Methods of statistical analysis and decision-making in business research and the behavioral sciences. Topics are selected from analysis of variance, regression analysis, factor analysis, time series analysis, and statistical decision theory. Prerequisite: The equivalent of three years of secondary school mathematics or consent of instructor.

BUS 250 Principles of Management

A study of the general principles of management that are applicable to any organization with an established set of goals and objectives. This course analyzes the four major managerial functions of planning, organizing, leading, and controlling, and introduces the topics of international management and managerial ethics. Prerequisite: sophomore standing.

BUS 255 Intro Management Science

The construction and use of mathematical models for making business decisions. Models studied include linear programming and related algorithms, project scheduling, waiting lines. Prerequisites: competency in algebra and junior standing or consent of instructor.

BUS 280 Business Websites

An examination of the form, function, and creation of B2C (business-to-consumer) and B2B (business-to-business) websites. Students conduct research, develop a fictional business proposal, and build a basic website that promotes products and/or services to businesses or end-user consumers. This course does not, on its own or in combination with another 0.5 course, count as one of the two business electives required for a business major. (0.5 course credit)

BUS 281 Social Media in Business

A survey of social media solutions utilized in the business environment with an emphasis on software usage. Learner-centered research and hands-on experience provide students with a solid understanding of current best practices. Applications explored include: LinkedIn, Skype, FaceTime, YouTube, Facebook, Yelp, Google+, Pinterest, Tumblr, Twitter, Instagram, and Kickstarter. This course does not, on its own or in combination with another 0.5 credit course, count as one of the two business electives required for a business major. (0.5 course credit)

BUS 285 Computer Appl:Adv Top

Advanced computer applications courses on selected topics covered in business. Example topics: Management Science, Database Management, Marketing Publications. May be taken more than once for credit, provided the topics are substantially different. Prerequisites: Computers in Business (BUS-125) or consent of instructor. Some topics may require completion of or concurrent registration in relevant courses in the department. This course does not satisfy any of the requirements for a major in Business Administration. (0.5 course credit)

BUS 300 Human Resource Management

A study of the theories, policies, and institutional forces that affect the human resource manager. This course analyzes managerial decisions regarding staffing, compensation, training, appraising, safety/ health, industrial relations, and the employment laws and environmental factors affecting human resource management. Prerequisite: sophomore standing.

BUS 305 Production & Operations Mgmt

A study of the design, planning, and control of the factors that affect operations, including how to use labor, facilities, and equipment to manufacture finished goods or provide services. Prerequisites: competency in algebra and junior standing or consent of instructor.

BUS 310 Insurance Company Operations

Examines the internal operations of insurance companies and the insurance industry as a whole. Students explore fundamental concepts, including financial operations, underwriting, claims management, risk assessment, regulatory compliance, and marketing within the insurance industry. Emphasis is placed on operational efficiency, financial performance, and emerging industry trends.

BUS 311 Personal and Business Risk Manageme

Studies the foundational knowledge and practical skills necessary for identifying, assessing, and managing risks encountered in both personal and business contexts. Students examine insurance policy considerations for life, health, property, liability, and casualty insurance.

BUS 312 Healthcare Justice, Law, and Ethics

Healthcare Justice, Law, and Ethics This course examines ethical, legal, and justice-based issues in healthcare decision-making. Topics may include definitions of death, the allocation of scarce medical resources, cost versus effectiveness in treatment approval, and emerging challenges such as genetic engineering. Students will engage with frameworks used to evaluate fairness, patient rights, and policy decisions in contexts where outcomes may be life-altering. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College.

BUS 315 Business Law I

An introduction to law as an agency of control in the business world. Course topics include: an introduction to business ethics, the sources of law in the United States and their impact on the business community, the role of the judiciary and its impact on social change, basic tort law as it relates to business, contract terminology and functions, the elements of a valid contract, and the law as it relates to agency, employment, and labor. Prerequisite: sophomore standing.

ECO 315 Intermediate Macroeconomic Theory

See **?@sec-economics**

ECO 320 Public Finance

See **?@sec-economics**

ECO 325 Collectve Bargaining

See **?@sec-economics**

BUS 330 Principles of Marketing

A study of the basic principles of marketing including the analysis of market opportunities, market segmentation, and product positioning. Emphasis is placed on consumer markets and the development of marketing strategy using the variables of product, price, promotion, and distribution. Prerequisite: sophomore standing.

BUS 340 Applied Regression Analysis

Introduction to the construction and use of regression models. Topics include estimation and inferential techniques in Simple and Multiple Regression; consequences of violations of the assumptions of the Classical Linear Regression model; regression with qualitative dependent variables.

BUS 341 Introductory Business Analytics

A spreadsheet-based introductory course to business analytics. Emphasis is placed on fundamental knowledge and practical skills for applying data analysis to business decision making. Topics include data collection, statistical distributions, linear regression, forecasting, simulation, and optimization. Prerequisite: Statistical Analysis (BUS-

190) or consent of instructor

BUS 342 Data-Driven Healthcare

Examines the role of information systems, data analytics, and emerging technologies in healthcare organizations. Focuses on the use of data to inform clinical and administrative decision-making, including applications of artificial intelligence, health informatics, and cloud-based systems. Emphasizes analysis of healthcare data, evaluation of technology infrastructure, and issues of security, privacy, and organizational performance. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: BUS-190 Statistical Analysis and BUS-312 Healthcare Justice, Law, and Ethics

BUS 345 Regulation of Business

Includes an examination of the social and economic impact of control legislation such as the Sherman Act, Clayton Act, Federal Trade Commission Act, Wagner Act, Securities Exchange Act, and many others. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 345 Intermediate Microeconomics

See **?@sec-economics**

BUS 346 Forecasting & Logistics

Examines the movement of goods and services from point of origin to point of consumption. The course focuses on using quantitative forecasting techniques to match supply with demand and the design of logistics networks to minimize costs. Topics addressed include transportation modes, warehousing, and inventory management. At the end of this class, a student will be able to critically assess the costs and logistical requirements of setting up a physical goods supply chain. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisite: Principles of Management (BUS-250). (1.0 Credit)

BUS 350 Principles of Finance

A survey of securities markets and financial institutions and an introduction to finance and development in finance theory. Practices of personal and business finance decisions are also included. Prerequisites: Principles of Macroeconomics (ECO-175), Principles of Microeconomics (ECO-215), and Principles of Accounting II (ACC-215).

BUS 352 Corporate Finance

A study of the major theories and models for planning and analyzing the working capital position, the financial structure, the cost of capital, and the capital budgeting of a business firm. Prerequisite: Principles of Finance (BUS-350).

BUS 353 Healthcare Finance

Healthcare Finance Examines financial management principles and practices within healthcare organizations. Focuses on budgeting, revenue cycle management, financial analysis, regulatory compliance, and strategic financial planning. Emphasizes the relationship between financial sustainability, organizational performance, and the delivery of high-quality, ethical patient care. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College.

BUS 375 Business Ethics

A study of some of the central ethical issues in the business world and some of the various ethical theories that might be employed in thinking about solutions to these problems. Topics likely to be covered include affirmative action, sexual harassment, whistleblowing, product safety standards, labor relations, advertising, and environmental issues. Prerequisite: sophomore standing or consent of instructor.

ECO 375 Econometrics

See **?@sec-economics**

BUS 381 Sourcing & Operations

Investigates the complexities of global procurement and manufacturing. The course focuses on supplier selection, negotiation strategies, and ethical considerations within a multi-country supply chain. Topics reviewed include contract management, lean principles, and quality control. At the end of this class, a student will be able to use popular methodologies, such as Six Sigma, to make and implement practical sourcing decisions. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisite: Principles of Management (BUS-250). (1.0 Credit)

BUS 387 Adv Top:Human Res Mgt

Expands on some of the traditional material presented in the Human Resource Management course. Contemporary issues in the workplace which affect the nature of the relationship between the organization and the employee are discussed. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Human Resource Management (BUS-300).

BUS 390 Strategic Healthcare Operations

Strategic Healthcare Operations Examines strategic management and operational decision-making in healthcare organizations. Focuses on the analysis of complex healthcare systems, resource allocation, staffing, patient satisfaction, financial sustainability, and emergency preparedness. Emphasizes problem identification, strategic planning, and evidence-based approaches to improving organizational performance and patient care outcomes. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: HSS-200 Comparative Health Systems.

BUS 395 Organizational Behavior

Combines theory and practice to investigate human behavior in organizations. Topics at the macrolevel (history, culture, design, communications, total quality), human-level (perception, personality, attitudes, learning, stress), and group-level (team and organization development), and their influences on organizational effectiveness are examined. Prerequisite: Principles of Management (BUS-250).

BUS 400 Legal Issues in Sports

A study of the legal aspects for the operations and administration of sports programs, competitive athletic programs, and community and commercial fitness programs. Topics such as risk management, gender equity, dipute resolution, and negotiation are included. Prerequisites: SMT-100: Introduction to Sports Management and BUS-315: Business Law I.

BUS 410 Business Law II

An extended study of traditional business law subjects, with the addition of Federal Securities Regulation, secured transactions, suretyship, and accountant's legal responsibility. Special attention is also given to agency, bankruptcy, and estates and trusts. Prerequisite: Business Law I (BUS-315).

BUS 411 Adv Topics:Risk Management/Insuranc

Examines one or more advanced topics in risk management/insurance. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Insurance Company Operations (BUS-310) and Personal and Business Risk Management (BUS-311).

BUS 412 Entrepreneurship & New Business Frm

Analysis of the role of the entrepreneur in the capitalist economy. Development of the procedural system for establishing a new business. Establishment and operation of a "small business" by teams of students, including presentation of a business plan in order to secure financing with a local financial institution, acquisition of tax information necessary for start-up and continued operations, and analysis of problems confronting the new or small enterprise. Prerequisite: senior standing or consent of instructor.

BUS 420 Sports Marketing and Communications

An introduction to the field of sports marketing and its role within sports organizations. Marketing mix, marketing research, and consumer behavior principles are used in studying topics such as sport sponsorships, branding, licensing, endorsements, naming rights, sales, fundraising, and public relations. Prerequisites: SMT-100: Introduction to

Sports Management and BUS-330: Principles of Marketing.

BUS 437 Strategic Compensation

A study of compensation systems used in organizations. This course looks at ways to develop, administer, and maintain compensation plans that attract and motivate employees while controlling labor costs. It covers such topics as the strategic importance of compensation; different types of compensation; designing competitive pay systems and employee benefits; and compensation for executives, expatriates, and contingent employees. Prerequisite: Human Resource Management (BUS-300).

BUS 441 Advanced Business Analytics

A project-based, advanced study of buysiness analytics. The course offers training of coding with a computer programming language. No prior knowledge of coding is required. Topics learned in Introductory Business Analytics will be implemented in the context of computer coding. A term project with real-world applications is also required. Prerequisite: Introductory Business Analytics (BUS 341).

BUS 442 Supply Chain Mgmt Technologies

Surveys the major systems and technologies that enable best-in-class supply chain organizations. The course focuses on how information flows throughout the supply chain—from procurement through delivery—and how digital tools improve efficiency and decision-making at each stage. Topics include enterprise resource planning (ERP), artificial intelligence, IoT, and blockchain applications in supply chain contexts. At the end of this class, a student will be able to evaluate how supply chain technologies function and articulate how they enhance operational performance. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Forecasting & Logistics (BUS-346) and Sourcing & Operations (BUS-381). (1.0 Credit)

BUS 444 Ind Study-Bus Admin

Independent studies under the direction of a faculty member in some area of business administration. May be taken more than once for a maximum of 2.0 credits. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of instructor.

BUS 446 International Business Management

An introduction to the concepts of international business and the global economy. Topics include the impact of national and cultural differences on global business; cross-cultural communication, negotiation, and decision making; international human resource management; international trade theory; cross-border trade and investment; and global business strategy development. Prerequisite: Human Resource Management (BUS-300) or Principles of Management (BUS-250).

ECO 446 International Econ

See **?@sec-economics**

BUS 454 Research in Business

Research on a selected topic in business, independently or in participation with a business department faculty member. May be taken more than once for a maximum of 2.0 credits. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: junior standing and consent of instructor.

BUS 456 Advanced Topics in Global Business

Examines one or more topics in international business. Example topics include international marketing, international business law, international leadership, international human resource management, and global strategy. May be taken more than once for credit, with consent of department chair, provided the topics are substantially different. Prerequisite: International Business Management (BUS-446).

BUS 457 Employment and Discrimination Law

Examines the legal regulation of the employment relationship. Extensive coverage of federal workplace discrimination statutes is featured, with particular consideration of Title VII, the ADEA, and the ADA. Significant attention placed on recent Supreme Court decisions and Congressional responses. Additional issues addressed may include employment-at-will and its exceptions, vicarious liability of employers for employee tort, and employee privacy concerns. Prerequisites: Human Resource Management (BUS-300) and Business Law I (BUS-315).

BUS 459 Supply Chain in Action

Explores the application of supply chain systems to vital real-world functions, ranging from global health crises to large-scale event logistics. The course analyzes how supply chains intersect with business, national, and global interests through case-based problem solving. Emphasis is placed on real-time decision-making and the financial impact of operational trade-offs. At the end of this class, a student will be able to solve real-world supply chain problems and clearly articulate end-to-end considerations for a proposed solution. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Forecasting & Logistics (BUS-346) and Sourcing & Operations (BUS-381). (1.0 Credit)

BUS 460 Advertising

A study of the basic practices and concepts of advertising. Advertising is studied in the broader context of integrated marketing communications, including public relations and sales promotion. Topics to be covered include historical, legal, and ethical concepts of advertising and other forms of promotion, the management and planning of advertising, creativity in advertising, media planning, and advertising research. Prerequisite: Principles of Marketing (WE) (BUS330).

BUS 461 Marketing Decision Making/Analysis

A continuation of the study of marketing principles with special emphasis on understanding marketing as the basis for management decision-making. Topics to be covered include customer relationship management, market-oriented strategic planning, brand asset management, buyer behavior analysis, the use of marketing research to identify and target customers, and integrated marketing communications planning. Prerequisites: Principles of Marketing (WE) (BUS-330).

BUS 463 Capstone in Supply Chain Management

Applies supply chain management principles to a series of actual problems faced by a real-world corporate partner. Working from company-provided background materials and video commentary from industry professionals, students develop original solutions—including plans of action, memos, and forecasts—and compare their work against the decisions made by practitioners. Topics span supply chain strategy, transportation, warehousing and inventory, supplier selection and risk, manufacturing capacity, forecasting, demand spikes, sustainability, and information technology. At the end of this class, a student will be able to create effective solutions for common types of supply chain issues and explain those solutions to both expert and lay audiences. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Forecasting & Logistics (BUS-346) and Sourcing & Operations (BUS-381). (1.0 Credit)

BUS 464 Seminar in Management

Development of written and oral communication proficiency through an intensive study of one or more selected topics in management. Topics are studied through the use of readings, class discussions, writings, and presentations, and vary from term to term. May be taken more than once for credit, provided the topics are substantially different. Prerequisites: senior standing and at least one course in management [Principles of Management (BUS-250), Human Resource Management (BUS-300), or Organizational Behavior (BUS-395)], or consent of instructor.

BUS 465 Advanced Topics in Marketing

An advanced study of a major topic in marketing. May be taken more than once for credit, provided the topics are substantially different. Example topics: marketing research, international marketing, and sales management. Prerequisite: Principles of Marketing (WE) (BUS-330).

BUS 467 Consumer Behavior

A study of the behavioral aspects of marketing with an emphasis on consumer markets. Various models of consumer decision-making are examined. Influences on consumer behavior are studied from both an individual perspective, including topics such as personality, perception, learning and attitudes, and a social perspective, including topics such as culture, social class, reference groups, and family. Prerequisite: Principles of Marketing (WE) (BUS-330).

BUS 470 Strategic Management

A study of strategic management principles and the application of these principles to problems encountered by

managers at all levels in large and small, for-profit and not-for-profit organizations. An advanced course in case studies to be taken near completion of the major. Prerequisite: junior standing.

BUS 472 Advanced Topics in Finance

An advanced study of a major topic in finance. Example topics include quantitative methods in finance, behavioral finance, the evolution of financial thought, alternative investments, fixed income management, portfolio management, and derivatives. May be taken more than once for credit, with consent of department chair, provided the topics are substantially different. Prerequisite: Principles of Finance (BUS-350).

BUS 475 Advanced Topics in Management

An advanced study of a major topic in management. Example topics: organizational theory, international management, negotiation, management information systems, and organizational change. May be taken more than once for credit, with consent of department chair, provided the topics are substantially different. Prerequisite: Principles of Management (BUS-250).

BUS 476 Ad Top Mgmt:non-west persp

Same as Advanced Topics in Management (BUS-475), except the course focuses on topics related to non-Western cultures. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Principles of Management (BUS-250).

BUS 485 Investment Fund Management

Examines financial asset portfolio construction and maintenance strategies used in the long-term management of an investment fund. Topics in this seminar include when to sell financial assets, how to evaluate mutual funds and exchange traded funds (ETFs), and the benefits of asset class diversification. Students will study the Birkey Investment Fund portfolio and make recommendations on rebalancing the portfolio through adjustments to its stock portfolio and its mutual fund and ETF holdings. Prerequisite: Research in Business (BUS-454) or permission of instructor. This course does not, on its own or in combination with another 0.5 credit course, count as one of the two business electives required for a business major. (0.5 course credit) (Offered Spring Term)

ECO 485 Mathematical Economics

See **?@sec-economics**

BUS 494 Internship in Business

A work experience with a business organization involving opportunities, experiences, and personal growth which can be evaluated in equivalent terms to traditional course work. In most circumstances such experience shall count for one course credit. On-site work plus academic work must total a minimum of 160 hours (140 of which must be spent on-site.) In exceptional situations where an internship presents significant theoretical or practical ways to augment or extend traditional classroom experiences, two course credits are available (see p. 37). P/NP basis only. This course does not satisfy any of the requirements for a major in business administration. Prerequisites: Candidates must meet GPA and departmental residency requirements. All candidates must have the consent of a supervising faculty member of the department and consent of department chair. Students seeking more than one course credit must further have approval of the Department Internship Review Committee.

BUS 495 Investment Analysis

A study of the fundamental principles underlying investment decisions. The course offers a basic understanding of the nature of risk and return considerations, the valuation framework for financial assets and derivatives, and introduction to the concepts of modern portfolio theory. Prerequisite: Principles of Finance (BUS-350).

13.12 Online RC-B.A. Degree in Business Administration with a Strategic Leadership Concentration

(This degree may be taken only by those Coe students who have been admitted into this program. See p. 22.)

13.12.1 Business Administration Major

A major in business administration requires a minimum cumulative 2.0 GPA in all courses counted toward the major. At least 40% of the courses must be completed at Coe.

1. ACC 171 Principles of Accounting I
2. ECO 175 Principles of Macroeconomics
3. BUS 190 Statistical Analysis
4. ACC 215 Principles of Accounting II
5. ECO 215 Prin Microeconomics
6. BUS 315 Business Law I
7. BUS 250 Principles of Management
8. BUS 330 Principles of Marketing
9. BUS 350 Principles of Finance
10. **Two** additional business courses numbered 200 or above

13.12.1.1 Concentration in Strategic Leadership

To complete this concentration, a student must meet the following requirements: - Completion of a major in Business Administration - Completion of seven additional courses (listed below). At least five of the seven courses must be completed at Coe. - A minimum cumulative 2.0 GPA in all courses counted in the concentration.

1. BUS 300 Human Resource Management
2. BUS 355 Leadership Principles
3. BUS 360 Project Management (0.5 course credit)
4. BUS 361 Leadership Ethics (0.5 course credit)
5. BUS 362 Teams (0.5 course credit)
6. BUS 405 Leadership Seminar (0.5 course credit)
7. BUS 471 Capstone in Strategic Leadership

13.12.2 Online-only Courses in Business

BUS 355 Leadership Principles
Explores the core concepts and strategies essential for effective leadership. Students develop self-awareness, learn how to create purpose and meaning, inspire themselves and others, make ethical decisions, and navigate change effectively. Emphasizing the practical application of leadership theories, the course incorporates readings, exercises, videos, and case studies to equip students with the tools needed to lead confidently and successfully. Prerequisite: Principles of Management (BUS-250)
BUS 360 Project Management
Introduces the fundamentals of project management. Students study how to plan, execute, lead, and close projects within time and budget constraints. Topics covered also include managing risk, monitoring quality, allocating resources, and communicating with project stakeholders. Prerequisite: Principles of Management (BUS-250) (0.5-credit course)
BUS 361 Leadership Ethics
Focuses on the role of leaders in managing conflicts and ethical risks within their organizations. Through readings and case studies, students learn about ethical theory, common ethical dilemmas in business, and the importance of strong moral leadership in ethical decision-making. Prerequisite: Principles of Management (BUS-250) (0.5-credit course)
BUS 362 Teams

Focuses on the use of work teams in organizations and how leaders can effectively build and manage teams. Students study the importance of collaboration, interpersonal dynamics, goal-setting, motivation, conflict resolution, and effective communication within teams. Prerequisite: Principles of Management (BUS-250) (0.5-credit course)

BUS 405 Leadership Seminar

Examines one or more advanced topics in leadership. Example topics include conflict resolution, crisis management, organizational change, negotiation, leadership skills, and organizational communication. With faculty permission, this course may be taken more than once for credit, provided the topics are substantially different. Prerequisite: Principles of Management (BUS-250) (0.5-credit course)

BUS 471 Capstone in Strategic Leadership

Integrates key leadership and business strategy concepts using case studies, simulations, and strategic projects. This course prepares students for leadership roles and professional advancement by sharpening their analytical skills, decision-making capabilities, and strategic thinking. The course fulfills the Coe College general education practicum requirement. Prerequisite: Satisfactory completion of four or more courses from the concentration or consent of instructor.

13.13 Economics

Economics is a social science concerning the study of how economic agents make choices in the face of scarcity. Economists study a broad variety of topics ranging from the theory of the consumer to economic growth and the wealth of nations. Students majoring in economics have two options: the economics major and the international economics major (see p. 147). The economics major is designed to permit a broad enough selection of courses for students to develop a general competence in economics, and to prepare students for graduate work in economics or other disciplines, such as law or business. The international economics major is designed to allow students who are interested in international studies to explore issues of development, growth, and international finance, using the tools of economic analysis.

Because of significant overlap in the economics and the international economics requirements, only one of the two majors may be elected by a student. Students majoring in economics or international economics may not minor in either economics or international economics.

13.13.1 Economics Major

A major in economics requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. ECO 175 Principles of Macroeconomics
2. ECO 215 Prin Microeconomics
3. ECO 315 Intermediate Macroeconomic Theory
4. ECO 345 Intermediate Microeconomics
5. ECO 375 Econometrics
6. **One** of the following Microeconomics Field courses:
   ECO 237 Labor Economics
   ECO 247 Health Economics
   ECO 447 Urban Economics

7. **One** of the following Macroeconomics Field courses:
   ECO 225 Money & Banking
   ECO 336 Divergent Economic Growth
   ECO 422 Macroeconomics Policy
   ECO 446 International Econ

8. **One** of the following Quantitative or History courses:
   Quantitative courses:
   ECO 435 Time Series Analysis
   ECO 445 Econometrics II
   ECO 485 Mathematical Economics History courses: ECO 395 History of Economic Thought
   ECO 424 Political Economy
   ECO 457 US Econ History

9. **One** of the following Seminars:
   ECO 436 Econ Development
   ECO 401 Seminar in Macroeconomics
   ECO 402 Seminar in Microeconomics

10. **Two** additional economics courses numbered 200 or higher, with at least one of the two courses numbered 300 or higher

NOTE: Students intending to pursue a graduate degree in economics are strongly encouraged to complete the following: MTH 135 Calculus I
MTH 145 Calculus II
MTH 255 Calculus III
MTH 365 Abstract Linear Algebra
ECO 435 Time Series Analysis
ECO 444 Ind Study-Economics
ECO 454 Research in Economics
ECO 485 Mathematical Economics

13.13.2 Economics Minor

1. ECO 175 Principles of Macroeconomics
2. ECO 215 Prin Microeconomics
3. **One** of the following Microeconomics courses:
   ECO 237 Labor Economics
   ECO 247 Health Economics
   ECO 345 Intermediate Microeconomics
   ECO 447 Urban Economics

4. **One** of the following Macroeconomics courses:
   ECO 225 Money & Banking
   ECO 315 Intermediate Macroeconomic Theory
   ECO 336 Divergent Economic Growth
   ECO 422 Macroeconomics Policy
   ECO 446 International Econ

5. **Two** additional Economics courses numbered 200 or higher, with at least one of the two courses numbered 300 or higher.

13.13.3 Courses in Economics

BUS 340 Applied Regression Analysis;
BUS 341 Introductory Business Analytics;
BUS 441 Advanced Business Analytics;
BUS 495 Investment Analysis;
See Business Administration, Section 25.11

ECO 105 Econ & Public Int
Designed to give students the opportunity to learn the fundamentals of the economic approach to problems and enable them to apply elementary concepts such as supply and demand, marginal costs and benefits, and the national income identity to problems like the environment, public choice, the budget deficit, the trade deficit, etc. The core of the course consists of the analytics of the economic way of thinking; the applications change from time to time. This course does not satisfy any of the requirements for a major or minor in economics or international economics.
ECO 115 Intro Political Econ
An introduction to political economy. A study of the roots of economics and the interaction between public policy debates and economic theory. The course explores the historical foundation and development of a variety of schools of thought, ranging from the classical liberalism of Adam Smith to the radical voice of Karl Marx. Emphasis is placed on understanding not only the historical progression of ideas, but also the relevance varied perspectives have on present political and economic issues. This course does not satisfy any of the requirements for a major or minor in economics or international economics.
DS 120 Sports Analytics
See Data Science, **?@sec-data-science**
ECO 155 Econ/Ethics of Alternative Energy
Focuses on the economics and ethics of energy choices, with some emphasis on climate change and other concerns related to energy use, including the science behind climate change and various alternative energies. The course examines a broad array of issues related to energy and more specifically, alternatives to petroleum-based sources of energy such as biomass, wind, and solar. Energy choices and policies are analyzed using a variety of methods, such as benefit-cost, equity, program evaluation (both monetary and non-monetary), and social benefits versus economic impact. The course includes travel to regional organizations that develop and produce these technologies; guest lectures from national and state experts on the economics of energy, energy policy, and the science behind various energies; case studies; and class discussion. Students gain a broad understanding of factors considered in energy development and policy. This course may be used to satisfy the requirements for a major in Environmental Studies but does not satisfy any of the requirements for a major or minor in economics or international economics. (Offered May Experiential Term only)
ECO 175 Principles of Macroeconomics
Theories of aggregate demand and supply applied to national income determination, business cycles, money, interest rates, inflation, and other macroeconomic questions.
ECO 195 Prin of Environmental Economics
An introduction to the economics of the environment and natural resource allocation. This course is focused on optimal resource allocation and the problems associated with externalities and public goods in the context of a market economy. Environmental issues and policy are analyzed using standard economic models. This course may be used to satisfy the requirements for a major in Environmental Studies but does not satisfy any of the requirements for a major or minor in economics. Prerequisite: Principles of Macroeconomics (ECO-175).
ECO 215 Prin Microeconomics
A study of demand and supply, theories of household and firm behavior, market structures, and pricing in output and factor markets under competitive and non-competitive conditions. Includes an economic analysis of the nature

and consequences of market failure. Prerequisite: Principles of Macroeconomics (ECO-175).

ECO 225 Money & Banking

A study of the role of financial intermediaries in a modern economy, financial institutions and markets, and money and interest rates. Topics include the role of financial institutions and the central bank in creating and regulating money supply, and monetary policy in economic stabilization. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 237 Labor Economics

A study of the wage earner in modern economic society, of the development and operation of labor organizations and their policies, and of economic and social issues raised as a result of the existence of these organizations. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 247 Health Economics

Examines the role of the government in health behaviors and health care. This course will examine the theoretical reasons for government intervention in health behaviors and health care, empirical evidence related to the theory, examples of government intervention, and effects of these interventions on health and economic outcomes. Prerequisite: Principles of Microeconomics (ECO-215).

ECO 315 Intermediate Macroeconomic Theory

A study of national income accounting concepts and analysis of the determination of the levels of gross national product, national income and employment, and their control. Prerequisites: Principles of Macroeconomics (ECO175)and Principles of Microeconomics (ECO-215).

ECO 320 Public Finance

Consideration of optimal resource allocation and the role of the public sector, the concept of public and semi-public goods, allocation of public goods, principles of taxation and tax incidence, the tax and expenditure system of the U.S., the budgetary process, and the theory and techniques of modern fiscal policy. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 325 Collectve Bargaining

Traces the development of labor law and the legal interpretation of the statutes by the NLRB as they affect collective bargaining relationships. Public-sector implications for public employees because of state law and executive orders are also discussed. Major emphasis on the functioning of the grievance process to administer, interpret, and enforce the negotiated contract. Rules and principles of arbitration as the terminal step in the grievance process are taught via a case approach.

ECO 336 Divergent Economic Growth

A combination of modern macroeconomic growth theory and its application to the underdeveloped economies of the world. The course begins with the basics of growth theory and identifies the commonly cited lessons for growth in order to analyze underdeveloped economies, especially those of Sub-Saharan Africa. A preponderance of content is aimed at investigating the growth-promoting and growth-inhibiting institutions currently in place in underdeveloped economies. Prerequisites: Principles of Macroeconomics (ECO-205) and Principles of Microeconomics (ECO-215).

BUS 340 Applied Regression Analysis

See Business Administration, Section 25.11

BUS 341 Introductory Business Analytics

See Business Administration, Section 25.11

ECO 345 Intermediate Microeconomics

Concepts and methods of analysis, including analysis of demand, theory of production, costs, pricing under different market structures, and functional distribution. General equilibrium analysis serves to introduce welfare economics. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

BUS 350 Principles of Finance

See Business Administration, Section 25.11

ECO 355 Industrial Organization

An upper division course devoted to the environment that firms operate within, the tools to analyze market processes under imperfect competition, and the consequences for economic performance. Topics include the structure-conductperformance paradigm and the fundamentals of game theory. Prerequisites: Principles of Macroe-

conomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 365 Law & Economics

A study of the Law and Economics school of jurisprudence, utilizing standard, elementary tools of microeconomics to analyze legal problems. The principal areas of property, contracts, crime, and tort law are evaluated from the economic perspective. Legal paradigms and rules of Western Europe and the New Zealand socialist tort program are also compared to the substantive laws of the United States. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 375 Econometrics

Application of elementary statistical methods to test economic theory that has been stated in mathematical terms. It is recommended that students take Statistical Analysis (BUS-240) or Statistical Reasoning I-Statistical Foundations (STA-100) prior to taking this course. Prerequisites: Both Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215) or Data Analysis and Visualization (DS-260).

ECO 395 History of Economic Thought

A history and comparison of the doctrines of various schools of economic thought from the Mercantilists to the present. Prerequisites: Principles of Macroeconomics (ECO-175), Principles of Microeconomics (ECO-215), and a nearly completed major in economics.

ECO 401 Seminar in Macroeconomics

An advanced study of selected macroeconomic theories and practices. May be taken more than once for credit, provided the topics are substantially different. (See instructor for specific content.) Prerequisite: Intermediate Macroeconomic Theory (ECO-315) or consent of instructor.

ECO 402 Seminar in Microeconomics

An advanced study of selected microeconomic theories and practices. May be taken more than once for credit, provided the topics are substantially different. (See instructor for specific content.) Prerequisite: Intermediate Price Theory (ECO-345) or consent of instructor.

BUS 441 Advanced Business Analytics

See Business Administration, Section 25.11

ECO 422 Macroeconomics Policy

Investigates modern Macroeconomic schools of thought as they pertain to the conduct of Macroeconomic Policy following the Great Depression and Keynesian Revolution in Economics. This course will survey the significant contributions of influential thinkers in contemporary Macroeconomics. Prerequisite: Intermediate Macroeconomic Theory (ECO-315).

ECO 424 Political Economy

Examines alternative approaches to economic theory. This course requires critical engagement with various theoretical frameworks ranging from Marxist to Austrian schools of thought, focusing primarily on the dominant models within each school of thought. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 435 Time Series Analysis

An advanced econometrics course emphasizing the challenges of working with dynamic systems of economic variables. Modeling stationary and nonstationary processes for hypothesis testing, forecasting, and policy design and evaluation are emphasized. Prerequisite: Econometrics (WE) (ECO-375).

ECO 436 Econ Development

The definition of development and underdevelopment in the modern context. A consideration of the process and problems of development in the presently less developed countries, strategies of planning for growth with distributional equity, the contribution of resources and capital, and the role of foreign trade and aid. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 444 Ind Study-Economics

Independent studies under the direction of a faculty member in some area of business administration or economics. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of instructor.

ECO 445 Econometrics II

Explores the theory and applications of identification strategies used in applied econometrics. This course covers commonly used econometric techniques with cross sectional and panel data including instrumental variables, differences-in-differences, and regression discontinuity design. Prerequisite: Econometrics (WE) (ECO-375).

ECO 446 International Econ

Studies the issues which arise in international trade theory and policy, the theory of exchange rate determination and the balance of payments. Topics emphasized include gains from trade, the patterns of trade, protectionism policies, and how changes in the exchange rates affect international assets and portfolios. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 447 Urban Economics

Studies the role of urban environments in the economic and social lives of individuals. The course will examine the historical evolution of the city, economic theories of urban formation, and the roles cities play in the contemporary economy. Emphasis will be placed on building, using, and extending core models in urban economic theory to evaluate and assess urban economic policy. Prerequisites: Principles of Macroeconomics (ECO- 175) and Principles of Microeconomics (ECO-215).

ECO 454 Research in Economics

Studies the issues which arise in international trade theory and policy. Topics emphasized include gains from trade, the patterns of trade, and protectionism policies. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 457 US Econ History

Analysis of the economic institutions, policies, and theories which influenced the development of the American economy from colonial times to the present. The course allows development of historical perspective in economic development; it also requires the application and analysis of the effects of economic theory, policy, and institutions in the developmental process. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 475 Comparative Econ Sys

A study of economic systems and theoretical models of competitive market economies, socialist market economies, and command economies. Topics include actual world economies such as those of the United States, Japan, Germany, and China; the breakdown of hitherto socialist command economies and the problems of transition to mixed market economies; emergence and strength of regional groupings such as European Community; and problems of stabilization, growth, and planning in different economies. Prerequisites: Principles of Macroeconomics (ECO-175) and Principles of Microeconomics (ECO-215).

ECO 485 Mathematical Economics

An introduction to mathematics as a tool to formulate economic models. Includes elementary matrix operations, use of derivatives in utility and production theory, and constrained optimization solutions. Little mathematical preparation required; familiarity with economics a necessity. Prerequisites: Intermediate Macroeconomic Theory (ECO-315), and Intermediate Price Theory (ECO-345) or equivalent.

BUS 495 Investment Analysis

See Business Administration, Section 25.11

13.14 Chemistry

Edvenson, Singleton, Stead, Stoudt (Chair)

The chemistry department seeks to support Coe's mission by providing students with top-quality instruction and research opportunities. The department offers a major and minor in **Chemistry** as well as collateral majors in **Biochemistry** (see p. 72) and **Neuroscience** (see p. 169). Students considering a chemistry major may continue research in a graduate program, pursue a career in the health sciences or teach science at the secondary level.

Students who receive a grade of less than "C–" in a prerequisite course are expected to consult with the instructor of the subsequent course prior to continuing in the chemistry curriculum.

In addition to a major in **Chemistry**, the chemistry department also offers an **American Chemical Society Certified Chemistry Major**. This major might be considered by students interested in chemistry as a career.

13.14.1 Chemistry Major

A major in chemistry requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. CHM 121/121L General Chemistry I and Laboratory
2. CHM 122/122L General Chemistry II and Laboratory
3. CHM 211/211L Analytical Chemistry and Laboratory (WE)
4. CHM 221 Organic Chemistry I
5. CHM 341/341L Physical Chemistry I (WE) and Laboratory
6. **Three** additional courses to be chosen from the list of advanced chemistry electives below: CHM 321 Organic Chemistry II
   CHM 322 Organic Laboratory
   CHM 421 Advanced Organic Chemistry
   CHM 422 Synthesis Laboratory I
   CHM 431/431L Biochemistry and Laboratory
   CHM 432/432L Protein Biochemistry and Laboratory
   CHM 441 Physical Chemistry II
   CHM 451/ 451L Inorganic Chemistry and Laboratory (WE)
7. MTH 145 Calculus II
8. PHY 185/185L General Physics I & Laboratory
9. PHY 195/195L General Physics II & Laboratory
10. CHM 464 Seminar in Chemistry I **and** CHM 474 Seminar in Chemistry II

Recommended:
MTH 255 Calculus III

13.14.2 Chemistry Minor

1. CHM 121/121L General Chemistry I and Laboratory
2. CHM 122/122L General Chemistry II and Laboratory
3. **Four** 1.0-credit chemistry electives numbered 200 or above

13.14.3 American Chemical Society Certified Chemistry Major

1. Completion of a major in chemistry, including Calculus II and two General Physics courses

2. **All** of the following: CHM 321 Organic Chemistry II
   CHM 322 Organic Laboratory
   CHM 422 Synthesis Laboratory I
   CHM 431/431L Biochemistry and Laboratory
   CHM 451/ 451L Inorganic Chemistry and Laboratory (WE)

3. **Two** of the following:
   CHM 421 Advanced Organic Chemistry
   CHM 432/432L Protein Biochemistry and Laboratory
   CHM 441 Physical Chemistry II

4. **One** of the following:
   CHM 444 Independent Study Chemistry
   CHM 454 Undergraduate Summer Research

13.14.4 Courses in Chemistry

CHM 103/103L Selected Concepts in Chemistry and Laboratory
A consideration of the basic principles of chemistry and applications of chemistry in contemporary society. Three class meetings and one laboratory per week. This course does not satisfy any of the requirements for a major or minor in chemistry.
CHM 111/111L Introduction to Organic and Biological Chemistry and Laboratory
Designed as a course for pre-nursing student. Topics in introductory organic and biological chemistry include drugs, proteins, and DNA. Laboratory component involves basic experimental techniques in organic chemistry and biochemistry. Three class meetings and one laboratory per week. Lab is P/NP basis only. This course does not satisfy any of the requirements for a major or minor in chemistry. Prerequisites: Cellular and Molecular Biology (BIO145) and one year of secondary school chemistry or one term of college chemistry, or consent of instructor.
CHM 121/121L General Chemistry I and Laboratory
A foundational treatment of atoms and molecules. Explores the nature of chemical bonding and how the macroscopic properties of substances can be interpreted in terms of atomic and molecular structure. Laboratory work emphasizes experimental techniques and the acquisition and analysis of experimental data. Three class meetings and one three-hour laboratory per week. Lab is P/NP basis only. Prerequisite: secondary school chemistry or consent of instructor.
CHM 122/122L General Chemistry II and Laboratory
A continuation of CHM-101. Topics include chemical kinetics, thermodynamics, equilibria, and redox chemistry. Three class meetings and one three-hour laboratory period per week. Lab is P/NP basis only. Prerequisite: General Chemistry I and Laboratory (CHM-121/-121L) or consent of instructor.
CHM 211 Analytical Chemistry
A study of the theory of equilibria as they apply to quantitative chemical analysis. The basic principles of spectroscopy, potentiometry, and chromatography are introduced. Three class meetings per week. Prerequisite: General Chemistry II and Laboratory (CHM-122/-122L). Corequisite: Analytical Chemistry Laboratory (CHM-211L).
CHM 211L Analytical Chemistry Laboratory
An introduction to experimental analytical chemistry, including titrimetric, potentiometric, spectroscopic, and chromatographic techniques. Two three-hour laboratories per week. Prerequisite: General Chemistry II and Laboratory (CHM-122/-122L). Corequisite: Analytical Chemistry (CHM-211). (0.5 course credit)
CHM 221 Organic Chemistry I

A study of the chemistry of carbon compounds, emphasizing reaction mechanisms and the influence of structure on the physical and chemical properties of these substances. Topics include alkanes, alkenes, alkynes, and other functional groups, as well as stereochemistry, ring systems, spectroscopy, and substitution and elimination reactions. This course is the first of a two-term organic chemistry sequence appropriate for students in chemistry and biological sciences, as well as those pursuing pre-medical, pre-dental, and pre-veterinary programs. Prerequisite: General Chemistry II and Laboratory (CHM-122/-122L) or consent of instructor.

CHM 321 Organic Chemistry II

Covers reactions of aromatic and carbonyl compounds, amines, and carbohydreates in a continuation of Organic Chemistry I (CHM - 221). Prerequisite: Organic Chemistry I (CHM-221).

CHM 322 Organic Laboratory

Introduces techniques for the separation, purification, and synthesis of organic compounds, in addition to chemical and spectroscopic methods of characterization. Two three-hour laboratories and one ninety-minute discussion per week. Prerequisite: previous or concurrent registration in Organic Chemistry II (CHM-321).

CHM 341/341L Physical Chemistry I (WE) and Laboratory

Study of chemical systems from a molecular basis. Basic concepts of kinetic molecular theory, quantum mechanics and thermodynamics applied to molecular structure and chemical change. Fundamentals of electronic structure of atoms and molecules and interaction of matter with light. Three class meetings and one three-hour, (0.0 course credit) laboratory per week. Prerequisites: General Chemistry II & Laboratory (CHM-122/-122L), General Physics I & Laboratory (PHY-185/-185L), and Calculus II (MTH-145).

CHM 421 Advanced Organic Chemistry

Extensive survey of synthetic and mechanistic implications of many organic reactions. Recent chemical developments and the use of the original scientific literature emphasized. Prerequisite: Organic Laboratory (CHM-322). (Offered alternate years)

CHM 422 Synthesis Laboratory I

Synthesis and characterization, inorganic and organometallic compounds based on current chemical literature. One class meeting and two laboratories per week. Prerequisite: Organic Laboratory (CHM-322). (Offered alternate years)

CHM 431/431L Biochemistry and Laboratory

Introduces biochemical processes, emphasizing biological oxidation and reduction; the chemistry of carbohydrates, lipids, proteins, and nucleotides; and the theory and mechanism of enzyme reactions. Laboratory includes modern techniques for separation, purification, and analysis of biochemical systems and substances. Three class meetings and one laboratory per week. Prerequisites: Cellular and Molecular Biology (BIO-145) and Organic Chemistry II (CHM321).

CHM 432 Protein Biochemistry

A study of the structure and function of proteins in their many biochemical roles. Topics include proteins as enzymes, messengers, antibodies, regulators, storage, structure, and transport molecules. Protein purification, protein engineering and kinetics, structure prediction, spectroscopy, and current literature topics are covered. Prerequisites: Cellular and Molecular Biology (BIO-145) and Organic Chemistry II (CHM-321). Corequisite: Protein Biochemistry Laboratory (CHM-432L). (Offered alternate years)

CHM 432L Protein Biochemistry Laboratory

Advanced methods and tools of protein purification and analysis, protein engineering and kinetics. One three-hour laboratory period per week. Corequisite: Protein Biochemistry (CHM-432). (0.2 course credit)

CHM 441 Physical Chemistry II

Study of quantum mechanics, molecular spectroscopy, rates and mechanisms of chemical reactions and thermodynamics of change and equilibrium from classical and statistical perspectives. Prerequisite: Physical Chemistry I and Laboratory (CHM-341/-341L) or consent of instructor.

CHM 444 Independent Study Chemistry

Research on a selected project directed by a member of the department, including library research, laboratory investigation, and submission of a research report. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of instructor.

CHM 451 Inorganic Chemistry
Structures and properties of selected ionic and covalent inorganic substances, coordination complexes and electron deficient compounds, general acid base theory, and inorganic reactions in solution. Prerequisite: Physical Chemistry I and Laboratory (CHM-341/-341L). (Offered alternate years)
CHM 451L Inorganic Chemistry Laboratory
Advanced methods for the synthesis and characterization of main group and transition metal compounds. Synthesis techniques include high temperature and inert atmosphere methods, while characterization methods include electrochemistry, multinuclear NMR, and Raman spectroscopy. One three-hour laboratory period per week. Prerequisite: previous or concurrent registration in Inorganic Chemistry (CHM-451). (0.2 course credit) (Offered alternate years)
CHM 454 Undergraduate Summer Research
Prerequisite: consent of department chair.
CHM 464/474 Seminar in Chemistry I, II
Weekly seminar covering two terms, in which topics of interest in modern chemistry and chemical research are presented. Particular emphasis on improving scientific communication skills. Required for all majors in chemistry. Prerequisites: Organic Chemistry I (CHM-221) and junior standing or consent of department chair. (Each seminar: 0.25 course credit)
CHM 494 Internship in Chemistry
Investigation of an area of interest through voluntary field placement supervised by a faculty member of the department. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a major in chemistry. Prerequisite: completion of a chemistry minor or junior standing and consent of department chair.

13.15 Classical Studies (Courses Only)

13.15.1 COURSES IN CLASSICAL STUDIES

CLA 155 Latin/Greek Origins Med Terminology
Examines the origins of contemporary medical terminology, in part by studying the development of a distinct technical vocabulary, with historical roots in the Greco-Roman, Arabic, and Modern-European worlds, which developed as physicians discovered distinct ways of communicating both with their patients and with each other.

13.16 Communications Studies

Carr, Harmsen, Opayemi (Chair)

The aim of the major in communication studies is to provide a background of theory and practice in oral and mediated communication. In their study of formal and informal oral, print and digital environments, students will learn to communicate ethically, responsibly and effectively for diverse audiences in multiple contexts.

13.16.1 Communication Studies Major

A major in communication studies requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. COM 101 Intro to Communication Studies

2. COM 125 Fundamentals of Public Speaking

3. **One** methods course:
   COM 281 Intro to Research Methods (WE)
   COM 381 Research Method Communication Study

4. **One** course in Human Communication:
   COM 137 Interpersonal Communication
   COM 231 Communication in Teams (WE)
   COM 225/227 Topics in Communication Studies
   COM 322 Prof Communication & Writing (WE)
   COM 327 Organizational Communication (WE)
   COM 236 Intercultural Communication
   COM 323 Relational Com:Theory & App (WE)
   COM 332 Health Communication (WE)
   COM 435/437 Special Topics in Relational Communication (WE)

5. **One** course in Mass Media:
   COM 141 Intro to Journalism
   COM 151 Introduction to New Media Studies
   COM 157 Introduction to Media Analysis
   COM 241 Multimedia Journalism
   COM 245/247 Topics in Communication Studies
   COM 257 Sex, Race, and Gender in the Media
   COM 341 Digital Storytelling
   COM 445/447 Special Topics in Production (WE)

6. **One** course in Cultural and Critical Communications: COM 160 Rhetorical Theory and Practice
   COM 161 Visual Rhetoric
   COM 267 Environmental Rhetoric
   COM 275/277 Topics in Communication Studies
   COM 377 Language, Power, and Social Change
   COM 465/467 Special Topics in Public Discourse (WE)
7. A Communication Studies (COM) course numbered 400 or above (if not used to satisfy requirement 4, 5, or 6)
8. **Three** additional courses with a COM prefix; students may count up to 1.0 credits with ECC prefix toward this requirement, including ECC-494 Internship in English, Creative Writing, and Communication Studies

13.16.2 Communication Studies Minor

A minor in communication studies requires a minimum cumulative 2.0 GPA in all courses counted toward the minor.

1. COM 101 Intro to Communication Studies

2. COM 125 Fundamentals of Public Speaking

3. **Three** additional courses with a COM prefix; students may count up to 1.0 credits with ECC prefix toward this requirement, including ECC-494 Internship in English, Creative Writing, and Communication Studies

13.16.3 COURSES IN COMMUNICATION STUDIES

COM 101 Intro to Communication Studies
COM-101 Introduction to Communication Studies

Offers an introduction to the field of communication studies, including areas such as interpersonal, health care, organizational, speech, and mass communication enabling students to delve into the intricacies of how individuals coordinate social meaning and achieve communicative objectives through various channels across diverse contexts. This course offers a solid foundation to pursue upper-level courses in the program, as well as a broader understanding of how to create and evaluate communication in everyday life.

COM 125 Fundamentals of Public Speaking
Explores the basic processes of speech making: audience analysis and adaptation, idea and organizational development, use of effective supporting material and reasoning, and presentation. Critical thinking and listening skills developed by analysis of public speeches. Speaking and writing skills developed through introductory, informative, persuasive, and ceremonial speeches.

COM 137 Interpersonal Communication
COM-137 Interpersonal Communication (WE) Examines the influence in interpersonal relationships of ethnicity, gender, family, and class on self-concept, perception, emotions, and verbal and non-verbal expression. Students practice specific techniques that facilitate building positive relationships, including such issues as clear language usage, supportive climate building, and conflict resolution.

COM 141 Intro to Journalism
Introduces and analyzes several forms of writing for media in a digital age. In addition to print format, students create and analyze interactive and web-based texts while acquiring a systematic approach to compositions in a variety of media.

COM 151 Introduction to New Media Studies
Exploration of the theoretical and practical questions surrounding digital or computer-mediated communication technologies. This introductory course examines how changes to the technologies for the creation, display, and circulation of messages influence meaning making.

COM 157 Introduction to Media Analysis
Exploration of important theories, concepts and terms in media studies. This course examines the production, circulation, and reception of content and provides an introduction to media analysis.

COM 160 Rhetorical Theory and Practice
COM-160 Rhetorical Theory and Practice Explores underlying forms and functions of written and spoken language, including the study of classical rhetoric (Plato, Aristotle, Quintilian) and recent developments in rhetorical theory.

COM 161 Visual Rhetoric
Examination of the persuasive power of visual symbols. The course provides an introduction to foundational concepts in the study of rhetoric and cultivates ways of thinking needed to critically analyze visual forms of symbolic expression.

COM 212 Journalism Practicum
COM-212 Journalism Practicum For Cosmos staff members. Introduction to college newspaper production, with discussions on professionalism, news gathering, ethics, advertising, layout, and computer skills. May be taken each term a student serves on the Cosmos staff. Advanced students assist with instructing beginners. To receive credit, students complete a term of service to the Cosmos and participate in the workshops at the level agreed upon among the instructor, the editor-in-chief, and the staff member. P/NP basis only. A maximum of one course credit may count toward a writing minor and no more than one course credit may count toward graduation. Credit for Journalism Practicum is regarded as internship credit. (0.2 course credit)

COM 225/227, 245/247, 275/277 Topics in Communication Studies
Offers selected topics on specific concerns, problems, or trends in writing and rhetoric. Content varies as determined by instructor. May be taken more than once for credit, provided topics are distinct.

COM 231 Communication in Teams (WE)
COM-231 Communication in Teams (WE) Studies the crucial role of interpersonal communication in enhancing

productivity in small groups and work teams. Students will examine topics such as group norms, trust, collaboration, defensive and supportive group communication, conflict management strategies, decision-making, problem-solving and creativity techniques for small groups and teams, and leadership styles. By the end of the course, students will learn about and practice small group communication processes to excel in group settings and drive success in team-oriented projects.

COM 236 Intercultural Communication

Exploration of the role of communication in constructing, navigating, and challenging various markers of similarity and difference.

COM 241 Multimedia Journalism

Develops journalistic writing skills in several styles (hard news, features, in-depth reporting) and across media (print, audio, video, online). Topics include information gathering, objectivity, audience, news convergence, news values, civic responsibility, and journalism ethics. Students investigate the state of news and the roles and responsibilities of journalists in contemporary American society.

COM 257 Sex, Race, and Gender in the Media

An introduction to analysis of representations of identities such as gender, race, sexual orientation, and the body in the mass media. As such, this course examines some of the relationships between the media in the U.S. and the social constructions of race, gender and sexuality. Students view, read about, analyze and discuss various forms of mass media and look at what these forms represent. An underlying understanding within the course is recognition of the inextricable interconnections of gender, race, and sexuality. Prerequisites: junior standing or consent of instructor.

COM 267 Environmental Rhetoric

COM-267 Environmental Rhetoric (WE) Examines how authors and organizations have attempted to define and influence the political, economic, social, and ethical debates on key environmental issues with particular attention to the birth and progress of global environmental movements. Students engage in close reading and analysis of a range of arguments and messaging pertaining to such movements.

COM 281 Intro to Research Methods (WE)

COM-281 Introduction to Research Methods (WE) Introduces students to a toolbox for understanding the methods scholars use to address questions pertinent to the field of communication studies. Students will read, interpret, and evaluate studies and reports in a range of methodologies.

COM 322 Prof Communication & Writing (WE)

COM-322 Professional Communication and Writing (WE) Introduces students to essential communication skills for workplace and professional business success. The course will cover interviewing principles and provide opportunities for students to practice relevant skills for achieving specific interviewing goals. By the end of the course, students will learn how to compose various texts—memos, letters/emails, formal/progress and activity reports, sales proposals, plan and execute effective presentations, and adapt their communication style to suit different audiences and workplace settings.

COM 323 Relational Com:Theory & App (WE)

COM-323 Relational Communication: Theory and Application (WE) Studies the complex dynamics of interpersonal communication within close relationships, including those with family, romantic partners, friends, and kin. Students will explore topics on personal and shared experiences with close relationship partners, such as identity (re)construction, uncertainty management, expectancy violation, self-disclosure, privacy management, and stressful life transitions. By the end of the course, students will learn how to use effective interpersonal communication skills to navigate relationship initiation, repair, reconciliation, and termination.

COM 327 Organizational Communication (WE)

COM-327 Organizational Communication (WE) Examines concepts, theories, and approaches to examine communication within organizational contexts such as government, non-profit organizations, in-person and the virtual workplace. The topics covered in this course include emotional intelligence, conflict, intercultural communication, globalization, crisis, and leadership. Students will learn how to implement appropriate communication practices within everyday organizational life.

COM 332 Health Communication (WE)

Examines the connections among communication, culture, and health. Course content and assignments focus on how one communicates about health in various contexts (family, end-of-life, patient-provider, etc.), cultural influences on healthcare practices, and the role of communication and storytelling in coping with one's body, illness, disability, and death. Prerequisite: junior standing or consent of instructor.

COM 341 Digital Storytelling

Students practice adapting written language to oral and/or visual formats while learning to communicate news messages in a variety of broadcast formats, ranging from audio to news-in-the-field to video productions. Continuing focus on professional standards emphasizing accuracy, conciseness, style, and the conventions of Standard English. Prerequisite: Multimedia Journalism (WE) (COM-241) or Introduction to Journalism (WE) (COM-141).

COM 347 Persuasion

Investigation of the nature and process of persuasion. This course provides practice constructing and analyzing persuasive messages and campaigns. Prerequisite: junior standing or consent of instructor.

COM 377 Language, Power, and Social Change

A survey of advanced theory in Cultural Studies, aiming to familiarize students with the range of questions, artifacts, conditions, and problems scholars of Cultural Studies strive to understand. Anchoring itself in linguistic and rhetorical theories about discourse and meaning, this course is specifically centered on questions of power: how is it constituted, acquired, distributed, and wielded to influence our shared culture of economics, politics, media, identity, and interpersonal relations.

COM 381 Research Method Communication Study

Explores one or more major approaches to conducting research in Communication Studies. This course serves as the foundation for more complex forms of qualitative and/or quantitative analysis.

COM 394 Directed Learning in Communication

Designed to explore an area of the discipline that is not covered by existing course offerings. Students create the reading list for the course in consultation with a faculty advisor, prepare for weekly meetings, and regular writing assignments. Prerequisites: junior standing, written consent of the instructor and the departmental petition form.

COM 435/437 Special Topics in Relational Communication (WE)

Exploration of a topic within the field of relational communication. Course work includes a substantive research project, and oral presentations. May be taken more than once for credit with consent of department chair. Can satisfy the DCP requirement when topic is appropriate. Prerequisites: Rhetorical Theory and Practice (RHE-200) and either Research Methods in Communication Studies (COM-381) or Research Methods: Rhetorical/Critical (COM-382).

COM 444 Independent Study in Comm Studies

Independent research projects in communication studies. May be taken for an X status grade with consent of instructor prior to registration. May be taken more than once for credit for a maximum of 2.0 credits. A maximum of one course credit may count toward a communication studies major or minor. Prerequisite: consent of instructor. (0.5 or 1.0 course credit)

COM 455/457 Special Topics in Media Studies (WE)

Exploration of a topic within the field of media studies. Course work includes a substantive research project, and oral presentations. May be taken more than once for credit with consent of department chair. Can satisfy the DCP requirement when topic is appropriate. Prerequisites: Rhetorical Theory and Practice (RHE-200) and either Research Methods in Communication Studies (COM-381) or Research Methods: Rhetorical/Critical (COM-382).

COM 465/467 Special Topics in Public Discourse (WE)

Exploration of a topic within the field of public discourse. Course work includes a substantive research project, and oral presentations. May be taken more than once for credit with consent of department chair. Can satisfy the DCP requirement when topic is appropriate. Prerequisites: Rhetorical Theory and Practice (RHE-200) and either Research Methods in Communication Studies (COM-381) or Research Methods: Rhetorical/Critical (COM-382).

13.17 Computer Science

Hughes, Saha, Stobb

Computer Science is the study of abstractions and algorithmic processes and how they can be applied to fulfill human information needs. The department of mathematical sciences offers a complete range of courses, with majors and minors available in **COMPUTER SCIENCE, DATA SCIENCE,** and **MATHEMATICS**, as well as courses in statistics for additional breadth. The department adheres to its belief that the mathematical sciences and the habits of mind that they engender are components of a fine liberal arts education.

13.17.1 Computer Science Major

A major in computer science requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. CS 110 Introduction to Programming, **or** commensurate programming experience
2. CS 115 Data Structures
3. CS 210 Object Oriented Software Developmen
4. CS 215 Analysis of Algorithms
5. CS 220 Principles of Computer Systems
6. **One** Introductory Mathematics course: MTH 135 Calculus I
   MTH 165 Computational Linear Algebra
7. MTH 215 Foundations of Advanced Mathematics
8. **One** of the following:
   CS 230 Web Programming
   DS 230 Data-Centric Computing
9. **Three** Computer Science Application courses: CS 320 Operating Systems
   CS 330 Cyber-Physical Systems
   CS 340 Programming Languages
   CS 350 Computer Graphics
   CS 384 Special Topics:Applications
   DS 315 Machine Learning
   DS 370 Database Systems and Data Managemen
10. **One** Advanced Software Development course: CS 410 Interactive Systems Design
    CS 430 Software Development for Web Applic
    CS 440 Mobile Computing
11. CS 480 Software Engineering Capstone

13.17.2 Computer Science Minor

1. CS 110 Introduction to Programming
2. CS 115 Data Structures

3. CS 210 Object Oriented Software Developmen

4. **Two** additional Computer Science courses numbered 200 or higher
5. **One** additional Computer Science course numbered 300 or higher

The following courses do not satisfy any of the requirements for a major or minor in Computer Science: CS 105 Computers & Society
CS 205 Competitive Programming

13.17.3 Courses in Computer Science

CS 105 Computers & Society
Examines the impact of emerging computer technologies on western culture. Topics include computer ethics, intellectual property rights, the transformation of work, electronic communities, free speech, privacy, and security.
CS 110 Introduction to Programming
Introduces computer programming as a methodology for problem solving and articulating solutions. Students learn to conceptualize, plan and implement programs in a modern programming language. Topics include data representation and manipulation, control structures, and subtask decomposition. Students experiment with basic concepts during regularly scheduled laboratory sessions.
CS 115 Data Structures
Continues the development of foundational programming concepts by focusing on the design and implementation of more complex software structures. Students will examine essential data structures including arrays, linked lists, stacks, queues, trees, graphs, and hash tables. Emphasis is placed on solving computational problems efficiently and recognizing implementation trade-offs in practical applications. Prerequisite: Introduction to Programming (CS-110)
CS 205 Competitive Programming
Provides structured time for students to develop competitive programming and technical interview skills through hands-on practice. Students work independently on weekly problem sets that expose them to essential programming techniques, algorithms and data structures. May be taken more than once. (.25 course credit). Prerequisite: CS 110
CS 210 Object Oriented Software Developmen
Studies the structure and design of larger scale programs using an object-oriented approach. Students learn to apply appropriate design techniques and patterns to implement robust, maintainable, and scalable software systems. Additional contemporary code mechanisms, such as events, exceptions, user interfaces and concurrency are also explored. Prerequisite: Data Structures (CS-115).
CS 215 Analysis of Algorithms
Studies fundamental algorithm design paradigms including divide-and-conquer, dynamic programming, greedy algorithms, and backtracking. The course examines classical algorithms involving searching, sorting, optimized tree structures, graph traversal, and path-finding problems. Emphasis is placed on analyzing and comparing worst-case and average-case performance. Advanced topics include complexity classes and the theoretical limits of computation. Prerequisite: Data Structures (CS-115).
CS 220 Principles of Computer Systems
Studies the low-level operation of computer systems to gain perspective on how computers encode, process and store information in the machine's hardware. Students will progress from the digital logic level through assembly language. Topics include, data representation, computer arithmetic, elementary circuit design, computer organization, instruction sets, memory addressing and control flow. Prerequisite: Introduction to Programming (CS-110)
CS 230 Web Programming
Provides a comprehensive introduction to modern web programming, focusing on both client-side and server-side technologies. Students will learn to design and implement interactive web applications using HTML, CSS, and

JavaScript, progressing from fundamental web page structure to dynamic, data-driven interfaces. The course also explores the fundamentals of network programming including protocol structure, client-server architectures and RESTful API development. Prerequisite: Introduction to Programming (CS-110)

CS 280 Algorithms in Society

Explores the impact computer algorithms have on our lives, including the gathering of large collections of personal data by both corporations and governments, and the resulting ethical issues of use and privacy. Topics include: targeted advertising in commerce and politics, artificial intelligence algorithms, machine-human interactions and behavior, and the social power and influence of big data. Prerequisite: Analysis of Algorithms (CS-215).

CS 320 Operating Systems

Explores the role of the operating system as an intermediary between the user, software and hardware of a computer system. Includes a system-level view of how the machine resources such as the processor, memory, and storage are managed. Prerequisite: Data Structures (CS-115) and Principles of Computer Systems (CS-220)

CS 330 Cyber-Physical Systems

Explores the design, implementation, and analysis of systems that integrate computational processes with the physical environment. Students will investigate how embedded computers interact with the physical world through sensors, actuators, microcontrollers and communication networks to create intelligent, responsive systems. Prerequisite: Principles of Computer Systems (CS-220) and Web Programming (CS-230)

CS 340 Programming Languages

Explores the fundamental principles of programming language design and implementation. Through comparative analysis and programming in multiple paradigms, students develop the ability to quickly learn new languages and make informed choices about language selection. Additional topics include lexical analysis, parsing, and code generation. Prerequisite: Analysis of Algorithms (CS-215)

CS 350 Computer Graphics

Introduces the fundamentals of computer graphics. Topics include user interface design, input/ output devices, and basic graphics concepts. Prerequisite: Object Oriented Software Development (CS-210)

CS 384 Special Topics:Applications

Offers an opportunity to study current and topical material unavailable through the regular catalog offerings. The specific topic varies by offering and may reflect current research directions, specialized subfields, or interdisciplinary applications of computing. Prerequisite: Object Oriented Software Development (CS-210)

CS 410 Interactive Systems Design

Explores the design, implementation, and evaluation of interactive systems through study of both mainstream and emerging interface technologies. Examines how human cognitive and ergonomic constraints drive the success or failure of technological solutions. Prerequisite: Object Oriented Software Development (CS-210)

CS 430 Software Development for Web Applic

Explores the design and development of full-scale web applications using modern software engineering practices. Students will apply principles of software architecture, modular design, and maintainability to build robust, secure, and scalable web systems. Topics include server-side frameworks, RESTful APIs, authentication and authorization, database integration, testing, deployment, and performance considerations. Prerequisite: Object-Oriented Software Development (CS-210) and Web Programming (CS-230)

CS 440 Mobile Computing

Studies the opportunities and constraints associated with developing applications intended to run on mobile and pervasive platforms. Students learn to utilize several core APIs (e.g. connectivity, location-based services, and multimedia) as they develop and deploy mobile applications. Prerequisite: Object Oriented Software Development (CS-210); Web Programming (CS-230) is strongly recommended.

CS 444 Ind Study-Comp Sci

An opportunity for independent and intensive study in computer science. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of supervising instructor. (Offered by arrangement)

CS 480 Software Engineering Capstone

Provides advanced Computer Science majors the opportunity to integrate and apply knowledge acquired throughout the degree program in a comprehensive, semester-long project. Students work individually or in teams to

design, implement, test, and deliver a substantial software system or research-based solution to an open-ended problem. Emphasis is placed on professional practices including requirements analysis, system architecture, project management, version control workflows, documentation, and effective communication with both technical and non-technical audiences. Prerequisite: One 300-level Applications course and One 400-level Software Development course.

CS 484 Special Topics:Software Development

Offers an opportunity to study advanced topics unavailable through the regular catalog offerings. The course will explore alternate processes, frameworks or approaches to modern software development. Prerequisite: Object Oriented Software Development (CS-210)

13.18 Creative Writing

Ferguson, LeMay, Shaw. For chair, see English, Creative Writing, and Communication Studies (p. 133)

The creative writing program (within the English Department) offers instruction in writing fiction, poetry, playwriting, and screenwriting. Workshop students are required to submit a collection of finished work at the end of each course. Included in this collection is reflective discussion of the composition history of the finished work.

13.18.1 Creative Writing Major

A major in creative writing requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. CRW 125 Introduction to Creative Writing

2. ENG 111 Intro to Lit:Art of Rdng & Writing

3. **Two** of the following:
   CRW/THE 255 Playwriting Workshop 1 (WE)
   CRW 225 Creative Nonfiction Workshop 1
   CRW 280 Poetry Workshop I
   CRW 290 Fiction Workshop I

4. **Two** of the following:
   CRW/THE 355 Playwriting Workshop 2 (WE)
   CRW 325 Creative Nonfiction Workshop 2
   CRW 380 Poetry Workshop II
   CRW 390 Fiction Workshop II
   CRW/THE 455 Playwriting Workshop 3 (WE)
   CRW 480 Poetry Workshop III
   CRW 484 Advanced Topics in Creative Writing
   CRW 490 Fiction Workshop III

5. **Two** courses in English (ENG-____) one of which must be ENG-281 or above.

6. **One** of the following:
   One elective from Creative Writing (CRW-***)***
   One elective from English (ENG-)
   Two terms of CRW 112 Advanced Literary Magazine Editing
   One 1.0 elective from English, Creative Writing, and Communication Studies (ECC-____)

7. CRW 492 Manuscript Workshop

8. Senior Reading: a public reading from the final manuscript completed in CRW 492.

13.18.2 Creative Writing Minor

1. CRW 125 Introduction to Creative Writing

2. **Three** of the following:
   CRW/THE 255 Playwriting Workshop 1 (WE) CRW 225 Creative Nonfiction Workshop 1
   CRW 280 Poetry Workshop I
   CRW 290 Fiction Workshop I
   CRW/THE 355 Playwriting Workshop 2 (WE)
   CRW 380 Poetry Workshop II
   CRW 390 Fiction Workshop II
   CRW/THE 455 Playwriting Workshop 3 (WE)
   CRW 480 Poetry Workshop III
   CRW 484 Advanced Topics in Creative Writing
   CRW 490 Fiction Workshop III
   CRW 492 Manuscript Workshop

3. **One** course in English (ENG-_____)

4. **One** of the following:
   One elective from Creative Writing (CRW-***)***
   One elective from English (ENG-)
   One 1.0 elective from English, Creative Writing, and Communication Studies (ECC-_____)
   Two terms of CRW 112 Advanced Literary Magazine Editing
   COM 267 Environmental Rhetoric
   COM 377 Language, Power, and Social Change

13.18.3 WORKSHOPS IN CREATIVE WRITING

Workshop students are required to submit a collection of finished work at the end of each course. Included in this collection is reflective discussion of the composition history of the finished work.

- CRW 225 Creative Nonfiction Workshop 1
- CRW 255 Playwriting Workshop I
- CRW 280 Poetry Workshop I
- CRW 290 Fiction Workshop I
- CRW 325 Creative Nonfiction Workshop 2
- CRW 355 Playwriting Workshop 2

- CRW 380 Poetry Workshop II
- CRW 390 Fiction Workshop II
- CRW 455 Playwriting Workshop 3
- CRW 480 Poetry Workshop III
- CRW 490 Fiction Workshop III
- CRW 492 Manuscript Workshop

13.18.4 COURSES IN CREATIVE WRITING

CRW 105 Exploring Creative Writing (WE)
Explores specific topics, genres, or forms in creative writing through reading, writing, and workshop. Topics vary depending on the instructor. May be taken more than once, with consent of instructor, provided the topics are substantially different.
CRW 106 Exploring CRW:Non-Western Persp(WE)
CRW-106 Exploring Creative Writing: Non-Western Perspectives (WE) Explores specific topics, genres, or forms in creative writing through reading, writing, and workshop. Topics vary depending on the instructor. Course focuses on topics related to non-western perspectives. May be taken more than once, with consent of instructor, provided the topics are substantially different.
CRW 107 Exploring CRW:US Pluralism (WE)
CRW-107 Exploring Creative Writing: United States Pluralism (WE) Explores specific topics, genres, or forms in creative writing through reading, writing, and workshop. Topics vary depending on the instructor. Explores works by writers from one or more subgroups in American culture. May be taken more than once, with consent of instructor, provided the topics are substantially different.
CRW 111 Literary Magazine Editing
Combines instruction in the skills of producing a literary magazine with the practical tasks of publishing the Coe Review. Students learn to plan a production schedule, evaluate and select materials, design an issue, organize and direct staff, manage a budget, promote the magazine, plan for the next cycle, communicate with contributors, and other skills related to producing an issue of the Coe Review. Current appointed Coe Review editorial staff are required to enroll in either CRW-111 or CRW-112 as a condition of retaining their appointments. Students may not register for both CRW-111 and CRW-112 in the same term. S/U basis only. May be taken more than once for credit for a maximum of 1.6 credits. (0.2 course credit)
CRW 112 Advanced Literary Magazine Editing
Combines instruction in the skills of producing a literary magazine with the practical tasks of publishing the Coe Review, but this course focuses on developing and practicing skills in one of the main editorial positions of the magazine. Only students who have been appointed to an editorial position on the Coe Review staff may register for this course. Current appointed Coe Review editorial staff are required to enroll in either CRW-111 or CRW-112 as a condition of retaining their appointments. Students may not register for both CRW-111 and CRW-112 in the same term. A maximum of one course credit may count toward a creative writing collateral major. May be taken more than once for credit for a maximum of 1.0 credit. (0.5 credit)
CRW 125 Introduction to Creative Writing
Studies the line or sentence as the basic unit of creative writing across multiple genres. This class introduces skills necessary for subsequent workshops by examining different ways of looking at the line, including by thinking about sound and meaning and how syntax, diction, and other choices create an overall effect. Focus is on analysis of both published and student-generated work.
CRW 135 Writers Colony

CRW-135 Writer's Colony (WE) An intensive writing workshop taught off campus; students engage in individual and collaborative writing projects. (Offered May Experiential Term only)

CRW 225 Creative Nonfiction Workshop 1

Practice in writing a variety of essay forms in nonfiction prose. Students read and discuss essayists chosen to represent a range of prose styles and subjects. Students also practice writing, workshopping, and revising nonfiction essays. Prerequisite: Introduction to Creative Writing (CRW-125) or consent of instructor.

CRW 255 Playwriting Workshop I

See also Theatre Arts (THE-255), Section 13.53.4

Explores the basics of playwriting through the study of dramatic structure, creative exercises, and reading and analysis of existing play scripts, with emphasis on the one-act play. Students complete a one-act play script of their own creation. Prerequisite: Introduction to Creative Writing (CRW-125) or consent of instructor.

CRW 280 Poetry Workshop I

Special attention to differences between closed forms of traditional rhymed, metrical verse, and open forms, such as non-stanzaic and free verse. Prerequisite: Topics in Creative Writing (CRW-105) or consent of instructor.

CRW 290 Fiction Workshop I

Emphasis on techniques of setting, plot, characterization, dialogue, timing, and systematic architecture, and on a variety of narrative methods. Prerequisite: Topics in Creative Writing (CRW-105) or consent of instructor.

CRW 325 Creative Nonfiction Workshop 2

CRW-325 Creative Nonfiction Workshop 2 (WE) Advanced study of the essay and other creative nonfiction forms and practice writing creative nonfiction at the advanced level. Prerequisites: Introduction to Creative Writing (CRW-125) and Creative Nonfiction Workshop 1 (CRW-225).

CRW 345 Writing Wilderness

An immersive writing workshop in which students write about their wilderness travel experiences in original prose and poetry. The focus of the student work will be the intersection of self and place. The class considers the idea of wilderness—as a concept, a place, a political designation, and a state of mind—through the lens of diverse environmental writers, theorists and poets across generations. Representative authors include Sigurd Olson, Annie Dillard, Terry Tempest Williams, Lorine Niedecker, Kimberly Blaeser, William Cronon, Robin Wall Kimmerer and Drew Lanham. Students in the class gain experience, confidence, and proficiency in wilderness travel and ethics. (Offered summers at the Wilderness Field Station)

CRW 350 Screenwriting

Survey of multiple modes of writing for moving image productions. May include examination of dramatic narrative screenplay fundamentals such as structure, character, scene development, theme, and story; the documentary treatment, including research, interviewing, and post-production writing; and experimental and multimedia writing. Students develop the tools and vocabulary to analyze their own writing. Screenings of a range of film and video works conducted in class and by assignment. Prerequisite: any CRW- or FLM- course.

CRW 355 Playwriting Workshop 2

See also Theatre Arts (THE-355), Section 13.53.4

Focuses on the analysis and creation of play scripts of two acts or more. Emphasis is placed on the writing and marketing of the student's own creative work, culminating in the completion and public reading of a full-length script. Prerequisite: Beginning Playwriting (CRW/THE-255).

CRW 380 Poetry Workshop II

Advanced study of poetic forms and practice writing poetry. Prerequisites: Topics in Creative Writing (CRW-105) and Poetry Workshop 1 (CRW-280).

CRW 390 Fiction Workshop II

Advanced study of the short story and practice writing fiction at the advanced level.. Prerequisites: Topics in Creative Writing (CRW-105) and Fiction Workshop 1 (CRW-290).

CRW 394 Directed Studies in Creative Writin

Completion of an independent creative writing project under the direction of a faculty member. Registration only after the instructor has approved a written proposal for the project. Prerequisities: two courses in Creative Writing and consent of English department chair.

CRW 455 Playwriting Workshop 3
See also Theatre Arts (THE-455), Section 13.53.4
Continued advanced writing, with an emphasis on producing finished poems. Prerequisite: Poetry Workshop 2 (CRW-380).
CRW 480 Poetry Workshop III
Continued advanced writing, with an emphasis on producing finished poems. Prerequisite: Poetry Workshop 2 (CRW-380).
CRW 484 Advanced Topics in Creative Writing
Study of special topics in creative writing, such as scriptwriting, experimental fiction and poetry, and hypertext. May be taken more than once, with consent of instructor, provided the topics are substantially different. Prerequisite: Advanced Playwriting (CRW-300), Poetry Workshop 2 (CRW-380) or Fiction Workshop 2 (CRW-390).
CRW 490 Fiction Workshop III
Continued advanced writing, with an emphasis on producing finished fiction. Prerequisite: Fiction Workshop 2 (CRW-390).
CRW 492 Manuscript Workshop
The capstone of the Creative Writing major. Students in this intensive workshop complete a thoroughly revised, polished major manuscript, suitable for an MFA writing sample or to submit for publication. Manuscripts usually are in a single genre. Students also write reflections on their manuscript and prepare for the senior reading. Prerequisites: completion of all writing courses required for the major or minor and consent of creative writing administrative coordinator.

13.19 Dance (Courses Only)

Rezabek

13.19.1 Courses in Dance

DAN 101 Dance - Jazz I
A beginning-level course designed to introduce the student to basic jazz dance techniques and skills. Emphasis on alignment and precise execution of jazz movements. Class includes functional kinesiology and injury prevention techniques, and presentations place jazz dance in socio-historical context. (0.2 course credit)
DAN 102 Dance - Jazz II
An intermediate-level course designed to increase the student's knowledge and skill in jazz dance techniques. May include Hatchett, Giordano, Luigi, and contemporary styles. Class continues functional kinesiology, and presentations place jazz dance in socio-historical context. Prerequisite: Jazz I (DAN-101). (0.2 course credit)
DAN 111 Dance-Modern I
A beginning-level class focusing on fundamental modern dance techniques. Emphasis on placement of the spine and quality of movement. Features the techniques of Doris Humphrey, Jose Limon, and Erick Hawkins. Presentations discuss modernisms and postmodernism and place modern dance in socio-historical context. (0.2 course credit)
DAN 112 Dance-Modern II
An intermediate-level class offering more complex modern dance styles and skills. May include Graham, Horton, and Cunningham techniques. Presentations continue the discussion of modernism and postmodernism and place modern dance in socio-historical context. Prerequisite: Modern I (DAN-111). (0.2 course credit)
DAN 131 Dance-Ballet I
Classical ballet is based on traditional positions and movements of the body emphasizing harmonious lines in space. It is the technical basis of many forms of dance. This course offers a working vocabulary of basic ballet movement skills and terminology. Presentations discuss the history and theory of ballet. (0.2 course credit)
DAN 132 Dance-Ballet II
This course continues Ballet I, offering more complex ballet movement skills and terminology. Prerequisite: Ballet I

(DAN-131). (0.2 course credit)

DAN 141 Dance - Tap I

Simple tap steps and combinations, including adequate background to survive an audition. The course progresses to more complicated movement sequences, with emphasis on speed and clarity. (0.2 course credit)

DAN 142 Dance - Tap II

More complex steps, styles, and rhythms. Emphasis on speed, clarity, strength, and dexterity. Prerequisite: Tap I (DAN-141). (0.2 course credit)

DAN 151 Dance-Choreography I

Introduction to the choreographic craft, concentrating on generating original movement through short studies focusing on body, space, and time. (0.2 course credit)

DAN 152 Dance-Choreography II

Further exploration of choreographic techniques, culminating in a short performance of student's work. Prerequisite: Choreography I (DAN-151). (0.2 course credit)

13.20 Data Science

Baranowski, Cross, Eichhorn, Hughes, Stobb

Data Science is an interdisciplinary study that couples programming skills, statistical methods, and domain specific knowledge to extract meaning, make predictions, and visually present quantitative data. The department of mathematical sciences offers a complete range of courses, with majors and minors available in **COMPUTER SCIENCE, DATA SCIENCE,** and **MATHEMATICS**, as well as courses in statistics for additional breadth. The department adheres to its belief that the mathematical sciences and the habits of mind that they engender are components of a fine liberal arts education.

13.20.1 Data Science Major

A major in data science requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. DS 100 Introduction to Data Science, DS 100 Introduction to Data Science, **or** DS 120 Sports Analytics

2. CS 110 Introduction to Programming, or commensurate programming experience

3. **One** of the following Statistical Foundations courses:
   BUS 190 Statistical Analysis
   BUS 340 Applied Regression Analysis
   PSY 300 Stat Methods and Data Analysis
   STA 100 Statistical Reasoning I-Foundations (7 weeks) **and** STA 110 Stats IIA: Inferential Reasoning (7 weeks)
   STA 100 Statistical Reasoning I-Foundations (7 weeks) **and** STA 130 Stats IIB: Experimental Design (7 weeks)
   STA 315 Mathematical Probability

4. DS 230 Data-Centric Computing

5. DS 260 Data Analysis and Visualization

6. ECO 375 Econometrics

7. DS 315 Machine Learning
8. DS 370 Database Systems and Data Managemen
9. **One** of the following Modeling Courses:
    a. DS 415 Deep Learning
    b. MTH 455 Mathematical Modeling
    c. ECO 435 Time Series Analysis
    d. ECO 445 Econometrics II
10. **Three** additional courses from a different discipline numbered 200+ with the same course prefix. These courses should be selected with advice from the Data Science faculty.

13.20.2 Data Science Minor

1. DS 100 Introduction to Data Science, DS 100 Introduction to Data Science, **or** DS 120 Sports Analytics
2. CS 110 Introduction to Programming, **or** commensurate programming experience
3. **One** of the following Statistical Foundations courses:
    a. BUS 190 Statistical Analysis
    b. BUS 340 Applied Regression Analysis
    c. PSY 300 Stat Methods and Data Analysis
    d. STA 100 Statistical Reasoning I-Foundations (7 weeks) **and** STA 110 Stats IIA: Inferential Reasoning (7 weeks)
    e. STA 100 Statistical Reasoning I-Foundations (7 weeks) **and** STA 130 Stats IIB: Experimental Design (7 weeks)
    f. STA 315 Mathematical Probability
4. DS 230 Data-Centric Computing
5. DS 260 Data Analysis and Visualization

13.20.3 Courses in Data Science

DS 100 Introduction to Data Science
Studies the theory and fundamentals of using data and statistics to make actionable decisions. This course will cover how to organize, process, and visualize data using computational tools. Case studies on the use, misuse, and impact of data on society will be reviewed, with emphasis placed on ethical privacy concerns.

DS 101 Data-Driven Design
Merges design thinking with data science to develop creative, data-driven solutions in a project based course. The course introduces students to the process of innovation utilizing data in the design thinking process. The course also covers how to use design thinking within the data science process to visualize and analyze data.

DS 120 Sports Analytics
Studies the theory and fundamentals of using data and statistics to make decisions in sports. This course will cover how popular statistics are calculated, where they can be found, what they represent, and how they can be used for objective decision making. Students will be exposed to computer programming languages used in data science to build, clean, and analyze data sets. The four types of data analysis – descriptive, diagnostic, predictive, prescriptive – will be covered with an emphasis on data visualization.

DS 230 Data-Centric Computing
Provides a programming experience with applications that focus on data handling tasks. Students examine programming techniques to acquire and manage data from a variety of sources and formats; use relational databases to store and query data; and explore techniques to work with semi-structured and unstructured data sets. Prerequisite: Introduction to Programming (CS-125) or consent of instructor

DS 260 Data Analysis and Visualization
Studies intermediate data analytic techniques and concepts to visualize quantitative data. This course expands the mathematical background of students, with topics from statistical analysis and linear algebra. Students will learn advanced visualization techniques, with particular emphasis on creating graphics and animations using visualization libraries. Prerequisite: Data-Centric Computing (DS-230)

DS 315 Machine Learning
Provides an overview of computational algorithms for learning patterns from data. Students implement and work with a wide range of different algorithms to solve classification, regression, and clustering problems. Topics will include linear and multiple regression, quadratic discriminant analysis, tree based methods, and support vector machines. Prerequisite: Data Analysis and Visualization (DS-260)

DS 370 Database Systems and Data Managemen
Studies the concepts and structures necessary to design and implement a database management system. Students review the current literature concerning database technology and design and implement a simple database system with limited functions. Additional topics include managing unstructured data and data mining techniques. Prerequisites: Data-Centric Programming (DS-230).

DS 415 Deep Learning
Investigates how machine learning algorithms use artificial neural networks to detect highly non-linear patterns in data. This course will explore the foundation of deep learning methods and implement several modern algorithms, including convolutional and generative adversarial networks. Prerequisite: Machine Learning (DS-315)

DS 444 Independent Study in Data Science
Provides an opportunity for independent and intensive study in data science. May be taken for an X status grade with consent of the instructor prior to registration. Prerequisite: consent of supervising instructor. (Offered by arrangement).

DS 454 Research in Data Science
Provides students with an individual or group investigation with a data science faculty member on a research topic of mutual interest. The student must obtain approval for a specific project and make necessary arrangements prior to the term of registration for the course. This course is offered on a P/NP basis and does not satisfy any of the requirements for any major or minor. May be taken more than once for credit for a maximum of 2.0 credits. Prerequisites: Data Analysis and Visualization (DS-260) and consent of supervising instructor. (1.0 credit; Offered by arrangement)

DS 484 Special Topics
Provides an opportunity to study current and topical material unavailable through the regular catalog offerings. Prerequisite: Data Analysis and Visualization (DS-260) or consent of instructor.

DS 494 Internship in Data Science
Investigates a career area related to the student's interest in data science supervised by a faculty member of the

department in cooperation with the Internship Specialist. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for any major or minor. Prerequisites: junior standing and consent of supervising instructor. (Offered by arrangement)

13.21 Economics

See Business Administration and Economics p. 81

13.22 Education

Christofferson, Haynes-Moore (Chair), Kigin (Placement Coordinator), Kress, Staeheli

Art: Rogers; Music: Carson; Physical Education: Libby

Content Specialists (Part-time): Dykes, Gaylord Robertson, Geers, Hynek, Jameson, Neilly, Sheronick, Zahn

Coe College believes that the most effective preparation for teaching is one that combines a liberal arts education with courses in the theory and practice of teaching. The Education Department has the responsibility for coordinating the efforts of the College to provide such a program.

Basic college requirements and those for a major area give students a well-rounded general education. Professional courses in education provide a foundation in principles and practices of teaching. Students gain practical experience in applying professional and general education through field experiences and, if pursuing licensure, through student teaching in area schools.

Students who successfully complete Coe's Teacher Education Program and student teaching are eligible to apply for an Iowa Initial Teacher License. Teaching licensure is governed by State of Iowa regulations. When changes in licensure requirements occur at the state level, they take precedence over College policies. For the most current policy information, students should consult the Guide to Teacher Education, available from the Education Department. The Education Department maintains records regarding Iowa licensure requirements. Students should consult a faculty member in the Education Department to arrange their respective courses of study.

The Teacher Education Program at Coe College is approved by the Iowa Department of Education. Copies of the annual report filed with the Iowa Department of Education are available on request.

13.22.1 Elementary Education Major

Teachers in elementary schools function as generalists who must draw upon a broad knowledge base from multiple disciplines. In recognition of this, the elementary teacher licensure program at Coe College consists of two components: content knowledge gained from the liberal arts classes and pedagogy learned in EDU courses. This program of undergraduate preparation to teach in elementary schools is intended to promote exploration and a balanced education drawn from a variety of fields.

1. At least one course in each of the four fields of mathematics, natural sciences, social sciences, and humanities.
   Iowa Distribution Requirements- a "C" or better in the following courses:
   One mathematics course with a prefix of MTH or STA
   One American History course
   One lab science in BIO or PHY-114 Modern Astronomy
   One social science course with a prefix of ANT, ECO, POL, PSY, or SOC

2. A K–8 endorsement in Art, English/Language Arts, Spanish, Health, History, Mathematics, Music, Physical Education, Reading, Science, Social Studies, or Speech Communication and Theater

3. GPA of 2.7 or higher and a "C" or better in the following professional education courses:
   EDU 105 Foundations of Education
   EDU 117 Exceptional Learners
   EDU 187 Human Relations
   EDU 215 Practicum in Education
   EDU 217 Principles of Effective Instruction
   EDU 219 InstructTech for Teaching &Learning
   EDU 270 Literature K-12
   EDU 275 Math Comprehension for Teaching
   EDU 300 Expressive Methods
   EDU 305 Methods of Elementary Science
   EDU 335 Methods of Elementary Mathematics
   EDU 345 Methods of Elementary Language Arts
   EDU 355 Methods of Elementary Reading
   EDU 365 Methods of Elementary Soc Studies
   KIN 112 Health Educ for Elementary Teacher

NOTE: *As is true for all majors, elementary education students are responsible for completion of Coe's general education requirements. Careful program planning may enable either greater breadth within the liberal arts or a deeper concentration within a specialty discipline. Programs containing such additional concentration may require more than four years of study.*

13.22.2 Secondary Education Minor

1. *Iowa Distribution Requirements*: a "C" or better in at least one course of the four fields of mathematics, natural sciences, social sciences, and humanities.

2. A grade of "C" or better must be earned in all courses counted toward a major or minor in education and in subject areas in which students intend to teach.

3. Completion of a major in one or more teaching fields with a GPA of 2.7 or higher. Teaching field(s) must be in subjects ordinarily taught in the secondary schools and for which Coe has approval by the Iowa Department of Education. Approved teaching fields include American Government, American History, Art, Basic Science, Biology, Business, Chemistry, Economics, English/Language Arts, Health, Math, Music, Physical Education, Physics, Psychology, Sociology, Spanish, Speech Communication and Theater, and World History.

4. GPA of 2.7 or higher and a "C" or better in the following professional education courses:
   EDU 105 Foundations of Education
   EDU 117 Exceptional Learners
   EDU 187 Human Relations
   EDU 215 Practicum in Education
   EDU 217 Principles of Effective Instruction
   EDU 219 InstructTech for Teaching &Learning

5. **One or more** of the following Methods courses:
   ART 230 Art of Children & Adolescents
   EDU 310 Methods of Secondary Bus Education

EDU 311 Methods of Secondary Language Arts
EDU 312 Methods of Secondary Social Studies
EDU 313 Methods Secondary Mathematics
EDU 320 Methods of Secondary Science
EDU 321 Methods of World Language K-12
KIN 415 Methods of Secondary Schl PE & Hlth
MU 361 Choral Music Methods
MU 363 Instrumental Music Methods

13.22.3 ADMISSION TO THE TEACHER EDUCATION PROGRAM

The Education Department offers a major in **elementary education**, a minor in **secondary education**, and courses leading to three types of teacher licensure: K-6 classroom (elementary education); 5–12 content area (secondary education) and K-12 "specials" content area (art, music, physical education). Students pursuing any of these options must be admitted to the Teacher Education Program before being allowed to enroll in a practicum course or methods course. Admission to Coe College does not guarantee admission to the Teacher Education Program. Information related to applying to the Teacher Education Program is found in the *Guide to Teacher Education* available from the Education Department.

State of Iowa licensure requirements specify that a minimum of 80 hours of field experience be completed after admission to the Teacher Education Program and prior to student teaching. Teacher Education Program applications are available online; contact your Education advisor.

The Teacher Education Committee has responsibility for review of the Teacher Education Program, including admission of students into the program. In reviewing applications for admission to the program, the committee considers the following: 1. A "C" or better in two core EDU courses (EDU-105 Foundations of Education (WE) strongly recommended) 2. GPA (a minimum of 2.7 is required in education core courses, courses in the major and overall) 3. A grade of "C" or higher must be earned in all courses counted toward a major or minor in education and in subject areas in which students intend to teach. 4. Performance in education courses taken. 5. The essay included on the program application. 6. Other relevant information as provided by the faculty of the Education Department and comments from faculty in classes the student is enrolled in or has recently taken.

The Teacher Education Committee reviews applications at the conclusion of each semester. Students are notified in writing regarding the committee's decision. Appeals may be made to the committee in writing. The committee evaluates such appeals on an individual basis, using its best judgment of the student's suitability to enter the teaching profession. The process for further appeals is detailed in the *Guide to Teacher Education.*

13.22.4 Graduates/Transfers from Other Institutions

Graduates/transfers from other institutions should submit transcripts and all other relevant materials for review to the Education department chair. In most cases, applicants are required to take a minimum of four EDU courses at Coe, in which at least a 2.7 GPA or higher and a "C" or better is earned, prior to student teaching.

Students who received the highest degree more than 10 years prior to application to the Teacher Education Program must complete two additional courses at Coe in the major area, with a grade of "C" or better, in addition to the required professional education courses.

13.22.5 Elementary Education/Non-Licensure

The majority of students who major in elementary education intend to become licensed K–6 classroom teachers and complete one term of full-time student teaching after completing the major requirements. Occasionally, however, a student may wish to work with young children in settings other than those for which certification is required. Such students may complete all of the required course work for the elementary education major without student teaching and are advised on supplementary course work to support their goals.

13.22.6 REQUIREMENTS FOR STUDENTS PURSUING TEACHING LICENSES

To be recommended for licensure in any of the categories listed below, a student must have a baccalaureate degree, a cumulative GPA of at least 2.7, and at least a 2.7 GPA in each teaching field. The department can refuse to recommend for licensure a student who has been found to have violated the College's Academic Integrity Policy.

13.22.7 Iowa Distribution Requirements for All Students Seeking Licensure

According to state regulations, all teachers in Iowa "shall acquire a core of liberal arts knowledge including, but not limited to, English composition, mathematics, natural sciences, social sciences, and humanities." While the state's distribution requirements are consistent with Coe's distributional requirements, they are not automatically met by these requirements. Education students should consult with their Education advisor to coordinate this mandate with the selection of courses for Coe's distributional requirements.

13.22.8 Elementary Licensure

Requirements:
1. Students licensed at the elementary level, must have a 2.7 GPA or higher and a "C" or better in all courses in their major and in endorsement areas.
2. **Iowa Distribution Requirements** - a "C" or better in the following courses:
- **One** mathematics course with a prefix of MTH or STA
- **One** American History course
- **One** lab science in BIO or Modern Astronomy
- **One** social science course
3. GPA of 2.7 or higher and a "C" or better in the following professional education courses:
- EDU 105 Foundations of Education
- EDU 117 Exceptional Learners
- EDU 187 Human Relations
- EDU 215 Practicum in Education
- EDU 217 Principles of Effective Instruction
- EDU 219 InstructTech for Teaching &Learning
- EDU 270 Literature K-12
- EDU 275 Math Comprehension for Teaching
- EDU 300 Expressive Methods
- EDU 305 Methods of Elementary Science
- EDU 335 Methods of Elementary Mathematics
- EDU 345 Methods of Elementary Language Arts
- EDU 355 Methods of Elementary Reading
- EDU 365 Methods of Elementary Soc Studies
- KIN 112 Health Educ for Elementary Teacher

4. A K–6 Iowa teaching license must be accompanied by at least one K–8 endorsement (state approved specialization in a particular subject area) available at Coe. K–8 endorsements include: Art, English/Language Arts, Spanish, Health, History, Mathematics, Music, Physical Education, Reading, Science, Social Studies, or Speech Communication and Theater. Students should consult their Education advisor for assistance in adding these endorsements to their elementary teaching license. 5. Elementary Education students will demonstrate content area knowledge and pedagogical knowledge of reading by successfully completing the state-required Foundations of Reading exam prior to their student teaching semester. If a passing score has not been achieved, students will be required to take EDU-301 Reading Foundations: Development, Assessment and Instruction and successfully pass with a C or better during the student teaching semester, or before program completion.
6. Student Teaching (4 course credits): - EDU 491 Student Teaching 4-6
- EDU 492 Student Teaching K-3
6. Successful completion of Student Teaching Seminar
- Active engagement in and regular attendance in seminar
- Dyslexia training
- Ethics training
- Mock evaluations
- CPR card (PE and coaching candidates)
- Successful completion and presentation of e-portfolio

NOTE: ***Students seeking elementary licensure must have an advisor in the Education Department with whom they meet regularly (at least twice per year) to ensure timely completion of all graduation, general education, and licensure requirements.***

13.23 Secondary Licensure

Those interested in teaching at the secondary level must major in one or more teaching fields, minor in education, and meet the state requirements for a 5–12 endorsement (state-approved specialization in a particular subject area). Teaching field(s) must be in subjects taught in the secondary schools and for which Coe has approval by the Iowa Department of Education.

> **5–12 endorsements include**: American Government, American History, Art, Biology, Business, Chemistry, Coaching (see Kinesiology), Economics, English/Language Arts, Health, Math, Music, Physical Education, Physics, Psychology, Science, Social Studies, Sociology, Spanish, Speech Communication and Theater or World History.

Requirements: 1. Students licensed at the secondary level, must have a 2.7 GPA or higher and a "C" or better in all courses in their major and in endorsement areas.
2. Iowa Distribution Requirements: a "C" or better in at least one course in each of the four fields of mathematics, natural sciences, social sciences, and humanities.
3. GPA of 2.7 or higher and a "C" or better in the following professional education courses:
- EDU 105 Foundations of Education
- EDU 117 Exceptional Learners
- EDU 187 Human Relations
- EDU 215 Practicum in Education
- EDU 217 Principles of Effective Instruction
- EDU 219 InstructTech for Teaching &Learning

One or more of the following Methods courses:
- EDU 310 Methods of Secondary Bus Education
- EDU 311 Methods of Secondary Language Arts
- EDU 312 Methods of Secondary Social Studies
- EDU 313 Methods Secondary Mathematics

- EDU 320 Methods of Secondary Science
- EDU 321 Methods of World Language K-12
5. Successful completion of Student Teaching:
- EDU 489 Student Teaching Sr HS
- EDU 490 Student Teaching Jr HS
6. Successful completion of Student Teaching Seminar
- Active engagement in and regular attendance in seminar
- Dyslexia training
- Ethics training
- Mock evaluations
- CPR card (PE and coaching candidates)
- Successful completion and presentation of e-portfolio
7. Demonstrate content-area knowledge and pedagogical knowledge by successfully passing state-required Praxis II exams.

NOTE: ***Not all Coe majors align perfectly with State of Iowa requirements for 5–12 endorsements. Students seeking secondary licensure should also have an advisor in the Education Department with whom they meet regularly (at least once per year) to ensure timely completion of all graduation, General Education, and licensure requirements.***

13.23.1 Art, Music and Physical Education (K–12 licensure)

Preparation for teaching at the elementary (K–8) and secondary (5–12) levels in the subject areas of art, music, and physical education includes state licensure requirements, in addition to work students complete in their major.

Requirements: 1. Students licensed in art, music, or physical education must earn a 2.7 GPA or higher and a "C" or better in all courses in their major and in endorsement areas (state approved specialization in a particular subject area). 2. Iowa Distribution Requirements: A "C" or better in at least one course in each of the four fields of mathematics, natural sciences, social sciences, and humanities. 3. GPA of 2.7 or higher and a "C" or better in the following professional educational courses:
- EDU 105 Foundations of Education
- EDU 117 Exceptional Learners
- EDU 187 Human Relations
- EDU 215 Practicum in Education
- EDU 217 Principles of Effective Instruction
- EDU 219 InstructTech for Teaching &Learning
One or more of the following Methods courses:
- ART 330 Methods of Teaching Art K-12
- KIN 315 Methods Elementary Sch PE & Health
- KIN 415 Methods of Secondary Schl PE & Hlth
- MU 360 Elementary & General Music Methods
- MU 361 Choral Music Methods - MU 363 Instrumental Music Methods 4. Successful completion of Student Teaching:
- EDU 481 Stu Tchg Sec: ART
- EDU 482 Stu Tchg Sec: Phys Education
- EDU 483 Std Teaching Elem: ART
- EDU 485 Std Teaching Elem: Phys Ed
- EDU 478 Student Teaching Music Elementary
- EDU 479 Student Teaching Music Secondary
5. Successful completion of Student Teaching Seminar
- Active engagement in and regular attendance in seminar

- Dyslexia training
- Ethics training
- Mock evaluations
- CPR card (PE and coaching candidates)
- Successful completion and presentation of e-portfolio

NOTE: ***Not all Coe majors align perfectly with State of Iowa requirements for licensure. Students seeking licensure should also have an advisor in the Education Department with whom they meet regularly (at least once per year) to ensure timely completion of all graduation, General Education, and licensure requirements.***

13.23.2 Student Teaching

Permission to student teach requires approval of the Teacher Education Committee. Applications are due by February 1 for student teaching the following Fall Term and by September 1 for student teaching the following Spring Term. Applications are available from the Education Office.

When an application to student teach is considered, the student's standing in the Teacher Education Program is reviewed. The committee considers: 1. Recommendations of cooperating teacher(s) during the student's field experience(s). 2. Consultation with student's major department(s). 3. A grade of "C" or better must be earned in all courses counted toward a major or minor in education and in all endorsement areas. 4. GPA (a minimum of 2.7 is required in the professional education courses, courses in the major, and overall). 5. Review by Education Department faculty.

Student teaching is the culminating experience of the Teacher Education Program. It involves observation and active participation in directing learning experiences aligned with professional learning standards in a school classroom, under the supervision of a cooperating teacher and the college supervisor. A minimum of four course credits of student teaching is required. Student teaching in all subjects is available for one to four course credits for students earning both Elementary and Secondary licensure.

Normally, students complete two seven- to eight-week placements, with each placement worth two credits. Successful completion of the student teaching semester, including attendance at and participation in the student teaching seminar, earns four credits. Student teaching is a full-time obligation, must be completed in one term, and is evaluated on a P/NP basis.

Student Teaching Requirements
1. One or more of the following:
- EDU 481 Stu Tchg Sec: ART
- EDU 482 Stu Tchg Sec: Phys Education
- EDU 483 Std Teaching Elem: ART
- EDU 485 Std Teaching Elem: Phys Ed
- EDU 489 Student Teaching Sr HS
- EDU 490 Student Teaching Jr HS
- EDU 491 Student Teaching 4-6
- EDU 492 Student Teaching K-3
- MU 421 Student Teaching Elementary Music
- MU 422 Student Teaching Secondary Music

2. Successful completion of Student Teaching Seminar
- Active engagement in and regular attendance in seminar
- Dyslexia training
- Ethics training
- Mock evaluations

- CPR card (PE and coaching candidates)
- Successful completion and presentation of e-portfolio

3. Satisfactory performance in the field as determined by the cooperating teacher and supervisor evaluations.

13.23.3 Ninth-Term/Fifth-Year Programs

Students who want to include more course work in their liberal arts and sciences curriculum in conjunction with completing requirements for elementary and/or secondary teacher licensure may apply for a Ninth-Term/Fifth-Year tuition reduction. Both options are open to all students who have been ***admitted*** to the Teacher Education Program and meet requirements for student teaching.

Students participating in the Ninth-Term/Fifth-Year Programs are eligible for a 60% discount on full-time tuition, if the following criteria are met: 1. The student must be in good standing with the college (not on academic probation); 2. The student must be registered as a full-time student; 3. The student must have completed 32 course credits, sixteen of which were taken at Coe OR have satisfactorily completed four years of full-time registration at Coe; and 4. The student cannot receive the reduced tuition discount and other Coe scholarships for the same term. If there is remaining scholarship eligibility, the greater of the discounts or the sum of the Coe scholarships will be awarded. 5. The student submits the application by the appropriate deadline: - Fall Term: May 1 - Spring Term: December 1

Students continue to be eligible to apply for student loans and any available federal and state government grants. This reduction can only be given for a maximum of two terms and applies only to regular full-time tuition charges for undergraduate campus-based programs. Students must re-apply for the reduced tuition each term. Applications for tuition reduction are available from the Education Department.

Exemptions from these requirements may be granted in unusual circumstances with the approval of the Provost and Dean of the Faculty and the Education department chair. A written request for such consideration, detailing the circumstances and rationale, should be made to the Education department chair.

13.23.4 Courses in Education

EDU 105 Foundations of Education
Explores the many facets of schooliing in the United States. Students will examine historical, political, legal, social, and philosophical issues related to education and public schooling in the United States. A second course component consists of an introduction to curricular and instructional planning. A ten-hour field experience in local schools is required.

EDU 117 Exceptional Learners
Addresses the nature and needs of students with exceptionalities in the general classroom. Topics include historical and legal foundations of special education; classroom teacher responsibilities under IDEA and Section 504 of the Vocational Rehabilitation Act, categories of exceptionality, appropriate instructional accommodations for students with exceptionalities, methods of instruction and assessment of students with special needs. The course addresses the different needs of all learners, including but not limited to gifted learners, learners with disabilities, English Language Learners, twice exceptional learners, and learners struggling with literacy.

EDU 187 Human Relations
Examines the lifestyles, history, and contributions of various identifiable subgroups in our pluralistic society. Students explore and analyze issues related to such topics as: equity in the schools, multicultural education, sexism, racism, religious pluralism, sexuality, intercultural interaction, and sexual harassment. Coursework encourages students to build their capacities for recognizing, understanding, and respecting diversity of people and cultures in order to develop constructive interpersonal relationships and favorable learning experiences in the classroom. A 10-hour field experience is required.

EDU 215 Practicum in Education
Integrates theory and pedagogical practice. Students spend a minimum of 60 hours of practical experience in an elementary or secondary school classroom assisting in a range of instructional activities. College classroom experience complements the field experience and focuses on instructional planning, differentiation, assessment, classroom management and reflective teacing practices. Prerequisites: Admission to the Teacher Education Program (approved or conditional).

EDU 217 Principles of Effective Instruction
Explores research-based instructional strategies that promote student engagement and achievement. Emphasis is placed on instruction that is differentiated and inclusive; formative and summative assessment through practical applications; and assessment-driven classroom instruction. Course coverage includes categories of disabilities and categories of diversity including gifted and talented; culturally and linguistically diverse; and at-risk populations. Prerequisite: EDU 117 or consent of Education department chair.

EDU 219 InstructTech for Teaching &Learning
Focuses on integrating educational technology for instructional design in the K–12 setting. Application of technological resources, course readings, reflective writing, and exposure to professionals in the field (both local and afar) help students gain the knowledge,skills, and dispositions needed to select, implement, and manage technology. Co-requisite: Recommended with Practicum in Education (WE) EDU-215, but must be taken with a Practicum or Methods course prior to student teaching. (0.5 course credit)

EDU 220 Professional Writing for Teachers
Mentors students into the crafting of texts used in the professional settings common to K–12 teachers. The course will explore the approaches, strategies, and techniques used by teachers for successful document creation in a variety of educational settings. Emphasis will be placed on creating documents that effectively communicate with parents and other stakeholders, convey professional plans and perspectives, document teaching and learning strategies, and present educational information to a wide range of audiences.

EDU 237 English Language Learners
Introduces the issues of language and literacy acquisition for English Language Learners. This class includes a focus on oral communication and instructional strategies to support English Language Learners in K-12 classrooms. It is appropriate for teachers of non-native English students and international teaching of English. Prerequisite: sophomore standing or consent of Education department chair (Offered Spring Term)

EDU 241 Foundations of Reading
Explores past and current theories of language acquisition and development. Attention to the history of reading complements a focus on current research related to the psychological, socio-cultural, and linguistic foundations of reading and writing. This is the first course in the sequence leading to the reading endorsement. Prerequisite: sophomore or consent of Education Department Chair. (Offered Spring Term)

EDU 260 Content Area Reading
Explores research-based instructional strategies for facilitating students' textual comprehension. Major topics include best practices in the teaching of vocabulary, meaning making, text structure, genre, and types of writing. Attention to instructional strategies especially helpful to English language learners, as well as technological tools for language and literacy instruction. This is the second course in the sequence leading to the reading endorsement. Prerequisites: admission to the Education Program and Foundations of Reading (EDU-247) or consent of Education Department Chair. (Offered Fall Term)

EDU 270 Literature K-12
Provides students pursuing literature-related studies with models of how teachers use literature to support various levels of readers and content areas in the classroom. The course focuses on the history of children's literature, analyses of a variety of books for youths, creation of a functional bibliography, and using knowledge of child and adolescent development to assist in book selection for young readers. Includes study of the development of language skills, strategies to facilitate student learning of standard English, diversity issues, non-print materials, and technology tools. (Offered Fall Term)

EDU 275 Math Comprehension for Teaching
Enhances understanding of the discipline of mathematics for elementary classroom teachers. Content is aligned with

the NCTM curriculum standards of Number, Algebra, Geometry, Measurement, and Data Analysis and Probability. Substantial attention is given to discrete mathematics, reasoning and proof, active problem solving, technology, and connections within mathematics and to other disciplines studied in schools. The ability to communicate mathematically and provide justification or rationale for quantitative reasoning is fostered across mathematical applications. (Offered Fall Term)

EDU 284 Topics in Education

Examines special topics in education. Content varies and is determined by the instructor. Example topics include: Assessment in Education, Educational Law, Leadership in Education, Social-Emotional Teaching and Learning, Current Events in Education. May be taken more than once provided the topics are substantially different. Prerequisite: Educational Foundations (EDU 105) or consent of instructor. (.5 course credit)

EDU 300 Expressive Methods

Integrates art, music, and physical education into the regular elementary classroom. Students will study of instructional methods for incorporating visual, aesthetic, auditory, and kinesthetic teaching and learning strategies into the classroom. This course promotes the integration of art, music, and physical education into the regular elementary classroom. Topics include research on learning styles, development of lessons and classroom management strategies that incorporate movement and creative expression, and alternative assessment as it relates to these strategies. Diversity issues, non-print materials, and technology tools are integrated. Prerequisite: Practicum in Education (EDU-215) or consent of Education Department Chair. (0.5 course credit) (Offered Fall Term)

EDU 301 Reading Foundations:Development

EDU-301 Reading Foundations: Development, Assessment and Instruction Is designed to support teacher candidates improve their knowledge of evidence-based principles and instructional practices for teaching reading at the elementary level. Topics reviewed include reading terminology, the components of reading, reading theories and application of evidence-based instruction and assessment practices. (0.5 course credit)

EDU 305 Methods of Elementary Science

Helps future teachers develop an integrated set of perspectives, attitudes, and skills, enabling them to give positive support to their students' natural inclination to be curious, manipulate, observe, and interpret. Multiiple instructional strategies and methods will be studied in an outside of class sessions. Integration of relevant children's literature is included. Prerequisite: Practicum in Education (EDU-215) or consent of Education Department Chair. (Offered Fall Term)

EDU 310 Methods of Secondary Bus Education

Prepares students for student teaching placement in a secondary business classroom. Students explore and examine approaches to teaching and learning. Among the topics studied are instructional strategies, lesson design, classroom management and learner assessment. Students will be exposed to strategies for teaching high school general business courses, including accounting, marketing, and economics. This course includes a 60 -hour field experience. Prerequisite: Practicum in Education (EDU-215) or consent of Education Department Chair.

EDU 311 Methods of Secondary Language Arts

Prepares students for student teaching in a secondary language arts classroom. Students explore and examine approaches to teaching and learning. Among the topics studied are instructional strategies, lesson design, and learner assessment. Students also experience working with texts such as YA literature, podcasts, novels, poetry, drama, etc.. The course includes a 60-hour field experience. Prerequisite: Practicum in Education (EDU-215) or consent of Ecducation Department Chair.

EDU 312 Methods of Secondary Social Studies

Prepares students for student teaching in a secondary social studies classroom. Students explore and examine approaches to teaching and learning. Among the topics studied are instructional strategies, lesson design, classroom management and learner assessment. This course includes a 60-hour field experience. Prerequisite: Practicum in Education (EDU-215) or consent of Education Department Chair. (Offered Fall Term)

EDU 313 Methods Secondary Mathematics

Prepares students for student teaching in a secondary mathematics classroom. Students explore and examine approaches to teaching and learning. Among the topics studied are instructional strategies, lesson design, classroom management and learner assessment. This course includes a 60-hour field experience. Prerequisite: Practicum in

Education (EDU-215) or consent of Education Department Chair.

EDU 320 Methods of Secondary Science

Prepares students for student teaching in a secondary science classroom. Students explore and examine approaches to teaching and learning. Among the topics studied are instructional strategies, lesson design, classroom management and learner assessment. This course includes a 60-hour field experience. Prerequisite: Practicum in Education (EDU-215) or consent of Education Department Chair. (Offered Fall Term)

EDU 321 Methods of World Language K-12

Prepares students for student teaching in a world language classroom. Students explore and examine approaches to teaching and learning. Among the topics studied are instructional strategies, lesson design, classroom management and learner assessment. This course includes a 60-hour field experience. Prerequisite: Practicum in Education (EDU-215) or consent of Education Department Chair.

EDU 335 Methods of Elementary Mathematics

Examines basic concepts of curriculum and instruction for elementary school mathematics using the framework of the National Council of Teachers of Mathematics and the Iowa Core Curriculum, This course assists prospective teachers in developing effective instructional skills that foster problem solving abilities and the conceptual and procedural knowledge of mathematics. Instruction includes integration of math-related children's literature. A field experience of 30 contact hours is included. Prerequisites: Mathematics Comprehension for Teaching (EDU-275), Practicum in Education (EDU-215) or consent of Education Department Chair. (Offered Spring Term)

EDU 345 Methods of Elementary Language Arts

Examines strategies for teaching the interrelated aspects of reading, writing, listening, speaking, spelling, and creative drama as they apply to the functional language of elementary school children. Assessing student literacy competence and planning for instruction are explored. Prerequisites: Concurrent registration in Teaching Reading (K-6) (EDU-355) and Practicum in Education (EDU-215) or consent of Education Department Chair. (Offered Spring Term)

EDU 355 Methods of Elementary Reading

Examines the five components of reading-phonological awareness, phonics, fluency, comprehension and vocabulary. Instruction is provided in the strategies for mastering pre-reading, decoding, and comprehension skills. Methods of organizing, maintaining, and evaluating reading programs are addressed. Substantial study of children's literature is included. A field experience of 30 contact hours provides an opportunity to apply the content of the course. Prerequisites: Concurrent registration in Teaching Language Arts (K-6) (EDU-345). Practicum in Education (EDU-215) or consent of Education Department Chair. (Offered Spring Term)

EDU 365 Methods of Elementary Soc Studies

Examines the content and teaching strategies that collectively form the scope and sequence of elementary school social studies. Geography and ecological anthropology provide a framework for integrating social science disciplines with other subject matter fields, such as children's literature and science. Social issues are investigated on three levels: in relation to self, one's immediate environment, and the global ecosystem. Prerequisite: Practicum in Eduation (EDU-215) or consent of Education Department Chair. (Offered Fall Term)

EDU 395 Diagnostic Reading & Tutorial

Intensively studies diagnostic and screening instruments as well as multiple strategies to improve reading and writing skills. This course includes direct application of assessment and instructional strategies with individual children through a supervised tutorial outside of regular class time. Prerequisites: admission to the Education Program, Foundations of Reading (EDU-241), and Content Area Reading (EDU-260). (Offered Spring Term)

EDU 444 Ind Study-Tchr Ed

Extensively studies selected problems in the teaching of elementary and secondary school subjects under the direction of a faculty member of the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of Education Department Chair.

EDU 454 Research Participation

Provides students engagement in educational research. Students should consult members of the department to determine projected programs. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of Education Department Chair.

EDU 494 Internship in Education
Explores a career area related to schools supervised by a faculty member of the department. A minimum of 140 hours on-site experience is required. A reflective paper analyzing the experience is required. May be completed during any term in which schools are in session. May include teaching, administrative, and/or counseling duties. S/U basis only. This course does not satisfy any of the requirements of the Education Program. Prerequisites: Foundations of Education (EDU-105) and consent of Education Department Chair.

13.24 English

Brown, Ferguson, Hausknecht, LeMay, Shaw, Sodeman. For chair, see English, Creative Writing, and Communication Studies (p. 133)

The study of English allows students to explore a wide range of literary and cultural productions from varied parts of the world. Our courses develop habits of mind that are fundamental to liberal education, including the ability to read critically, to think creatively, and to write clearly and with verve.

In consultation with their advisors, English majors are able to design personalized programs of study that attend to the historical and geographical range of literatures in English. Students considering graduate work in literature should consult with English faculty to plan a rigorous course of study that would typically include an honors thesis and coursework in a world language.

13.24.1 English Major

A major in English requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. ENG 111 Intro to Lit:Art of Rdng & Writing
2. ENG 281 Literatures in English to 1800
3. ENG 291 Literatures in English after 1800
4. ENG 301 The Art of Literary Research
5. **Three** English courses numbered 305 or above, one of which must be in British literature before 1800. COM-377 Language, Power, and Social Change (WE) can count for this requirement.
6. **Two** credits from the following options
    a. additional English courses
    b. one Creative Writing course
    c. SPA 148 Spanish Literature in Translation or SPA 457 US LatinX Literature
    d. 1.0 ECC credit
    e. COM 267 Environmental Rhetoric
    f. COM 377 Language, Power, and Social Change
7. ENG 464 Seminar in Literature **or** ENG 467 Seminar in Literature: USP

13.24.2 English Minor

1. ENG 111 Intro to Lit:Art of Rdng & Writing
2. **Two** English courses numbered 300 or above
3. **Two** credits from the following options
    a. additional English courses
    b. one Creative Writing course
    c. SPA 148 Spanish Literature in Translation or SPA 457 US LatinX Literature
    d. 1.0 ECC credit
    e. COM 267 Environmental Rhetoric
    f. COM 377 Language, Power, and Social Change

13.24.3 Courses in Literature

ENG 105 Exploring Literature: Humanities
Explores works by a variety of world authors outside the United States with the purposes of stimulating the appreciation of literary art and considering the various functions of literature in the contemporary world.
ENG 107 Exploring Literature:US Pluralism
Explores works by writers from one or more subgroups in American culture with the purposes of stimulating the appreciation of literary art and considering the various functions of literature in the contemporary world.
ENG 108 Exp Lit:Diverse Western Perspective
Explores works by writers from one or more subgroups in Western Civilization outside the United States with the purposes of stimulating the appreciation of literary art and considering the various functions of literature in the contemporary world.
ENG 110 Ancient Mythology
Study of the myths of the ancient Greeks and Romans, while briefly touching on their Near Eastern predecessors as a way of investigating the character of myth and the purpose it plays in society. We examine these myths not only through the ancient texts, but by studying theoretical models and approaches to mythology.
ENG 111 Intro to Lit:Art of Rdng & Writing
The Art of Reading and Writing (WE). Study of selected works of fiction, poetry, and drama with an emphasis on close reading and expository writing. This course introduces terms and skills necessary for further literary study.
ENG 112 Environmental Humanities
Introduces fundamental issues, questions, and methods relating to humans and our environment. This course explores how human cultures may participate in the response to environmental challenges through an analysis of various literary works and other forms of cultural production.
ENG 115 The Classical Tradition
Study of ancient Greek, Roman, or other classical literature, read in translation. This course focuses on the diverse genres of classical literature, including epic, lyric, and drama, while attending to its continuities with medieval continental literature.
ENG 117 Asian American Literature
Reading and discussion of literature by Asian Americans and an introduction to its literary, cultural, and historical context.

ENG 127 Social Justice and Literature
Study of literary works that represent and reimagine issues of human rights in the twentieth and twenty-first centuries.
ENG 137 African American Literature
Cross-listed with AAM 137 African American Literature
Reading and discussion of the writings of African Americans, with emphasis on the twentieth century. May include some relevant writings on African Americans by other groups. Study of the artistic values and of the social and cultural significance of these writings. May be taken more than once, with consent of African American Studies administrative coordinator, provided the topics are substantially different.
ENG 146 Intro Postcolonial Literature
Study of twentieth-century prose and poetry arising out of the cultural, social, economic, and legal harms of imperialism and colonization.
ENG 157 Latinx/Chicanx Literature
Explores the lived experiences and cultures of Latinx and Chicanx communities in the U.S. through fiction, poetry, and non-fiction by Latina/os and Chicana/os. This course examines cultural works from dominant U.S. sub-groups— such as Mexican-Americans—and from communities with roots in South America, Central America, and the Caribbean. It interprets these works in relation to cultural, historical, and sociopolitical contexts.
ENG 175 Contemporary Literature
Study of American or British literature from 1945 to the present.
ENG 206 Gender and Literature: NWP
Examination of a particular author, theme, region, or genre in the context of gender and sexuality studies. Course focuses on topics related to non-western perspectives, such as women in the global south and the role that African American literature plays within different regions of the world.
ENG 207 Gender & Literature: US Pluralism
Examination of a particular author, theme, region, or genre in the context of gender and sexuality studies. Course focuses on topics related to United States pluralism, such as American Women Writers or Gender and Race in American Literature.
ENG 208 Gender & Literature: DWP
Examination of a particular author, theme, region, or genre in the context of gender and sexuality studies. Course focuses on topics related to Western cultural diversity, such as Gender Identity in Literature, Renaissance Women Writers, Women's Autobiography.
ENG 281 Literatures in English to 1800
Charts literary developments and transformations before 1800 in relation to changing historical conditions, from the history of books and writing to the wider histories of social, political, and cultural movements. An excursion into the literary, social, and cultural histories of the English speaking world, this course may include works by Bristish, American, or Anglophone writers.
ENG 291 Literatures in English after 1800
Charts literary developments and transformations after 1800 in relation to changing historical conditions, from history of books and writing to the wider histories of social, political, and cultural movements. An excursion into the literary, social, and cultural histories of the English speaking world, this course may include works by British, American, or Anglophone writers.
ENG 301 The Art of Literary Research
Practice in literary research, with particular attention to the varied critical and theoretical approaches necessary for advanced study. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101).
ENG 312 Studies in Environmental Humanities
Studies selected works by major environmental writers, filmmakers, philosophers, and activists. Students study environmental texts in their ecological, historical, and cultural contexts and uses the interdisciplinary, justice-oriented methods of the environmental humanities to analyze environmental challenges and our cultural responses to them. Specific topics vary from year to year.
ENG 327 Literature of American Renaissance

Study of literature from 1830 to the Civil War or of an author, topic, or genre of the period. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 337 American Realism & Naturalism

Study of literature from the Civil War to World War I, or of an author, topic, or genre of the period. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 328 Dantes Divine Comedy (WE)

Cross-listed with REL 328 Dantes Divine Comedy (WE)

ENG-328 Dante's Divine Comedy (WE) See also Religion (REL-328). Explores the vision of the afterlife as imagined by the Florentine poet Dante Alighieri (1265-1320) in his great epic The Divine Comedy. Examines historical, literary, theological, and philosophical issues as our guide takes us through realms of the damned (Hell), the penitent (Purgatory) and the blessed (Heaven). Seminar consists of close reading and discussion. Prerequisites: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or one course in REL, or consent of instructor.

ENG 347 Modern/Contemp. American Literature

Study of novels, short fiction, and poetry by American writers of the twentieth and twenty-first centuries or of an author, topic, or genre of the period. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 357 Studies in Latinx/ChicanxLiterature

Reviews selected works of literature by Latina/os and Chicana/os. Students explore through reading and discussion methods and concepts relating to human rights, coloniality, diaspora, Latinidad and/or linguistic philosophy to better understand the lived experiences, identities, and cultures of Latinx and Chicanx communities in the U.S. Specific topics vary from year to year.

ENG 367 African American Literature

Cross-listed with AAM 367 Studies in African American Lit

See also African American Studies (AAM-367), Course focuses on specific literary genres or time periods and functions as an intermediate course between the introductory African American Literature (AAM/ENG-267) and the advanced English seminar (particularly Seminar in Literature: United States Pluralism (ENG-707)). Students read and discuss both primary and secondary sources in an effort to gain a fuller understanding and appreciation of the artistic values and of the social and cultural significance of these writings. Specific topics vary from year to year. Possible topics include African American Historical Fiction, African American Speculative Fiction, Literature of the Civil Rights Era, and the African American Bildungsroman. May be taken more than once, with consent of African American Studies administrative coordinator, provided the topics are substantially different. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 375 Study in European Literature

Study of selected works in English or translation by major European writers. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 378 Studies in Transatlantic Literature

Study of selected works in English from the Atlantic world. This course examines the diverse literatures, politics, and trade relations of the Atlantic world and considers how transatlantic relations alter the ways we read and understand national literatures. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 380 The Age of Chaucer

Reading and discussion of literature of the later Middle Ages, with some emphasis on the work of Geoffrey Chaucer. This course may count toward the upper-level early British literature requirement for the English major. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 382 Shakespeare:Comedies/Romances

Reading, viewing, and discussion of comedies and romances spanning Shakespeare's career. This course may count toward the upper-level early British literature requirement for the English major. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or consent of instructor.

ENG 383 Shakespeare:Tragedies & Histories

Reading, viewing, and discussion of history plays and tragedies, with some emphasis on the middle period of Shakespeare's career, including the major tragedies. This course may count toward the upper-level early British literature requirement for the English major. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 384 British Renaissance Literature

Study of the development of English literature in the sixteenth and seventeenth centuries. Typically the focus is on either poetry or drama. This course may count toward the upper-level early British literature requirement for the English major. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 385 Restoration &18th Cntry British Lit

Study of major works from 1660 to the end of the eighteenth century or of an author, topic, or genre of the period. This course may count toward the upper-level early British literature requirement for the English major. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-101) or consent of instructor.

ENG 388 Romantic Literature

Study of a range of literary works from 1780 to 1830, with emphasis on writings by Blake, Coleridge, Radcliffe, Robinson, Smith, Wollstonecraft, Wordsworth, Austen, Byron, Hemans, Keats, P. Shelley, and M. Shelley. This course may count toward the upper-level early British literature requirement for the English major. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or consent of instructor.

ENG 390 Victorian Literature

Study of poetry and prose of the Victorian era from 1832 through the fin-de-siècle, including such writers as Tennyson, Browning, Barrett Browning, Arnold, Mill, Ruskin, C. Rossetti, D. G. Rossetti, Swinburne, Hopkins, and Wilde. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or consent of instructor.

ENG 392 19th Century British Novel

Study of major British novelists such as Austen, Scott, Dickens, C. Brontë, E. Brontë, Eliot, Collins, and Hardy. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or consent of instructor.

ENG 393 Study in Mod/Contmp British Fiction

Study of novels, short fiction, and poetry by British writers of the twentieth and twenty-first centuries, or of an author, topic, or genre of the period. Prerequisite: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or consent of instructor.

ENG 394 Directed Learning in English

Study of individually chosen topics in literature or execution of projects in writing under the direction of a faculty member of the department. Registration only after the instructor has approved a written proposal for the project. Prerequisite: three courses in literature.

13.24.4 Advanced Study in English

Students registering for these courses must fulfill the prerequisites first and should consult with English department faculty if they have questions.

ENG 454 Honors Research

Development and completion of an honors thesis under the direction of a faculty member of the department. Normally taken in Fall Term of the senior year for an X status grade. Prerequisites: Seminar in Literature (ENG-464) or Seminar in Literature: United States Pluralism (ENG-467) and consent of instructor.

ENG 464 Seminar in Literature

Advanced study of a specialized topic in literature. As a capstone experience, the seminar fosters student-driven inquiry and requires students to present their work-in-progress and to complete a culminating project (typically, an extensive research paper). To be taken at or near the end of the English major. May be counted toward the upper-level early British literature requirement for the English major when topic is appropriate. May be taken more than once for credit toward the English major. Prerequisites: junior standing, The Art of Literary Research

(ENG-301), and an English course numbered 305 or above.

ENG 467 Seminar in Literature: USP

Advanced study of a specialized topic in literature. As a capstone experience, the seminar fosters student-driven inquiry and requires students to present their work-in-progress and to complete a culminating project (typically, an extensive research paper). To be taken at or near the end of the English major. May be taken more than once for credit toward the English major. Prerequisites: junior standing, The Art of Literary Research (WE) (ENG-301), and an English course numbered 305 or above.

13.25 English, Creative Writing, and Communication Studies

Carr, Ferguson, Harmsen, Hausknecht, LeMay, Opayemi (Chair), Shaw, Sodeman

13.25.1 Courses in English, Creative Writing, and Communication Studies

ECC 100 Inspirations and Aspirations

ECC-100 English, Creative Writing, and Communication Studies: Inspirations and Aspirations Allows students to identify and share the values, priorities, and motivations that draw them to a major in English, Creative Writing, or Communication Studies; and demonstrates how knowledge and skills honed within the classroom can be the foundation of different rewarding careers. This course is appropriate for both declared and exploratory majors. It includes values and strengths articulation, informational interviews, guest speakers, and a final collaborative presentation project. It welcomes any student interested in learning how studies in ENG, CRW, and COM can inspire and support a wide range of future paths. The 0.5 course credit does not count toward the ENG, CRW, or COM majors or minors. No prerequisites. (0.5 course credit)

ECC 112 Intro to Wri Center Thry & PR (WE)

ECC-112 Introduction to Writing Center Theory & Practice (WE) Introduces foundations of writing center theory and pedagogy. Designed for Writing Center consultants who are concurrently beginning work at the writing center. Instruction takes place in weekly group meetings and individual conferences. Offered fall semesters only. (0.3 course credit)

ECC 230 Grammar & Style Workshop

Examines various grammatical principles that provide structure to language and explores the stylistic choices available to writers. Focuses on the rhetorical use of grammar and style to affect meaning, express power relations, and persuade readers. Analysis of published writers and extensive practice in writing helps students develop stylistic versatility and effectiveness.

ECC 312 Writing Center Theory & Pract (WE)

ECC-312 Wring Center Theory & Practice (WE) Explores current topics in writing center research. Students plan and complete a project informed by research and share with writing center peers. Offered fall and spring terms. May be taken more than once for credit for a maximum of 0.9 credits. Prerequisite: Introduction to Writing Center Theory & Practice (WE) (ECC-112) (0.3 course credit)

ECC 325 CBP:Applied & Public Humanities

ECC-325 Community-Based Projects: Applied and Public Humanities Engages students in supervised work on service projects sponsored by external constituencies such as non-profit institutions and community agencies. Students learn how their knowledge and skills gained in ENG, CRW, COM, and other arts and humanities coursework can sustain prolonged engagement in a community setting, providing service and benefits to community and project sponsors and creating connections for future creative and professional growth. A commitment of 70 hours over a single term. P/NP only. (0.5 course credit)

ECC 345 Writing Process

ECC-345 Writing Process (WE) Focuses on established and emergent theories about writing and writers' processes from the discipline of writing studies. Students apply select theory and/or research in a self-study of their writing while undertaking a modest independent writing project of their own design, to be included with the self-study and

other documents in a portfolio of polished work.

ECC 494 Internship in Eng, Crw, & Comm

ECC-494 Internship in English, Creative Writing, and Communication Studies Explores a career area related to English, Creative Writing, or Communication Studies. Application and supervision through the Internship Specialist. A minimum of 140 hours on-site experience is required. P/NP basis only. A maximum of one credit may count toward a major or minor in English, Creative Writing, or Communication Studies. Prerequisites: junior standing and consent of department chair.

13.26 Environmental Studies (Collateral Major)

Ellis (Administrative Coordinator)

The Environmental Studies Major is a collateral, interdisciplinary program which requires students to study environmental issues using the techniques and perspectives from a variety of academic disciplines.

In the sophomore or junior year, a student intending to complete an environmental studies collateral submits a proposal to the Environmental Studies administrative coordinator, outlining the plan of study for the major and describing plans for independent research, internship, or off-campus study. Students seeking this collateral major should submit this document prior to enrollment in EVS-484 Topics in Environmental Studies.

In addition to the requirements listed below, before undertaking a practicum experience, each student is strongly encouraged to consult with the Environmental Studies administrative coordinator to identify a practicum experience that supports his or her study of environmental issues.

Students choosing a collateral major in environmental studies may not select the concentration in environmental science.

13.26.1 Collateral Major in Environmental Studies

A major in environmental studies requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

Concurrent completion of any of the majors for a B.A. degree listed on p. 21 of the Catalog is required.

1. BIO 105 Introduction to Environmental Studies

2. BIO 111/111L Urban Ecology **or** BIO 155/155L Organismal and Ecological Biology and Laboratory (WE)

3. **One** of the following:
   Any Data Science course
   BUS 190 Statistical Analysis
   BUS 340 Applied Regression Analysis
   PSY 300 Stat Methods and Data Analysis
   POL 244 Research Methods in Political Scien
   SOC 235 Methods of Sociological Research
   STA 100 Statistical Reasoning I-Foundations (7 weeks) **and** STA 110 Stats IIA: Inferential Reasoning (7 weeks)
   STA 100 Statistical Reasoning I-Foundations (7 weeks) **and** STA 130 Stats IIB: Experimental Design (7 weeks)
   STA 315 Mathematical Probability

4. **Three** of the following:
   BIO 111/111L Urban Ecology, if not used to satisfy #2
   COM 267 Environmental Rhetoric
   ECO 195 Prin of Environmental Economics
   POL 107 Environmental Justice (NOTE: Taught at the Wilderness Field Station)
   PHL 205 Environmental Ethics
   PHY 161 Energy: Science and Technology

5. EVS 484 Topics in Environmental Studies

6. **One** of the following Natural Science courses, if not used to satisfy #2 or #4
   BIO 111/111L Urban Ecology
   BIO 115 Marine Biology (Note: Offered May Term)
   BIO 165/165L Introduction to Ornithology and Lab
   BIO 175 Field Botany
   BIO 185/185L Entomology and Lab (Note: Taught at the Wilderness Field Station)

   PSY 255 Social Psychology

13.26.3 Courses in Environmental Studies (Collateral Major)

ECO 195 Prin of Environmental Economics
An introduction to the economics of the environment and natural resource allocation. This course is focused on optimal resource allocation and the problems associated with externalities and public goods in the context of a

market economy. Environmental issues and policy are analyzed using standard economic models. This course may be used to satisfy the requirements for a major in Environmental Studies but does not satisfy any of the requirements for a major or minor in economics. Prerequisite: Principles of Macroeconomics (ECO-175).

EVS 484 Topics in Environmental Studies

An intensive examination of selected works and subjects dealing with environmental issues. Specific topics vary from year to year. Prerequisite: junior standing or permission of instructor. May be taken more than once for credit with permission of instructor.

13.27 Gender And Sexuality Studies (Minor Only)

Janca (Administrative Coordinator)

The Gender and Sexuality Studies program is an interdisciplinary inquiry into the ways in which gender and sexuality inform constructions of identity, societies, and ideologies across race, ethnicities, class, cultures, and historical periods. Because core courses and electives are offered by faculty across the College, students are encouraged to meet with the Gender and Sexuality Studies administrative coordinator for informal advising to discuss options within the minor.

13.27.1 Gender and Sexuality Studies Minor

A minor in gender studies requires a minimum cumulative 2.0 GPA in all courses counted toward the minor.

1. GS 107 Intro Gender & Sexuality Studies

2. **Four** electives from the lists below, with at least **three** from the list of core courses. Other courses may count as electives when topics are appropriate with the consent of the academic coordinator.
   Core Courses

   - ARH 107 Gender and Art
   - COM 137 Interpersonal Communication
   - COM 257 Sex, Race, and Gender in the Media
   - COM 323 Relational Com:Theory & App (WE)
   - COM 377 Language, Power, and Social Change
   - ENG 206 Gender and Literature: NWP
   - ENG 207 Gender & Literature: US Pluralism
   - ENG 208 Gender & Literature: DWP
   - GS 127 Dress, Gender, and Identity
   - GS 247 Gender & Sexuality StudiesSymposium
   - GS 327 Thry&Mthds/Gender &Sexuality Stdy

- GS 387 Topics: Gender & Sexuality Studies
- HIS 297 Women in America
- NUR/PSY 137 Human Sexuality
- POL 277 Women & Poltics in US
- PSY 208 Gender Psychology
- SOC 207 Sociology of the Family
- SOC 227 Sociology of Sexuality
- SPA 418 Gender & Sexuality in Hispanic Wrld

Component Courses

- ANT 116 Cultural Anthropology
- COM 236 Intercultural Communication
- EDU 187 Human Relations
- ENG 127 Social Justice and Literature
- MTH 105 Math for Social Justice
- PSY 215 Multicultural Psychology

13.27.2 Courses in Gender and Sexuality Studies

GS 107 Intro Gender & Sexuality Studies
Examines the ways in which gender and sexuality are constructed, performed, and intersect with race, class, ability, nationality, ethnicity, and age in historical and contemporary contexts, particularly with regard to issues of power, privilege, oppression, and marginalization. As a required core course for all Gender and Sexuality Studies minors, its goal is to offer students the necessary critical conceptual and theoretical basis for further inquiry and analysis in core and elective courses. Attendance at community partner guest speaker events is required.
GS 127 Dress, Gender, and Identity
Explores the issues of personal adornment and dress related to the projection of gender and identity. Examples from contemporary cultures around the globe are analyzed and compared following a variety of themes. Those themes include: revealing and concealing gender and/or identity, dress codes as social markers, body image and gender, and group identity through dress and adornment.
GS 247 Gender & Sexuality StudiesSymposium
Focuses on specific questions and issues with an emphasis on multiple voices and perspectives, grounded in critical theory and methods.The course may include films, guest speakers, participation in a service-learning or oral history project, and field trips. Specific topics vary from year to year. May be taken more than once, provided the topics are substantially different. Prerequisite: Introduction to Gender and Sexuality Studies (WE) (GS-107) or consent of instructor.
GS 327 Thry&Mthds/Gender &Sexuality Stdy
Offers a thorough introduction to critical theories and methods in feminist and queer studies with particular

emphasis on historical foundations, questions of power and discourse, intersectionalities, and global perspectives. A research project using feminist or queer theory is required. Prerequisite: Introduction to Gender and Sexuality Studies (GS-107) and completion of one elective that counts toward a Gender and Sexuality Studies minor. Can be completed as an independent study with consent of administrative coordinator.

GS 387 Topics: Gender & Sexuality Studies

Focuses on specific authors, events, or issues in feminist, queer, and masculinity studies. May be taken more than once, provided the topics are substantially different. May be done as an independent study and/or community-based project with consent of the administrative coordinator. Prerequisite: Introduction to Gender and Sexuality Studies (WE) (GS-107) or consent of instructor.

13.28 Health and Society Studies (Minor Only)

Storer (Administrative Coordinator)

The Health and Society Studies program is an interdisciplinary cluster of courses that allows students to examine the breadth of issues impacting health and healthcare from the perspectives of natural sciences, social sciences, and humanities. This Health and Society Studies minor broadens students understanding of the impact of health and healthcare delivery issues, personally, professionally, and within our society. In addition, the minor will provide a strong interdisciplinary foundation for students interested in graduate studies related to health professions. Because required and elective courses are offered by faculty across the College, students are encouraged to meet with a Health and Society Studies administrative coordinator for informal advising before choosing the Health and Society minor.

13.28.1 Health and Society Studies Minor

A minor in Health and Society Studies requires a minimum cumulative 2.0 GPA in all courses counted toward the minor. In addition, only (1) one course from a student's major or collateral major can count towards the Health and Society Studies Minor.

Required Courses

1. PHL 200 Bio-Medical Ethics

2. SOC 107 Introductory Sociology

3. **One** of the following Biology courses:
   BIO 103 Anatomy & Physiology BIO 120 Biology, Health, & Society BIO 155 Organismal & Ecological Biology

4. **Three** elective courses from the list below, only (1) one of which may be a 100-level course. ANT 116 Cultural Anthropology
   CLA 155 Latin/Greek Origins Med Terminology
   COM 137 Interpersonal Communication
   COM 236 Intercultural Communication
   COM 332 Health Communication (WE)
   KIN 115 Fundamentals:Exercise & Nutrition
   KIN 125 Public and Consumer Health
   KIN 255 Substance Use, Misuse, & Addiction
   PHL 128 Morality & Moral Controversies
   ECO 247 Health Economics
   PHY 321 Health Physics
   PSY 205 Developmental Psychology

PSY 235 Abnormal Psychology
PSY 325 Health Psychology
PSY 350 Drugs & Behavior
SOC 257 Sociology of Health & Medicine
SPA 339 Spanish for Health Care
HSS 200 Comparative Health Systems
HSS 494 Health Professions Externship
Additional health-related courses may be approved as an elective with administrative coordinator approval

13.28.2 Courses in Health and Society Studies

HSS 100 Exploration in Health & Society
Allows students interested in health-related careers to explore various career options (e.g., medicine, dentistry, physical therapy, occupational therapy, nursing, psychological counseling); to assess and reflect on their own values, abilities, and motivations; and to develop some of the applied knowledge and skills necessary for entry into these occupations. Appropriate for first and second year students. (0.5 course credit)
HSS 200 Comparative Health Systems
Comparative Health Systems Introduces students to the structures, financing, and outcomes of health systems around the world. Drawing on frameworks from health economics and public policy, the course compares how countries organize, pay for, and deliver healthcare—and how these choices affect cost, access, and health outcomes. Special attention is paid to the U.S. system in a global context, as well as current challenges such as universal coverage, provider payment reform, and global health equity. No prior coursework is required. This course is designed for students pursuing careers in health professions, public health, policy, or related fields. Prerequisites: sophomore standing.
HSS 300 Learn Strategies Health Profess
Learning Strategies for the Health Professions:

Explores and reviews interdisciplinary topics that are essential for progressing to and succeeding in the health professions. Particular emphasis is put on the ability to integrate knowledge and analytical skills from across the natural sciences, social sciences and humanities in order to address questions and topics that are pertinent to preparation for entering various health fields. P/NP basis only. Prerequisites: junior standing or consent of instructor. (0.2 course credit)
HSS 494 Health Professions Externship
Offers an intense exploration in the fields of human or animal healthcare, allied health, or auxiliary fields within the healthcare system. Students are placed at local sites and/or in nearby communities with one or more professionals in fields related to the student's interests. A minimum of 140 hours on-site experience is required. P/NP basis only. Prerequisites: junior or senior standing, submission of application in Fall term, and consent of instructor. (Offered May Experiential Term only)

13.29 History

Swenson Arnold, Buckaloo, Keenan (Chair), Nordmann, Ziskowski

The history department allows students the opportunity to study history broadly, while also focusing on specific interests. Students learn how to express themselves, both orally and in writing, and, in the liberal arts tradition, are taught to learn quickly, communicate clearly, and build a rewarding career and life in their chosen field.

13.29.1 History Major

A major in history requires a minimum cumulative 2.0 GPA in all courses counted toward the major

1. **Four** courses in one of these two combinations:
    - HIS 115 History of Europe to 1500
    - HIS 125 History of Europe Since 1500
    - HIS 145 History of United States to 1865 **or** HIS 155 History of United States since 1865
    - **One** additional U.S. History course

    or

    - HIS 145 History of United States to 1865
    - HIS 155 History of United States since 1865
    - HIS 115 History of Europe to 1500 **or** HIS 125 History of Europe Since 1500
    - **One** additional European History course
2. HIS 205 The Historians Craft
3. **One** of the following:
    - HIS 136 East Asian Civilization
    - HIS 216 History of Modern Korea (WE)
    - HIS 246 History of Modern China
    - HIS 256 History of Modern Japan
4. **One** of the following:
    - HIS 465 Seminar in Ancient History
    - HIS 466 Seminar Modern East Asian History
    - HIS 472 Seminar American History I
    - HIS 473 Seminar American History II
    - HIS 474 Seminar Modern European History
5. **Three** additional history courses

13.29.2 History Minor

1. **One** of the following combinations:

   - HIS 115 History of Europe to 1500
   - HIS 125 History of Europe Since 1500
   - **One** course in United States history
   - **One** course in Asian history
   - **Two** additional history courses approved by the department

   or

   - HIS 145 History of United States to 1865
   - HIS 155 History of United States since 1865
   - **One** course in European history
   - **One** course in Asian history
   - **Two** additional history courses approved by the department

13.29.3 Courses in History by Content Area

Asian History
- HIS 136 East Asian Civilization
- HIS 216 History of Modern Korea (WE)
- HIS 246 History of Modern China
- HIS 256 History of Modern Japan
- HIS 316 Topics in History:Non-Western Persp

European History
- HIS 115 History of Europe to 1500
- HIS 125 History of Europe Since 1500
- HIS 238 Modern France
- HIS 248 The French Revolution
- HIS 272 History of Medieval Europe
- HIS 275 Ancient Greek History
- HIS 285 History of Ancient Rome
- HIS 288 Renaissance & Reformation
- HIS 292 History of Modern England
- HIS 318 Topics in History :Div West Persp
- HIS 355 19th Century Europe
- HIS 365 20th Century Europe
- HIS 372 Early Modern Europe

U.S. History
- HIS 145 History of United States to 1865

- HIS 155 History of United States since 1865
- HIS 217 American War in Vietnam
- HIS 227 American Civil War
- HIS 257 Native American History
- HIS 297 Women in America
- HIS 317 Topics in History:US Pluralism
- HIS 325 Recent American History I
- HIS 335 Recent American History II
- HIS 347 African American History
- HIS 387 American Colonial History
- HIS 395 United States Diplomatic History

Methods and Research
- HIS 205 The Historians Craft
- HIS 465 Seminar in Ancient History
- HIS 466 Seminar Modern East Asian History
- HIS 472 Seminar American History I
- HIS 473 Seminar American History II
- HIS 474 Seminar Modern European History

Other History Courses
- HIS 208 The First World War (WE)
- HIS 218 The Second World War (WE)
- HIS 268 Latin America
- HIS 276 The "Discovery" of America: Clash
- HIS 278 History of the Holocaust
- HIS 286 Modern Middle East
- HIS 300 Public History
- HIS 306 Revolution, Social Struggle, Testim
- HIS 308 Legacies of the Cold War inLatin Am
- HIS 328 Sprt & Spect: Ancient Greece & Rome
- HIS 444 Independent Study
- HIS 494 Internship in History

13.29.4 Courses in History

HIS 115 History of Europe to 1500
The development of Western civilization from the earliest times to 1500, with primary emphasis on the culture and thought of the Ancient, Medieval, and Renaissance eras.
HIS 125 History of Europe Since 1500
The development of Western civilization from 1500 to modern times, with emphasis on the cultural and intellectual development of the West and such topics as the Reformation, the Enlightenment, the Industrial Revolution, Imperialism, and the rise of Totalitarianism.
HIS 136 East Asian Civilization
A survey of East Asian civilization with emphasis on China from its origins to 1700. Particular attention is paid to cultural and political factors.
HIS 145 History of United States to 1865
A survey of relations between indigenous, European, and African peoples in places that would become the United States from the colonial era through the Civil War. Topics include European colonization; indigenous resistance; racial slavery; the American Revolution and creation of the United States; westward territorial expansion; and the Civil War.

HIS 155 History of United States since 1865
A survey of American history from the Reconstruction to the present. Topics include the changing American economy, the inclusion and exclusion of various Americans defined by race, class, and gender, and the emergence of the United States as a world power.
HIS 205 The Historians Craft
Introduction to the nature and craft of history. Emphases include use of sources, historiography, philosophy of history, and various forms of historical writing. The capstone assignment is a research paper. Prerequisite: sophomore standing.
HIS 208 The First World War (WE)
Introduces students to the global history of the First World War and the start of the interwar period. The class focuses on the political, cultural, and social effects of the war through a study of historical documents, period literature, and film. Through class discussion, short compositions, response papers, and digital humanities work students will: critically analyze historical documents; identify and evaluate the significance of key actors, events, and ideas of the First World War; and synthesize evidence from to produce effective written and oral arguments.
HIS 216 History of Modern Korea (WE)
Introduces students to modern Korean history by examining Korea's transition from a politically isolated rural state to, in the South, an industrialized country electing its own government and, in the North, a totalitarian state capable of producing nuclear weapons. Students will examine historical documents, literature and film and use class discussion and formal papers to analyze key events such as: Korea's colonization under Japan; the Korean War; South Korea's economic and democratic "miracles;" North Korean communism and nuclear brinksmanship; and South Korea's emergence as a major producer of exported entertainment like K-Pop and K-Drama.
HIS 217 American War in Vietnam
Examines the American war in Vietnam from its earliest roots to its latest ramifications and from multiple perspectives. Emphases include the French Indochina War, American policy debate, the sources of American policy, Vietnamese perspectives, and the war in fiction and film.
HIS 218 The Second World War (WE)
Introduces students to the global history of the Second World War, beginning with the interwar period and moving into the start of the Cold War. The course will focus on both the European and Pacific battle and home fronts, including the Holocaust, through a study of historical documents, period literature, and film. Through class discussion, short compositions, response papers, and digital humanities work students will: critically analyze historical documents; identify and evaluate the significance of key actors, events, and ideas of the Second World War; and synthesize evidence from to produce effective written and oral arguments.
HIS 227 American Civil War
A study of events, issues, ideas, and forces leading to the American Civil War and the resulting Reconstruction. Topics emphasized include slavery, social, economic, and political events leading to the war, the political and military strategies of the war, the efforts of Americans on the homefront, and the trials and triumphs during Reconstruction.
HIS 238 Modern France
An examination of the major political, cultural, and social developments in France from the end of the French Revolution to present day, with an emphasis on the changes and shifts in French national identity and global relations.
HIS 246 History of Modern China
A history of modern China since 1700. Chinese states and society from the height of Qing culture, through the impact of the West and Japan, the rise of Chinese Republicanism and Marxism, the Liberation of 1949, the Great Leap Forward, the death of Mao Zedong, and rule of Deng Xiaoping, up to the present day.
HIS 248 The French Revolution
An investigation of the origins and course of the French Revolution from the Ancien Regime to 1815. The course covers the Enlightenment, the collapse of the Ancien Regime, the opening of the Revolution, the Terror, and Napoleon.
HIS 256 History of Modern Japan

A history of modern Japan since 1700. Historical analysis of Edo period culture, politics and society, rapid Meiji era changes, constitutionalism and imperialism, Japan's expansion in Asia, World War II, the post-war social change, and economic recovery and rise to international leadership, up to the present.

HIS 257 Native American History

Examines the history of Native Americans and their relationships to Europe and Anglo-America from pre- Columbian times to the present. Emphases include understanding Native cultures, early Anglo-Indian relations, the western "Indian wars," and the Red Power movement of the 1970s.

HIS 268 Latin America

Survey of the social, political, economic, and cultural factors of Latin America from the colonial era to the present, with an emphasis on how these factors influence present day Latin America.

HIS 272 History of Medieval Europe

A survey of Medieval Europe focusing on the intellectual, cultural, religious, artistic, and literary achievements of the High Middle Ages from roughly 1000 A.D. to 1300 A.D.

HIS 275 Ancient Greek History

An examination of the evolution of certain key institutions and traditions in the ancient Greek world—political, constitutional, military, social, and economic—with particular emphasis on the revolutionary changes experienced during the Classical Age, i.e., the fifth and fourth centuries B.C.

HIS 276 The "Discovery" of America: Clash

Focuses on the biggest empires in the Americas (Maya, Aztec, and Inca) and the process of conquest and colonization after Christopher Columbus' arrival. The students will read accounts written during the 15th-17th centuries and consider how to critically engage them. The class aims to reflect not only on the stories of the conquistadores, but also on those of the conquered people through historical accounts that attempt to give a voice to the voiceless, analyze the challenges of facing a completely unknown culture, and the ethical implications of imposing your values and traditions on others. By the end of the class, the student will be able to provide an overview of the Spanish Conquest, its history, and controversies. Students also will develop skills to analyze primary and secondary sources and write small response papers as well as a small essay that demonstrates an understanding of the time period and the ability to support an argument.

HIS 278 History of the Holocaust

Introduces students to the examination of the causes, experiences, and legacy of the Holocaust, studying viewpoints of victims, perpetrators, and bystanders. Students will study historical documents and literature as well as audiovisual sources in course discussions and written work as they cover social, cultural, and political history from pre-war Germany through World War II, and evaluate memory of the Holocaust in the time period since 1945. Through written work and course discussions, students will: identify and evaluate the significance of key actors, events, and ideas connected to the Holocaust; analyze primary and secondary sources; synthesize evidence to produce cogent written and oral arguments; and critically examine understanding of the Holocaust.

HIS 285 History of Ancient Rome

An examination of the evolution of certain key institutions and traditions—political, constitutional, military, social, and economic—in the ancient Roman world, with emphasis on the revolutionary changes during the transition from the Republic to the Empire, i.e., the first centuries B.C.E and C.E.

HIS 286 Modern Middle East

A survey of recent history of the Middle East, from the 1800's to the present with an emphasis on the 20th century. Course focuses on the Middle East and its global interactions.

HIS 288 Renaissance & Reformation

The European experience from the waning of the Middle Ages through the period of the religious wars, with the emphasis on art, the rise of nation states, overseas expansionism, the scientific revolution, and the Protestant and Catholic Reformations.

HIS 292 History of Modern England

A survey of the major constitutional, political, and social developments in England from The Glorious Revolution to the present. Particular attention is paid to the growth of Empire, the Industrial Revolution, the rise of labor, and the effects of The Great War and World War II.

HIS 297 Women in America
A survey of the role and power of a variety of women in America's history from colonial times to the present, with an emphasis on understanding the place of women today.
HIS 300 Public History
Introduces students to the methods and practices of public history. Public history refers to the many ways history is utilized and applied outside traditional academic research and college classroom settings. Through readings, discussions, site visits, guest speakers, and writing assignments, students will learn about the many ways history is applied, interpreted, and used by museums, historical sites, non-historians, and other publics. They will be introduced to career opportunities in public history and will engage with the cultural and historical resources of Cedar Rapids. Students will analyze primary and secondary sources, refine written and verbal communication skills, and demonstrate an understanding of and ability to use historical research techniques. The course culminates in the production of a hands-on, research-based, collaborative class history project (e.g., exhibit, website, historical markers, etc.) that will serve a public beyond the classroom.
HIS 306 Revolution, Social Struggle, Testim
Revolution, Social Struggle, and Testimonio in Latin America 20th Century

Introduces students to the testimonial literature in Latin America, a genre capable of allowing the oppressed to bring forward their perceptions, world view, and experience of a specific historical moment. This class includes narratives from Guatemala, Nicaragua, El Salvador, México, and Bolivia, among others. It will also include a theoretical segment that will reflect on the advantages and shortcomings of this genre. At the end of the class, students understand and describe major social problems during specific time frames in the 20th century of the nations studied, articulate the characteristics of this genre, and use a testimonio to gain an insight into a sociohistorical event. Through written assignments and discussions students will analyze the experience of marginalized communities in relation to specific institutional policies. The course ends with a testimonio project where students explore the genre using personal experience, family history, or by interviewing an acquaintance that can offer a special insight regarding a social problem.
HIS 308 Legacies of the Cold War inLatin Am
Legacies of the Cold War in Argentina, Peru, Colombia, and Chile Is an interdisciplinary class centered on the relation between the Cold War and the internal violence that several South American nations lived through during the second half of the 20th century. The influence of anti-imperialist ideas throughout Latin America, the development of the guerrilla movement and its revolutions, and the militarized counter-revolution served as the political basis for moments of crisis that each nation endured: The National Reorganization Process in Argentina (1976-1982), the Civil War in Peru (1980-2000), the Military Dictatorship in Chile (1973-1990), and the long-term war in Colombia (1948-present). The classwork with historical and anthropological accounts, testimonios, art, film, and theory to give a more diverse image of experiences and implications of these events for different sectors of the communities. At the end of the course, the student will understand major Latin American historical trends in relation to the Cold War, as well as the specificities of the conflict in each one of these nations. They also will be able to analyze one of the factors that play a role in the development of these crises through a small research project that is developed by written assignments.
HIS 316 Topics in History:Non-Western Persp
An intensive study of a selected topic (or topics) in history related to non-Western cultures through lectures or group discussion or directed learning or research and writing. (Offered on an occasional basis)
HIS 317 Topics in History:US Pluralism
An intensive study of a selected topic (or topics) in history related to United States Pluralism through lectures or group discussion or directed learning, or research and writing. (Offered on an occasional basis)
HIS 318 Topics in History :Div West Persp
An intensive study of a selected topic (or topics) in history related to Diverse Western Perspectives through lectures or group discussion or directed learning or research and writing. (Offered on an occasional basis)
HIS 325 Recent American History I
An examination of American domestic development from the last quarter of the 19th century to the present. Topics include immigration, workers in a changing economy, the World Wars, the Cold War, civil rights, the changing role

of women in society, and the contested post-1960's move to the political right. Prerequisite: History of the United States Since 1865 (HIS-155) or consent of instructor.

HIS 328 Sprt & Spect: Ancient Greece & Rome

Introduces students to the many forms of public entertainment in ancient Greek and Roman society. These include theater, dramatic festivals, athletic competitions, the origin of the Olympics, gladiatorial combats, chariot racing, as well as processions and sacrifices. In this course, students will demonstrate a recognition of key themes and concepts in the literature, art, and archaeological evidence of the ancient Mediterranean; deconstruct the role of competition and performance in the Classical world; articulate the influence of the ancient Greeks and Romans on modern society; and critically assess the value of ancient texts and other bodies of evidence through written assignments.

HIS 335 Recent American History II

An examination of American foreign relations from the 1890s to the present, including the World Wars, the Cold War, and the post-9/11 world. Prerequisite: History of the United States Since 1865 (HIS-155) or consent of instructor.

HIS 347 African American History

An examination of changes and continuities in the lives of African Americans from the colonial era to the present. Emphases include the origins and evolving nature of slavery, race, and racism; development of African-American culture, individual struggles for freedom and civil rights; migrations; segregation; and large-scale movements for social and political change.

HIS 355 19th Century Europe

The evolution of Europe from the French Revolution to World War I, with an emphasis on such topics as Liberalism, the Industrial Revolution, Nationalism, Marxian Socialism, Imperialism, and Great Power diplomacy.

HIS 365 20th Century Europe

A historical survey of modern Europe from 1900 to the present. Emphases are on World War I, the Russian Revolution, the rise of Fascism, Hitler, Nazi Germany, Stalin and Soviet Communism, World War II and the Cold War, as well as the emergence of the European Community (EC) and the collapse of Communism and the Soviet Union.

HIS 372 Early Modern Europe

The history of Europe from 1603-1815 with emphasis on the English Revolutions, the age of Absolute Monarchy, the Enlightenment, the decline of the Ancien Regime, the French Revolution, the Napoleonic era, and concluding with the Congress of Vienna.

HIS 387 American Colonial History

The history of the American colonies from their founding through the American Revolution, focusing on the diverse perspectives of people varying in religion, ethnicity, and gender, as well as economic and political backgrounds.

HIS 395 United States Diplomatic History

Begins with an examination of the relations of the colonies to international affairs. The course focuses attention on topics in American diplomatic history which provide a background for an understanding of the nation's present status as a world power.

HIS 444 Independent Study

Independent work on a selected project under the direction of a faculty member of the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of instructor.

HIS 465 Seminar in Ancient History

An intensive reading and research seminar on a selected topic in the history of the ancient world. Prerequisite: The Historian's Craft (WE) (HIS-205) and junior standing.

HIS 466 Seminar Modern East Asian History

An intensive reading and research seminar on selected topics in the 19th- and 20th-century history of China, Japan and Korea. Prerequisite: The Historian's Craft (HIS-205) and junior standing.

HIS 472 Seminar American History I

An introduction to historical research in earlier American history (prior to 1865). Critical inquiry is emphasized in detailed examination of specific topics. Prerequisite: The Historian's Craft (HIS-205) and junior standing.

HIS 473 Seminar American History II
An introduction to historical research in later American history since 1865. Critical inquiry is emphasized in detailed examination of specific topics. Prerequisite: The Historian's Craft (HIS-205) and junior standing.
HIS 474 Seminar Modern European History
An intensive reading and research seminar on selected topics in 19th- and 20th-century European political, diplomatic, and intellectual history. Prerequisite: The Historian's Craft (HIS-205) and junior standing.
HIS 494 Internship in History
Part-time work experience for one term in a history-related field supervised by a faculty member of the department in cooperation with the Internship Specialist. A minimum of 140 hours on-site experience is required. S/U basis only. This course does not satisfy any of the requirements for a major or minor in history. Prerequisites: junior standing and consent of department chair.

13.30 Interdisciplinary Science

Singleton (Administrative Coordinator)

The interdisciplinary science major provides a broad background in the Natural Sciences. The major is suitable for students interested in pre-professional programs such as medicine, dentistry, and engineering, or careers in the health sciences, neuroscience, data analysis, teaching, writing, and other areas that could be augmented with study in the natural sciences. Students interested in pursuing the Interdisciplinary Science major should contact the program coordinator.

13.30.1 Interdisciplinary Science Major

A major in interdisciplinary science requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

Students earning a major in the Natural Sciences are not eligible for the Interdisciplinary Science major.

A major in interdisciplinary science requires a minimum of eleven course credits from the natural science areas of biology, chemistry, mathematics, and physics. At least five of these course credits must be above the introductory level and:

1. **Five** course credits in one of the four natural science areas
2. **Four** course credits in a second natural science field
3. **Two** course credits in a third natural science field
4. Satisfactory completion of assessment requirement

13.31 Interdisciplinary Studies

The interdisciplinary major is a rigorous academic program in which the individual student assumes primary responsibility for designing their own academic program. Since the interdisciplinary major is structured by the student to serve individual needs, the primary courses selected for the major invariably cross traditional departmental boundaries. In all instances, the interdisciplinary major must display internal topical coherence.

Assisting the student in developing a coherent interdisciplinary major will be the supervising faculty member, the student's academic advisor (if the advisor is not the supervising faculty member), faculty from those departments in which the student is taking primary courses, and the Academic Policies Committee. This committee is responsible

for approving student-initiated majors and for offering, where necessary, constructive advice on student proposals. Further guidelines for interdisciplinary majors may be obtained from the Office of the Registrar. The decision to undertake and to seek approval of an interdisciplinary major should be made after the student has had sufficient consultation with the appropriate persons within the College.

Normally, this decision is made in the sophomore year, but in no case is an interdisciplinary major approved after the student has embarked upon the final eight courses leading to graduation. Application for an interdisciplinary major must contain the following: 1) a list of the nine to 11 primary courses which constitute the major; 2) a list of secondary or supportive courses which are tangentially related to the major; and 3) a three- to four-page typewritten statement of the rationale for the proposal, indicating, among other things, the internal coherence of the major.

13.31.1 Additional guidelines and requirements:

1. Courses for the major are selected from three or more academic disciplines. At least 40% of the courses in a proposed major must be taken at Coe.

2. A student's program of study must include, among the primary and secondary courses listed on the proposal, at least five upper division classes within a single discipline or within two closely related disciplines. Students may consider an established, departmental minor when a minor appropriate to the proposed major is available. Students should not propose a major that simply recombines courses from majors and minors that will already be recognized on the student's transcript. An interdisciplinary major should be substantially distinct from the student's other majors and minors.

3. Students must complete an integrative senior project which demonstrates competence in bringing together at least two disciplines within the major. A student develops a project in consultation with the student's academic advisor and at least one other faculty consultant from an appropriate department other than that of the academic advisor. The senior project must be reviewed. The form of the review, which may be similar to the defense of an honors project, is determined by the project advisor in consultation with the student. The project must also be reviewed by at least one other faculty member from a department other than that of the faculty advisor. Students may undertake the project with or without academic credit. Registration for credit may take one of two forms. Students may register for regular catalog courses in individualized instruction (e.g., directed readings or directed writing classes) or they may apply for an independent study which requires approval by the Chair of the Academic Policies Committee (Provost).

4. An interdisciplinary major may include an internship.

13.31.2 Courses in Interdisciplinary Studies

INT 394 Interdisciplinary Directed Learning
INT-394 Interdisciplinary Directed Learning Investigates an interdisciplinary topic, not covered by existing course offerings, selected by the student and directed by a faculty instructor to fit the student's particular interests and interdisciplinary educational needs. Students attend regular meetings and turn in assignments as requested by the instructor. Registration only after the instructor has approved a written proposal for the project. May be taken more than once for credit, provided the topics are substantially different. May be used as registration for integrative senior project of the interdisciplinary major. Prerequisites: Consent of instructor and approval by the Academic Policies Committee.
INT 444 Interdisciplinary Independent Study
INT-444 Interdisciplinary Independent Study Entails independent study and/or research in a specific interdisciplinary

area chosen by the student, under the direction of a topically relevant faculty member, whose consent is required prior to the term of registration. May be used as registration for the integrative senior project of the interdisciplinary major. Prerequisites: Consent of instructor and approval by the Academic Policies Committee.

INT 494 Internship

Supervised work or volunteer experience related to a student's career interests. A minimum of 140 hours on-site or remote work experience is required. Authorization and evaluation of the course credit for the internship is determined by the department through which the student is completing the internship. P/NP basis only. With departmental approval, credit may be applied to a major only with consent of department chair. Prerequisites: consent of the Internship Faculty Advisor

13.32 International Economics

Students majoring in economics have two options: the **ECONOMICS** major (see p. 96) and the **INTERNATIONAL ECONOMICS** major. The international economics major is designed to allow students who are interested in international studies to explore issues of development, growth, and international finance, using the tools of economic analysis. Because of significant overlap in the economics and the international economics requirements, only one of the two majors may be elected by a student. Students majoring in economics or international economics may not minor in either economics or international economics.

13.32.1 International Economics Major

1. ECO 175 Principles of Macroeconomics
2. ECO 215 Prin Microeconomics
3. ECO 315 Intermediate Macroeconomic Theory
4. ECO 336 Divergent Economic Growth
5. ECO 345 Intermediate Microeconomics
6. ECO 375 Econometrics
7. ECO 436 Econ Development
8. ECO 446 International Econ
9. **One** additional Economics course numbered 200 or higher
10. **Two** courses in world language numbered 115 or above
11. **One** of the following: A semester abroad A May Experiential Term abroad A capstone project in international economics, supervised by a member of the economics faculty

    NOTE: *International economics majors intending to do graduate work in international studies or intending to pursue a career with a governmental or non-governmental agency are strongly encouraged to consider a minor or major in Political Science or one of the International Studies tracks to complement the International Economics major. Students are also encouraged to work closely with a member of the department to select complementary General Education courses.*

13.32.2 International Economics Minor

1. ECO 175 Principles of Macroeconomics
2. ECO 215 Prin Microeconomics
3. ECO 336 Divergent Economic Growth
4. ECO 436 Econ Development
5. ECO 446 International Econ
6. **One** additional Economics course numbered 200 or higher

13.33 International Studies

Janca (Administrative Coordinator).

13.33.1 International Studies Major

A major in international studies, in any track, requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

13.33.1.1 International Studies Core Courses (required of students completing a major in international studies):

1. IS 116 Intro to International Studies
2. ANT 116 Cultural Anthropology
3. POL 258 World Politics
4. ECO 175 Principles of Macroeconomics
5. **Two** world language courses, numbered 125 or above in Spanish, 115 or above in another language.
6. A term-long study abroad experience, subject to prior approval by the International Studies program committee.
7. IS 464 International Studies Colloquium

NOTE: *International Studies majors select one of the following tracks: The Global South, International Relations, or Global Cultural Studies. (Students who plan to pursue a graduate program that requires a strong foundation in economics should consider the International Economics major offered by the Business and Economics Department.)*

13.33.1.2 International Studies Major — The Global South track

The Global South examines the characteristics of regions in what has come to be called the "Global South," especially Latin America, Africa, and Asia. It investigates how the evolution of these regions relates to social, political and economic systems. Students are introduced to a variety of disciplinary and theoretical approaches to the study of international development; graduates better understand the history and legacy of colonialism, the conditions that create or resolve poverty, and relations between the Global South and North.

1. **Seven** international studies core courses

2. ECO 215 Prin Microeconomics

3. **Two** courses to be chosen as indicated from the two lists below.

   a. **One** of the following:
      - ECO 436 Econ Development **or**
        Subject to prior approval by the International Studies administrative coordinator:
      - ECO 336 Divergent Economic Growth
      - ECO 446 International Econ

   b. One course selected in consultation with the International Studies administrative coordinator (priority given to upper-level POL- courses)

4. **Two or more** additional courses from either the courses under #3 or any of the following, subject to prior approval by the International Studies administrative coordinator. (Not more than one of these two courses can be from political science and not more than one of these two courses can be from economics.). At least one course must be completed at the 300 level or above.

   - ASC 186 Modern South Asia
   - ENG 146 Intro Postcolonial Literature
   - HIS 246 History of Modern China
   - HIS 268 Latin America
   - HIS 286 Modern Middle East
   - HIS 316 Topics in History:Non-Western Persp
   - IS 316 Top in Internl Stds:Non-West Persp
   - POL 266 Latin American Politics
   - POL 276 African Politics
   - POL 286 Asian Politics

13.33.1.3 International Studies Major — International Relations track

International Relations combines theoretical approaches to and empirical knowledge of state and non-state actors, power, and international structures.

1. **Seven** international studies core courses

2. POL 108 Introduction to Politics

3. POL 310 International Organizations

4. **Three** courses to be chosen as indicated from the two lists below. No more than two of these three courses can be completed in the Political Science department.

   a. **One** of the following:
      - ASC 186 Modern South Asia
      - HIS 216 History of Modern Korea (WE)
      - HIS 217 American War in Vietnam
      - HIS 246 History of Modern China
      - HIS 256 History of Modern Japan
      - HIS 268 Latin America
      - POL 266 Latin American Politics
      - POL 276 African Politics
      - POL 286 Asian Politics
      - POL 298 European Politics

   b. **Two** of the following:
      - ECO 446 International Econ
      - HIS 286 Modern Middle East
      - HIS 335 Recent American History II
      - HIS 395 United States Diplomatic History
      - IS 315 Topics in International Studies (when appropriate)
      - IS 316 Top in Internl Stds:Non-West Persp (when appropriate)
      - POL 305 Terrorism
      - POL 365 American Foreign Policy

13.33.1.4 International Studies Major — Contemporary European Studies

The Contemporary European Studies track emphasizes the study of cultural commonalities and differences in Europe since the mid-19th century.

Contemporary European Studies
1. Seven international studies core courses

2. HIS 365 20th Century Europe
3. POL 298 European Politics
4. **Three** of the following, two of which must be numbered 300 or above. At least two academic disciplines must be represented.
- ARH 248 Baroque, Rococo, and Neoclassicism
- ARH 307 Modern and Contemporary Art
- ENG 393 Study in Mod/Contmp British Fiction
- HIS 238 Modern France
- HIS 278 History of the Holocaust
- HIS 292 History of Modern England
- IS 315 Topics in International Studies (when appropriate)
- REL 138 Modern Judaism
- REL 148 Islam
- REL 178 Christianity
- THE 238 History of Theatre and Drama II
- A course approved by the International Studies administrative coordinator

13.33.2 Courses in International Studies

IS 116 Intro to International Studies
A range of case studies introduces students to the nomenclature and analytical approaches of international studies. Focus areas include migration and human geography; global economics, trade, and development; global governance; media and culture across borders. Global health, the environment, and gender issues are also included.
IS 126 Human Rights Burmese Migrant
Offers the opportunity during a May-Term residency at a school on the border of Thailand and Myanmar to gain an understanding of the lives of Burmese youth who live as educational migrants in Thailand. Through teacher/ pupil interactions and tutoring students learn about the conditions that drive Burmese children from their homeland to seek an education in a foreign country and about the challenges these children face far from home. Students also gain insight into the rewards and pitfalls of international humnitarian work. Prerequisite: consent of instructor. (Offered May Experiential Term only).
IS 199 May Experiential Term in the Franco
Explores the history, culture, and arts in a site within the francophone world. Sites and topics vary by term. May count toward a major or minor if completed in French. Prerequisite: consent of instructor. (Offered May Experiential Term only)
IS 315 Topics in International Studies
A study of a selected topic or theme in international studies. Topics vary and may include interdisciplinary approaches to human migration, transitional justice, human rights. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Introduction to International Studies (IS-116) or consent of instructor.
IS 316 Top in Internl Stds:Non-West Persp
Same as Topics in International Studies (IS-315) except selected works focus on Non-Western Perspectives.
IS 464 International Studies Colloquium
Synthesizes learning from major courses with a blend of cross-disciplinary readings, career exploration, and an independently designed community-based project. The Colloquium is usually taken during Spring Term of the senior year. Satisfactory completion of the Colloquium is required for graduation with a major in international studies. P/NP basis only. Prerequisite: consent of instructor. (0.5 course credit)

13.34 Japanese (Courses Only)

Potter

13.34.1 Courses in Japanese

JPN 106 Images Foreign Culture
A course dealing with the picture of human activity and values given in foreign short stores, novels, films, and other works of art, as well as in historical documents and the like. It celebrates and explores the special character of a national or ethnic identity. Topics vary from year to year. Taught in English.
JPN 115 Elementary Japanese I
Beginning Japanese phonology, structure, and vocabulary. Study of hiragana and katakana syllabaries with introduction of some kanji.
JPN 125 Elementary Japanese II
Continuing study of Japanese phonology, structure and vocabulary. Study of hiragana and katakana syllabaries with introduction of some kanji. Prerequisite: Elementary Japanese I (JPN-115) or consent of instructor.
JPN 215 Intermediate Japanese I
Reading and discussion of selected Japanese texts, with continued work on grammatical structures. Increased emphasis on kanji. Prerequisite: Elementary Japanese II (JPN-125) or consent of instructor.
JPN 225 Intermediate Japanese II
Reading and discussion of selected Japanese texts, with continued work on grammatical structures. Increased emphasis on kanji. Prerequisite: Intermediate Japanese I (JPN-215) or consent of instructor.
JPN 305 Topics in Japanese Language
An advanced study of the Japanese language. May be taken more than once. Prerequisite: Intermediate Japanese II (JPN-225) or consent of instructor.

13.35 Kinesiology

Chandler, Kirkpatrick, Libby (Chair), Rydze

The kinesiology department's program enables students to earn a major in Kinesiology with a concentration in physical education for teacher certification, fitness development-strength & conditioning, fitness development-health & wellness, or Pre-Health Professions. In Addition, students may complete coursework to fulfill the state of Iowa Board of Educational Examiners requirements for a coaching endorsement, coaching authorization, and a teacher health certification endorsement.

13.35.1 Kinesiology Major

A major in Kinesiology requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

13.35.2 Concentrations in Kinesiology

Students completing a major in Kinesiology may elect to also complete a concentration of courses within a specific discipline in the major. Courses taken to fulfill requirements in the Kinesiology major may be used to also fulfill requirements in an area of concentration. Students may declare only one concentration. Concentrations are offered in nutrition. To complete a concentration a student must meet the following requirements:
1. Completion of a major in Kinesiology
2. Completion of six additional courses in which a cumulative 2.0 GPA must be earned. At least three of the six courses must be completed at Coe.

13.35.2.1 Kinesiology Major — Pre-Health Professions

1. BIO 155 Organismal & Ecological Biology
2. BIO 215/215L Human Anatomy and Laboratory
3. BIO 225 Human Physiology
4. KIN 105 Foundations of Physical Movement
5. KIN 115 Fundamentals:Exercise & Nutrition
6. KIN 275 Prevention & Care of Athletic Injur
7. KIN 365 Exercise Measurement/Eval&Prescript
8. KIN 442 Physiology of Exercise
9. KIN 495 Kinesiology

All of the following courses in the Pre-Health Professions Group
- KIN-110 Emergency Life Skills (0.5 credit)
- KIN-310 Athletic Injury Evaluation
- KIN-410 Athletic Injury Treatment & Rehabilitation

Students interested in the Pre-Health Professions track are strongly encouraged to meet with the Kinesiology faculty for informal advising as soon as they have chosen this major. Additional coursework may be needed for those students pursuing graduated work in Physical Therapy, Athletic Training or Occupational Therapy.

13.35.2.2 Kinesiology Major — Fitness Development

1. BIO 155 Organismal & Ecological Biology
2. **One** of the following:
   - +++MISSING INFO: c.bio103_103l.long +++
   - BIO 215 Human Anatomy **and** BIO 225 Human Physiology
3. KIN 105 Foundations of Physical Movement
4. KIN 115 Fundamentals:Exercise & Nutrition
5. KIN 275 Prevention & Care of Athletic Injur
6. KIN 365 Exercise Measurement/Eval&Prescript
7. KIN 440 Org-Admin of PE, Health & Athl

8. KIN 442 Physiology of Exercise
9. +++MISSING INFO: c.kin449.long +++
10. **All** of the following courses in the **Strength and Conditioning Group**:
    - KIN 103 PE **or** KIN 104 PE Advanced Weight Training
    - KIN 103 PE **or** KIN 104 PE Movement Training
    - KIN 185 Group Exercise
    - KIN 385 Methods Strength Trng & Condition
    - KIN 405 Program Design

    or

    All of the following courses in the **Health and Wellness Group**:
    - KIN 125 Public and Consumer Health
    - KIN 135 Concepts of Individual Wellness
    - KIN 255 Substance Use, Misuse, & Addiction

13.35.2.3 Kinesiology Major — Physical Education

13.35.2.3.1 Secondary Education Emphasis in Physical Education

1. BIO 155 Organismal & Ecological Biology
2. **One** of the following:
    - +++MISSING INFO: c.bio103_103l.long +++
    - BIO 215 Human Anatomy **and** BIO 225 Human Physiology
3. KIN 105 Foundations of Physical Movement
4. KIN 165 Master Activity Class for Teachers
5. KIN 225 Motor Learning
6. KIN 275 Prevention & Care of Athletic Injur
7. KIN 347 Adapted Physical Education
8. KIN 365 Exercise Measurement/Eval&Prescript

9. KIN 415 Methods of Secondary Schl PE & Hlth
10. KIN 440 Org-Admin of PE, Health & Athl
11. KIN 442 Physiology of Exercise
12. KIN 495 Kinesiology

13.35.2.3.2 Elementary Education Emphasis in Physical Education

1. BIO 155 Organismal & Ecological Biology
2. **One** of the following:
   - BIO 103 Anatomy & Physiology
   - BIO 215 Human Anatomy **and** BIO 225 Human Physiology
3. KIN 105 Foundations of Physical Movement
4. KIN 165 Master Activity Class for Teachers
5. KIN 225 Motor Learning
6. KIN 275 Prevention & Care of Athletic Injur
7. KIN 347 Adapted Physical Education
8. KIN 315 Methods Elementary Sch PE & Health
9. KIN 440 Org-Admin of PE, Health & Athl
10. KIN 442 Physiology of Exercise

For additional educational requirements, K-12 Licensure, see p. 120; for Secondary Licensure, see p. 121.

13.35.2.4 Nutrition Concentration

1. BIO 145/145L Cellular and Molecular Biology and Laboratory (WE)
2. CHM 121/121L General Chemistry I and Laboratory
3. CHM 122/122L General Chemistry II and Laboratory
4. **Three** of the following through an online partnership with Rize Education:
   - KIN 220 Food Science
   - KIN 325 Food Economics

- KIN 330 Lifecycle Nutrition I
- KIN 430 Lifecycle Nutrition II
- KIN 435 Medical Nutrition Therapy

Students interested in a Nutrition Concentration in the Kinesiology department are strongly encouraged to meet with the Kinesiology faculty for informal advising as soon as they have chosen this major. Additional coursework may be needed for those students interested in pursuing graduate study in Nutrition or Dietetics.

The Nutrition concentration is offered online through a consortium of accredited colleges and universities. All courses within the program are delivered by faculty employed by partner institutions in the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through the consortium are reviewed and approved by Coe College. Students register through Coe College and receive academic credit from Coe College.

13.35.2.5 State of Iowa Coaching Endorsement (#55, K-12)

1. Teaching certification in an academic area
2. KIN 110 Emergency Life Skills
3. KIN 201 Fundamentals of Coaching
4. KIN 275 Prevention & Care of Athletic Injur

The Coaching Endorsement (#55, K-12) may be granted to any student with teacher certification completing a major in kinesiology and by taking Emergency Life Skills (KIN-110) and either Theory of Coaching (KIN-205) **or** Fundamentals of Coaching (KIN 201).

13.35.2.6 State of Iowa Coaching Authorization

1. KIN 110 Emergency Life Skills
2. KIN 201 Fundamentals of Coaching
3. KIN 275 Prevention & Care of Athletic Injur

13.35.2.7 State of Iowa Health Certification Endorsement

1. KIN 115 Fundamentals:Exercise & Nutrition
2. KIN 125 Public and Consumer Health
3. KIN 135 Concepts of Individual Wellness
4. KIN 255 Substance Use, Misuse, & Addiction

5. KIN 275 Prevention & Care of Athletic Injur

6. **One** of the following:

   - GS 107 Intro Gender & Sexuality Studies
   - KIN 202 Family Life Education
   - SOC 207 Sociology of the Family

13.35.3 Courses in Kinesiology

KIN 100/102/103/104 Physical Education Activities
Badminton, weight training, volleyball, physical fitness, recreational sports, gymnastics, swimming, squash, rock climbing, scuba diving, dance, jogging, racquetball, archery, tennis, handball, golf, cycling, and ballroom dancing investigated in depth through history, rules, strategy, development of playing skill, and physical conditioning. No course may be taken more than once. (0.2 course credit per activity)
KIN 105 Foundations of Physical Movement
The foundations, historical development, professional qualification, and opportunities in the field of physical education. Movement education theory is studied as it applies to all grade levels along with the study of growth, maturation, physical activity and performance in young adolescents.
KIN 110 Emergency Life Skills
Incorporates the latest principles of emergency care in order to become effective initial responders. Broader discussion will focus on the efficacy of Good Samaritan laws, while at the same time addressing current changes to society as it relates to these laws. In addition, this course will prepare students to recognize and care for a variety of first aid emergencies such as burns, cuts, scrapes, sudden illnesses, head, neck, back injuries, heat and cold emergencies. Students will gain both the competency and proficiencies associated with learning how to respond to breathing and cardiac emergencies. Successful students will receive a certificate for Adult First Aid/CPR/AED. (0.5 credit)
KIN 111 Phys Educ for Elementary Teacher
Emphasizes a survey of modern health and physical education practice in school and community, and the development of exercise in the elementary school through singing games and rhythms, folk and square dancing, games, and sports. (0.5 course credit)
KIN 112 Health Educ for Elementary Teacher
Surveys health-related issues that directly affect the lives of young children. Topics include health, fitness, substance abuse, and physical and mental insult. Students learn to identify and respond to children who have been placed at risk. (0.5 course credit)
KIN 115 Fundamentals:Exercise & Nutrition
Study and evaluation of existing health patterns, which are tested to elicit positive behavior changes. Principles of exercise physiology and fitness, weight control and human nutrition, and problems associated with malnutrition and overnutrition are included to provide students with concepts for an enhanced lifestyle.
KIN 125 Public and Consumer Health
Philosophy and practice of public and community health, including economic, sociological, and legal justification. Examination of health care products, services and consumer protection vehicles in today's marketplace. Information and guidelines enable individuals to select health care products and services intelligently.
KIN 135 Concepts of Individual Wellness
Examination of personal health and positive lifestyle through the enhancement of physical, social, and mental/emotional wellness.
KIN 165 Master Activity Class for Teachers
Covers all phases of the teaching methodology. This class assesses the skill acquisition of the learner. Students

model instructional procedure. After introduction of the activity or skill, students pre-test, teach, and assess each other in the activity or skill. Activities and skills include the following: Soccer/ Football/Volleyball, Basketball/ Softball/Track and Field, Racquet Activities, Strength Conditioning/Fitness, Cycling/Bowling/Archery, Dance/Rhythms, and Aquatic Activities.

KIN 185 Group Exercise

Explores the up-to-date, ever-changing, group aerobic activities available in the 21st century. Students discover the advantages and disadvantages, background, physical benefits, and techniques of performing a variety of group aerobic activities. Prerequisite: Foundations of Physical Movement (KIN-105). (0.5 course credit)

KIN 201 Fundamentals of Coaching

Addresses the structure and function of the human body in relation to physical activity, theory and techniques of coaching interscholastic athletics. Topics include professional ethics and legal aspects of coaching as well as the study of human growth and development of children.

KIN 202 Family Life Education

Examines family life and human relationships through the practice of equipping and empowering family members to develop knowledge and skills that enhance well-being. The course will examine human sexuality from a biological, psychological, and social perspective. Topics not limited to reproduction, development, communication and expression will be examined across the lifespan. Perspectives include diversity, variations from the majority, and the influence of gender, race, class, religion, sexual orientation, abilities, age, and culture on sexuality and sexual expression. Topics will also include the understanding of families by using the application of family theory and current research in order to understand family dynamics.

KIN 205 Theory of Coaching

Sports treated from the standpoint of theory and practice. Topics vary from term to term and include, but are not limited to, football, basketball, baseball and softball, wrestling, track, swimming, and volleyball. May be taken more than once for credit, provided the topics are substantially different. (0.5 course credit)

KIN 215 Psychology of Sport and Exercise

An introduction to sport and exercise psychology, emphasizing the psychological and psychophysiological factors that influence performance in sports and physical activity. Key topics include motivation, goal setting, self-talk, mental imagery, anxiety & stress management, self-confidence, focus and concentration, communication skills, sportsmanship, and mental preparation strategies to optimize performance and training outcomes.

KIN 220 Food Science

Examines the intersection between culture, health, and innovation. By understanding the composition of foods, we can determine the best methods for their preparation, and how different cooking and preservation techniques affect food quality, safety, and nutritional value. Students will explore food categories, such as the role of lactose and casein in dairy, and the science behind various preparation methods. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Declared Major in Kinesiology, with a Concentration in Nutrition, and KIN-115 Fundamentals of Exercise & Nutrition

KIN 225 Motor Learning

Designed to acquaint students with research findings, empirical evidence, and theoretical constructs regarding the learning and teaching of motor skills. Emphasis placed upon the state of the learner, the learning process, and the conditions for learning. Prerequisite: sophomore standing.

KIN 255 Substance Use, Misuse, & Addiction

Effects of drugs on the brain and body, patterns of use and misuse, problems and risks associated with substance use, relevant laws and regulations, and evidence-based prevention, treatment, and recovery education approaches are examined.

KIN 275 Prevention & Care of Athletic Injur

Principles of human biology, hygienic applications to the care of the body, and the effects of alcohol and substance abuse. Also covered is the nature of injuries frequently sustained in athletic participants and the control, handling, and care of injuries.

KIN 310 Athletic Injury Evaluation
Introduces students to the procedures used in the examination of injuries involving both the upper and lower extremity. This course will develop a student's systematic ability to identify, evaluate, and monitor commonly experienced orthopedic injuries in athletics. Investigation into surface palpation, goniometry, manual muscle, and special testing will be developed. Prerequisite: Prevention and Care of Athletic Injuries & Laboratory (KIN-275).
KIN 315 Methods Elementary Sch PE & Health
Analysis of the program of physical education and health for the elementary school. Selection of activities, teaching methods, program planning, equipment and facilities, class management, and evaluation is examined. Prerequisite: Practicum in Education (WE) (EDU-215) or consent of department chair.
KIN 325 Food Economics
Examines the inequalities in our global food system that are often mirrored through the broader disparities in society. By understanding these systems, we can bring about transformative change. This course investigates the essentials: preventing foodborne illnesses, mastering procurement, and ensuring production quality. Students will learn real-world calculations behind food costs and discover how food systems can save lives. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Declared Major in Kinesiology, with a Concentration in Nutrition, and KIN-115 Fundamentals of Exercise & Nutrition
KIN 330 Lifecycle Nutrition I
Explores how early nutrition choices, like breastfeeding or formula feeding, impact a child's development milestones and potential food allergies. As children grow, this course will examine how dietary needs and relationships with food evolve, especially during adolescence. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Prerequisites: Declared Major in Kinesiology, with a Concentration in Nutrition, and KIN-115 Fundamentals of Exercise & Nutrition
KIN 347 Adapted Physical Education
A program of activities adapted for individuals with physical disabilities. Development of a rehabilitative exercise program for correction of physical handicaps or deviations.
KIN 365 Exercise Measurement/Eval&Prescript
Study of methods for measuring and evaluating motor skills, athletic performance, and physical fitness. Emphasis on designing and implementing skill and fitness assessments, following proper testing procedures, and applying basic statistics to interpret results. Key topics include assessment of strength, endurance, flexibility, and other fitness components followed by development of individualized training programs to enhance performance and overall physical conditioning.
KIN 385 Methods Strength Trng & Condition
Application of resistance and movement training techniques. Topics include methods of teaching progressions for resistance training, flexibility, speed/agility training, stretching, plyometrics, safety, successful routines, and exercise prescription for beginning to advanced trainees. Prerequisites: Organismal and Ecological Biology (BIO-155), either Human Anatomy (BIO-215) or Anatomy and Physiology (BIO-103), and junior standing. NOTE: Students are encouraged to complete Advanced Weight Training (PE-103/-104) and Movement Training (PE-103/-104) before enrolling in KIN-385.
NOTE: *Students are encouraged to complete Advanced Weight Training (KIN-103/-104) and Movement Training (KIN-103/-104) before enrolling in KIN-385.*
KIN 405 Program Design
A theory-based course that discusses different strength and conditioning techniques used to program workouts for students, athletes, and members of the community. The course examines physiological factors, such as volume, intensity, rest, frequency, duration, and the acute and chronic effects of exercise. Students design and evaluate their own strength and conditioning programs based on the needs of the individual. Prerequisite: Methods of Teaching

Strength Training and Conditioning (KIN-385).

KIN 410 Athletic Injury Treatment & Rehab

Introduces various forms of individualized exercise and rehabilitation programs used in an athletic injury setting. Didactic and laboratory components provide the background and practical application of the principles and techniques related to the rehabilitation of injuries. Students will be able to identify signs and symptoms of the healing process, describe the indications and contraindications of treatment, and instruct patients on proper technique and execution of rehabilitation exercises. Surgical and non-surgical orthopedic injury rehabilitation protocols discussed with a special emphasis given to progressions back to sport. Prerequisite: Prevention and Care of Athletic Injuries & Laboratory (KIN-275) & Kinesiology (KIN-495).

KIN 415 Methods of Secondary Schl PE & Hlth

Analysis of the program of physical education for the secondary schools. Selection of activities, teaching methods, program planning, equipment and facilities, class management, and evaluation. Includes 30-hour field experience. Prerequisite: Practicum in Education (WE) (EDU-215) or consent of department chair.

KIN 430 Lifecycle Nutrition II

Explores how early adulthood sets foundational food choices, and middle adulthood introduces complexities with work, family, and the onset of chronic diseases. In addition, this course will explore the challenges faced in geriatric nutrition, including the impacts of polypharmacy. Throughout, a recurring theme will be weight management, emphasizing its role in promoting sustained health and activity. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Declared Major in Kinesiology, with a Concentration in Nutrition, and KIN-115 Fundamentals of Exercise & Nutrition, and KIN-330 Lifecycle Nutrition I

KIN 435 Medical Nutrition Therapy

Examines how medical and social histories play a crucial role in accurate nutrition diagnoses. The course studies various counseling techniques and introduces therapeutic diets tailored to address specific health challenges. Emphasizing the importance of monitoring and evaluating outcomes, this course prepares students for effective and informed interventions. This course is offered online through a consortium of accredited colleges and universities. Instruction is provided by faculty employed by partner institutions within the consortium, with technology and administrative support provided by Rize Education. Oversight of courses offered through Coe College and receive academic credit from Coe College. Prerequisites: Declared Major in Kinesiology, with a Concentration in Nutrition, and KIN-115 Fundamentals of Exercise & Nutrition, and KIN-330 Lifecycle Nutrition I, and KIN-430 Lifecycle Nutrition II.

KIN 440 Org-Admin of PE, Health & Athl

Objectives, principles, and methods of organization and administration of physical education, health education, recreation, and athletics in elementary and secondary schools, as well as colleges. Prerequisite: sophomore standing.

KIN 442 Physiology of Exercise

The study and evaluation of the effects of exercise upon the biological control systems of the human body. Topics include bioenergetics, exercise metabolism, endocrine function during and cardiopulmonary response to exercise, neuromuscular function, acid-base regulation, temperature regulation, and the effect of endurance training on various organ systems. Prerequisites: Organismal and Ecological Biology (BIO-155), and either both Human Anatomy (BIO-215) and Human Physiology (BIO-225), or Anatomy and Physiology (BIO-103).

KIN 444 Independent Study

Independent investigation of a selected project in Kinesiology under the direction of a faculty member of the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: consent of instructor and department chair.

KIN 494 Internship in Kin, Health & Rec

Investigation of kinesiology, health, or recreation through voluntary field placement supervised by a faculty member of the department. Not available to prospective teachers in physical education. A minimum of 140 hours on-site experience is required. S/U basis only. One credit may be counted toward a major in kinesiology. Prerequisites:

declared major in kinesiology or interdisciplinary major and consent of department chair.
KIN 495 Kinesiology
Application of the principles of structure and mechanics involved in human movement. Prerequisites: Organismal and Ecological Biology (BIO-155), and either both Human Anatomy (BIO-215) and Human Physiology (BIO-225), or Anatomy and Physiology (BIO-103).

13.36 Mathematical Sciences

Cross, Hughes (Chair), Miller, Saha, Stobb, White

The department of mathematical sciences offers a complete range of courses, with majors and minors available in **COMPUTER SCIENCE**, **DATA SCIENCE**, and **MATHEMATICS**, as well as a minor in **APPLIED MATHEMATICS** and courses in statistics for additional breadth. The department adheres to its belief that the mathematical sciences and the habits of mind that they engender are components of a fine liberal arts education.

13.36.1 Mathematics Major

A major in mathematics requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. MTH 135 Calculus I
2. MTH 145 Calculus II
3. MTH 165 Computational Linear Algebra
4. MTH 215 Foundations of Advanced Mathematics
5. MTH 255 Calculus III
6. CS 110 Introduction to Programming
7. **One** Algebra course:
    - MTH 365 Abstract Linear Algebra
    - MTH 385 Modern Algebra I
8. **One** Analysis course:
    - MTH 415 Real Analysis I
    - MTH 445 Complex Analysis
9. **Three** of the following:
    - STA 315 Mathematical Probability
    - STA 325 Mathematical Statistics
    - MTH 305 Advanced Geometry

- MTH 325 Differential Equations WE
- MTH 365 Abstract Linear Algebra
- MTH 385 Modern Algebra I
- MTH 395 Modern Algebra II
- MTH 415 Real Analysis I (if not used to satisfy #8)
- MTH 425 Real Analysis II
- MTH 444 Independent Study
- MTH 445 Complex Analysis (if not used to satisfy #8)
- MTH 455 Mathematical Modeling
- MTH 463 Set Theory & Toplogy
- MTH 484 Special Topics

NOTE: *A course in statistics and a course in geometry are required for the Iowa teaching endorsement in mathematics at either the elementary or secondary school level. Students planning to teach should consult with faculty in the education department.*

13.36.2 Mathematics Minor

Students choosing a minor in Mathematics may not select a minor in Applied Mathematics.

1. MTH 135 Calculus I
2. MTH 145 Calculus II
3. MTH 165 Computational Linear Algebra
4. MTH 215 Foundations of Advanced Mathematics
5. **Two** of the following:
   - STA 315 Mathematical Probability
   - STA 325 Mathematical Statistics
   - MTH 255 Calculus III
   - MTH 305 Advanced Geometry
   - MTH 325 Differential Equations WE

- MTH 365 Abstract Linear Algebra
- MTH 385 Modern Algebra I
- MTH 395 Modern Algebra II
- MTH 415 Real Analysis I
- MTH 425 Real Analysis II
- MTH 444 Independent Study
- MTH 445 Complex Analysis
- MTH 455 Mathematical Modeling
- MTH 463 Set Theory & Toplogy
- MTH 484 Special Topics

13.36.3 Applied Mathematics Minor

Students choosing a minor in Applied Mathematics may not select a minor in Mathematics.

1. MTH 135 Calculus I
2. MTH 145 Calculus II
3. MTH 165 Computational Linear Algebra
4. CS 110 Introduction to Programming
5. **Two** of the following:
   - STA 315 Mathematical Probability
   - STA 325 Mathematical Statistics
   - MTH 255 Calculus III
   - MTH 325 Differential Equations WE
   - MTH 444 Independent Study
   - MTH 445 Complex Analysis
   - MTH 484 Special Topics
   - ECO 375 Econometrics

13.36.4 Courses in Mathematics

MTH 105 Math for Social Justice
An introduction to contemporary mathematical thinking with emphasis on its connections to society. Logical thinking and the ability to read critically are interwoven with elementary mathematical skills. The course concentrates on discussions about mathematics—about its nature, its content, and its applications to a variety of topics, such as management science, network science, finance, data, statistics, probability, fairness, apportionment, voting theory, and social choice. This course is appropriate for a varied audience. This course does not satisfy any of the requirements for a major or minor in the mathematical sciences. Prerequisite: Some ability in arithmetic, geometry, and elementary algebra.

MTH 135 Calculus I
An introduction to the concepts of limits, continuity, differentiation of elementary functions, applications, definite and indefinite integrals, and the Fundamental Theorem. Prerequisite: three years of secondary school mathematics or consent of instructor.

MTH 145 Calculus II
Further study of the techniques of differentiation and integration, the calculus of exponential, logarithmic and trigonometric functions, sequences, series, and applications. Prerequisite: Calculus I (MTH-135) or consent of instructor.

MTH 155 Calculus for Engineers
Introduces fundamental concepts of calculus including limits, derivatives, fundamental theorem of calculus, integration and power series, with a focus on solving engineering problems, including those involving kinematics, mechanics, optimization, moments, work, statics.

MTH 165 Computational Linear Algebra
Explores elementary concepts in linear algebra with applications using a computational approach. Topics include matrix computations, Gaussian elimination, determinants, vector spaces, subspaces, bases and dimension, inner product spaces, orthogonality, least squares, linear transformations, eigenvalues and eigenvectors, and matrix factorizations.

MTH 215 Foundations of Advanced Mathematics
A survey of material common to all advanced study of mathematics, including elements of formal logic, axiomatic set theory, induction, relations, functions, cardinality, and various other topics in discrete mathematics. This course is specifically intended to serve both as a transition to upper-division mathematics courses and also as a survey of some areas of mathematics important for future teachers of mathematics and related fields. Prerequisite: Calculus I (MTH-135) or Computational Linear Algebra (MTH-165) or consent of instructor.

MTH 255 Calculus III
Further study of curves, surfaces, power series, partial derivatives, iterated and multiple integrals, and an introduction to differential and integral vector calculus. Prerequisite: Calculus II (MTH-145) or consent of instructor.

MTH 305 Advanced Geometry
A course designed to give the student an introduction to the modern approaches to geometry at an advanced level. Topics include foundations, Euclidean, projective, and non-Euclidean geometries. Prerequisites: Calculus II (MTH-145) and Foundations of Advanced Math (MTH-215), or consent of instructor.

MTH 325 Differential Equations WE
The theory, solution, techniques, and applications of elementary types of ordinary differential equations. Prerequisite: Calculus II (MTH-145) or consent of instructor.

MTH 365 Abstract Linear Algebra
A proof-based study of concepts of abstract vector spaces, including matrix algebra, subspaces, bases and dimension, inner product spaces, linear transformations, eigenvalues and eigenvectors, and matrix factorizations. Prerequisites: Computational Linear Algebra (MTH-165) and Foundations of Advanced Math (WE) (MTH-215), or consent of instructor.

MTH 385 Modern Algebra I
A rigorous introduction to advanced algebra. Topics include mappings, operations, groups, rings, fields, integral

domains, and homomorphisms. Prerequisite: Computational Linear Algebra (MTH-165) and Foundations of Advanced Math (MTH-215), or consent of instructor.

MTH 395 Modern Algebra II

A continuation of Modern Algebra I (MTH 385), including homomorphisms, permutation groups, symmetry, unique factorization domains, quotient rings, and field extensions. Prerequisite: Modern Algebra I (MTH-385). (Offered on an occasional basis)

MTH 415 Real Analysis I

A rigorous introduction to selected topics in analysis. Topics selected from number systems, Euclidean spaces, metric spaces, limits, continuity, derivatives, and integrals. Prerequisites: Calculus II (MTH-145) and Foundations of Advanced Math (MTH-215).

MTH 425 Real Analysis II

A continuation of Real Analysis I (MTH-415), including a study of such topics as Riemann Stieltjes and Lebesgue integration, series and series expansions. Prerequisite: Real Analysis I (MTH-415). (Offered by arrangement)

MTH 444 Independent Study

An opportunity for independent and intensive study in mathematics. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: appropriate background courses depending on the nature of the work planned and consent of supervising instructor. (Offered by arrangement)

MTH 445 Complex Analysis

An introduction to the theory, techniques, and applications of functions of a complex variable. Topics include elementary and analytic functions, limits, differentiation, integration, series, mappings, and applications. Prerequisite: Calculus III (MTH-255) or consent of instructor.

MTH 454 Research in Mathematics

Individual or group investigation with a mathematics faculty member on a research topic of mutual interest. The student must obtain approval for a specific project and make necessary arrangements prior to the term of registration for the course. This course is offered on a P/NP basis and does not satisfy any of the requirements for a major or minor in mathematics. May be taken more than once for credit for a maximum of 2.0 credits. Prerequisites: Foundations of Advanced Mathematics (WE) (MTH-215) and consent of supervising instructor. (0.0–1.0 credit; Occasional course, offered by arrangement)

MTH 455 Mathematical Modeling

An introduction to the application of mathematical techniques used in the solution of real-world problems. These techniques include interpolation, ordinary differential equations, taylor series expansions, curve fitting, matrix inversion, numerical differentiation, and integration. Prerequisites: Introduction to Programming (CS-125); and Calculus II (MTH-145)

MTH 463 Set Theory & Toplogy

A rigorous introduction to abstract set theory and to metric and topological spaces, including a discussion of such topics as separation, connectedness, and compactness. Prerequisites: Calculus II (MTH-145) and Foundations of Advanced Math (MTH-215), or consent of instructor.

MTH 484 Special Topics

An opportunity to study current and topical material unavailable through the regular catalog offerings. Prerequisites: Calculus II (MTH-145) and Foundations of Advanced Math (MTH-215), or consent of instructor.

MTH 494 Internship in Mathematics

Investigation of a career area related to the student's interest in mathematics supervised by a faculty member of the department in cooperation with the Internship Specialist. A minimum of 140 hours on-site experience is required. S/U basis only. This course does not satisfy any of the requirements for a major or minor in mathematics. Prerequisites: junior standing and consent of supervising instructor. (Offered by arrangement)

13.37 Museum Studies (Minor Only)

Rogers (Administrative Coordinator)

The Museum Studies minor is designed to educate and train students in the basic tenets of museum-related work that is applicable to traditional museums of all kinds (art, cultural, thematic, science, etc.), archaeological sites, auction and appraisal houses, historic homes, historical societies, and commercial galleries.

If pursuing another major or minor in a related discipline (Art, Art History, Business, History, Public Relations), you can only double count two courses.

A Museum Studies minor may also complete an Art major or minor or Art History minor, but only two courses may count toward both the major and the minors.

13.37.1 Museum Studies Minor (MS)

1. MS 101 Intro to Museum Studies

2. MS 105 History of Museums

3. MS 283 Arts Administration

4. **One credit** from the following:
   MS 201 Curating a College Collection (0.5 credit)
   MS 203 Collection Mgmt & Registration (0.5 credit)
   MS 205 Exhibition Planning & Museum Audien (0.5 credit)
   MS 215 Exhibition Installation & Lighting (0.5 credit)
   ART/MS 235 Arts Advocacy (0.5 credit)
   MS 220 Marketing the Museum (0.5 credit)
   MS 225 Archives Care, Mgmt, & Best Practic (0.5 credit)
   MS 395 Topics in Museum Studies (0.5 or 1 credit)

5. **One** of the following:
   AAM 107 Intro to African American Studies
   ANT 116 Cultural Anthropology
   ANT 125 Art & Archaeology Classical World
   Any 100-level ART course
   ARH 106 World Art
   ARH 128 Introduction to Art History
   ARH 307 Modern and Contemporary Art
   BUS 125 Computers in Business
   BUS 250 Principles of Management
   BUS 285 Computer Appl:Adv Top
   BUS 330 Principles of Marketing
   BUS 460 Advertising
   BUS 461 Marketing Decision Making/Analysis
   COM 151 Introduction to New Media Studies
   COM 161 Visual Rhetoric
   COM 231 Communication in Teams (WE)
   COM 322 Prof Communication & Writing (WE)
   COM 327 Organizational Communication (WE)
   COM 377 Language, Power, and Social Change
   DS 100 Introduction to Data Science
   DS 230 Data-Centric Computing
   Any HIS course

IS 116 Intro to International Studies
PR 205 Public Relations

6. MS 494 Museum Studies Internship or ANT 208 Archaeological Field School

13.37.2 Courses in Museum Studies

100-level courses are open to any student and may offer the opportunity to explore two or more areas of art making in a studio environment.

MS 101 Intro to Museum Studies
Highlights the multi-faceted world of museum studies, as well as the numerous careers in museums (of various types), commercial galleries, historic homes and sites, auction houses, archives, and more. Features a series of guest lecturers who work with different entities in the Eastern Iowa area. These experts offer valuable insight to the numerous occupational choices–and their historical contexts–under the category of Museum Studies.
MS 105 History of Museums
Reviews the history of museums. Evidence shows that humans have been collecting objects for millennia, and there are many reasons why, ranging from functional to aesthetic to displaying power, wealth, knowledge, and prestige. The evolution of museums from private collections to public institutions is investigated in depth.
MS 201 Curating a College Collection
Implements the full experience of curatorial work. Students will research Coe's Permanent Art Collection in order to craft an exhibition. They will write exhibition proposals, didactic panels, wall labels, extended wall labels, and more. Prerequisite: MS-101 Introduction to Museum Studies, MS-105 History of Museum Studies, or consent of instructor.MS-201 Curating a College Collection
MS 203 Collection Mgmt & Registration
Introduces the organizational practices of art/museum collections. This includes work with databases as well as the best practices for handling artworks and artifacts, for storage and maintenance, and for preservation of materials. Prerequisite: MS-101 Introduction to Museum Studies, MS-105 History of Museum Studies, or consent of instructor.
MS 205 Exhibition Planning & Museum Audien
Encourages students to design innovative and engaging exhibitions that enhance audience experiences. Using previously-curated exhibition plans, students map gallery installations using a variety of methods, such as traditional two-dimensional layouts, three dimensional models, and digital software. An additional attention is given to audience reception and the research surrounding memory and museum experiences. Prerequisites: two ART- courses (each 1.0 course credit), or MS-101 Introduction to Museum Studies, or MS-105 History of Museum Studies, or consent of instructor. (0.5 course credit)
MS 215 Exhibition Installation & Lighting
Challenges students to actually install an art exhibition. This includes in-depth instruction on mapping, measuring, and physically installing objects in a gallery setting. In addition to lighting design, students also learn various installation techniques for two- and three-dimensional artwork, video and time-based media, and full gallery installations. This is an essential course for anyone pursuing work as a museum preparator. Prerequisites: two ART- courses (each 1.0 course credit), or MS-101 Introduction to Museum Studies, or MS-105 History of Museum Studies, or consent of instructor. (0.5 course credit)
MS 220 Marketing the Museum
Directs students to analyze and implement best practices for museum advertising and public relations. Additionally, students must think about building donor and community relationships. This is an essential course for anyone pursuing work in museum marketing. Prerequisite: MS-101 Introduction to Museum Studies, MS-105 History of Museum Studies, or consent of instructor.
MS 225 Archives Care, Mgmt, & Best Practic
Features in-depth, hands-on training with archival material, in addition to a brief academic history of libraries and

archives. Projects involve work with Coe's own George T. Henry College Archives or a local museum or historical institution. Prerequisite: MS-101 Introduction to Museum Studies, MS-105 History of Museum Studies, or consent of instructor.

MS 235 Arts Advocacy

See also Art (ART-235) Introduces students to arts advocacy, providing tools to cultivate, promote, sustain, and support the arts. Students will develop and implement arts advocacy programming. This course meets weekly for the full term. Prerequisites: two ART- courses (each 1.0 course credit), or MS-101 Introduction to Museum Studies, or MS-105 History of Museum Studies, or consent of instructor. (0.5 course credit)

MS 283 Arts Administration

Implements the skills and guiding principles of managing arts-related organizations, in particular non-profits. Through collaborative efforts, students learn about project development and implementation, focusing on goal-setting initiatives, financial planning, marketing and advertising, viewership and participation, and audience awareness. Current issues and challenges facing nonprofit arts organizations will be addressed as well. Cross listed with MU-283 and THE-283.

MS 395 Topics in Museum Studies

Examines a topic or theme pertaining to the field of museum studies, such the economics of museums and public institutions, deaccessioning and repatriation, technology in the museum, and controversies facing museums today. Depending on the course material and intended assignments, the course can be taken for 0.5 credits or 1 credit. Prerequisite: MS-101 Introduction to Museum Studies, MS-105 History of Museum Studies, or consent of instructor.

MS 494 Museum Studies Internship

Focuses on an area of interest related to the Museum Studies minor. Requires placement within a museum or museum-related area that is approved by a faculty member associated with the minor. A minimum of 140 hours of on-site experience is required. P/NP basis only. Prerequisites: declared Museum Studies minor, junior standing, and consent of program director.

13.38 Music

Carson (Chair, Spring), Lovegood, Shanley (Chair, Fall)

Teaching Artists: Altfillisch, Bishop, Brumwell, Capistran, Farley, Fleer, Hall, Harris, Haselhuhn, Marrs, Morton, Nagel, Nothnagle, Phelps, Reznicow, Rothrock, Terrell, Wissenberg, B. Wolgast, M. Wolgast

All Coe students are encouraged to participate in music as part of their liberal arts education. Choral and instrumental ensembles, private lessons in applied music, and academic courses are open to non-music majors.

The Coe College Music Department Faculty/Student Handbook supplements the descriptions of courses and requirements for music majors and outlines departmental policies and procedures. Copies of the *Handbook* are available in the Music Office, Marquis Hall 103 or online at www.coe.edu/academics/majors-areas-study/music.

13.38.1 Music Major

Candidates for a major in music must successfully complete:

1. MU 101 Music Fundamentals I
2. MU 107 American Music
3. MU 166 Music of the World
4. MU 201 Music Fundamentals II

5. MU 384 Conducting I

6. 4.5 credits of MUA- lessons or ensembles

7. **One** additional credit in MU- coursework, numbered 300-level or above

8. Students seeking music education licensure must also complete the Secondary Education Minor as listed on p. 119 (MU- courses may be used to satisfy #7)

9. The Senior Assessment Examination in the final term prior to graduation

13.38.1.1 Jazz Emphasis

Students completing a music degree may choose to supplement their music major with an Emphasis in Jazz. Concurrent completion of a major in music is required. A minimum of 6.3 course credits must be taken that do not count toward a major in music.

1. MU 157 Introduction to Jazz History **or** MU 157 Introduction to Jazz History

2. MU 301 Music Fundamentals III

3. **Seven** terms of MUA 101 Jazz Band

4. **Two** terms of MUA 102K Piano Arranging Lessons

5. **Two** terms of MUA 103K Piano: Jazz

6. AAM 107 Intro to African American Studies

13.38.1.2 Music Industry Emphasis

Students completing a music degree may choose to supplement their music major with an Emphasis in Music Industry. Concurrent completion of a major in music is required. A minimum of 6.5 course credits must be taken in addition to those that count toward a major in music.

1. A minimum of **One credit** earned in:

   - MUA 111C Music Production and Engineering
     or
   - MUA 222C Music Production and Engineering

2. MU 283 Arts Administration

3. **One** of the following:

   - COM 231 Communication in Teams (WE)
   - COM 322 Prof Communication & Writing (WE)

- COM 327 Organizational Communication (WE)
- PR 205 Public Relations

4. **One** of the following:
   - BUS 250 Principles of Management
   - BUS 330 Principles of Marketing
5. A music industry-related internship or independent study

13.38.1.3 Pre-Music Therapy Emphasis

Students completing a music degree may choose to supplement their music major with an Emphasis in Pre-Music Therapy. Concurrent completion of a major in music is required.

The Pre-Music Therapy Emphasis is designed to prepare students to apply to a Music Therapy certification program. It is not a free-standing major, and it does not include music therapy courses. Rather, the courses listed below are intended to better prepare music students for future study in Music Therapy at an academic program approved by the American Music Therapy Association. Students must complete all requirements for a Bachelor of Arts in Music, in addition to the courses listed below. These include 5 non-music course credits and 2 additional music course credits for a minimum total of 7 course credits that must be taken in addition to those that count toward a major in music.

Courses taken to satisfy requirements in the Bachelor of Arts in Music may NOT also be used to satisfy the requirements of the Pre-Music Therapy Emphasis below, but all courses MAY be used towards General Education requirements.

1. PSY 100 Introductory Psychology
2. BIO 103 Anatomy & Physiology
3. BIO 100 Human Biology
4. **One** of the following:
   - EDU 117 Exceptional Learners
   - EDU 187 Human Relations
   - PSY 235 Abnormal Psychology
   - PSY 270 Learning and Behavior
5. **One** of the following:
   - THE 100 Introduction to Theatre
   - THE 150 Acting I

- THE 160 Movement for the Stage
- THE 170 Voice & Diction
- THE 270 Musical Theatre Acting

6. **Two** credits (or more) from the following:
   - MU 301 Music Fundamentals III
   - Additional terms of ensemble participation, beyond those required for the Bachelor of Arts in Music:
     - Concert Band (0.3 each), Jazz Band (0.3 each), Concert Choir (0.3 each), Coe Sho Cho (0.3 each), or Crimson Singers (0.3 each)
   - Additional terms of lessons, beyond those required for the music major

Strongly recommended:

- MU 108 Queerness in Music
- MU 385 Conducting II
- Additional music performance courses (ensembles and lessons)
- Additional theatre, art, biology, business, education, psychology, sociology, and statistics courses
- Fulfill the academic practicum requirement with a music therapy-related internship

13.38.2 Music Minor

The minor in music consists of six course credits in music. At least two of these credits must be MU courses.

13.38.3 Departmental Notes

- Private music lessons are available for credit only. Coe students are charged by term according to the total registered lesson credit. Students who have not attended three lessons by the end of the third week of classes are dropped from music lessons and may be reinstated only by petition. After the third week of lessons, students will be charged for the full term, even if they choose to drop.
- Students who register for 0.3 cc (100-level) lessons will receive 12 half-hour private lessons. Students who register for 0.6 cc (200-level) will receive 12 one-hour private lessons.

13.38.4 APPLIED MUSIC CLASSES

Artist teachers in violin, viola, cello, string and electric bass, piano, piano accompanying*, harpsichord*, organ*, flute, oboe, clarinet, saxophone, bassoon, trumpet, horn, trombone, low brass, percussion, guitar, harp, composition*, music production and engineering, and voice are available to all students who wish to study applied music.

*Prerequisite: proficiency in piano and consent of instructor.

Credit for applied music study is granted after the student has satisfactorily passed an examination by a faculty committee (jury exam) at the close of each term.

13.38.4.1 APPLIED BRASSES–LESSONS

- MUA 101B Trumpet
- MUA 202B Trumpet
- MUA 111B French Horn
- MUA 212B French Horn
- MUA 121B Trombone
- MUA 222B Trombone
- MUA 131B Low Brass
- MUA 232B Low Brass

13.38.4.2 APPLIED COMPOSITION–LESSONS

- MUA 101C Composition
- MUA 111C Music Production and Engineering
- MUA 202C Composition
- MUA 222C Music Production and Engineering

13.38.4.3 APPLIED KEYBOARD–LESSONS

- MUA 101K Piano Lessons
- MUA 102K Piano Arranging Lessons
- MUA 103K Piano: Jazz
- MUA 202K Piano Lessons
- MUA 304K Piano Accompanying
- MUA 111K Organ
- MUA 212K Organ

- MUA 121K Harpsichord Lessons
- MUA 222K Harpsichord Lessons

13.38.4.4 APPLIED PERCUSSION–LESSONS

- MUA 101P Percussion
- MUA 202P Percussion

13.38.4.5 APPLIED STRINGS–LESSONS

- MUA 101S Violin
- MUA 202S Violin
- MUA 111S Viola
- MUA 212S Viola
- MUA 121S Cello
- MUA 222S Cello
- MUA 131S String Bass
- MUA 232S String Bass
- MUA 141S Harp
- MUA 242S Harp
- MUA 151S Guitar
- MUA 252S Guitar

13.38.4.6 APPLIED VOICE–LESSONS

- MUA 101V Voice
- MUA 202V Voice
- MUA 300A Alexander Technique

13.38.4.7 APPLIED WOODWINDS–LESSONS

- MUA 101W Flute
- MUA 202W Flute
- MUA 111W Oboe
- MUA 212W Oboe
- MUA 121W Clarinet
- MUA 222W Clarinet
- MUA 131W Saxophone
- MUA 232W Saxophone
- MUA 141W Bassoon
- MUA 242W Bassoon

13.38.5 COURSES IN MUSIC BY CATEGORY

13.38.5.1 ENSEMBLES

Ensembles are open, by audition, to all Coe students, as well as being required of all students pursuing a degree in music. Students are encouraged to participate in these ensembles as often as possible.

- MUA 100 Concert Band
- MUA 101 Jazz Band
- MUA 104 Concert Choir
- MUA 105 Crimson Singers
- MUA 110 Coe Sho Cho
- MUA 284 Applied Music: Special Topics
  Coe College musicians seeking an orchestral experience are encouraged to participate in the Cedar Rapids Community Orchestra at Kirkwood Community College. Please contact the music office (319-399-8520) for more information about how to earn credit for your participation.

13.38.5.2 GENERAL SURVEY COURSES

- MU 101 Music Fundamentals I

- MU 107 American Music
- MU 108 Queerness in Music
- MU 117 Jazz: The Early Years
- MU 140 Film Music
- MU 157 Introduction to Jazz History
- MU 166 Music of the World
- MU 201 Music Fundamentals II
- MU 283 Arts Administration
- MU 284 Topics in Music

13.38.5.3 THEORY COURSES

- MU 101 Music Fundamentals I
- MU 201 Music Fundamentals II
- MU 301 Music Fundamentals III

13.38.5.4 CONDUCTING COURSES

- MU 384 Conducting I
- MU 385 Conducting II

13.38.5.5 HISTORY COURSES

- MU 107 American Music
- MU 108 Queerness in Music
- MU 117 Jazz: The Early Years
- MU 140 Film Music
- MU 157 Introduction to Jazz History
- MU 166 Music of the World

13.38.5.6 MUSIC EDUCATION COURSES

- MU 360 Elementary & General Music Methods
- MU 361 Choral Music Methods
- MU 363 Instrumental Music Methods

13.38.5.7 ADVANCED STUDY IN MUSIC

- MUA 490 Senior Recital
- MU 444 Independent Study

13.38.6 Courses in Music

MU Prefix

MU 101 Music Fundamentals I
Introduces the materials of music and an understanding of the musical system: melody, harmony, notation, songwriting, arranging, aural skills, and technology.
MU 107 American Music
Examines the diversity of American music ranging from Rock 'n' Roll and Hip Hop to Classical, Jazz, Avant-Garde, and Musical Theatre. Societal influences on American music, including issues of race, gender, and religious prejudice, will be explored within a historical framework.
MU 108 Queerness in Music
MU-108 Queerness in Music: A History Examines queer musical artists throughout history; both those who lived authentic and queer lifestyles, and those who struggled with identity, challenged by society, and closeted at various times of their lives. The course will explore music ranging from classical to vaudeville, from early blues and Jazz Age to present day. Recordings, videos, and discussions will illuminate the historical context of modern-day drag, the stories behind songs, and the influence these songs had over time. Issues related to masculinity, femininity, gender fluidity, cross-dressing, homosexuality, love, race, religion will be addressed.
MU 117 Jazz: The Early Years
Combines an on-campus experience with visits to Memphis, New Orleans, and Nashville. The visit to New Orleans, the birthplace of jazz, introduces students to the early history of one of America's greatest contributions to the world of music. Seeing New Orleans in person helps students understand the geographical, political, and societal influences that shaped the early history of Jazz. Students also visit Beale Street in Memphis and the National Museum of African American Music in Nashville to develop an understanding of the music that preceded and followed New Orleans jazz. Listening to live music is emphasized. Offered May Experiential Term only.
MU 140 Film Music
An introduction to the history, principles, and techniques of music in film. In addition to lecture, film viewing and analysis, critical reading and response, student presentation, and short film-music projects elucidate the genre.
MU 157 Introduction to Jazz History
Surveys many styles of jazz by studying them in a historical perspective. Listening, discussion, and lecture components are emphasized. (Offered May Term only)
MU 166 Music of the World
MU-166 Music of the World Surveys the music of the world, ranging from Classical and Art Music to Traditional and Popular musics of other nationalities and cultures. Emphasis is on examining these musics in their social, cultural, and historical contexts.

MU 201 Music Fundamentals II
MU-201 Music Fundamentals II Studies materials of music and the musical system, building on the concepts developed in Music Fundamentals I: melody, harmony, rhythm, notation, songwriting, arranging, aural skills, and technology. Prerequisite: Music Fundamentals I or consent of instructor. Prerequisite: Music Fundamentals I or consent of instructor.

MU 283 Arts Administration
Implements the skills and guiding principles of managing arts-related organizations, in particular non-profits. Through collaborative efforts, students learn about project development and implementation, focusing on goal-setting initiatives, financial planning, marketing and advertising, viewership and participation, and audience awareness. Current issues and challenges facing nonprofit arts organizations will be addressed as well. Cross listed with MS-283 and THE-283.

MU 284 Topics in Music
Centers on a particular musical issue, problem, theory, or methodology. Topics vary, and they include, but are not limited to, Advanced Form and Analysis, Rock and Roll History, Music of the 1960s, and Modern Musical Theatre. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: consent of instructor. (Offered on an occasional basis)

MU 301 Music Fundamentals III
MU-301 Music Fundamentals III Continues the advanced study of the materials of music and the musical system: melody, harmony, rhythm, notation, songwriting, arranging, aural skills, and technology. Prerequisite: Music Fundamentals II or consent of instructor.

MU 360 Elementary & General Music Methods
Objectives, problems, and methods of teaching elementary music and general music in the schools. Course surveys elementary and general music curricula and develops a functional knowledge of: organization and management; fretted and classroom instruments; methods of teaching singing, rhythmic, and listening activities expected. Directed observation in elementary schools required. Pre-or co-requisite: Practicum in Education (EDU-215) or consent of Music Department Chair.

MU 361 Choral Music Methods
Objectives, problems, and methods of teaching choral music in the schools. General survey of elementary and secondary choral music curricula and develops a functional knowledge of: organization and management; the changing voice; beginning, intermediate, and advanced choral techniques. Directed observation in elementary and secondary schools required. Prerequisite: Practicum in Education (EDU-215)

MU 363 Instrumental Music Methods
Objectives, problems, and methods of teaching instrumental music in the schools. General survey of elementary and secondary instrumental music curricula and develops a functional knowledge of: organization and management; concert band and orchestral techniques; jazz band techniques; marching band techniques; beginning, intermediate, and advanced band and orchestral techniques. Directed observation in elementary and secondary schools required. Prerequisite: Practicum in Education (EDU-215).

MU 384 Conducting I
Basic conducting techniques: reading, analysis, and interpretation of choral, band, and orchestral literature. Laboratory experience with college ensembles.

MU 385 Conducting II
Continuation of Conducting I. Prerequisite: Conducting I (MU-384).

MU 444 Independent Study
Independent work on a selected project in music under the direction of a faculty member of the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: background courses and consent of department chair.

MUA Prefix

MUA 100 Concert Band
Open to all woodwind, brass, and percussion players. The ensemble offers students the opportunity to perform

some of the great band repertoire of the 20th and 21st centuries, as well as carefully selected transcriptions of orchestral repertoire. A select Wind Ensemble within the Concert Band occasionally performs additional selections from the contemporary repertoire. The Concert Band tours on a regular basis. (0.3 course credit)

MUA 101 Jazz Band

MUA-101 Jazz Band

Membership determined by an audition of interested saxophone, trombone, trumpet, piano, bass, guitar, drum set, and auxiliary percussion players. The ensemble offers students the opportunity to perform varied selections from the jazz repertoire of the 20th and 21st centuries, as well as the opportunity to improvise in the jazz idiom. The Jazz Band tours on a regular basis and performs with three to five guest artists each year. (0.3 course credit)

MUA 104 Concert Choir

Performs a wide variety of repertoire covering many styles from the Renaissance through the 21st centuries, in a large, auditioned, mixed ensemble. The Concert Choir also performs on and off campus, in both formal and informal concert settings and tours on a regular basis. (0.3 course credit)

MUA 105 Crimson Singers

Performs a wide variety of repertoire from the Renaissance through the 21st centuries in a small auditioned, mixed singing ensemble. Crimson Singers performs on and off campus, in both formal and informal concert settings and tours on a regular basis. (0.3 course credit)

MUA 110 Coe Sho Cho

Provides an opportunity, through rehearsal and performance, to experience the combination of popular, musical theater, contemporary a cappella and jazz choral literature, as well as choreography, in a medium-sized mixed ensemble. Membership is determined by audition. While previous show choir experience is preferable, it is not required. Students in Coe Sho Cho are also encouraged to enroll in the Concert Choir. Coe Sho Cho performs on and off campus, in both formal and informal concert settings and tours on a regular basis. (0.3 course credit)

MUA 130V MusicalTheatreProductionExperience

Practical involvement in a mainstage production of a musical as a vocal or instrumental performer, accompanist, or vocal coach stage manager, assistant director, dramaturge, or in another capacity as approved by the faculty. May be taken more than once. Prerequisite: an audition. (0.5 course credit)

MUA 284 Applied Music: Special Topics

Private study in Applied Music topics not offered in MUA course listings for music majors or other interested and qualified students. The course provides extended, yet tangible, instruction and/or research pertaining to the student's specific applied music specialty or related music interest area. Prerequisites: consent of instructor and department chair. (0.3 and 0.6 course credit)

MUA 490 Senior Recital

A full-length senior recital in composition or performance area. P/NP basis only. Prerequisite: consent of instructor.

13.39 Neuroscience (Collateral Major)

Storer (Administrative Coordinator)

Concurrent completion of a primary major in biology, chemistry, or psychology is required. A minimum of six course credits must be taken that do not count toward the student's primary major.

13.39.1 Collateral Major in Neuroscience

1. BIO 145/145L Cellular and Molecular Biology and Laboratory (WE)

2. BIO 155/155L Organismal and Ecological Biology and Laboratory (WE)

3. BIO 375/375L Integrated Human Physiology and Laboratory ***OR*** BIO 355/355L Animal Physiology and Laboratory

4. CHM 121/121L General Chemistry I and Laboratory

5. CHM 122/122L General Chemistry II and Laboratory

6. PSY 100 Introductory Psychology

7. PSY 250 Biopsychology

8. PSY 350 Drugs & Behavior

9. PSY 450 Behavioral Neuroscience

10. **Four** courses chosen from the lists below. Unless explicitly listed, associated laboratories are recommended, but not required.

    a. Biology
    - BIO 202 Topics in Evolution
    - BIO 215 Human Anatomy ***OR*** BIO 315 Integrated Human Anatomy
    - BIO 235 Genetics
    - BIO 285/285L Animal Behavior and Lab
    - BIO 345/345L Techniques in Molecular Biology and Laboratory
    - BIO 415 Developmental Biology
    - BIO 435 Cell Physiology
    - BIO 455/455L Molecular Neurobiology and Laboratory

    b. Chemistry
    - CHM 211/211L Analytical Chemistry and Laboratory (WE)
    - CHM 221 Organic Chemistry I
    - CHM 321 Organic Chemistry II
    - CHM 421 Advanced Organic Chemistry
    - CHM 431/431L Biochemistry and Laboratory
    - CHM 432 Protein Biochemistry

    c. Psychology
    - PSY 205 Developmental Psychology

- PSY 235 Abnormal Psychology
- PSY 270 Learning and Behavior
- PSY 335/335L Sensation and Perception and Laboratory (WE)
- PSY 454 Directed Research Experience (when research topic is appropriate, as determined by the neuroscience administrative coordinator)
- PSY 464 Seminar in Psychology (when seminar topic is appropriate, as determined by the neuroscience administrative coordinator)

13.40 Nursing

Crockett, Crook-Lockwood, Mulford, Siems (Chair)

A description of policies unique to the nursing department is in the Nursing Student Handbook. Copies of the handbook are available in the Nursing Department Office, Stuart Hall 415, and online.

13.40.1 The Bachelor of Science in Nursing Program

The baccalaureate nursing program is designed to prepare students for practice as professional nurses in a variety of settings. The upper division nursing courses draw upon broad and diverse knowledge gained from the liberal arts foundation to support the educational outcomes.

Clinical experiences in the program include working with clients across the age span in a wide spectrum of practice sites. Nurse preceptors are utilized at clinical sites to provide the maximum amount of individual supervision and educational opportunity to students. Coe College nursing faculty provide clinical expertise and education by overseeing student clinical experiences, evaluating and promoting preceptor performance, and engaging in ongoing dialogue with students regarding the application of theory into practice.

Graduates of the Bachelor of Science in Nursing degree program are eligible to take the state board licensing examination for Registered Nurses. The baccalaureate degree program in nursing at Coe College is accredited by the Commission on Collegiate Nursing Education (http://www.ccneaccreditation.org) and is approved by the Iowa Board of Nursing.

Coe College offers two paths to enter the nursing program. Standard entry is for sophomore level (or higher) college students and direct entry is for selected high school seniors. Details for both plans are found in the Nursing Student Handbook. Transfer students will be considered and advised on an individual basis. Prior to admission to the nursing program, all students must earn a cumulative GPA of at least a 2.70. Additionally, students must possess a valid Licensed Practice Nurse (LPN) license or proof of valid Certified Nursing Assistant (CNA) certification or equivalent. A clinical component may not be taken by a person: a) who had been denied licensure by the State Board of Nursing, b) whose licensure is currently suspended, surrendered or revoked in any United States jurisdiction, c) whose licensure/registration is currently suspended, surrendered or revoked in another country due to disciplinary action. Students are required to complete a criminal background check prior to program entry. Students should self-disclose offenses, as applicable, prior to starting the nursing program and while enrolled in the program. Mandatory Clinical Information (MCI) must be submitted and approved prior to starting the nursing program; more information is available in the Nursing Student Handbook.

The nursing department Admission, Promotion, and Retention committee reviews applications and selects and admits candidates who are best qualified to meet the standards of the nursing profession. Admission to the

BSN degree program is competitive. Standard and direct entry students are expected to maintain the eligibility requirements as outlined in the Nursing Student Handbook.

Nursing students have additional fees while enrolled in the nursing program. More information is available in the Comprehensive Fees list on the Coe website.

13.40.2 Departmental Notes:

In order to successfully complete a course and be promoted to successive courses, students must:

- Achieve a minimum grade of C (2.0) in all nursing courses; a grade of C- (1.7) or lower requires the student to repeat the course
- Achieve a cumulative average of 72% on all exams in a given course

Candidates for the **Bachelor of Science in Nursing** degree must satisfactorily complete:

1. The general education requirements
2. **Eight** required supporting courses:
   - Biology
     - BIO 100 Human Biology ***OR*** BIO 145 Cellular & Molecular Biology (Nursing students are not required to take the lab associated with either BIO-100 or BIO-145)
     - BIO 195/195L Introduction to Microbiology and Laboratory
     - BIO 215/215L Human Anatomy and Laboratory
     - BIO 225 Human Physiology
   - Chemistry
     - CHM 111/111L Introduction to Organic and Biological Chemistry and Laboratory
   - Psychology
     - PSY 100 Introductory Psychology
   - Sociology
     - SOC 107 Introductory Sociology
   - Statistics
     - PSY 300 Stat Methods and Data Analysis ***OR***
     - STA 100 Statistical Reasoning I-Foundations **and** STA 110 Stats IIA: Inferential Reasoning
3. NUR 100 Nursing Issues (0.2 course credit) (Pre-nursing students must enroll each term of the first year.) Course graded P/NP and students must receive a P to be considered for admission to the nursing program. This course may be waived for transfer students, late nursing major declaration, or early entry nursing admission.)

4. NUR 200 Nursing Issues II (0.2 course credit) (Pre-nursing students must enroll each term of the sophomore year.) This course may be waived for transfer students. Course graded P/NP and students must receive a P to be considered for admission to the nursing program. This course may be waived for transfer students, late nursing major declaration, or early entry nursing admission.

5. **Nine** non-clinical theory course credits:

   - NUR 300 Art & Science of Nursing
   - NUR 305 Information Literacy & Management
   - NUR 315/315L/315C Pathophysiology and Assessment
   - NUR 345 Mental Health Nursing
   - NUR 355/355L/355C Introductory Concepts in Nursing
   - NUR 360 Pharmacological Principles
   - NUR 375 Legal & Ethical Issues in Nursing
   - NUR 415/415L/415C Advanced Concepts in Nursing
   - NUR 425 Nursing Research
   - NUR 430 Community & Population Oriented Nur
   - NUR 431 Wellness in Aging & Chronicity
   - NUR 455/455C Leadership and Contemporary Issues in Nursing (WE)
   - NUR 495 Maternal Newborn Nursing

6. Complete all required supporting courses and nursing courses with no one specific course repeated more than once and with no more than two different courses repeated due to earning less than a C. This rule applies to courses taken at Coe and other institutions. Actual grades from transferring courses are required to make an admittance determination.

The Nursing Department implements standardized assessment tests throughout the nursing program to assist in preparing students for the NCLEX-RN licensure exam. Additional details will be provided in the affected course syllabi.

Prior to graduation, students will complete a review course for the NCLEX-RN licensure exam arranged by nursing department faculty and will complete the Comprehensive ATI Predictor Exam. More information on this can be found within the Nursing Student Handbook.

13.40.3 Courses in Nursing

NUR 100 Nursing Issues
An introduction to the nursing degree program. The seminar provides an opportunity for pre-nursing students to

interact with nursing students and faculty to explore the process of becoming a nurse. Topics include professional role development and current issues in clinical nursing practice. Pre-nursing students must enroll each term. May be taken more than once for credit for a maximum of 0.4 credit. Prerequisite: first-year student. (0.2 course credit)

NUR 137 Human Sexuality

See also PSY 137 Human Sexuality , Section 13.44

See also Psychology (PSY-137), Examines human sexuality from the psychosocial, biophysiological, and cultural perspective. Topics include, but are not limited to, cultural and historical influences on our current understanding and attitudes toward the human sexual experience; the development of gender roles as they impact upon political, work, and social relationships; cultural aspects of sexuality including intimacy, courtship, marriage, and procreation; and sexuality during developmental changes and alterations in health such as infertility, pregnancy, abortion, cancer, AIDS, and others. Prerequisite: sophomore standing.

NUR 200 Nursing Issues II

An introduction to the nursing profession. The seminar provides an opportunity for pre-nursing students to explore the profession of nursing through discussions regarding the domains of nursing knowledge, nursing roles, and nursing skills. May be taken more than once for credit for a maximum of 0.4 credit. Prerequisite: Nursing Issues (NUR-100) or sophomore standing. (0.2 course credit)

NUR 215 Devel Relationship

Investigates theories for successful relationships. The emphasis is on self learning and application of principles involved in healthy and dysfunctional relationships. The students critically review popular literature versus scientific research related to relationship theory. Prerequisite: sophomore standing.

NUR 268 Cult Diver & Health

A study of the health practices of diverse cultures within the United States. Culture guides problem solving with regard to life choices, including health. This course examines how culture affects decisions about health and health care. Prerequisite: sophomore standing.

NUR 297 Parent Child Relationships

A study of the historical, cultural, ethnic, and religious perspectives on parenting in America, the effects of stress and change on parenting ability, and the challenges and rewards of parenting as children and parents move across the lifespan and experience changes in family composition (blended, single-parent, gay and lesbian), health (sandwich generation and aging), and lifestyle. Prerequisite: sophomore standing.

NUR 300 Art & Science of Nursing

Introduces the nursing student to the nursing profession. The concepts of—professional responsibility, accountability, human development, spirituality, values and beliefs, diversity, and death and dying are discussed. Students learn to apply the nursing process, principles of teaching/learning, and therapeutic communication in the practice of individualized nursing care. Preventative nursing strategies in caring for individuals with reduced mobility are introduced. Prerequisite: admission to the Bachelor of Science in Nursing Program; previous or concurrent registration in the following courses: Information Literacy and Management (WE) (NUR-305), Pathophysiology and Assessment (NUR-315/NUR-315L/NUR-315C) and Pharmacological Principles (NUR-360).

NUR 305 Information Literacy & Management

Introduces the student to the intellectual language, vocabulary, and expectations used in making nursing decisions in practice. Discusses concepts such as data gathering using search methods, organizing, synthesizing and critical evaluation. Data information, knowledge, and standardized nursing language are discussed. Prerequisite: admission into the Bachelor of Science Nursing Program; previous or concurrent registration in the following courses: Art and Science of Nursing (NUR-300), Pathophysiology and Assessment (NUR-315/NUR-315L/NUR-315C) and Pharmacological Principles (NUR-360). (0.5 course credits)

NUR 315/315L/315C Pathophysiology and Assessment

Provides the foundation for the integration of assessment data and pathophysiological concepts in the application of the nursing process. Focuses on comprehensive health assessment of diverse individuals across the lifespan. Assessment skills, health histories, and physical exams are practiced. Clinical and laboratory components provide opportunities to reinforce psychomotor skills and health assessment skills with diverse individuals across the lifespan as well as implementing safe, basic patient-centered care. Lab and clinical are P/NP basis only. Prerequisites:

admission to the Bachelor of Science in Nursing Program; previous or concurrent registration in the following course: Art and Science of Nursing (NUR-300), Information Literacy and Management (WE) (NUR-305), Pharmacological Principles (NUR-360). (2.0 course credits)

NUR 345 Mental Health Nursing

Focuses on the knowledge and skills necessary to provide safe, holistic care for diverse individuals and families experiencing actual or potential alterations in mental health. Students explore specific mental health problems and how to apply evidence-based practice when caring for individuals and families across the life span, as well as the importance of self-analysis, respect for diversity, professional accountability, and ethical responsibility. Students develop communication techniques necessary to promote client well-being and safety, as well as collaborate with the health-care team. Clinical application includes caring for individuals experiencing alterations in mental health in a variety of settings. Prerequisite: admission into the Bachelor of Science Nursing Program; Art and Science of Nursing (NUR-300), Information Literacy and Management (WE) (NUR-305), Pharmacological Principles (NUR-360), and Pathophysiology and Assessment (NUR-315/NUR-315L/NUR-315C).

NUR 355/355L/355C Introductory Concepts in Nursing

Focuses on holistic care of diverse individuals and families across the life span. Applies the nursing process, emphasizing primary, secondary, and tertiary nursing interventions. in the care of individuals experiencing actual or risk for alterations in renal, gastrointestinal, and musculoskeletal systems. Surgical, dietary, and pharmacological management is integrated. Clinical and laboratory components provide opportunities to reinforce psychomotor skills and application of the nursing process in the delivery of safe, evidence-based, holistic care. Lab and clinical are P/NP basis only. Prerequisites: admission into the Bachelor of Science Nursing Program; Art and Science of Nursing (NUR-300); Information Literacy and Management (WE) (NUR-305); Pharmacological Principles (NUR-360), and Pathophysiology and Assessment (NUR-315/NUR-315L/NUR-315C). (2.0 course credits)

NUR 360 Pharmacological Principles

Basic concepts and principles of administration, pharmacokinetics, pharmacodynamics, and application to basic biophysical concepts for specific pharmacological interventions. A brief overview of the mechanisms of action of select classifications of drugs is included. Prerequisite: admission into the Bachelor of Science in Nursing Degree or consent of instructor Program; previous or concurrent registration in the following course: Art and Science of Nursing (NUR-300), Information Literacy & Management (WE) (NUR-305), and Pathophysiology and Assessment (NUR-315/NUR-315L/NUR-315C). (0.5 course credits)

NUR 375 Legal & Ethical Issues in Nursing

Focuses on the complexity of moral, legal, and ethical issues in health care. Topics include the legislative and regulatory processes governing healthcare, appraisal of legal risks, ethical principles, current ethical debates in healthcare, and developing trends and ethical conflicts. Students examine and explore one topic in depth. Prerequisite: admission into the Bachelor of Science Nursing Program; Art and Science of Nursing (NUR-300), Information Literacy and Management (WE) (NUR-305), Pharmacological Principles (NUR-360), and Pathophysiology and Assessment (NUR-315/NUR-315L/NUR-315C).

NUR 387 Alternative Therapies for Hlth/Heal

Examines available alternative and complimentary therapies. Risks and benefits of these modalities are assessed to determine if there are solid, scientific rationales for them. Therapies include dietary supplements, mind-body interventions (e.g., meditation), body based methods (e.g., massage), and energy therapies (e.g., Reiki). Prerequisite: sophomore standing.

NUR 415/415L/415C Advanced Concepts in Nursing

Advances and continues the focus of holistic care for diverse individuals, families, groups, and populations across the life span. Applies the nursing process, emphasizing primary, secondary and tertiary nursing interventions, in care of individuals experiencing actual or risk for alterations in integumentary, pulmonary, cardiovascular, endocrine, sensory/neurological, and immune systems. Surgical, dietary and pharmacological management is integrated. Clinical and laboratory components provide opportunities to reinforce psychomotor skills and application of the nursing process in the delivery of safe, evidence-based, holistic, patient-centered care. Lab and clinical are P/NP basis only. Prerequisite: admission into the Bachelor of Science Nursing Program; Mental Health Nursing (NUR-345), Legal & Ethical Issues in Nursing (WE) (NUR-375), Pharmacological Principles (NUR-360), Introductory Concepts in

Nursing/Clinical Application (NUR-355/-355L/-355C). (2.0 course credits)

NUR 425 Nursing Research

Explores the development of evidence-based nursing practice. Discusses research methods for gathering evidence. Explains how evidence is developed and applied to practice. Steps of the research process are addressed. Elements in determining the validity and reliability of research and levels of evidence are discussed. Prerequisites: admission into the Bachelor of Science Nursing Program; Information Literacy and Management (NUR-305), Mental Health Nursing (NUR-345), Legal & Ethical Issues in Nursing (WE) (NUR-375), Introductory Concepts in Nursing (NUR-355/355L/-355C).

NUR 430 Community & Population Oriented Nur

Focuses on community and population health promotion, and disease/injury prevention. Community oriented nursing roles are discussed. Topics include levels of prevention, risk analyses, harm reduction, causality, epidemiology, biostatistics, study designs, and sources of data applied to population health. Current issues related to disease control and surveillance, screening programs, clinical decision-making, health planning, and evaluation are addressed. Clinical application includes community observation experiences. Prerequisite: Admission into the Bachelor of Science Nursing Program; Mental Health Nursing (NUR-345), Legal & Ethical Issues in Nursing (WE) (NUR-375), Introductory Concepts in Nursing (NUR-355/-355L/-355C).

NUR 431 Wellness in Aging & Chronicity

Examines normal versus abnormal aspects of the aging process. Common health problems of the elderly are discussed. Addresses evidence-based strategies to promote wellness and to assist those living with chronic illnesses. Explores community resources to meet the holistic health needs of diverse individuals, groups, and families. Topics include the impact of culture, gender, stigma, and socioeconomic status on communication and care. Clinical application includes well elderly visits in the community. Prerequisite: Admission into the Bachelor of Science Nursing Program; Advanced Concepts in Nursing (NUR-415/-415L/-415C), Community and Population Oriented Nursing (NUR-430), and Nursing Research (WE) (NUR-425).

NUR 444 Ind Study-Nursing

Guided study of individually chosen topic in nursing with a nursing department faculty member. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: junior standing and consent of instructor.

NUR 455/455C Leadership and Contemporary Issues in Nursing (WE)

Focuses on leadership skills, knowledge, and creativity to promote and manage safe, holistic patient-centered care for diverse individuals, families, groups, and populations across the lifespan. Concepts include management and organizations, quality improvement, change process, political/organizational/micro systems, communication/collaboration, fiscal/ human resource management, delegation, prioritization, decision making, and professional/self-care management. Nursing theories/frameworks are discussed. Clinical components provide an opportunity to collaborate with patients, families, and health care team members and to develop leadership roles. Lab and clinical are P/NP basis only. Prerequisite: admission into the Bachelor of Science Nursing Program; Advanced Concepts in Nursing (NUR-415/-415L/-415C), Community and Population Oriented Nursing (NUR-430), and Nursing Research (WE) (NUR-425). (2.0 course credits)

NUR 494 Internship in Nursing

A clinical practicum on an inpatient health care unit supervised by a faculty member of the department and a professionally prepared R.N. preceptor. A minimum of 140 hours on-site experience is required. P/NP basis only. Prerequisite: Introductory Concepts in Nursing (NUR-355/-355L/-355C) and consent of department chair.

NUR 495 Maternal Newborn Nursing

Analyzes previously learned nursing knowledge and skills to provide safe, holistic patient-centered care for diverse individuals and families during normal and high-risk pregnancy, labor, delivery, and the postpartum-neonatal period of life. Includes concepts and issues in reproductive health of men and women using a developmental framework. Surgical, dietary, and pharmacological management are integrated. Clinical component includes patient simulation experiences. Prerequisite: admission into the Bachelor of Science Nursing Program; Advanced Concepts in Nursing (NUR-415/-415L/415C), and Nursing Research (WE) (NUR-425).

13.41 Philosophy

Lemos (Chair)

The Philosophy and Religion Department offers courses designed for students to engage with human thought and practice through the study of important texts and historical evidence as well as recent and contemporary writings. Philosophy and Religion courses help students encounter the diversity of human ideas and religious practice in ways that are thoughtful, respectful, and accurate. Students will grow in their abilities to read texts, construct arguments from evidence, think critically, and communicate accurately and with nuance. Any student seeking a liberal education, whatever the major discipline, will profit from the departmental offerings.

13.41.1 Philosophy Major

A major in philosophy requires a minimum cumulative GPA of 2.0 in all courses counted towards the major.

1. PHL 105 Introduction to Philosophy:
2. PHL 115 Logic
3. PHL 220 Ancient Greek Philosophy
4. PHL 300 Early Modern Philosophy
5. **Five** additional courses, two of which must be Philosophy courses at the 300-level or higher. With the approval of the Philosophy program faculty, two of these four may be courses taken outside of the Philosophy program.
6. PHL 490 Philosophy Colloquium

NOTE: *The recommended beginning course in philosophy for those contemplating a major in philosophy is Introduction to Philosophy (PHL-105). However, any of the other 100-level courses are also suitable first courses. Some courses numbered between 200 and 299 may be suitable first courses for students with sophomore standing.*

13.41.2 Philosophy Minor

Five courses in Philosophy, two of which must be at the 200-level or higher and one of which must be at the 300-level or higher.

13.41.3 Courses in Philosophy

13.41.3.1 Introductory courses

The introductory courses listed here are especially well suited for first-year students, as they presuppose no familiarity with college-level writing and reading expectations and there are no prerequisites for these courses.

The various courses numbered PHL-105 are different versions of the same course. They share some overlapping content and focus on the development of the same skills. Students can receive credit for only one PHL-105 Introduction to Philosophy course.

PHL 105 Introduction to Philosophy: Minds, Knowledge, and Value (WE)
Examines what philosophers think about some of the most basic questions in life. What is real? What does it

mean to have a mind? Could minds have an existence independent from our bodies? Is there anything we can know with absolute certainty? Are there objective moral values, and if so, could we know what they are? May not be taken more than once for credit.

PHL 105 Introduction to Philosophy: God, Self, and Free Will (WE)

Focuses on questions about the nature and existence of God, human nature, personhood, and free will. Is there evidence for the existence of God and is the presence of suffering in the world consistent with God's existence? Are human beings merely material beings or might we have non-physical minds or souls? What are persons and what constitutes personal identity over time? What does it mean to have free will? Do we possess free will? May not be taken more than once for credit.

PHL 105 Introduction to Philosophy: Masterworks (WE)

Central philosophical debates encountered through the examination of important classical and modern texts from the history philosophy. Readings in the course focus on several major works from philosophers such as Plato, Descartes, Hume, Marx, and Sartre who discuss the meaning of life, belief in God, the mind-body problem, relativism of truth, and other important philosophical concerns. May not be taken more than once for credit.

PHL 105 Introduction to Philosophy: Science Fiction and Philosophy (WE)

Uses science fiction as a springboard for thinking about classic issues and problems in philosophy. Sci-fi classics such as The Matrix, Bladerunner, and Surrogates, raise fundamental philosophical questions such as: What is the difference between appearance and reality and how can we distinguish between them? What is it to be a person? Should we think that all and only human beings can be persons? What is a good human life? Is a pleasant life sufficient for living a good life? In this course, such questions are examined through the lens of both philosophy and science fiction. May not be taken more than once for credit.

PHL 115 Logic

Introduces the discipline of logic on an elementary level. This course teaches skills that are essential to good critical reasoning—how to detect forms of arguments, how to test for validity, and how to construct valid arguments. This course focuses on both formal and informal logic.

PHL 128 Morality & Moral Controversies

Examines important moral issues facing contemporary society. The course uses a variety of common ethical theories. Possible topics include environmental ethics, euthanasia, animal rights, humanitarian aid, abortion, and capital punishment.

PHL 200 Bio-Medical Ethics

Addresses a variety of issues in medical ethics and introduces various moral frameworks for thinking about these issues. Students are introduced to ethical theories, such as utilitarianism and Kantianism, and how they can be applied in the context of medical ethics. Topics addressed in the course are likely to include: abortion, euthanasia, paternalism, and patient autonomy, organ transplants and scarce medical resources, and genetic screening, among others.

PHL 205 Environmental Ethics

Serves as a general introduction to environmental ethics. Students receive instruction in ethical theory and how it can be applied to issues in environmental ethics. Some topics likely to be addressed in the course are: defining our obligations to future generations, the definition of wilderness, sustainable agriculture, animal rights, anthropocentrism, the nature of the value of wilderness, environmental holism, and ecofeminism.

PHL 210 Topics in Philosophy

Examines a selected topic in philosophy. Topics vary depending on the instructor. May be taken more than once for credit, provided the topics are substantially different.

PHL 220 Ancient Greek Philosophy

Surveys of the central ideas and figures in the philosophy of the ancient Greek world. Figures studied include the pre-Socratic philosophers, Socrates, Plato, and Aristotle.

PHL 265 Political Philosophy

Examines the central issues in social and political philosophy concerning the individual's relation to society and to the state in particular. Questions may include: on what basis can states legitimately exercise authority over individuals? What are the proper ends and limits of state authority? What principles should our society pursue in

allocating goods such as property, education, health, and welfare?

PHL 285 Law, Morality & Punishment

Addresses key issues in the philosophy of law. Topics may include issues of both distributive justice and retributive justice, the proper limits of state authority in restricting individual liberty, and civil disobedience. Questions addressed in the course may include: On what principled basis should wealth be distributed in society? On what basis is the punishment of persons justified and what forms should punishment take? Should we abolish institutions of punishment? On what principled basis should the state be allowed to infringe upon individual liberty? What constitutes civil disobedience to the laws and under what conditions is civil disobedience justified, if ever?

PHL 300 Early Modern Philosophy

Examines the metaphysical and epistemological theories of major European philosophers of the 17th and 18th centuries. Readings are drawn from the works of Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant. Prerequisite: one course in philosophy or consent of instructor.

PHL 315 Advanced Topics in Philosophy

Examines a selected topic in philosophy. Topics vary depending on the instructor. May be taken more than once for credit, provided the topics are substantially different. Prerequisites: two courses in philosophy or consent of instructor.

PHL 320 Seminar in Ethics

Examines central topics in normative ethics and/or metaethics. Topics addressed may include: utilitarianism, Kantianism, Aristotelian virtue theory, moral realism, ethical relativism, etc. In this course emphasis is placed on the development of student research projects on central topics in ethical theory. Prerequisite: two courses in philosophy or consent of instructor.

PHL 355 Seminar Metaphysics & Epistemology

Examines central topics in metaphysics and epistemology. Metaphysical topics addressed may include: the nature and existence of God, the nature of the self and personal identity, free will, etc. Epistemological topics addressed may include the analysis of knowledge, theories of justified belief, the philosophy of perception, etc. In this course emphasis is placed on the development of student research projects on central topics in metaphysics or epistemology. Prerequisite: two courses in philosophy or consent of instructor.

PHL 394 Directed Learning in Philosophy

Provides the opportunity for a student to design a course of study fitting the individual student's particular interests and educational needs. Readings may focus on either a philosophical problem or one or more philosophers. Prerequisite: consent of instructor.

PHL 444 Ind Study-Philos

Allows for the independent study of some philosophical problem or the thought of some major philosopher, under the direction of a faculty member of the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of instructor.

PHL 490 Philosophy Colloquium

Requires students majoring in philosophy to submit 10–15 pages of finished philosophical prose, and present their work orally to students and faculty. Although the Colloquium is usually taken during Spring Term of the senior year, it is open to all juniors and seniors with appropriate background in philosophy. Satisfactory completion of the Colloquium is required for graduation with a major in philosophy. P/NP basis only. (0.0 credits)

PHL 494 Internship in Philosophy

Involves the exploration of a career area related to the student's interest in philosophy supervised by a faculty member of the department in cooperation with the Internship Specialist. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a major in philosophy. Prerequisites: declared major in philosophy, junior standing, and consent of department chair.

13.42 Physics

Affatigato, Akgun (Administrative Coordinator, Engineering Physics), Baehr, Duru (Chair), Li, Wetzel, Wheaton

The physics department serves a variety of students with a balanced program, giving equal emphasis to the needs of the technically and the non-technically oriented.

13.42.1 BACHELOR OF ARTS: Physics Major

A major in physics requires a minimum cumulative 2.0 GPA in all courses counted toward the major.

1. PHY 185/185L General Physics I & Laboratory
2. PHY 195/195L General Physics II & Laboratory
3. PHY 231 Math Mthds Physicists & Engineers
4. PHY 235 Modern Physics **and** PHY 236 Advanced Laboratory 1
5. PHY 265 Electromagnetism
6. **Two** of the following courses:
    - PHY 275 Classical Mechanics
    - PHY 315 Thermodynamics & Stat Mech
    - PHY 335 Quantum Mechanics
    - PHY 425 Solid State Physics
7. **Four** additional physics or engineering physics full-credit courses, all of which must be numbered 150 or above.
8. Comprehensive evaluation
    - Satisfactory completion of written and oral examinations

Recommended:
- CS 110 Introduction to Programming
- CHM 121/121L General Chemistry I and Laboratory

13.42.2 Physics Minor

A minor in Physics requires a cumulative 2.0 GPA in all courses counted toward the major.

1. PHY 185/185L General Physics I & Laboratory **or** PHY 165/165L Basic Physics I & Laboratory
2. PHY 195/195L General Physics II & Laboratory **or** PHY 175/175L Basic Physics II & Laboratory
3. PHY 235 Modern Physics **or** PHY 236 Advanced Laboratory 1
4. PHY 265 Electromagnetism
5. **Two** additional physics courses approved by the department, both of which must be numbered 150 and above.

13.42.3 Bachelor of Science in Engineering Program

The B.S.E. degree in Engineering Physics requires a minimum cumulative 2.0 GPA in all courses counted towards the major.

Students completing the B.S.E. in Engineering Physics cannot minor in Physics and cannot earn a B.A. degree with a major in physics.

Candidates for the BACHELOR OF SCIENCE IN ENGINEERING degree with an area of study in engineering physics must successfully complete

1. ENR 101 Introduction to Engineering Design
2. ENR 101L Engineering Design Laboratory
3. ENR 145 Comput Mthds for Physicist & Engin
4. PHY 185/185L General Physics I & Laboratory
5. PHY 195/195L General Physics II & Laboratory
6. MTH 155 Calculus for Engineers **or** MTH 135 Calculus I **and** MTH 145 Calculus II
7. CHM 121/121L General Chemistry I and Laboratory
8. PHY 231 Math Mthds Physicists & Engineers
9. PHY 235 Modern Physics
10. PHY-245/-245L Principles of Analog Electronics and Laboratory
11. PHY 246 Advanced Laboratory 2 (WE)
12. PHY 265 Electromagnetism
13. ENR-325/325L Principles of Digital Electronics and Laboratory
14. ENR 405 Senior Design 1
15. ENR 415 Senior Design 2
16. **Four** of the following:
    - ENR 221 Materials Science Engineering 1
    - ENR 321 Materials Science Engineering 2
    - ENR 355 Robotics and Sensors
    - PHY 275 Classical Mechanics

- PHY 311 Renewable Energy (WE)
- PHY 315 Thermodynamics & Stat Mech

17. **One** of the following:
    - CHM 122/122L General Chemistry II and Laboratory
    - One full-credit Physics or Engineering Physics course which must be numbered 150 and above.

13.42.4 Courses in Physics

PHY 104 From the Big Bang to First Humans
Studies the history of the evolving Universe starting with the Big Bang all the way to the first humans on the Earth. The conditions in the first moments of the Universe, formation of matter and forces, formation of galaxies, stars and planets, emergence of life on Earth, the evolution of life from the first organisms to the humans, along with very basic science to understand all these phenomena, are covered.
PHY 105 Physics: An Historical Approach
Introduces important developments in physics from the time of Aristotle to the 20th century. Special attention is given to significant conceptual developments and major technological advances. Readings are selected from writings of some of the major figures in the history of physics, as well as modern commentators. The class experience includes reenactments of some historically significant experiments. This course satisfies the non-lab science course requirement.
PHY 114/114L Modern Astronomy & Laboratory
Introduces the objects and phenomena found in the universe, including the solar system, planets, moons, comets, meteors, the sun, stars, birth and death of stars, neutron stars, pulsars, black holes, galaxies, quasars, and cosmological evolution. Laboratory activities required. Lab is P/NP basis only. This course satisfies the general education laboratory science requirement. Prerequisite: competence in algebra.
PHY 121 Everyday Physics
Covers the principle of physics we use in our daily life. Examples from everyday experience are used to explain the fundamental principles of linear and rotational motion, momentum, forces, energy, as well as electricity, magnetism, and medical applications.
PHY 161 Energy: Science and Technology
Covers physics and technology of energy generation, consumption, and conservation. Covers a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, bioenergy, and nuclear energy. Surveys the efficiencies and environmental impacts of energy use in transportation, manufacturing, and buildings.
PHY 165/165L Basic Physics I & Laboratory
An algebra-based survey course in the basic principles of mechanics, dynamics, energy, momentum and rotational motion. One (0.0 course credit) laboratory per week, held jointly with General Physics laboratories, is a required part of this course. Lab is P/NP basis only. This course satisfies the general education laboratory science requirement. Previous experience in algebra recommended.
PHY 175/175L Basic Physics II & Laboratory
An algebra-based survey course in the basic principles of thermodynamics, electrostatics, magnetism, circuits, light, and optics. One (0.0 course credit) laboratory per week, held jointly with General Physics laboratories, is a required part of this course. Lab is P/NP basis only. This course satisfies the general education laboratory science requirement. Prerequisite: Basic Physics I & Laboratory (PHY-165/-165L), or consent of instructor.
PHY 185/185L General Physics I & Laboratory
A calculus-based introduction to mechanics to serve as a basis for advanced courses in physics. Kinematics, dynamics, energy, momentum, rotational motion and fluid mechanics are covered. One (0.0 course credit) laboratory per week, held jointly with Basic Physics laboratories, is a required part of this course. Lab is P/NP basis only. Previous

experience in calculus recommended.

PHY 195/195L General Physics II & Laboratory

A calculus-based introduction to thermodynamics, electrostatics, magnetism, circuits, light, and optics. One (0.0 course credit) laboratory per week, held jointly with Basic Physics laboratories, is a required part of this course. Lab is P/NP basis only. Prerequisites: General Physics I & Laboratory (PHY-185/-185L) or consent of instructor.

PHY 211 Glass Science

Introduces the physics and chemistry behind the formation and study of glassy materials. The course covers glass making, glass structure and surfaces, property characterization, a wide array of industrial and scientific applications, as well as modern experimental techniques. It is especially suitable in preparation for glass research, and for students interested in a possible career in materials research and/or condensed matter physics. Prerequisite: General Physics II & Laboratory (PHY-195/-195L), or consent of instructor.

PHY 231 Math Mthds Physicists & Engineers

Studies areas of mathematics that are of fundamental importance in the physical sciences. Topics include vector calculus, eigenvalue problems, curvilinear coordinates, Fourier analysis, introduction to complex variables and differential equations. Topics include complex variables, Fourier analysis, eigenvalue problems, and vector calculus. Includes one computer laboratory session per week. Previous experience in calculus is recommended. Prerequisite: Calculus II (MTH-145), or Calculus for Engineers and Physicists (ENR 125).

PHY 235 Modern Physics

Introduces quantum phenomena, including the wave-particle duality, atomic models, special theory of relativity, Schrodinger's equation and its applications to certain potentials. Corequisite: Advanced Laboratory 1 (PHY-236). Prerequisites: General Physics II & Laboratory (PHY-195/-195L) or consent of instructor.

PHY 236 Advanced Laboratory 1

PHY-236 Advanced Laboratory 1 (WE) Introduces laboratory measurement techniques as applied to modern physics experiments. Experiments from optics and atomic physics. A writing intensive course with laboratory and computer design projects based on applications of modern physics and atomic physics. Corequisite: Modern Physics (PHY-235). (0.5 course credit)

PHY 241 Introduction to Astrophysics

Covers the fundamental concepts in astrophysics: The tools of astronomy, celestial mechanics, interaction of light and matter, telescopes, nature of the stars and their classifications. Other topics include the general overview of the solar system, and the binary systems. Prerequisite: General Physics II & Laboratory (PHY-195/-195L) or consent of instructor.

PHY-245/-245L Principles of Analog Electronics and Laboratory

Covers analog devices and components used in electronic circuits and devices, including their applications. Focus on direct current (DC) and single-phase alternating current (AC) circuits, transient analysis of RC, RL, and RLC circuits in sinusoidal steady-state. The topics cover the current and charge relationships, Ohm's Law, resistors, inductors, capacitors, equivalent resistance and impedance, Kirchoff's Laws, Thevenin and Norton equivalent circuits, superposition and source transformation, power and energy, maximum power transfer, first-order transient response, algebra of complex numbers, phasor representation, time domain and frequency domain concepts, and ideal transformers. Prerequisite: General Physics II and laboratory (PHY-195/-195L) or consent of instructor.

PHY 246 Advanced Laboratory 2 (WE)

Continuation of Advanced Laboratory 1. A writing-intensive course that expands the laboratory experiments to nuclear and particle physics, such as Gamma Ray Spectroscopy, Nuclear Magnetic Resonance, Muon Lifetime, and Nuclear radiation. Prerequisite: Modern Physics (PHY-235) and Advanced Laboratory 1 (PHY-236). (0.5 course credits)

PHY 251 Stars & Galaxies

Focuses on the star formation and evolution, as well as the galactic evolution. The formation of the solar system and its implications, the degenerate remnants, and the Milky Way galaxy are covered. Prerequisite: General Physics II & Laboratory (PHY-195/-195L) or consent of instructor.

PHY 255/355 Introduction to Physics Research I–II

Extensive independent or group investigations of a particular topic or set of topics. Designed to be a research

experience in preparation for teaching, graduate school, or direct entry into a technical field after graduation. Prerequisite: General Physics II & Laboratory (PHY-195/-195L) or consent of instructor.

PHY 265 Electromagnetism

Studies electromagnetic phenomena at the intermediate level, including circuits, static and quasi-static fields, Maxwell's equations, radiation, and selected topics in properties of materials. Special topics in vector algebra, scalar and vector point functions, and differential vector calculus are developed and used. Prerequisite: General Physics II & Laboratory (PHY-195/-195L) or consent of instructor.

PHY 275 Classical Mechanics

Studies Newtonian, Lagrangian, and Hamiltonian formulations of the laws of motion. Applications to systems of particles, extended objects, and oscillatory systems. Prerequisite: General Physics II & Laboratory (PHY-195/-195L).

PHY 301 Optics & Waves

Covers the theory of modern optics, wave theory of light, as well as mechanical and electromagnetic oscillations. Introducing a variety of topics, including geometrical and physical optics, mathematics of wave motion, propagation, reflection, refraction, phenomenon of resonance in oscillations, and Fourier formalism. Prerequisite: Electromagnetism (PHY-265) or consent of instructor.

PHY 311 Renewable Energy (WE)

Reviews the scientific fundamentals of renewable energy production. Basic thermodynamic principles of the heat engines, the hydrogen production and storage methods are covered. Renewable energy sources including solar, biomass, wind, and ocean engine designs are discussed in detail. Also includes some hands-on experiments on solar, wind, and fuel cell systems. Prerequisite: General Physics II & Laboratory (PHY-195/-195L), or consent of instructor.

PHY 315 Thermodynamics & Stat Mech

Introduces fundamental concepts such as temperature, phase transitions, the first, second, and the third laws of thermodynamics, and the work/entropy relationship. The Statistical Mechanics half covers a mathematical treatment of partition functions, thermal properties of solids, and critical-point transitions. Problems will involve theoretical situations, as well as real-life scenarios involving engines, pumps, and energy transfer-related problems in which the students will design their own unique solutions. Prerequisite: Modern Physics (PHY-235) and Advanced Laboratory 1 (PHY-236) or consent of instructor.

PHY 321 Health Physics

Studies the use of physics in medicine. The basic principles of the medical physics applications, such as radiation therapy, dosimetry, computed tomography (CT), positron emission tomography (PET), single photon emission spectroscopy (SPECT), Magnetic Resonance Imaging (MRI), Nuclear Magnetic Resonance (NMR), and crystallography are covered. Prerequisite: General Physics II & Laboratory (PHY-195/-195L), or consent of instructor.

PHY 335 Quantum Mechanics

Introduces the formal treatment of quantum mechanics. This course covers the Schrodinger wave equation, the Dirac Braket notation, operator formalism, spin and angular momentum, the wave equation in one and three dimensions, and perturbation theory. Prerequisite: Modern Physics (PHY-235) and Advanced Lab 1 (PHY-236).

PHY 341 Space Plasma Physics

Focuses on the behavior of plasma in space environment. Covers the plasma parameters, waves, the planetary atmospheres, ionospheres, and magnetospheres. Prerequisite: Introduction to Astrophysics (PHY-241) or consent of instructor.

PHY 425 Solid State Physics

Studies the structure and properties of crystalline and amorphous solids. The main topics include crystal structure and quantized vibrations (phonons); electronic band structure and its relation to electrical, thermal, and optical behavior; semiconductors and superconductors. Prerequisite: Modern Physics (PHY-235), Advanced Lab 1 (PHY-236), and Mathematical Methods for Physicists (PHY-231); or consent of instructor.

PHY 441 Relativity and Cosmology

An introduction to Einstein's general theory of relativity, as well as the intervals, geodesics, black holes, and close binary star systems. The course starts with an introduction to tensor calculus, then covers the Newtonian,

relativistic and observational cosmology, and the physics of the early Universe. Prerequisite: Modern Physics (PHY-235), Advanced Lab 1 (PHY-236), and Mathematical Methods for Physicists (PHY-231); or consent of instructor.

PHY 444 Ind Study-Physics

Allows independent study of topics under the guidance of the department: experimental or pedagogical research on a problem predefined by the student in consultation with the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: demonstrated initiative and self-discipline, four courses in physics, and consent of department chair.

PHY 451 Particle Physics

Reviews the Standard Model, particle detection techniques, and the particle physics experiments. The nuclear weak, strong, and the electromagnetic interactions, Feynman diagrams, quark model, relativistic kinematics are also covered. Prerequisite: Modern Physics (PHY-235) and Advanced Lab 1 (PHY-236), or consent of instructor.

PHY 454 Summer Research

May be taken more than once for credit for a maximum of 2.0 credits. Prerequisite: consent of instructor.

PHY 464/474 Junior-Senior Seminar I and II

Presentations and discussions of advanced topics unavailable through the regular catalog offerings, and appropriate to students enrolled. Prerequisite: Modern Physics (PHY-235) or consent of instructor.

PHY 484 Advanced Topics in Physics

Covers several instructional modules. The content corresponds to material usually covered in the second-semester of an advanced, year-long course. Core modules include quantum mechanics (e.g., Bell's theorem) and electromagnetism (e.g., stress tensor). The four remaining modules are chosen from topics that include optics, fluid dynamics, experimental techniques, nuclear physics, geophysics, advanced classical mechanics, waves, statistical mechanics, and atomic physics. Prerequisite: Quantum Mechanics (PHY-335) and Electromagnetism (PHY-265), or consent of instructor.

PHY 494 Internship in Physics

Investigates an area of interest through field placement supervised by a faculty member of the department. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a major in physics. Prerequisites: completion of a physics minor or junior standing and consent of department chair.

13.42.5 Courses in Engineering Physics

ENR 101 Introduction to Engineering Design

Provides first-year engineering students with an introduction to how to solve open-ended problems in a hands-on manner using critical thinking and workplace skills. Students are expected to work in multidisciplinary teams to learn through doing, with an emphasis on defining and diagnosing the problem through a holistic lens of technology, people, and culture. Course also covers engineering ethics, and requires successfully completing a team design project. Oral and written presentations are required.

ENR 101L Engineering Design Laboratory

Introduces the concepts of engineering design. Topics include 2-dimensional and 3-dimensional drawings, CAD software, 3D printing, and hands-on sessions on building 3D models with various materials, introduction to power tools, and wood machine shop. Corequisite: Introduction to Engineering Design (ENR-101) or DS-130 Innovation by Design is required. (0.5 course credit)

ENR 145 Comput Mthds for Physicist & Engin

Computational Physics Methods for Physicists & Engineers Designed to be a survey of the computational methods used by physicists. Students learn basics of Linux systems, Python, Jupyter Notebook, Github, shell scripting, and data analysis tools, such as MATLAB and ROOT. The students will learn and apply simulation tools and electronic interfaces to their design projects. This course is project-based and requires intensive individual participation in prototyping.

ENR 221 Materials Science Engineering 1

ENR-221 Materials Science Engineering 1 Introduces the relationship of atomic arrangement with microscopic and macroscopic material properties using fundamentals of physics and chemistry. Covers the crystalline and amorphous structures, the defects and grain boundaries, phase diagrams and time-dependency of phase transformation. The emphasis is placed on understanding the different aspects of atomic arrangement and how to analyze them. As an essential component of the class, students will learn how to work with different analysis techniques available in our laboratories and develop a project involving the characterization of an unknown material.

ENR 321 Materials Science Engineering 2

ENR-321 Materials Science Engineering 2 Continuation of Materials Science Engineering 1, this course will follow up by studying the relationship between structure and property, as well as introducing processing methods. Examples of these relationships are mechanical, optical, magnetic, electrical, and thermal properties. As an essential component for the class, students will work in groups to analyze and develop solutions for case studies involving challenges faced by the industry, applying concepts of design thinking. Prerequisite: Materials Science Engineering 1 (ENR-221) or consent of instructor.

ENR-325/325L Principles of Digital Electronics and Laboratory

Introduces digital devices used in modern electronics. Topics covered include logic gates, flip-flops, timers, counters, multiplexing, analog-to-digital and digital-to-analog devices. Emphasis is on constructing, analyzing, verifying, and troubleshooting digital circuits using appropriate techniques and test equipment. Prerequisite: Principles of Analog Electronics and Laboratory (PHY-245/245L).

ENR 355 Robotics and Sensors

Introduces the basics of robotics and automation; mechanical design, principles of motion and kinematics for automated devices. The students will complete projects while learning about the system requirements identification, sensor, and microcontroller integration. The course exposes students to the current research in robotics research such as autonomous vehicles, assistant robots, and field robots for extreme conditions. Prerequisite: Electromagnetism (PHY-265).

ENR 405 Senior Design 1

Introduces final project work. The class is divided into two parts. In the first portion, the students will learn effective team organization, team planning, time management, literature research methods, record keeping, technical writing, professional ethics and development, among other skills required to be an effective engineer in the classroom. In parallel, the students will be developing, under the supervision of a mentor, their project in which they will design a project and execute all steps. Prerequisites: Computational Methods in Physics and Engineering (ENR-145) and senior standing.

ENR 415 Senior Design 2

Continues the work of Senior Design I. At the end of Senior Design 2 students are expected to finalize their project. The course focuses on the development of the scientific project and culmination of a written report and an oral presentation. The course also includes visits to regional research and manufacturing facilities. Prerequisite: Senior Design 1 (ENR-405).

13.43 Political Science

Lanegran (Chair), Snyder

The department of political science emphasizes the breadth of political science and presents politics as a worldwide phenomenon. The department nurtures active and responsible habits of citizenship, encouraging service learning and the development of political values, while offering students a variety of opportunities to study politics outside the classroom.

13.43.1 Political Science Major

A major in political science requires a cumulative 2.0 GPA in all courses counted toward the major.

A major in political science requires ten courses, including at least three 300- or 400-level courses.

1. POL 108 Introduction to Politics
2. POL 115 American National Gov & Pol
3. POL 244 Research Methods in Political Scien
4. **One** additional American government course:
   - POL 245 Political Parties & Elections
   - POL 277 Women & Poltics in US
   - POL 325 The American Congress
   - POL 345 American Presidency
   - POL 350 US Social Policy Process
5. **Two** comparative or international politics courses:
   - POL 258 World Politics
   - POL 266 Latin American Politics
   - POL 276 African Politics
   - POL 286 Asian Politics
   - POL 298 European Politics
   - POL 305 Terrorism
   - POL 310 International Organizations
   - POL 365 American Foreign Policy
6. **Four** additional political science courses

Satisfactory work in Topics in Political Science (POL-284/-296) may be used, with consent of department chair, to satisfy any departmental requirement.

13.43.2 Political Science Minor

A minor in political science requires six courses, including at least **one** 300- or 400-level course.

1. POL 108 Introduction to Politics
2. POL 115 American National Gov & Pol
3. POL 244 Research Methods in Political Scien

4. **One** additional American government course:
    - POL 245 Political Parties & Elections
    - POL 277 Women & Poltics in US
    - POL 325 The American Congress
    - POL 345 American Presidency
    - POL 350 US Social Policy Process

5. **One** comparative or international politics courses:
    - POL 258 World Politics
    - POL 266 Latin American Politics
    - POL 276 African Politics
    - POL 286 Asian Politics
    - POL 298 European Politics
    - POL 305 Terrorism
    - POL 310 International Organizations
    - POL 365 American Foreign Policy

6. **One** additional political science course

Satisfactory work in Topics in Political Science (POL-284/-296) may be used, with consent of department chair, to satisfy any departmental requirement.

13.43.3 Courses in Political Science

POL 107 Environmental Justice
Investigates issues of environmental ethics, Ojibwe culture and the nature of wilderness in the wilderness region known by the Ojibwe as the Arrowhead, the Boundary Waters Canoe Area Wilderness and Quetico Provincial Park. The course raises questions about the history of environmental preservation, environmental law-making at the grassroots, race relations, different models of economic development, environmental and social justice, and the role of Ojibwe communities and government in wilderness preservation. Offered summers at the Wilderness Field Station.
POL 108 Introduction to Politics
Compares societies and states across regions, cultures, and time spans, in an attempt to understand what governments have in common, how they differ, and why. Includes such specific topics as democracy and fascism, nationalism, human rights, post-communist states, and post-cold war international politics. Challenges students to look beyond the day's headlines, learn from other peoples' politics, and develop political self-awareness.
POL 115 American National Gov & Pol

Constitutional, institutional, and political dimensions, and principal contemporary problems of the government of the United States.

POL 210 Environmental Politics

Brings multiple perspectives to bear and provides a solid foundation for understanding the politics and complexities of environmental issues. Examines actors and issues in environmental policy-making at various levels of government, from the local to the national to the global. Analyzes the reasons for and hindrances to collective action. Students will acquire some tools of "practical politics," including political communications. No prerequisites, but Introduction to Politics (POL-108) is recommended.

POL 244 Research Methods in Political Scien

Surveys quantitative and qualitative methods of inquiry in political science. The course will cover the formulation of research questions, theories, and hypotheses, as well as the concepts of measurement, inference, causality, and ethical and normative issues in social science research. Methods of inquiry covered will include survey research, experiments, regression analysis, archival research, and in-depth interviews. Students learn how to conduct original analyses of quantitative data using the statistical computing software R. Prerequisite: sophomore standing or consent of instructor.

POL 245 Political Parties & Elections

The development and nature of political parties; state, local, and national party organizations; parties in government; voting behavior; campaigns and nominations. The course includes an introduction to election data sets and original research using quantitative research methods. Prerequisite: American National Government and Politics (POL-115) or consent of instructor. (Offered alternate years)

POL 258 World Politics

Survey of the basic factors of international politics, including the character of the state system and international economic relations, the role of force, the role of diplomacy and negotiation, and an examination of the formulation of foreign policy within domestic political systems.

POL 266 Latin American Politics

Focuses on two of the most exciting and dynamic features of contemporary Latin American politics: the "wave" of democratization that is washing over the region and the changing relationship between religion and politics. Topics include political culture, political economy, political violence, the impact of U.S. policies, the Catholic church's role in politics, and how the rise of Protestantism affects church-state relations. Prerequisite: Introduction to Politics (POL-108) or consent of instructor. (Offered alternate years)

POL 276 African Politics

An introductory survey of post-independence political patterns and processes in Africa. Similarities and differences across the continent are highlighted while a small number of select countries are studied indepth. Attention is given to the legacy of the colonial period, democratization, the challenges of violence and illegitimate governance, and the impact of the modern global economy on life in Africa. Prerequisite: Introduction to Politics (POL-108) or consent of instructor. (Offered alternate years)

POL 277 Women & Poltics in US

Examines three aspects of the dynamic between women and the US political process: women as political leaders, women as voters and activists, and the impact of policies on women and their everyday lives. The course addresses general theories of elections, feminist politics, and political behavior and discusses a number of specific policy issues such as reproductive health and international affairs. Prerequisite: American National Government and Politics (POL-115) or consent of instructor. (Offered alternate years)

POL 284 Topics in Political Science

Intensive reading, study, writing, and discussion dealing with various political science subjects. Examples of recent topics include political violence, environmental politics, and Mexican politics. This course may count toward a political science major, depending on course content, as either an American government course or as a comparative or international politics course. May be taken more than once for credit, provided the topics are substantially different.

POL 286 Asian Politics

Examines the broad variety of Asian political systems through case studies of selected countries that are authoritarian,

communist, transitioning, or established democracies. Issues confronted include: the East Asian economic miracle, the character of Asian democracies, and the role of ethnicity and religion in politics. The tension in the region between economic growth and political control receives particular attention. Prerequisite: Introduction to Politics (POL-108) or consent of instructor. (Offered alternate years)

POL 296 Topics Pol Sci: Non-West Persp

Same as Topics in Political Science (POL-284) except the course focuses on topics related to non-Western cultures. May be taken more than once for credit, provided the topics are substantially different.

POL 298 European Politics

Addresses political and economic continuities, changes, and challenges in modern Europe. The course examines the political structures and policy challenges of select states in the region including Great Britain, Germany and France. Other topics are the political dynamics of the expanding European Union as well as transitions to democracy and capitalism in Russia and Central and Eastern European states. Prerequisite: Introduction to Politics (POL-108) or consent of instructor. (Offered alternate years)

POL 305 Terrorism

An advanced-level examination of terrorism and global responses to it. Topics include the history of terrorism, a variety of domestic and international terrorist groups, and how terrorism is changing in the post-Cold War era. Prerequisite: Introduction to Politics (POL-108) or consent of instructor. (Offered alternate years)

POL 310 International Organizations

Examines the role of international organizations in international relations. The central question is whether organizations like the United Nations and the European Union are tools of their member states or actors that rival the power of nation-states in international relations. Students participate in simulations of international organizations. Prerequisite: Introduction to Politics (POL-108) or consent of instructor.

POL 325 The American Congress

Examines the American legislative process at the national level, with special attention to the constitutional origins of Congress, consideration of legislation by Congress, and the relationship of Congress to other political actors, as well as current policy issues. Prerequisite: American National Government and Politics (POL-115) or consent of instructor.

POL 335 Constitution & Roles of Govt

Examination of original court opinions and political writings focusing on the nature and sources of Supreme Court authority; the structure of government; judicial review; commerce, taxing, spending, and war powers; with special emphasis upon separation of powers: the President, Congress, and the Court. Prerequisite: junior standing or consent of instructor. (Offered alternate years)

POL 345 American Presidency

The President as chief executive, commander-inchief, chief diplomat, chief legislator, party leader, head of state; the institutionalized presidency. The course includes doing original research using historical case studies. Prerequisite: American National Government and Politics (POL-115) or consent of instructor.

POL 350 US Social Policy Process

Familiarizes students with the bureaucratic process through which national-level public policy is formulated in the United States, and gives students expertise in the challenges, history, successes, and shortcomings of select social policies. Policies examined may include education, public health, social security and welfare. Students participate in primary research examining the implementation of national policies in Iowa. Prerequisite: American National Government and Politics (POL-115) or consent of instructor. (Offered alternate years)

POL 365 American Foreign Policy

Examination of the institutional setting in which foreign policy is formulated, the political dynamics of policy formulation, and case studies of American foreign policy since World War II. Prerequisite: Introduction to Politics (POL-108) or consent of instructor. (Offered alternate years)

POL 375 Constitution & Individual Liberties

Examination of original court opinions and political writings focusing upon the procedural contents of due process, equal protection under the law, post-Civil War amendments, and civil rights legislation, with special emphasis upon freedoms of religion and expression. Prerequisite: junior standing or consent of instructor. (Offered alternate years)

POL 405 Contemporary Political Theory
Survey and argumentative analysis of the ideas of major political thinkers since 1900. Selections are made from such authors as Hannah Arendt, John Dewey, Sigmund Freud, Martin Luther King Jr., Robert Nozick, John Rawls, and Jean-Paul Sartre. Prerequisites: Introduction to Politics (POL-108) and junior standing, or consent of instructor.
POL 435 Ancient & Medieval Pol Thry
Historical survey and argumentative analysis of the ideas of great political thinkers from the 5th century B.C.E. to the 15th century C.E. Selections are made from such authors as Plato, Aristotle, Confucius, the Biblical writers, Augustine, and Thomas Aquinas. Prerequisites: Introduction to Politics (POL-108) and junior standing, or consent of instructor.
POL 444 Ind Study-Pol Sci
Independent study and research, under the direction of a faculty member of the department, in some area of political science. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: two completed courses in the relevant area at the 300- or 400-level and consent of department chair.
POL 445 Modern Political Theory
Historical survey and argumentative analysis of the ideas of the most important political thinkers from the 16th to the 19th centuries. Selections are made from such authors as Machiavelli, Hobbes, Locke, Rousseau, Marx, and Mill. Prerequisites: Introduction to Politics (POL-108) and junior standing, or consent of instructor.
POL 494 Internship in Political Science
Substantial work or participation in an office, organization, or activity concerned with government and politics, such as a congressional, federal, state, or local government office, a political campaign, or an active interest group. A minimum of 140 hours on-site experience is required. S/U basis only. One course credit toward a political science major for successful completion, unless The Washington Experience (WSH-494) is completed for credit toward a major. Prerequisite: consent of department chair.

13.44 Psychology

Brown, Castillo, Chihak, Farrell, Lee (Chair), Recker

Psychology is the scientific study of behavior and mental processes—the basis for both a field of scientific knowledge and of professional application. Both required and elective courses in psychology are grounded in the scientific approach. As an important tool for the understanding of both theory and data, the study of basic statistical and methodological concepts is included among courses required of all students majoring in psychology.

In addition to a major in **PSYCHOLOGY**, the College also offers a collateral major in **NEUROSCIENCE** and a concentration in **ORGANIZATIONAL SCIENCE**.

13.44.1 Secondary Education Certification in Psychology

Students seeking certification to teach psychology at the secondary level are strongly encouraged to speak with an advisor in Education as early as possible in their program of studies.

13.44.2 Psychology Major

A major in Psychology requires a cumulative 2.0 GPA in all courses counted toward the major.

1. PSY 100 Introductory Psychology
2. PSY 200 Research Methods
3. PSY 295 Applied Career Development in Psych
4. PSY 300 Stat Methods and Data Analysis
5. **One**of the following:
    - PSY 454 Directed Research Experience
    - PSY 494 Internship in Psychology
6. **One** of the following:
    - PSY 205 Developmental Psychology
    - PSY 235 Abnormal Psychology
7. **One** of the following:
    - PSY 215 Multicultural Psychology
    - PSY 245 Organizational Psychology
    - PSY 255 Social Psychology
8. **One** of the following:
    - PSY 250 Biopsychology
    - PSY 260 Cognitive Psychology
    - PSY 270 Learning and Behavior
9. **One** of the following:
    - PSY 325/325L Health Psychology and Laboratory (WE)
    - PSY 335/335L Sensation and Perception and Laboratory (WE)
    - PSY 355/355L Personality & Laboratory (WE)
10. **Two** additional courses in psychology, one of which must be 300 level or above.

13.44.3 Organizational Science Concentration in Psychology

Students completing a major in Psychology may elect to also complete a concentration in Organizational Science. This concentration is designed to acquaint students with human behavior in organizations from both theoretical and applied perspectives. It aims to prepare students to carry out various human resources, organizational development, customer service, and institutional research functions in a variety of organizational settings. It also prepares students for graduate study in the fields of Industrial/Organizational (I/O) Psychology, Human Resources, and other similar fields.

To complete the Organizational Science concentration, students must meet the following requirements. Courses taken to fulfill the Psychology major may be used to also fulfill requirements in the Organizational Science concentration.

1. Completion of a major in Psychology
2. Completion of the following **six** courses in which a cumulative 2.0 GPA must be earned. At least three of the six courses must be completed at Coe:
    - PSY 245 Organizational Psychology
    - PSY 255 Social Psychology
    - PSY 355/355L Personality & Laboratory (WE)
    - PSY 465 Industrial Psychology
    - BUS 300 Human Resource Management
    - BUS 315 Business Law I

13.44.4 Courses in Psychology

PSY 100 Introductory Psychology
Introduces students to the basic concepts, theories, and methods in the study of behavior and mental processes. Provides a basic understanding of psychology for interested students, who may take this as their only course in psychology, as well as for future majors.
PSY 137 Human Sexuality
See also Nursing (NUR-137), This course does not satisfy any of the requirements for a major in psychology.
PSY 200 Research Methods
Discussion of and experience in designing research studies, collecting and analyzing data, and preparing research reports in psychology. Coverage includes descriptive, correlational, quasi-experimental, and experimental methods, and basic statistical analysis using SPSS. Prerequisite: Introductory Psychology (PSY-100).
PSY 205 Developmental Psychology
Consideration of the major principles of maturation from conception to death. Critical evaluation of contemporary theories in physical, sensory, cognitive, emotional, and social development. Special attention to empirical, experimental, and theoretical literature related to the developmental process. Prerequisite: Introductory Psychology (PSY-100).
PSY 208 Gender Psychology
Psychological perspectives on the differences and similarities between females and males. Examination of theory and research includes topics such as: hormones and brain structure, intelligence, education, social roles, stereotypes, emotion, health, employment, and relationships. Prerequisite: Introductory Psychology (PSY-100). (Offered on an occasional basis)

PSY 215 Multicultural Psychology
Introduces the principles, theories, and practices of how culture and psychology intersect. Topics may include sexuality, health, power & prejudice, discrimination, communication, acculturation, and cultural development. Prerequisite: Introductory Psychology (PSY-100).

PSY 235 Abnormal Psychology
Examines the diagnosis, etiology, explanation, and treatment of major mental disorders. Focus is on understanding the interplay of biological and psychological forces in the development and treatment of disorders, with emphasis on research findings. Prerequisite: Introductory Psychology (PSY-100).

PSY 245 Organizational Psychology
Examines the ways in which human attitudes and behavior are affected by organizational characteristics. Involves the application of psychological research and theories in organizational settings. Major topics include motivation, leadership, team performance, job attitudes, organizational justice, and organizational culture. Prerequisite: Introductory Psychology (PSY-100).

PSY 250 Biopsychology
Introduces students to the biological bases of behavior and mental processes. This course emphasizes the cell biology of neurons, neural communication, and the organization of the nervous system. The neurological basis of psychological processes such as sensation, learning, memory, and cognition are discussed. Prerequisite: Introductory Psychology (PSY-100).

PSY 255 Social Psychology
Examines individual human behavior as it is influenced by social variables. Topics covered include person perception, conformity, attitudes, prejudice, persuasion, helping, aggression, and group processes. Experimental research methods and findings are given emphasis. Prerequisite: Introductory Psychology (PSY-100).

PSY 260 Cognitive Psychology
Explores current theories, research findings, and applications in the areas of attention, perception, consciousness, knowledge representation, memory processes, language comprehension and production, inductive and deductive reasoning, evaluation and decision making, human and artificial intelligence, problem solving and creativity, and cross-cultural cognition. Prerequisite: Introductory Psychology (PSY-100).

PSY 270 Learning and Behavior
Examines the ways in which behavior changes as a result of our experiences. The course focuses on roles of respondent and operant learning in the development and expression of adaptive and maladaptive behaviors and emotional responses. Students are provided opportunities to discover how learning principles are applied in contemporary behavior modification and behavior therapy. The role of learning is discussed in contexts such as health-related behaviors, sex and love, self-control, drug addiction, and psychological disorders. Prerequisite: Introductory Psychology (PSY-100).

PSY 295 Applied Career Development in Psych
Addresses complex interpersonal, cultural, ethical, and legal issues that may arise in psychology-related professional settings, using established theoretical and practical frameworks. Taken prior to Internship in Psychology (PSY-494), this course allows students to explore various psychology-related careers and develop some of the applied knowledge necessary for entry into such careers. Prerequisites: Introductory Psychology (PSY-100), a declared major in psychology, or consent of instructor.

PSY 300 Stat Methods and Data Analysis
Introduces students to core topics including the theoretical foundations of estimation, variability, and inferential statistics critical for statistical literacy. Focus is on the development of proficiency in data analysis using SPSS, interpretation of analyses, graphical representation of data, and written communication of results. Prerequisite: Research Methods (PSY-200).

PSY 325/325L Health Psychology and Laboratory (WE)
Explores current theories, research findings, and laboratory applications related to the bidirectional relationship between psychological processes (thoughts, emotions, and behaviors) and physical health. Topics include health promotion and health behaviors, disease prevention, stress and coping, compliance with medical advice, pain, chronic illness, and psychological mechanisms of health disparities. Three hours of lecture and three hours of

laboratory per week. Prerequisites: Statistical Methods and Data Analysis (PSY-300).

PSY 335/335L Sensation and Perception and Laboratory (WE)

Explores current theories, research findings, and laboratory applications related to how individuals detect and perceive sensory information in the environment. An overarching theme is how organisms appear to generate accurate percepts despite the limited and ambiguous nature of incoming sensory information. While the primary focus is on human vision, the most extensively studied of the senses, other systems are discussed. Course material covers basic biological structures (e.g. photoreceptors) that detect and transduce environmental energy into electrical impulses transmitted throughout the nervous system. Three hours of lecture and three hours of laboratory per week. Prerequisites: Statistical Methods and Data Analysis (PSY-300).

PSY 350 Drugs & Behavior

Explores how psychoactive drugs affect the nervous system. Concepts particularly relevant to a wide variety of psychological, sociological, and health-related careers in which clients are commonly taking drugs, therapeutically or recreationally. Course focuses on factors that influence the variability of drug effects, including neural, pharmacological, and psychological mechanisms. Major topics include the problem and implications of categorizing drugs, basic neural function, principles of pharmacology, and physiological and psychological aspects of addiction. Selected psychotherapeutic drugs and legal and illegal drugs of abuse are surveyed. Prerequisite: Introduction to Biopsychology (PSY-250) or Integrated Human Physiology (BIO-375).

PSY 354 Research Participation

Research and investigation of an area of interest supervised by a faculty member of the department. The student must obtain approval of a specific plan and complete the necessary arrangements prior to the term of registration for the course. P/NP basis only. Prerequisites: Research Methods (PSY-200) and consent of instructor.

PSY 355/355L Personality & Laboratory (WE)

Explores current theories, research findings, and laboratory applications related to the structure, development, and dynamic processes underlying the differences in how people act, think, and feel. Includes methods of constructing and evaluating personality assessment techniques. Three hours of lecture and three hours of laboratory per week. Prerequisite: Statistical Methods and Data Analysis (PSY-300).

PSY 415 Counseling Psychology

Introduces students to the field of counseling. Topics include ethical principles of the counseling profession, legal issues and licensing, counseling in a diverse and multicultural society, and effectiveness of various forms of therapy. Major theoretical approaches including psychoanalytic, humanistic, existential, cognitive-behavioral, couples and family systems are covered. Prerequisites: Research Methods (PSY-200) and Abnormal Psychology (PSY-235).

PSY 444 Ind Study-Psychology

Independent reading and the preparation of a proposal, with consent of psychology department faculty required prior to the term of registration. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: Research Methods (PSY-200), a declared major in psychology and consent of instructor.

PSY 450 Behavioral Neuroscience

Further explores relationship between the nervous system and behavior begun in Biopsychology (PSY-250). The course provides a more in-depth study of neural function and explores many new areas. Focuses on development of the nervous system, neural communication, neuroanatomy, hierarchical and parallel organization, neural plasticity, sensorimotor function, and neurohormonal influences on sexual development and behavior. Prerequisites: junior standing and either Biopsychology (PSY-250) or Integrated Human Physiology (BIO-375).

PSY 454 Directed Research Experience

A capstone course for students interested in conducting psychological research. Topics include legal and ethical responsibilities in psychological research, conducting literature reviews, research design, use of statistical software (e.g., SPSS and SAS), interpretation of statistical results, and clear communication and presentation of scientific information. Students also present their research findings in a public forum. P/NP basis only. May be taken more than once for credit. A maximum of one course credit may be counted toward a major in psychology. Prerequisites: Research Methods (PSY-200) and consent of instructor.

PSY 464 Seminar in Psychology

Intensive study of a topic selected by the instructor. May be taken more than once for credit, provided the topics

are substantially different. Prerequisites: Statistical Methods and Data Analysis (PSY-300) or consent of instructor.

PSY 465 Industrial Psychology

Focuses on the scientific study of making decisions about and developing people within organizations. Examines, from a psychological perspective, procedures aimed at improving productivity, and fairness in work settings. Students in the course complete multiple applied projects. Major topics include job analysis, employee selection, performance evaluation, and employee training and development. Prerequisites: Statistical Methods and Data Analysis (PSY-300) or consent of instructor.

PSY 494 Internship in Psychology

On-site work experience in psychology under the direction of the on-site supervisor and a faculty member of the department. A minimum of 140 hours on-site experience is required. P/NP basis only. One course credit of Internship in Psychology may be counted toward a major in psychology. Prerequisites: Applied Career Development in Psychology (WE) (PSY-295), a declared major in psychology, and consent of instructor.

13.45 Public Relations (Collateral Major)

Carstens (Administrative Coordinator)

The Public Relations major prepares students for a career in public relations and related communication fields. The major integrates course work in business administration, professional writing, graphic arts, and other disciplines relevant to public relations. The curriculum encourages the development of skills and perspectives desirable for learning to manage the successful communication between an organization and its publics.

Students wishing to complete this major must consult with the Public Relations administrative coordinator no later than the first term of their junior year. Students wishing to register for any of the art courses that count toward this major should consult with the art and art history department prior to course registration.

13.45.1 Collateral Major in Public Relations

A major in Public Relations requires a cumulative 2.0 GPA in all courses counted toward the major.

Concurrent completion of any of the majors listed on p. 21 of the Catalog for a B.A. (residential) is required.

1. **One** of the following:
    - ART 104 Digital Photography
    - ART 115 Drawing
    - ART 145 Digital Studio
    - ART 150 Time Based Media
2. PR 205 Public Relations
3. BUS 330 Principles of Marketing
4. BUS 460 Advertising
5. **One** of the following:
    - COM 141 Intro to Journalism

- COM 241 Multimedia Journalism

6. **One** of the following (producing a portfolio of writings related to the field of public relations):
   - BUS 461 Marketing Decision Making/Analysis
   - ECC 345 Writing Process

7. **One** of the following:
   - BUS 494 Internship in Business (with public relations or advertising as a major component)
   - PR 494 Internship in Public Relations
   - Summer Internship with public relations as a major component

8. **Three** of the following. No more than two courses may be selected from within any one department. (Students majoring in Business Administration may select no more than one course with either a BUS or an ACC prefix. Students majoring in Communication Studies may select no more than one course with a COM prefix.)
   - ACC 171 Principles of Accounting I
   - ART 104 Digital Photography (if not used to satisfy #1)
   - ART 115 Drawing (if not used to satisfy #1)
   - ART 145 Digital Studio (if not used to satisfy #1)
   - ART 150 Time Based Media (if not used to satisfy #1)
   - ART 363 Graphic Design Studio (if not used to satisfy #1)
   - BUS 250 Principles of Management
   - BUS 375 Business Ethics
   - BUS 461 Marketing Decision Making/Analysis (if not used to satisfy #6)
   - BUS 464 Seminar in Management , subject to topic approval by PR administrative coordinator
   - BUS 465 Advanced Topics in Marketing , subject to topic approval by PR administrative coordinator
   - COM 125 Fundamentals of Public Speaking
   - COM 157 Introduction to Media Analysis
   - COM 341 Digital Storytelling
   - COM 347 Persuasion

- COM 141 Intro to Journalism (if not used to satisfy #5)
- COM 322 Prof Communication & Writing (WE)
- ECC 345 Writing Process (if not used to satisfy #6)

13.45.2 Courses in Public Relations

PR 205 Public Relations
A study of the key concepts and processes of public relations used in corporate, not-for-profit, and government organizations. Topics include planning, research, communication/ media channels, campaigns, crisis communication, and public relations ethics. The historical development of public relations, current trends in public relations, and international issues in public relations are also coverd. This course does not satisfy any of the requirements for a major in business administration. Prerequisite: sophomore standing.
PR 494 Internship in Public Relations
On-site work experience in psychology under the direction of the on-site supervisor and a faculty member of the department. A minimum of 140 hours on-site experience is required. P/NP basis only. One course credit of Internship in Psychology may be counted toward a major in psychology. Prerequisites: Applied Contemporary Psychology (WE) (PSY-295), a declared major in psychology, and consent of instructor.

13.46 Religion

Hatchell (Chair)

The Philosophy and Religion Department offers courses designed for students to engage with human thought and practice through the study of important texts and historical evidence as well as recent and contemporary writings. Philosophy and Religion courses help students encounter the diversity of human ideas and religious practice in ways that are thoughtful, respectful, and accurate. Students will grow in their abilities to read texts, construct arguments from evidence, think critically, and communicate accurately and with nuance. Any student seeking a liberal education, whatever the major discipline, will profit from the departmental offerings.

13.46.1 Religion Minor

1. Any five courses in Religion

13.46.2 Courses in Religion by Content Area

Special attention should be given to the numerical ordering of the courses listed below:

1. Courses numbered between 100 and 199 include general introductions to religion (REL 101 Introduction to Religion , REL 103 Belief & Unbelief , REL 106 Eastern Religions , and REL 108 Western Religions as well as introductory courses focused on specific traditions.
2. Courses numbered 200-299 are topical courses especially suitable for sophomore level and above.
3. Courses numbered 300-399 are advanced courses with prerequisites.

Recommended beginning courses for those contemplating a major in religion are: REL 101 Introduction to Religion , REL 103 Belief & Unbelief , REL 106 Eastern Religions , or REL 108 Western Religionsm. However, other courses numbered below 200 are also suitable introductory courses.

- **Survey courses**
  - REL 101 Introduction to Religion
  - REL 103 Belief & Unbelief
  - REL 106 Eastern Religions
  - REL 108 Western Religions
- **Individual traditions**
  - REL 116 Buddhism
  - REL 128 Judaism
  - REL 136 Religions of China
  - REL 138 Modern Judaism
  - REL 148 Islam
  - REL 178 Christianity
  - REL 196 Hinduism
  - REL 206 Buddhist Thought
  - REL 215 The Rise of Christianity
  - REL 226 Religions of China: Daoism
  - REL 236 Zen Buddhism
  - REL 336 Tibetan Buddhist Cultrue
- **Judeo-Christian scriptures**
  - REL 105 Introduction to Hebrew Bible
  - REL 115 Introduction to New Testament
  - REL 310 Early Christian Gospels
  - REL 330 Topics in Hebrew Bible
  - REL 365 The Letters of Paul
- **Topical courses**
  - REL 217 Religion in America
  - REL 295 Topics in Religion
  - REL 296 Topics in Religion NWP
  - REL 338 Modern Religious Thought
  - REL 385 Advanced Topics in Religion
  - REL 394 Directed Learning in Religion
  - REL 394 Directed Learning in Religion
  - REL 444 Ind Study-Relig
  - REL 494 Internship in Religion

13.46.3 Courses in Religion

REL 101 Introduction to Religion
Introduces students to thinking about religion as a category of human experience, both in terms of foundational beliefs and how those beliefs are situated in practice. The course examines methods of studying religion as well as essential questions regarding the nature of religion.
REL 103 Belief & Unbelief
Discussion oriented course focusing on the dynamics of faith and of atheism. Special attention to traditional proofs for God's existence, the problems of evil and the afterlife, and the nature of religious experience.
REL 105 Introduction to Hebrew Bible
A literary and theological overview of the first five books of the Hebrew Bible (the Pentateuch or Torah) in the

context of their historical development and their formative impact on the rest of Israelite scripture (the Prophets and Writings). It is recommended that this course be taken prior to other Biblical studies courses.

REL 106 Eastern Religions

An introductory survey of some of the major religions of the Indian subcontinent and the Far East. Religions to be discussed include Hinduism, Buddhism, Confucianism and Taoism.

REL 108 Western Religions

An introductory survey of the three major Abrahamic religions (Judaism, Christianity and Islam), both in their historical development and their contemporary expressions.

REL 115 Introduction to New Testament

A literary and theological overview of the Christian scriptures (the Gospels and Acts, the Pauline, Johannine and catholic epistles, and the Apocalypse of John) in the context of the origins and early historical development of Christianity.

REL 116 Buddhism

An introduction to the Buddhist religion, including its history, philosophy, ritual, meditation, and popular practice. Course materials include Buddhist histories and religious texts, as well as contemporary anthropological materials and film.

REL 128 Judaism

The basic beliefs and practices of Judaism, from the prophetic period to the present. This course and the Modern Judaism course form a program in Jewish Studies which is supported by The Sinaiko Endowment.

REL 136 Religions of China

An introduction to religion in China, with particular focus on the three major traditions of Confucianism, Taoism, and Buddhism. Course materials include readings from major texts of each tradition, as well as histories, anthropological studies, literature, and film.

REL 138 Modern Judaism

A study of selected issues in Enlightenment or post Enlightenment Judaism as reflected, for example, in the history of the Jewish people, rabbinic teachings and Jewish theological scholarship, or Jewish literature. This course and the Judaism course form a program in Jewish Studies which is supported by The Sinaiko Endowment.

REL 148 Islam

An introductory overview of Islam as an Abrahamic faith, a global civilization, and an integral facet of the American religious experience.

REL 178 Christianity

A study of the beliefs and practices of Christianity from its earliest formulations to the modern world. Special attention is paid to essential tenets of Christian faith, elements of Christian practice, and divergences between Catholic, Protestant, and Orthodox Christianities.

REL 196 Hinduism

An introduction to the Hindu religion, including its history, philosophy, ritual, meditation, and popular practice. Course materials include Hindu histories and religious texts, as well as contemporary anthropological materials, literature, and film.

REL 206 Buddhist Thought

A survey of major issues in Buddhist philosophy, including ethics, emptiness, idealism, the nature of mind, and the nature of reality. The course focuses on Indian Buddhist philosophical schools and also explores distinctive philosophical ideas from Buddhist traditions in China, Japan, and Tibet. Prerequisite: Eastern Religions (REL-036), or Buddhism (REL-116), or consent of instructor. (Offered on an occasional basis.)

REL 207 Apocalypses and Apocalyptic Lit

REL-207 Apocalypses and Apocalyptic Literature Examines influential depictions of the end of human history and follows their interpretations from the first century BCE to contemporary America, thinking about how ideas about the end of the world are a reflection of the values communities hold most sacred, and how people make meaning of the world and their place in it. Highlights moments of apocalyptic anxiety, the development of the doctrine of the rapture, social groups like the Branch Davidians of Waco, TX, and apocalyptic threads in contemporary Evangelicalism and QAnon.

REL 215 The Rise of Christianity
An examination of how Christianity grew from a small band of Jewish followers of Jesus to the dominant religion in the Roman Empire. Attention is paid to crucial figures such as Paul of Tarsus, Irenaeus of Lyons, and Augustine of Hippo, among others.
REL 217 Religion in America
Examines the varieties of American religious experience, from the religion of the Puritans to the 21st century. Attention is paid both to normative and minority traditions, with a look at the growing Evangelical and Muslim communities in America today.
REL 226 Religions of China: Daoism
An introduction to China's Daoist tradition of Buddhism, beginning with its early literature like the Dao-de-jing and the Zhuang-zi and examining several later Daoist movements in China. The course also examines other Chinese religions and intellectual traditions that have influenced Daoism, including Confucianism and Buddhism. Course materials include histories, translations of Daoist literature, accounts of contemporary Daoists, and film.
REL 236 Zen Buddhism
An introduction to the Zen tradition of Buddhism beginning with its origins in China and also examining its traditions in Japan. The course examines other Chineses religious and intellectual traditions that helped shape the Zen tradition, with particular influence on Daoism. Course materials include histories, translations of Zen literature, autobiography, and film.
REL 246 Caste & Untouchability in S. Asia
REL-246 Caste and Untouchability in South Asia Explores caste and untouchability in South Asia, with a focus on the writings, histories, and lived experiences of Dalit people (formerly referred to as "untouchables").
REL 295 Topics in Religion
An examination of a selected topic in religious studies. Content varies from year to year. May be taken for credit more than once.
REL 296 Topics in Religion NWP
Same as Topics in Religion REL-295, except the course focuses on topics related to non-western cultures. Content varies from year to year. May be taken for credit more than once.
REL 310 Early Christian Gospels
An examination of the literary genre in early Christianity, focusing on both canonical (Mark, Matthew, Luke, John) and non-canonical Gospels, including the Gospel of Truth and the Gospel of Thomas. Why did early Christians utilize this genre to communicate traditions about Jesus of Nazareth? Prerequisite: Introduction to Hebrew Bible (REL-105) or Introduction to New Testament (REL-115) or consent of instructor.
REL 328 Dantes Divine Comedy (WE)
REL-328 Dante's Divine Comedy (WE) See also English (ENG-328), Explores the vision of the afterlife as imagined by the Florentine poet Dante Alighieri (1265-1320) in his great epic The Divine Comedy. Examines historical, literary, theological, and philosophical issues as our guide takes us through realms of the damned (Hell), the penitent (Purgatory) and the blessed (Heaven). Seminar consists of close reading and discussion. Prerequisites: Introduction to Literary Studies: The Art of Reading and Writing (ENG-111) or one course in REL, or consent of instructor.
REL 330 Topics in Hebrew Bible
An advanced course in an aspect of critical study of the Hebrew Bible. Potential topics include Prophecy, Wisdom Literature, and Women in the Bible. Prerequisite: Introduction to Hebrew Bible (REL-105) or consent of instructor.
REL 336 Tibetan Buddhist Cultrue
Introduces students to the lived experience of Buddhists on the Tibetan plateau and in Nepal. THe course discusses the history of religion in Tibet, as well as the major doctrines of Tibetan Buddhism. Particular attention is also paid toTibetan religious culture and popular religious practices. Course materials include Tibetan literature, histories, biographies, and film, as well as anthropological studies of Tibetan societies.
REL 338 Modern Religious Thought
A survey of the religious thinkers and themes of the 20th century. Various religious outlooks, ranging from conservative to radical, are explored, as are alternative conceptions of God, religion, and salvation. Prerequisite:

one course in religion or consent of instructor.

REL 365 The Letters of Paul

An examination of the 13 letters attributed to Paul of Tarsus in the New Testament as well as biblical and extra-biblical sources for the life of this crucial figure who spread Christianity around the Roman Empire. Prerequisite: Introduction to Hebrew Bible (REL-105) or Introduction to New Testament (REL-115) or consent of instructor.

REL 385 Advanced Topics in Religion

Seminar examining a selected topic in religious studies. Content varies from year to year. May be taken for credit more than once. Prerequisite: one course in religion or consent of instructor.

REL 394 Directed Learning in Religion

A course of directed learning designed by the student and instructor to fit the individual student's particular interests and educational needs. Prerequisite: consent of instructor.

REL 396 Advanced Topics in Religion NWP

Same as Advanced Topics in Religion REL 395 except course focuses on topics related to non-western cultures. Content varies from year to year. May be taken for credit more than once. Prerequisite: one course in religion or consent of the instructor.

REL 444 Ind Study-Relig

Independent study under the direction of a faculty member of the department in an area selected by the student. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of instructor.

REL 494 Internship in Religion

Exploration of a career area related to the student's interest in religion supervised by a Religion faculty member in cooperation with the Internship Specialist. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a major in Religion. Prerequisites: declared major in Religion, junior standing, and consent of department chair.

13.47 Secondary Education (Minor Only)

See Education , **?@sec-education**

13.48 Social & Criminal Justice

Barnett, J. Christensen, Hausknecht, Howard, Lemos, McNabb (Administrative Coordinator)

The Social & Criminal Justice Program offers students an opportunity to immerse themselves in an interdisciplinary major that draws from Coe's rich tradition in the liberal arts, as well as the pre-professional opportunities at the college. Core courses in the major address multifaceted questions surrounding restorative, retributive, procedural, and distributive justice. While many programs addressing such issues are housed in the field of criminal justice studies, the SCJ faculty teach topics within the major from varying perspectives and disciplines, introducing students to the ways in which matters of justice are at work in—and essential to—many areas of study.

Through interdisciplinary engagement, the SCJ program demonstrates for students how a multiplicity of voices and viewpoints can help to shape new ideas about the impact of social justice initiatives upon the criminal justice system, and the foundations of individual and collective community engagement.

13.48.1 Social & Criminal Justice Major

A major in Social & Criminal Justice requires a cumulative 2.0 GPA in all courses counted toward the major.

1. SCJ 101 Intro to Social & Criminal Justice

2. SCJ 202 Police and Society
3. SCJ 203 Collateral Consequences of Correcti
4. SOC 235 Methods of Sociological Research
5. **One** of the following (Philosophy of Law):
    - PHL 265 Political Philosophy
    - PHL 285 Law, Morality & Punishment
    - PHL 315 Advanced Topics in Philosophy
6. SOC 351 Criminology

- SOC 355 Sociology of Deviance
- WSH 464 Washington Term Internship Seminar
- A course approved by the Social & Criminal Justice administrative coordinator

13.48.2 Courses Social & Criminal Justice

SCJ 101 Intro to Social & Criminal Justice
Explores components of justice with a focus on understanding the nature and goals of social and criminal justice issues and policies. Considers the history, structure, functions, and philosophy of justice.
SCJ 190 Topics in Social & Criminal Justice
A focused examination of an issue, problem, theory, or methodology related to social and criminal justice. Content varies and is determined by the instructor. May be taken more than once for credit, provided the topics are substantially different (0.5 or 1.0 course credit).
SCJ 202 Police and Society
Examines the structure and function of law enforcement philosophies, policies, strategies, and tactics. Reviews the historical development of law enforcement focusing on the sociological issues of race, class, gender and power. Looks to the future and outlines challenges facing society as well as evidence-based reforms that could be adopted. Prerequisite: Introduction to Social and Criminal Justice (SCJ-101).
SCJ 203 Collateral Consequences of Correcti
Examines crime and punishment through various correctional theories and how they relate to policy, power relations, and cultural values. Focuses on mass incarceration, issues related to corrections in the 21st century, and both the intended and unintended consequences of using the carceral system to hold individuals who have committed crimes accountable. Prerequisite: Introduction to Social and Criminal Justice (SCJ-101).
SCJ 207 Restorative Justice
Introduces concepts of restorative justice, a framework for repairing harm, reducing conflict, and being in community with others that focuses on healing rather than punishment and is rooted in Indigenous traditions. Explores the history, theory and range of applications of restorative justice with particular emphasis on the U.S. context, surveying some of the most common and well-known contexts in which restorative justice practices are used. Considers how restorative justice contrasts with punitive and retributive justice and how it aligns with transformative and transitional justice, and discusses critiques of restorative justice. Prerequisite: Introduction to Social and Criminal

Justice (SCJ-101) or consent of the instructor.

SCJ 220 Juvenile Delinq & the Justice Sys

Overview of delinquent behavior and juvenile justice system responses to delinquency. Addresses historical precedents and philosophical reasons for treating juveniles differently from adults. Considers methodological problems and theoretical controversies in delinquency research, and the goals and effectiveness of juvenile justice systems. Prerequisite: Introduction to Social and Criminal Justice (SCJ-101).

SCJ 301 Criminal Law & the 4th, 5th & 6th

Study of criminal law including the general elements of crime, the specific criminal offenses, legal justification defenses, and conspiracy. Additionally, the course offers a general understanding of accused rights under the Fourth, Fifth, Sixth Amendments of the U.S. Constitution. Prerequisite: junior standing or consent of instructor.

SCJ 390 Adv Topics in Soc & Crim Just

Advanced study of an issue, problem, theory, or methodology related to social and criminal justice. Content varies and is determined by the instructor. May be taken more than once for credit, provided the topics are substantally different. Prerequisite: Introduction to Social and Criminal Justice (SCJ-101) and Methods of Sociological Research (SOC-235). (0.5 or 1.0 course credit)

SCJ 444 Independent Study in Social and Cri

Independent study under faculty guidance of a research problem chosen by the student. May be taken for an X status grade with consent of instructor prior to registration. Prerequisites: Methods of Sociological Research (WE) (SOC235) junior standing, and declared major in Social & Criminal Justice.

SCJ 494 Internship in Social and Criminal J

Investigation of a career area related to the student's interest in social and criminal justice supervised by a faculty member in cooperation with the Center for Creativity and Careers. A minimum 140 hours of on-site experience is required. P/NP basis only. Prerequisites: junior standing, declared major in Social & Criminal Justice, and consent of Social & Criminal Justice administrative coordinator.

13.49 Sociology

Barnett (Chair, Fall), Boguslaw, Fairbanks, Rodgers (Chair, Spring)

The sociology department offers a rigorous curriculum in support of Coe's mission of providing students with a high-quality liberal arts education and preparing students intellectually, professionally, and socially to lead productive and satisfying lives in the global society of the 21st century. The department serves this mission through an integrated series of courses designed to promote students' awareness and understanding of 21st-century social problems, including the enduring presence of social inequality.

13.49.1 Sociology Major

A major in Sociology requires a cumulative 2.0 GPA in all courses counted toward the major.

1. SOC 107 Introductory Sociology
2. SOC 235 Methods of Sociological Research
3. SOC 450 Sociological Theory
4. SOC 464 Sociology Capstone
5. **Five** additional sociology courses, including at least one course numbered 400–449
6. **One** of the following:

- STA 100 Statistical Reasoning I-Foundations (7weeks) and STA 110 Stats IIA: Inferential Reasoning (7 weeks)
- STA 100 Statistical Reasoning I-Foundations (7weeks) and STA 130 Stats IIB: Experimental Design (7 weeks)

13.49.2 Sociology Minor

1. SOC 107 Introductory Sociology
2. SOC 235 Methods of Sociological Research
3. SOC 450 Sociological Theory
4. **Three** additional sociology courses, including at least one course numbered 400–449

The following courses do not satisfy any of the requirements for a major or minor in sociology:
* SOC 494 Internship in Sociology

13.49.3 Courses in Sociology

SOC 107 Introductory Sociology
Is an introduction to sociology, the scientific study of human social behavior. The course explores the place of the discipline in the social sciences and the interplay of theory and empirical evidence in building an understanding of society, and it provides exposure to a wide range of research topics and results from different areas of study in the field.
SOC 207 Sociology of the Family
Focuses on the Sociological analysis of the family as a major social institution. Topics covered may include, but are not limited to: the various ways in which "families" are defined, and the different forms that families take; the relationship of family life to social processes such as socialization, stratification, and globalization, and the role of families in the interdependent network of social institutions. Prerequisite: Introductory Sociology (SOC-107)
SOC 217 Sociology of Religion
Introduces sociological perspectives on religion and its role in society. Examines the ways in which religion affects—and is affected by—the social context in which it occurs. Although The primary emphasis is on religion in the contemporary United States, though considerable cross-cultural and historical material is may be included as well. The concept of secularization (that both the public and private impact of religion decline as societies modernize) is examined in light of empirical evidence. Examines topics such as religious pluralism, religion and politics, social change, new religious movements, and how religion interacts with other social structures. Prerequisite: Introductory Sociology (SOC-107)
SOC 227 Sociology of Sexuality
SOC-227 Sociology of Sexuality Examines how social contexts in the United States shape sexual practices and identities. Emphasis is on the socially constructed nature of sex and sexuality. Topics covered may include, but are not limited to: interconnections of gender, race, and sexuality; the role of sexuality in various social institutions such as religion, education, and the criminal legal system; and systematic inequalities related to sexuality and gender identity. Prerequisite: Introductory Sociology (SOC-107)
SOC 235 Methods of Sociological Research
Explores various strategies social researchers employ to gather information and test hypotheses about the social world. Topics include data collection, sampling, conceptualization and measurement, and both qualitative and quantitative methods of analysis. Prerequisite: Introductory Sociology (SOC-107) or Introduction to Social and

Criminal Justice (SCJ-101)

SOC 236 Topics in Sociology NWP

Is a course of selected focus that centers on a particular sociological issue, problem, theory, or methodology related to non-Western cultures. Content varies and is determined by the instructor. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Introductory Sociology (SOC-107).

SOC 237 Topics in Sociology:U S Pluralism

Is a course of selected focus that centers on a particular sociological issue, problem, theory, or methodology related to United States Pluralism. Content varies and is determined by the instructor. May be repeated for credit, provided the topics are substantially different. Prerequisite: Introductory Sociology (SOC-107).

SOC 238 Topics in Sociology: DWP

Same as Topics in Sociology (SOC-237) except topic(s) relate to diverse Western cultures. Prerequisite: Introductory Sociology (SOC 107).

SOC 247 Sociology of Race

Examines the role that racial identity and racial inequality play in the contemporary United States. Explores the historical creation of race and racial categories. Focus is on application of theory to better understand the ways that race operates at both the interpersonal and institutional level. Prerequisite: Introductory Sociology (SOC-107)

SOC 257 Sociology of Health & Medicine

Explores the intersections of social structure and process with health, healthcare, and medicine. Topics include but are not limited to social determinants of health, healthcare systems and inequalities, and the social construction of health and illness. Examines how social factors, such as race & ethnicity, class, gender, sexual orientation, and others shape health and healthcare experiences and how health and medical systems reproduce and reinforce social inequalities. Prerequisite: SOC-107 Introductory Sociology.

SOC 286 Global and Transnational Sociology

Examines social structures and practices in a global and transnational perspective. Students are introduced to sociological frameworks to analyze social life within and across national borders. Topics may include, but are not limited to, state formation, nations and nationalism, globalization, peace and conflict, migration, social movements, and inequality. Prerequisite: Introductory Sociology (SOC-107).

SOC 326 Gender and Globalization

Examines processes of globalization through a gendered lens. Focus on the ways global issues such as labor, intimacy, poverty, pop culture, and environmental degradation affect people of different genders in various ways. Also explores how people respond to the forces of globalization and addresses the effects of globalization on the lives of people in the non-Western world. Prerequisite: Introductory Sociology (SOC-107).

SOC 338 Political Sociology

Examines the interconnections between politics and society. Emphasis is on the relationship between the state and social structures of capatalist societies. Theoretical, historical, and comparative materials are considered. Topics may include polititcal power, the polititcs of the welfare state, policy-making, and political participation. Prerequisite: Introductory Sociology (SOC 107)

SOC 351 Criminology

Examines the social meaning of criminal behavior. Looks at the relationship between crime and society—in particular, how the production and distribution of economic, political, and cultural resources shape the construction of "law" and "crime". Includes a comparison of different types of crime, criminals, and victims, as well as at efforts to understand and control them. Prerequisite: Introductory Sociology (SOC-107)

SOC 355 Sociology of Deviance

Examines deviance through sociological theory, focusing on how norms are constructed, challenged, and enforced and how definitions of deviance shape, and are shaped by, social organization and inequality Prerequisite: Introductory Sociology (SOC-107)

SOC 425 Social Change

Theories of change applied to substantive areas (for example, modernization, economic development or restructuring, social values, and social definitions), selected by the instructor. The course addresses the differential experiences of the consequences of change among various social groups. Prerequisite: Methods of Social Research (SOC-235)

SOC 435 Advanced Topics in Sociology
Examines a particular sociological issue, problem, theory, or methodology. Content varies and is determined by the instructor. May be taken more than once for credit, provided the topics are substantially different. Prerequisite: Methods of Sociological Research (SOC-235)
SOC 444 Independent Study
Independent study under faculty guidance of a research problem chosen by the student. May be taken for an X status grade with consent of instructor prior to registration. This course does not satisfy any of the requirements for a major or minor in sociology. Prerequisite: Previous or concurrent enrollment in Sociological Theory (WE) (SOC-450) or consent of department chair.
SOC 445 Small Groups: Self and Society
Examines social interaction and the relationship between self and society, with emphasis on how patterns of interaction shape behavior, identity, and group processes. Prerequisite: Methods of Sociological Research (WE) (SOC-235)
SOC 450 Sociological Theory
Examines the major paradigms and theories in contemporary sociology. The course places particular emphasis on the ways in which those paradigms and theories affect—and are affected by—the process of empirical research. Prerequisites: Methods of Sociological Research (SOC-235) and three other sociology courses above the introductory level.
SOC 464 Sociology Capstone
Focuses on exploring a contemporary social problem or issue using sociological concepts, theories, and methodologies learned in previous sociology courses. Additional emphasis on vocational and career exploration. Prerequisite: Sociological Theory (WE) (SOC-450), and senior standing
SOC 494 Internship in Sociology
A field placement with a career-related organization. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a major or minor in sociology. Prerequisite: declared major in sociology, junior standing, and consent of department chair.

13.50 Spanish/Spanish Studies

Muñoz Pérez, Rodríguez Moreno (Program Coordinator)

13.50.1 Spanish Major

A grade of "C" (2.0) or higher must be earned in all courses counted toward a major in Spanish.

Students who major in Spanish complete a minimum of eight courses in Spanish beyond SPA 225 Intermediate Spanish II, though one class in translation (e.g., SPA 148 Spanish Literature in Translation, SPA 457 US LatinX Literature, ENG 357 Studies in Latinx/ChicanxLiterature, or other) may be taken as one of the eight. SPA 115/125 Elementary Spanish I and II, SPA 135 Spanish Review & Preparation, SPA 215 Intermediate Spanish I, and SPA 225 Intermediate Spanish II are regarded as skill-building courses, and do not count toward the major in Spanish. Spanish students are urged to substitute study abroad in a program approved by the College and the department for up to three courses for the major. Either SPA 345 Introduction to Hispanic Literature, SPA 336 Hispanic Life & Culture: Latin Amer, or SPA 338 Hispanic Life & Culture: Europe must be taken as part of the eight credits.

Students selecting Spanish as a second teaching field should complete a minimum of four Spanish courses numbered 315 or above. Any advanced courses taken for the second teaching field should include SPA 315 Spanish Composition & Conversation.

13.50.2 Spanish Minor

A grade of "C" (2.0) or higher must be earned in all courses counted toward a minor in Spanish.

The minor in Spanish' requires the completion of four courses beyond SPA 225 Intermediate Spanish II, though with the consent of department chair, one class in translation (e.g., SPA 148 Spanish Literature in Translation, SPA 457 US LatinX Literature, ENG 357 Studies in Latinx/ChicanxLiterature, or other) may be taken as one of the four. SPA 115/125 Elementary Spanish I and II, SPA 135 Spanish Review & Preparation, SPA 215 Intermediate Spanish I, and SPA 225 Intermediate Spanish II are regarded as skill-building courses, and do not count toward the minor in Spanish. Either SPA 345 Introduction to Hispanic Literature, SPA 336 Hispanic Life & Culture: Latin Amer, or SPA 338 Hispanic Life & Culture: Europe must be taken as part of the four credits.

13.50.3 Spanish Studies Major

A grade of "C" (2.0) or higher must be earned in all courses counted toward a major in Spanish Studies.

The Spanish Studies major requires: 1) successful completion of four courses beyond SPA 225 Intermediate Spanish II, with SPA 336 Hispanic Life & Culture: Latin Amer or SPA 338 Hispanic Life & Culture: Europe recommended as one of the four; and 2) successful completion of a departmentally approved list of five courses proposed by the student which exhibits both internal coherence and relevance to the course work in Spanish. Typically, application to the department for the approval of the interdisciplinary elected courses is to be made no later than the Spring Term of the junior year. SPA 115/125 Elementary Spanish I and II, SPA 135 Spanish Review & Preparation, SPA 215 Intermediate Spanish I, and SPA 225 Intermediate Spanish II are regarded as skill-building courses, and do not count toward the major in Spanish Studies.

13.50.4 Courses in Spanish

SPA 115/125 Elementary Spanish I and II
Develops basic proficiencies in oral and written communication for students with no previous knowledge of Spanish. The first term emphasizes oral practice in the context of Hispanic Cultures. The second term builds upon acquired skills and includes class discussion, short reading, and writing activities. Prerequisite: appropriate Spanish Placement exam results or consent of instructor.
SPA 129 Intensive Elementary Spanish I-II
Offers students with no prior training a year's worth of basic communicative skills in Spanish in a single term. Students will be introduced to beginning grammar based on a communicative and task-supported curriculum that helps them to develop skills in reading, listening, speaking, and writing in Spanish to engage in interpretive, interpersonal, and presentational modes of communication. (Offered in the summer)
SPA 135 Spanish Review & Preparation
Prepares students who have had some limited experience in Spanish to enter Intermediate Spanish SPA-215 the following term. It provides a complete review of college level elementary Spanish vocabulary, grammar, and oral and written communication. This course is appropriate for students with one recent year of secondary school Spanish or two years if there are significant gaps in learning or if some time has elapsed since their earlier study of Spanish. Prerequisite: appropriate Spanish Placement exam results or consent of instructor.
SPA 148 Spanish Literature in Translation
Focuses on reading and analysis of selected works by major Hispanic authors, centering on a theme, author, time period, or genre. The content varies from term to term. Students pursuing a major or minor in Spanish must write a paper in Spanish. Taught in English.
SPA 215/225 Intermediate Spanish I and II
Follows and builds upon the skills and proficiencies acquired in Continuation of Elementary Spanish, with particular emphasis on oral practice and a review of grammatical structures. Prerequisite: Elementary Spanish II (SPA-125),

Spanish Review and Preparation (SPA-135), appropriate Spanish Placement exam results or consent of instructor.

SPA 258 Spanish Lang Learn in Spain

Features immersive leaning of Spanish in the context of a study abroad course supervised by a Coe faculty member. It includes three hours of daily instruction in Spanish with an additional hour studying the culture and traditions of the country. Prerequisite: consent of instructor. (Offered May Experiential Term only)

SPA 315 Spanish Composition & Conversation

Focuses on further development of oral and written communication skills in appropriate cultural contexts, and includes a review of key problematic structures of the Spanish language. Students write frequent compositions using a variety of structures of the Spanish language, and class time concentrates on conversational activities. Prerequisite: Intermediate Spanish II (SPA-225), appropriate Spanish Placement exam results or consent of instructor.

SPA 325 Spanish Language & Literature

Continues Spanish Composition and Conversation, with an emphasis on speaking and writing. A wide range of short literary texts is also studied. Prerequisite: Intermediate Spanish II (SPA-225), appropriate Spanish placement exam, or consent of instructor.

SPA 330 Spanish for Heritage Speakers

Focuses on the specific linguistic and communicative needs of heritage speakers of Spanish in the context of exploring issues of identity, immigration and community in contemporary Latino communities in the U.S. Assessments based on an exit interview and a portfolio of formal writing. Prerequisite: Spanish placement test or approval of the instructor.

SPA 336 Hispanic Life & Culture: Latin Amer

Offers an interdisciplinary overview of the culture and history of Latin America as portrayed in literature, art, architecture, and film. Particular attention is given to the way the past has created and shaped contemporary Hispanic culture in Latin America. Prerequisite: Spanish Composition and Conversation (WE) (SPA-315), Spanish for Heritage Speakers (SPA-304), or Spanish Language and Literature (WE) (SPA-325). (Offered alternate years)

SPA 338 Hispanic Life & Culture: Europe

Offers an interdisciplinary overview of the culture and history of Spanish in Europe as portrayed in literature, art, architecture, and film, with particular emphasis on how Spanish cultural history shapes the present. Particular attention is given to the way the past has created and shaped Hispanic culture in Spain. Prerequisite: Spanish Composition and Conversation (WE) (SPA-315), Spanish for Heritage Speakers (SPA-304), or Spanish Language and Literature (WE) (SPA-325). (Offered alternate years)

SPA 339 Spanish for Health Care

Focuses on providing Spanish language proficiency for students planning careers in the area of healthcare. Emphasis is placed on the healthcare vocabulary and the culture of the Latino population living in the United States. Local outreach is a required component of this course. Students visit local health clinics, where they are able to volunteer, using their knowledge of Spanish and working as translators. Prerequisite: Intermediate Spanish II (SPA-225) or consent of instructor.

SPA 345 Introduction to Hispanic Literature

Introduces Peninsular and Spanish-American literary works, with an emphasis on basic critical concepts, terminology, and methods. A wide range of texts is studied, beginning with poems and short narratives, and ending with longer works. Prerequisite: Spanish Composition and Conversation (WE) (SPA-315) or Spanish Language and Literature (WE) (SPA-325), or Spanish for Heritage Speakers (SPA-304).

SPA 349 Business Spanish

Focuses on providing Spanish language proficiency for students planning careers in business with emphasis on the variety of Spanish-speaking cultures in the business world and requires local outreach and on-site learning. Prerequisite: Intermediate Spanish II (SPA-225) or consent of instructor.

SPA 394 Directed Learning: Spanish

Allows students to investigate a particular aspect of literature in Spanish unavailable through the regular sequence of courses offered. Periodic conferences and papers are required. May be taken more than once for credit. Prerequisite: Spanish Composition and Conversation (WE) (SPA-315) or Spanish Language and Literature (WE) (SPA-325).

SPA 412 Ecologies:Latin America Environ Lit

Examines Latin American writers and artists who have long focused on nature as a means to address pressing political, social, and ethical issues through literature, ethnographic texts, film and the visual arts. Readings in this class will trace connections between environmental thought and the region's long and multi-layered history of colonialism. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 418 Gender & Sexuality in Hispanic Wrld

Examines constructions and representations of gender, sexuality, and power in Latin American and/or Spanish literature and cultures with particular emphasis on intersections with race/ethnic positioning, sexual identity, and social class. The course adopts an interdisciplinary approach to explore the role and contributions of artists, as well as the reception of their work, with regard to issues surrounding cultural representations of race and ethnicity, masculinity and femininity, gender and sexual identities and LGTBQ+ communities, nationalism and citizenship, and social movements. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 421 Nation, History, and Literature

Focuses on the literature and culture of one nation in the Hispanic world, highlighting their relationship to the specific national history of the country. This class will study a variety of genres: short stories, poetry, and theater. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 428 Indigeneity, Blackness, & EthnicLit

Examines voices of ethnic cultures that have creatively responded to their social and political contexts through literary analysis as well as visual, musical, and other symbolic and representational literacies. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 431 Hispanic Graphic Novel:Theory& Prac

Focuses on providing students with the knowledge to understand cartoons and graphic novels produced in Spanish as a particular medium in relation to a historical context. The class will study theory of comics, the tradition of Hispanic comics, and will hold a workshop where the students learn techniques to develop their own story in a comic format. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338)

SPA 432 Representations of Violence

Explores the relationships between a variety of cultural productions (film, literature, poetry, painting, theater, performance, TV productions, etc.) and specific accounts of personal and collective violence in socio-political conflicts in the Hispanic world. Concepts such as memory, trauma, mourning, and pain will be a central part of this course. Prerequisite: Introduction to Hispanic Literature (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA338).

SPA 442 Popular Culture, Media, & Cultural

Focuses on popular culture with an emphasis on the role of visual and material culture in the Hispanic world as contested territory between power structures and resistance movements. A variety of cultural productions may be included: film, literature, music, internet blogs, YouTube videos, publicity, folklore, dance, TV productions, comic strips, etc. This class will focus on a selected time period and/or geographical region of the Spanish-speaking world. May be taken more than once for credit, if focused on a different region or period. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 443 Cinema & Politics of Representation

Provides a historical and thematic overview of cinema in a selected time period and/or geographical region of the Spanish-speaking world to deepen understanding of and engagement with important and complex cultural issues in relation to both aesthetics and politics, and offers both offers tools and guidance for discussing and writing about film. May be taken more than once for credit, if focused on a different region or period. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 444 Ind Study-Spanish

Allows students to design and undertake a selected project in Spanish under the direction of a faculty member of the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite:

consent of department chair.

SPA 446 Latin Am. & Spanish Short Stories

Focuses on the rich and varied literary production of the short story in Latin America and/or Spain. Readings may include a wide range of short narratives with an emphasis on those of the 20th and 21st century. Prerequisite: Introduction to Hispanic Literature (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 451 Hispanic Cross-Over Literature

Focuses on literature that is designed for children or for both adults and children. Texts for this class will intersect with notions of memory, education, censorship, and the dialogue between image and written text. The class will emphasize the picture-book (álbum ilustrado), and it will hold a workshop where the students learn techniques to develop their own. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 455 Spanish Drama

Focuses on providing students with the elements to appreciate and analyze Spanish and US Latinx theatre and performance art. This class will introduce students to the various techniques, themes, and images used to express, criticize, or romanticize Hispanic society and life, and may include the staging of a play. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336/ SPA-338).

SPA 457 US LatinX Literature

Focuses on the major trends of LatinX literature that highlight the experiences of LatinX people within the US. Topics will include bilingualism, code-switching, identity, borders, immigration, and exile in LatinX groups such as Chicano/a, Nuyorican, Boricuas, Dominicans, etc. Their cultural productions will be analyzed within their social and political context and texts assigned will be in English, Spanish or mixed. Prerequisite: Introduction to Hispanic Literature (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 458 Travel Writing & Transatlantic Lit

Explores the varying perceptions of life, history, culture, traditions, and customs in Spain and Latin America across time and space through the accounts of travel narratives through interdisciplinary perspectives. Prerequisite: Introduction to Hispanic Literature (SPA-345) or Hispanic Life and Culture (SPA-336 / SPA-338).

SPA 464 Capstone in Spanish

Serves as the final requirement designed for Spanish majors who are graduating seniors. Students will polish a research paper written for any of the advanced classes in a previous semester. They will demonstrate the skills acquired throughout the major, such as: critical reading and writing, textual analysis, and original thinking regarding a historical and cultural topic related to Latin America and/or Spain. At the end of the course, students should present their research work on a conference-like panel open to the public. (Offered every spring)

SPA 475/485 Topics in Hispanic Literature (WE)

Centers on a particular theme, author, region, time period, or genre of Hispanic literature. Approach and content vary from term to term as determined by the instructor. May be taken more than once, provided the topics are substantially different. Prerequisite: Introduction to Hispanic Literature (WE) (SPA-345) or Hispanic Life and Culture (SPA-336/ SPA-338).

SPA 476/486 Topics in Hispanic Society and Culture (WE)

Centers on a particular theme, author, region, time period, or genre of Hispanic culture and society. May be taken more than once, provided the topics are substantially different. Prerequisite: Consent of instructor.

SPA 494 Internship in Spanish

Allows students to explore a career area related to Spanish. Application and supervision through the Internship Specialist. A minimum of 140 hours on-site experience is required. P/NP basis only. This course does not satisfy any of the requirements for a major or minor in Spanish. Prerequisites: junior standing and consent of department chair.

13.51 Sports Management (Courses Only)

See Sports Management Concentration in Business, Section 13.10.3.9

13.51.1 Courses in Sports Management

SMT 100 Introduction to Sports Management
An introductory course in sports management. This course provides an overview of the historical, legal, economic, political, and social-cultural issues that shape the field of sports management. The skills needed for managing sports organizations, from recreational to collegiate and professional, are also introduced. The course will look at the key functional areas of sport management such as marketing, communication, finance and economics and facility and event management.
SMT 300 Sport/Recreation Event Management
An introduction to the principles and procedures for preparing, planning, operating, managing, and evaluating events and venues in sports settings. Students will gain a greater understanding of event and venue management and the total operation of sports organizations. Prerequisite: SMT-100: Introduction to Sports Management
SMT 450 Seminar in Sports Management
A lecture/discussion-based course in which relevant and current research and industry trends are thoroughly reviewed and analyzed. Students are encouraged to take this course near the end of their careers as undergraduate students in the sports management concentration. Prerequisite: Introduction to Sports Management (SMT-100).
SMT 494 Internship in Sports Management
An internship with a focus on sports management supervised by a faculty member teaching within the sports management concentration. A minimum of 140 hours on-site experience is required. Students must document and analyze the experience through a journal and final report or through other written work as assigned by the faculty supervisor. P/NP basis only. A maximum of one credit may count toward the concentration with the approval of the administrative coordinator(s) of the concentration. Prerequisites: junior standing and consent of administrative coordinator(s).

13.52 Statistics (Courses Only)

Cross

13.52.1 Courses in Statistics

STA 100 Statistical Reasoning I-Foundations
A hands-on introduction to the use of statistical techniques. Provides a foundation for statistical analysis and introduces the basic concepts involved in data collection and presentation. (0.5 course credit) (Offered first 7 weeks of Term)
STA 105 Probability: A World of Chance
An introduction to probability and its applications in our world. This hands-on course examines how probability techniques can be used to understand topics in science, government, recreation, and communication. Bizarre events in everyday life are also discussed. This course is appropriate for a varied audience. Some ability in arithmetic and elementary algebra is assumed. This course does not satisfy any of the requirements for a major or minor in the mathematical sciences.
STA 110 Stats IIA: Inferential Reasoning
A continuation of Statistical Reasoning I (STA-100), presenting a broad range of data analysis techniques. Topics covered include hypothesis testing, confidence intervals, Chi-square tests, and regression. Emphasis is on a project-based approach to analyzing data. Prerequisite: Statistical Reasoning I (STA-100) or consent of instructor. (0.5 course credit) (Offered second seven weeks of Term)
STA 130 Stats IIB: Experimental Design
A continuation of Statistical Reasoning I (STA-100), with an emphasis on Analysis of Variance designs. Topics covered include factorial, nested, and hierarchical models. Coursework uses a project-based approach to analyzing data. Prerequisite: Statistical Reasoning I (STA-100) or consent of instructor. (0.5 course credit) (Offered second

seven weeks of Term)

STA 315 Mathematical Probability

A calculus-based introduction to the mathematical theory of probability. Topics include enumeration techniques, Bayes' theorem, random variables, discrete and continuous distributions, expectation, moment-generating functions, sampling distribution theory, and simulation techniques. Prerequisites: Computational Linear Algebra (MTH-165) and Calculus II (MTH-145), or consent of instructor.

STA 325 Mathematical Statistics

A calculus-based introduction to the mathematical theory of statistics. Topics include point and interval estimation, hypothesis tests, regression, analysis of variance, nonparametric methods, and Bayesian methods. Prerequisites: Computational Linear Algebra (MTH-165) and Calculus II (MTH-145), or consent of instructor.

13.53 Theatre Arts

Ganfield (Co-Chair), Rezabek, Schmidt (Co-Chair)

Mission Statement

The mission of Coe's Theatre Department is to provide hands-on training in theatre making (in classes, labs and productions) with a collaborative process that builds community, fosters global awareness and examines the complexities of diverse human narratives.

The Theatre Arts major, minor and emphases are based in experiential learning encompassing diverse aspects of theatre that include the examination of the human condition through creative expression, collaboration, verbal and visual communication, problem-solving and design thinking. The practicum is completed with either a theatre internship, NY Term Internship or Independent Study. Because of significant overlap in the Theatre Arts major and the Theatre Arts majors with emphasis, only one major may be earned.

For the campus community at large, as audience members or as occasional participants, the program offers a wide range of drama selected both to educate and to entertain.

13.53.1 Theatre Arts Major

A major in Theatre Arts requires a cumulative 2.0 GPA in all courses counted toward the major.

A Theatre Major consists of the core courses 1–6 and an additional **four** THE course credits with at least **three** at the 200 level or above.

1. THE 100 Introduction to Theatre
2. THE 130 Technical Production I
3. THE 140 Design for the Stage
4. THE 150 Acting I
5. THE 102 Theatre Production Lab (0.25 course credit each) (may be taken twice to replace one THE 112 Production Experience for a total one full credit of technical theatre experience)
   or
   THE 112 Production Experience (0.50 course credit each) (may be taken twice for one full credit or in combination with THE 102 Theatre Production Lab taken twice for one full credit)

6. THE 185 Production and Performance
7. **Four** of the following:
    - THE 162 Stage Make-Up
    - THE 220 Lighting Design
    - THE 255 Playwriting Workshop I
    - THE 283 Arts Administration
    - THE 288 History of Dress
    - THE 355 Playwriting Workshop 2
    - THE 444 Ind Study-Theatre
    - THE 455 Playwriting Workshop 3
    - THE 486 Spc Top Theatre or Film: NWP
    - THE 494 Internship in Theatre Arts
    - NYT 250 Fine Arts in New York City
    - SPA 455 Spanish Drama
    - THE 161 Afro-Latin Dance

13.53.2 Theatre Arts Minor

The minor in Theatre Arts consists of any **six** full-credit-equivalent course credits selected from the following:

- THE 100 Introduction to Theatre
- THE 102 Theatre Production Lab (0.25 course credit each) (may be taken twice to replace one THE 112 Production Experience for a total of one full credit of technical theatre experience)
- THE 112 Production Experience (0.50 course credit each) (may be taken twice for one full credit or in combination with THE 102 Theatre Production Lab taken twice for one full credit)
- THE 130 Technical Production I
- THE 140 Design for the Stage
- THE 150 Acting I
- THE 162 Stage Make-Up

- THE 185 Production and Performance (may be taken once for minor credit)
- THE 220 Lighting Design
- THE 255 Playwriting Workshop I
- THE 283 Arts Administration
- THE 288 History of Dress
- THE 355 Playwriting Workshop 2
- THE 444 Ind Study-Theatre
- THE 455 Playwriting Workshop 3
- THE 486 Spc Top Theatre or Film: NWP
- THE 494 Internship in Theatre Arts
- SPA 455 Spanish Drama
- THE 161 Afro-Latin Dance

13.53.3 Theatre Major Areas of Emphasis

Theatre Major areas of emphasis are designed to allow students to align a core of study in theatre arts with interdisciplinary coursework in other disciplines to create career pathways in the following areas.

13.53.3.1 Secondary Education Endorsement in Theatre Arts

1. THE 100 Introduction to Theatre
2. ENG 111 Intro to Lit:Art of Rdng & Writing
3. THE 102 Theatre Production Lab (0.25 course credit each) (may be taken twice to replace one THE 112 Production Experience for a total one full credit of technical theatre experience)
   or
   THE 112 Production Experience (0.50 course credit each) (may be taken twice for one full credit or in combination with THE 102 Theatre Production Lab taken twice for one full credit)
4. COM 125 Fundamentals of Public Speaking
5. THE 130 Technical Production I
6. THE 140 Design for the Stage
7. THE 150 Acting I

8. THE 185 Production and Performance (One required, may be taken again as elective)

9. ENG 382 Shakespeare:Comedies/Romances
   or
   ENG 383 Shakespeare:Tragedies & Histories

10. At least **three** of the following selected in consultation with advisor:
    - THE 162 Stage Make-Up
    - THE 185 Production and Performance
    - THE 255 Playwriting Workshop I
    - THE 288 History of Dress
    - THE 355 Playwriting Workshop 2
    - THE 444 Ind Study-Theatre
    - THE 455 Playwriting Workshop 3
    - THE 486 Spc Top Theatre or Film: NWP
    - THE 494 Internship in Theatre Arts

13.53.3.2 Theatre Arts Management Emphasis

1. THE 100 Introduction to Theatre

2. THE 102 Theatre Production Lab (0.25 course credit each) (may be taken twice to replace one THE 112 Production Experience for a total one full credit of technical theatre experience)
   or
   THE 112 Production Experience (0.50 course credit each) (may be taken twice for one full credit or in combination with THE 102 Theatre Production Lab taken twice for one full credit)

3. THE 130 Technical Production I

4. THE 140 Design for the Stage

5. THE 150 Acting I

6. THE 185 Production and Performance (at least once as stage manager)

7. THE 283 Arts Administration

8. THE 494 Internship in Theatre Arts
   or
   NYT 250 Fine Arts in New York City

9. **Two** additional theatre courses 200 level or above:
    - THE 220 Lighting Design
    - THE 255 Playwriting Workshop I
    - THE 288 History of Dress
    - THE 355 Playwriting Workshop 2
    - THE 444 Ind Study-Theatre
    - THE 455 Playwriting Workshop 3
    - THE 486 Spc Top Theatre or Film: NWP
    - THE 494 Internship in Theatre Arts (if not used to satisfy #8)
    - NYT 250 Fine Arts in New York City (if not used to satisfy #8)

10. At least **two** additional full course credit equivalents selected in consultation with advisor from the list:
    - BUS 125 Computers in Business
    - PR 205 Public Relations
    - BUS 250 Principles of Management
    - COM 322 Prof Communication & Writing (WE)
    - BUS 280 Business Websites (0.50 course credit)
    - BUS 281 Social Media in Business (0.50 course credit)
    - BUS 300 Human Resource Management
    - BUS 330 Principles of Marketing

13.53.3.3 Performing Arts Emphasis

1. THE 100 Introduction to Theatre
2. THE 130 Technical Production I
3. THE 140 Design for the Stage
4. THE 150 Acting I
5. THE 185 Production and Performance (taken twice in performance role)

6. THE 494 Internship in Theatre Arts
   or
   NYT 250 Fine Arts in New York City

7. At least **two** additional full credit course equivalents in consultation with advisor from the following list:
   - ENG 111 Intro to Lit:Art of Rdng & Writing
   - ENG 382 Shakespeare:Comedies/Romances
   - ENG 383 Shakespeare:Tragedies & Histories
   - THE 162 Stage Make-Up
   - THE 255 Playwriting Workshop I
   - THE 288 History of Dress
   - THE 355 Playwriting Workshop 2
   - THE 444 Ind Study-Theatre
   - THE 455 Playwriting Workshop 3
   - THE 486 Spc Top Theatre or Film: NWP
   - THE 494 Internship in Theatre Arts
   - NYT 250 Fine Arts in New York City
   - SPA 455 Spanish Drama
   - THE 161 Afro-Latin Dance

8. **Four** MUA- vocal ensemble or vocal lessons full credit equivalent experiences

13.53.4 Courses in Theatre Arts

THE 100 Introduction to Theatre
A study of the art of theatre, emphasizing theatre's place among the humanities; its relationship to the other arts; and its cultural and social influences in our society. Students derive a foundation for discriminating theatregoing through analysis of dramatic form and of selected playtexts; consideration of the methods and techniques employed by theatre artists and crafts persons; and a brief survey of theatre and drama, both in their historical context and as they have been manifested through related media. As part of the study, students are required to attend some evening events. This course does not satisfy any of the requirements for a major in theatre arts.
THE 102 Theatre Production Lab
Applied skills in one of the theatre production crews. Students assist with set construction, costuming, lighting, painting, publicity, sound, or run-crew positions for productions during a term. No previous experience is required. Lab meets four hours per week. Theatre arts majors are required to take four labs. (0.25 course credit)
THE 112 Production Experience

Practical involvement in a mainstage production as an actor (in a leading or secondary role), stage manager, assistant director, dramaturge, technical crew head (property master, master electrician, wardrobe master, etc.), or in another capacity as approved by the faculty (excluding run-crew positions). May be taken more than once. Prerequisite: consent of department chair. (0.5 course credit)

THE 118 Theatre & Arts in Serbia

Explores the recent history and political realities of Belgrade, Serbia, through the lens of Theatre and other art forms, as well as visits to multiple cultural formations: museums, churches, monuments and schools. Prerequisite: consent of instructor. (Offered May Experiential Term only)

THE 130 Technical Production I

An introduction to the technical aspects of theatre production. Topics covered include safety, mechanical drawing, stage carpentry, craft techniques, stage lighting and electricity, costume construction, scene painting, and production organization. Class includes lecture-demonstration and practical application. Additional time outside of class is necessary to complete projects. (Offered Fall Term)

THE 140 Design for the Stage

Examines the design process for all aspects of theatre design (costume, scenery, and lighting). Specific topics include the design elements, script analysis, research, basic drawing, basic drafting, and presentation techniques. A series of projects and readings introduce students to the basic language of visual story telling. Additional time outside of class is necessary to complete projects. (Offered Spring Term)

THE 150 Acting I

Stanislavsky-based, comprehensive introduction to the elements of acting for the stage. Through theatre games, improvisations, exercises, and partnered work on scenes grounded in realism, students learn to identify and personalize a character's "objectives" and the "obstacles" that stand in the way of attaining them, and to engage themselves (via voice, body, mind, and spirit) in specific "actions" undertaken in pursuit of those identified goals. Emphasis is placed on "interactive" skills and on character-specific listening. Additional rehearsal time outside of class is required.

THE 160 Movement for the Stage

Designed to help students learn the effective use of the body as a component of the acting process. Physical expression in movement and gesture is developed by way of in-class exercises and improvisations, leading to the solo and collaborative creation of movement pieces for performance. Skills of concentration, breath control, partner awareness, and physical characterization are also fostered in this work.

THE 161 Afro-Latin Dance

Focuses on dances developed in the Americas as a result of the process of transculturation of African people brought into these lands. Afro-Latin dances are reviewed in relation to conceptions of community and the sacred, identity as well as migratory issues. This class is strongly interdisciplinary. The course includes a significant practical component, allowing students to acquire the footwork, fundamental steps, and sequences, alongside the historical context of several Afro-Latin dances: Dominican merengue and bachata, Latinx salsa, Argentine tango, Colombian cumbia, and Brazilian samba. No dance experience is required.

THE 162 Stage Make-Up

The theory and practice of designing and creating make-up for the stage actor. Lecture/demonstration plus laboratory experience.

THE 170 Voice & Diction

Designed to help students learn how to use the voice as a component of the acting process. The mechanics of vocal production and of speech are examined, along with various approaches for their improvement. A number of performance projects supplement a wide range of vocal exercises and drills. Students are introduced to the International Phonetic Alphabet (IPA) as the basis for determining correct pronunciation, both in standard speech and in preparing dialects and accents. Additional rehearsal time outside of class is required.

THE 185 Production and Performance

A "theatre company" consisting of actors, designers, a stage manager, costume, set, and lighting crew (plus an accompanist and choreographer, if needed). The company has as its goal the mounting of the chosen production in a fully-collaborative atmosphere. In addition to fulfilling their various creative functions, company members may

be asked to take on, under the supervision of a faculty member of the department, dramaturgical assignments designed to provide research and study on selected aspects of the play or musical. This material is presented to the Coe community in the form of public displays throughout the campus. Company members need to audition prior to spring registration. The basis for student evaluation is completion of assigned duties and quality of work. May be taken more than once for credit. A maximum of two course credits may be counted toward a major or minor in theatre arts. (Offered Spring Term)

THE 220 Lighting Design

A study of the equipment, mechanics, and theories used by lighting designers to produce lighting for theatre, dance, concerts, and architecture. Specific topics include design research and conceptualization, color, angle, cueing, and methods of presentation (sketches, storyboards, light plots, and associated paperwork). Class includes lecture/demonstration and practical application. Additional time outside of class is necessary to complete projects. Prerequisites: Design for the Stage (THE-140) and Technical Production I (THE-130) or consent of instructor. (Offered Spring Term, alternate years)

THE 228 History of Theatre and Drama I

A writing intensive course that provides students with an overview of World Theatre and Drama from cultures where oral traditions were the dominant forms of communication through and including those wherein the written word presented a new paradigm. The course provides a practical investigation of current critical discourses that examine dramatic literature and performance traditions from around the world. (Offered Fall Term in rotation with History of Theatre and Drama II (THE-238))

THE 232 Computer Aided Drafting and Design

An introduction to the use of the computer as a drafting and design tool. Using theatre-related examples and projects, students create two- and three-dimensional drawings. Further work involves 3-D modeling and creating perspective images of virtual stage settings. Class includes lecture/demonstration and laboratory. Additional time outside of class is necessary to complete projects. (Offered Spring Term, alternate years)

THE 238 History of Theatre and Drama II

A writing intensive course that provides students with an overview of World Theatre and Drama, focusing primarily on cultures and periods wherein new forms of technology, from the camera to the computer, have become determining factors in systems of communication. The course provides a practical investigation of current critical discourses that examine dramatic literature from around the world. (Offered Fall Term in rotation with History of Theatre and Drama I (THE-228))

THE 242 Scene Design

A study of the aesthetic, historical, and technical aspects of stage design. Projects emphasize research, drawing, drafting, problem solving, model building, and rendering. Class includes lecture/demonstration and practical application. Additional time outside of class is necessary to complete projects. Prerequisites: Technical Production I (THE-130) and Design for the Stage (THE-140) or consent of instructor.

THE 250 Acting II

A performance-based studio course designed to expand upon the work begun in Acting I by assisting students in the development of intermediate-level acting skills. Scenes and monologues progress beyond realism with an introduction to a number of other styles. Significant emphasis is placed on character development and on detailed analysis of dramatic action. Additional rehearsal time outside of class is required. Prerequisite: Acting I (THE-150). (Offered Spring Term)

THE 255 Playwriting Workshop I

See CRW 255 Playwriting Workshop I , Section 13.18.4

Explores the basics of playwriting through the study of dramatic structure, creative exercises, and reading and analysis of existing play scripts, with emphasis on the one-act play. Students complete a one-act play script of their own creation.

THE 260 Acting for the Camera

Development of basic acting techniques essential for work in film and television. The course is designed to help students become comfortable in front of the camera by way of breaking down their physical and internal inhibitions. The instructor helps the student find the most effective personal resources for the creation of truthful characters,

given the unique pressures of a film or television shoot. The course also focuses on audition techniques and culminates in the shooting of a scripted scene. Additional rehearsal time outside of class is required. Prerequisite: Acting I (THE-150).

THE 270 Musical Theatre Acting

See MU 270 Musical Theatre Acting , Section 13.38.6

A performance-based studio course focusing on the development of basic skills necessary for musical theatre performance. Students become familiar with the specialized requirements necessary for the merging of singing with dramatic action. Periodic performance projects (solos, duets, and ensemble numbers—some including dialogue) are supplemented by student research projects. The course is also designed to introduce students to a wide-ranging repertoire of available audition material. Additional rehearsal time outside of class is required.

THE 280 Costume Design

A study of the aesthetic, historical, and technical aspects of costume design. Projects emphasize research, character analysis, figure drawing, textile selection, and rendering. Class includes lecture-demonstration and practical application. Additional time outside of class is necessary to complete projects. Prerequisites: Technical Production I (THE-130) and Design for the Stage (THE-140) or consent of instructor.

THE 283 Arts Administration

MS-283 Arts Administration Implements the skills and guiding principles of managing arts-related organizations, in particular non-profits. Through collaborative efforts, students learn about project development and implementation, focusing on goal-setting initiatives, financial planning, marketing and advertising, viewership and participation, and audience awareness. Current issues and challenges facing nonprofit arts organizations will be addressed as well. Cross listed with MS-283 and MU-283.

THE 288 History of Dress

Traces the history of dress from ancient to modern times, with a special emphasis on dress as it relates to gender roles, social issues, cultural practices and beliefs, politics, and economic patterns within an historical context.

THE 290 Directing I

Offers students an introduction to the fundamental tools of directing plays for the stage. Analysis of playtexts is undertaken to demonstrate how a director develops the vision of a play that serves as an interpretive guide throughout the production process. In-class exercises, improvisations, and staged “image” pieces focus on the acquisition of skills for communicating effectively with actors. Scene projects are rehearsed outside of class for in-class presentation, and comprehensive promptbooks are prepared in conjunction with each. Additional rehearsal time outside of class is required. Prerequisite: Acting I (THE-150). (Offered Spring Term)

THE 350 Advanced Acting:Shakespeare

A performance-based studio course aimed at the development of advanced-level acting skills specifi- cally related to performing the playtexts of William Shakespeare. An eclectic approach to this complex material is offered, with emphasis divided between its verbal, physical, and psychological demands. Students prepare and perform several scenes and monologues throughout the term. Exercises and improvisations related to characterization and written character analyses are also components of this course. Additional rehearsal time outside of class is required. Prerequisite: Acting I (THE-150).

THE 355 Playwriting Workshop 2

See also CRW 355 Playwriting Workshop 2 , Section 13.18.4

Focuses on the analysis and creation of play scripts of two acts or more. Emphasis is placed on the writing and marketing of the student’s own creative work, culminating in the completion and public reading of a full-length script. Prerequisite: Playwriting Workshop I (CRW/THE-255).

THE 390 Directing II WE

An intermediate-level course or independent study expanding upon the work begun in Directing I by developing more complex analytical tools and deepening the work of conceptualization for production. Assigned readings guide the directing student to knowledge and understanding of a wide variety of 20th-century and contemporary directing theories and methodologies. The course culminates in the analysis and preparation with actors of a short one-act play or an extended scene from a full-length play that allows the student director to work in a non-realist style. Prerequisite: Directing I (THE-290). (Offered by arrangement)

THE 442 Adv Proj-Design/Tech Production
Individual work in a specific aspect of theatrical production: lighting design, costume design, scene design, sound design, technical direction, or stage management. A written proposal, conceptual statement, documentation of process, and self-evaluation are components of this upper-level course. May involve actual work for a departmental production. May be taken more than once, provided the emphasis varies. Prerequisite: consent of department chair. (Offered by arrangement)

THE 444 Ind Study-Theatre
Independent study under the direction of a faculty member of the department. May be taken for an X status grade with consent of instructor prior to registration. Prerequisite: consent of instructor.

THE 452 Advanced Projects in Acting
A senior acting recital designed to demonstrate the proficiency level of majors with an acting emphasis. The recital may take the form of a one-person performance or a selection of scenes, monologues, and /or musical numbers demonstrating the student's range and versatility. The project requires conceptualization, organization and selection of performance material, and adherence to a pre-arranged rehearsal process. Written components include a detailed proposal, a comprehensive statement of concept, thorough documentation of process, and analytical self-evaluation. Prerequisites: senior standing and consent of department chair. (Offered by arrangement)

THE 455 Playwriting Workshop 3
See also CRW 455 Playwriting Workshop 3 , Section 13.18.4
Continued advanced writing, with an emphasis on producing finished plays. Prerequisite: Playwriting Workshop 2 (CRW/THE-355).

THE 462 Advanced Projects in Directing
The faculty-supervised staging of an extended one-act or a full-length play as an advanced project. The production is staged in the Mills Experimental Theatre and may receive modest technical and design support, when appropriate. Comprehensive playtext analysis and documentation of process are components of this course. Prerequisite: Design for the Stage (THE-140), Directing II (THE-390), or consent of department chair. (Offered by arrangement)

THE 464 Senior Seminar
Capstone course for theatre arts majors that requires students to synthesize their study of dramatic theory and literature and their experiences in theatre performance and production. Assignments center on dramaturgy, dramatic theory and criticism, and on the current state of the art. Required of theatre arts majors in their senior year. (Offered Fall Term)

THE 486 Spc Top Theatre or Film: NWP
Focuses on specific aspects of theatre or film. Possible topics include: Asian Theatre in Perspective and Cinema of Japan. May be taken more than once, provided the topics are substantially different. With departmental approval, this course may be used to satisfy the requirements for a major in Theatre Arts.

THE 488 Special Topics in THE/ FLM:DWP
Focuses on specific aspects of theatre or film. Possible topics include: Eastern European Theatre, Post-War Eastern European Cinema, Queer Cinema, Feminist Theatre. May be taken more than once, provided the topics are substantially different. With departmental approval, this course may be used to satisfy the requirements for a major in theatre arts.

THE 494 Internship in Theatre Arts
An experience in professional or community theatre under the direction of an on-site supervisor in cooperation with a faculty member of the department and the Internship Specialist. A minimum of 140 hours on-site experience is required. P/NP basis only. One internship credit may be used to satisfy the requirements for a major in theatre arts. Prerequisites: junior standing, declared major in Theatre Arts, and consent of department chair.

14 RESERVE OFFICER TRAINING CORPS

14.1 Aerospace Studies

Clark, Spyker

14.1.1 Air Force ROTC Courses

The Air Force Reserve Officers' Training Corps (AFROTC) program at Coe College is administered through a cross-enrollment agreement with the Department of Aerospace Studies at the University of Iowa in Iowa City. Classes are held at the University of Iowa or at Coe College. Information on the Air Force ROTC program is available by contacting the Department of Aerospace Studies at 319-335-9221.

Air Force ROTC is typically a four-year program divided between the General Military Course (first two years), field training, and the Professional Officer Course (last two years). Enrollment in the General Military Course is open to all students and carries no service obligation. Students can join the program any time during their first or freshman year. Students who complete the General Military Course attend a paid two-week field training course. Normally, students attend the camp between the sophomore and junior years of college. Successful completion of field training and the Professional Officer Course culminates in the student receiving a commission as an officer in the United States Air Force. Opportunities are available in approximately 100 career fields.

Students are supplied all AFROTC books, uniforms, and necessary materials free of charge. All students in the Professional Officer Course receive a monthly stipend of either $450 or $500. Veterans continue to draw both the AFROTC stipend plus any VA educational benefits to which they are entitled. General Military Course Students are eligible to apply for AFROTC two- and three-year scholarships which provide tuition, books, fees, and between $300-$500 tax-free monthly stipend.

MSA 110 Air Force Heritage and Values I
A survey course designed to introduce students to the United States Air Force (USAF) and Air Force Reserve Officer Training Corps (AFROTC). Featured topics include: structure of the U.S. Air Force, the Air Force's capabilities, career opportunities, benefits, Air Force installations, core values, leadership, teambuilding, and communication skills. Prerequisite: first-year or sophomore standing. (0.25 course credit)
MSA 110L AFROTC Leadrshp Lab I
A progression of experiences designed to develop leadership ability; includes military customs and courtesies, drill and ceremonies, military professional development, and the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Corequisite: Foundations of the U.S. Air Force I (MSA-110); Prerequisite: first-year or sophomore standing. (0.25 course credit)
MSA 120 Air Force Heritage and Values II
A survey course designed to introduce students to the United States Air Force (USAF) and Air Force Reserve Officer Training Corps (AFROTC). Spring semester featured topics include: Evolution of the U.S. Air Force/Air Force history, Principles of War/Tenets of Air Power, What the Air Force Brings to the Joint Fight and a look at the Department of the Air Force and Air Force Major Commands. It will also introduce several leadership concepts, to include ethical decision-making, communication, and professional speaking opportunities. Prerequisite: first-year or sophomore standing. (0.25 course credit)
MSA 120L AFROTC Leadrshp Lab II

See MSA-110L. Corequisite: Air Force Heritage and Values II (MSA-120) (0.25 course credit)

MSA 210 Team and Leadership Fundamentals I

Provide the foundation for both leadership and team building. The concepts will be applied in team building activities and class discussion to include demonstration of basic verbal and written communication. Featured topics include: listening, followership, and problem solving efficiently. (0.25 course credit)

MSA 210L AFROTC Leadrshp Lab ASP I

See MSA-110L. Corequisite: Team and Leadership Fundamentals I (MSA-210). (0.25 course credit)

MSA 220 Team and Leadership Fundamentals II

Provide the foundation for both leadership and team building. The concepts will be applied in team building activities and class discussion to include demonstration of basic verbal and written communication. Featured topics include: Conflict Management, Comprehensive Airman Fitness, and a Leadership Capstone. (0.25 course credit)

MSA 220L AFROTC Leadrshp Lab ASP II

See MSA-110L. Corequisite: Team and Leadership Fundamentals II (MSA-220) (0.25 course credit)

MSA 310 Leadership Studies: I

Course is designed to build on the leadership fundamentals taught in AERO 2100 and AERO 2200. The class studies leadership and leadership skills to use in your future Air Force environment. You will study the profession of arms, communications skills, and ethics. Case studies will be used to examine Air Force leadership situations, and to demonstrate and exercise practical application of the concepts you study. (0.75 course credit)

MSA 310L AFROTC Leadrshp Lab AFLS I

See MSA-110L. Corequisite: Leadership Studies: Leading People and Effective Communication I (MSA-310). (0.25 course credit)

MSA 320 Air Force Leadership Studies II

Class studies leadership and leadership skills used in your future Air Force environment. You will continue to study the profession of arms, communications skills, and ethics taught in AERO 3100, in addition to learning more about creating a vision, mentoring, and other leadership fundamentals. Additionally, you will continue to hone your reading, writing, and speaking skills via several communication studies applications. Case studies will be used to examine Air Force leadership situations, and to demonstrate and exercise practical application of the concepts you study. The goal is to instill a more in-depth understanding of how to effectively lead people and organizations. (0.75 course credit)

MSA 320L AFROTC leadrshp Lab AFLS II

See MSA-110L. Corequisite: Leadership Studies: Leading People and Effective Communication II (MSA-320). (0.25 course credit)

MSA 410 National Security / Leadership I

Class is designed for college seniors and gives them the foundation to understand their role as military officers and how they are directly tied to our National Security Strategy. It is an overview of the complex social and political issues facing the military profession. Additionally, you will improve your oral and written communication skills and delve into military professionalism and ethics. (0.75 course credit)

MSA 410L National Security Leadership I

See MSA-110L. Corequisite: National Security / Leadership Responsibilities and Commissioning Preparation I (MSA-410). (0.25 course credit)

MSA 420 National Security / Lead II

National Security / Leadership Responsibilities and Commissioning Preparation I (MSA-340) introduced the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. This class will expand your knowledge to comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system. It is designed to prepare cadets for life as a second lieutenant. Additionally, you will continue to improve your oral and written communication skills. (0.75 course credit)

MSA 420L National Security Lab

See MSA-110L. Corequisite: National Security / Leadership Responsibilities and Commissioning Preparation II (MSA-420). (0.25 course credit)

14.2 Military Science

Guderski

14.2.1 Army ROTC Courses

The Army Reserve Officers' Training Corps (ROTC) program at Coe College is administered through a cross-enrollment agreement with the Department of Military Science at The University of Iowa in Iowa City. Classes are held either at The University of Iowa or at Coe College, depending upon the size of class enrollment. Information on the Army ROTC program is available by contacting the Department of Military Science at (319) 399-8297 or the website at http://armyrotc.com/edu/univia/index.htm

All students are eligible to apply for ROTC two-, three-, and four-year scholarships which cover tuition and fees, books and supplies, and a tax-free monthly stipend during the academic year. The Army National Guard and Army Reserve also provide financial assistance through membership with a respective unit.

14.2.1.1 Basic Course

The ROTC Basic Course is primarily for first- and second-year students. It provides the fundamentals of leadership and management and introduces the roles of the military as influenced by national and foreign policy. Enrollment in the Basic Course is open to all students and carries no service obligation. Students with prior military training normally are exempt from the Basic Course requirements.

Students may complete the Basic Course requirements over a one- or two-year period, or during a four-week fully-paid summer training session, the Leader's Training Course (LTC), held at Fort Knox, Kentucky. Students normally attend the camp between the sophomore and junior years of college.

MIL 101 Leadership & Pers Devel
Introduces students to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as critical thinking, goal setting, time management, physical fitness, and stress management relate to leadership, officership, and the army as a profession. The focus is on the dimensions of army leadership; understanding of the ROTC program, its purpose in the army, and its advantages for students. (0.25 course credit) (Offered Fall Term; Spring Term by arrangement)
MIL 102 Intro Tactical Leadership
Overviews leadership fundamentals such as setting direction, problem-solving, listening, presenting briefs, providing feedback, and using effective writing skills. Students explore dimensions of leadership values, attributes, skills, and actions in the context of practical, hands-on, and interactive exercises. Continued emphasis is placed on recruitment and retention of cadets. Cadre role models and the building of stronger relationships among the students through common experience and practical interaction are critical aspects of the class. (0.25 course credit) (Offered Spring Term; Fall Term by arrangement)
MIL 103 Innovative Team Leadership
Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and historical leadership theories central to the Army leadership framework; personal motivation and team building through planning, executing, and assessing team exercises and participating in leadership labs; continued development of leadership values and attributes through understanding of army rank, structure, duties, basic aspects of land navigation and squad tactics. Case studies provide tangible context for learning the soldier's creed and warrior ethos as they apply in the contemporary operating environment (COE). (0.5 course credit) (Offered Fall Term; Spring Term by arrangement)
MIL 104 Foundations of Tactical Leadership
Examines the challenges of leading tactical teams in the complex contemporary operating environment (COE). The course highlights dimensions of terrain analysis, patrolling, and operation orders. Further study of the theoretical

basis of the Army leadership framework explores the dynamics of adaptive leadership in the context of military operations. Students develop greater self-awareness as they assess their own cadet leadership styles and practice communication and team building skills. Case studies give insight into the importance and practice of teamwork and tactics in realworld scenarios. (0.5 course credit) (Offered Spring Term; Fall Term by arrangement)

14.2.1.2 Advanced Course

The ROTC Advanced Course is open to any student who meets the prerequisites. Its design is primarily for students who wish to pursue a commission as a lieutenant in the U.S. Army upon graduation. Most students in the advanced course incur an obligation to the military via the Active Army, Army National Guard, or Army Reserve. Students agreeing to serve in the armed forces, through a contractual obligation with the ROTC program, receive a tax-free monthly stipend.

To enter the Advanced Course, students must fulfill the requirements of the Basic Course, attain junior status, and earn a minimum cumulative GPA of 2.00. Students must complete the Leadership Development and Assessment Course (LDAC), a six-week course held at Fort Lewis, WA, usually during the summer between the third and fourth years of instruction. The course may be delayed until the summer following the final ROTC class with permission of the professor of military science.

Students in the Advanced Course complete the following list of courses: Leadership Laboratory MIL-209, Adaptive Tactical Leadership MIL-220, Leadership in Changing Environs MIL-305, Developing Adaptive Leaders MIL-350, and Leadership in a Complex World MIL-360. In addition, students choose one course in history from the following list: History of the United States to 1865 HIS-145, History of the United States Since 1865 HIS-155, The American War in Vietnam HIS-217, The American Civil War HIS-227, or American Colonial History HIS-387. Students earning a degree in nursing normally are exempt from this requirement, and students may, with the approval of the professor of military science, use other courses to meet the requirement.

Students in the Advanced Course complete the following list of courses:

- MIL 209 Leadership Lab
- MIL 220 Adaptive Tactical Leadership
- MIL 305 Leadership in Changing Environs
- MIL 350 Developing Adaptive Ldrshp
- MIL 360 Leadership in Complex World

In addition, students choose **one** course in history from the following list:

- HIS 145 History of United States to 1865
- HIS 155 History of United States since 1865
- HIS 217 American War in Vietnam
- HIS 227 American Civil War
- HIS 387 American Colonial History

Students earning a degree in nursing normally are exempt from this requirement, and students may, with the approval of the professor of military science, use other courses to meet the requirement.

MIL 209 Leadership Lab
Hands-on training of basic soldier skills, such as customs and courtesies, drill and ceremony, first aid, weapons employment, and troop movement techniques. In addition, students learn the application of leadership dimensions to improve students' abilities to perform as officers in the U.S. Army. This course is designed to enhance the training received in the classroom. (0.0 course credit).

MIL 215 Adv Military Fitness Training
Developed around the army physical fitness training program. This course covers aerobics and running, muscular strength and endurance, flexibility, and nutrition. Students also learn how to evaluate and measure fitness improvement. This course models the use of ability groups to improve the fitness levels of all individuals from the unfit to the tri-athlete or bodybuilder. Lab fee required. Course may be repeated up to three times. (0.5 course credit)

MIL 220 Adaptive Tactical Leadership
Challenges students to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Students receive systematic and specific feedback on their leadership attributes and actions. Based on such feedback, as well as their own self-evaluations, students continue to develop their leadership and critical thinking abilities. Students' tactical leadership abilities are developed to enable them to succeed at ROTC's Leadership Development and Assessment Course (LDAC). Corequisite: Leadership Laboratory (MIL-209) and Advanced Military Fitness Training (MIL-215). Prerequisites: Leadership and Personal Development (MIL-101), Introduction to Tactical Leadership (MIL-102), Innovative Team Leadership (MIL-103) and Foundations of Tactical Leadership (MIL-104) or completion of Army Basic Training or the Leaders Training Course. (0.75 course credit) (Offered Fall Term; Spring Term by arrangement)

MIL 305 Leadership in Changing Environs
Uses increasingly intense situational leadership challenges to build student awareness and skills in leading tactical operations up to platoon level. Students review aspects of combat, stability, and support operations Military briefings are conducted and proficiency is developed in garrison operation orders. The focus is on exploring, evaluating, and developing skills in decision-making, persuading, and motivating team members in the contemporary operating environment (COE). Students are evaluated on what they know and do as leaders as they prepare to attend the ROTC summer Leader Development Assessment Course (LDAC). Corequisite: Leadership Laboratory (MIL-209). Prerequisites: Leadership and Personal Development MIL-101, Introduction to Tactical Leadership MIL-102, Innovative Team Leadership (MIL-103), and Foundations of Tactical Leadership (MIL-104), or completion of Army Basic Training or the Leaders Training Course (LTC) and Adaptive Tactical Leadership (MIL-220). (0.75 course credit) (Offered Spring Term; Fall Term by arrangement.)

MIL 350 Developing Adaptive Ldrshp
Develops student proficiency in planning, executing, and assessing complex operations, functioning as a member of a staff, and providing performance feedback to subordinates. Students assess risk, make ethical decisions, and lead fellow ROTC cadets. Lessons on military justice and personnel processes prepare students to make the transition to Army officers. Students in this course analyze, evaluate, and instruct students at lower levels. Both the classroom and battalion leadership experiences are designed to prepare students for their first unit of assignment. Responsibilities of key staff are identified, staff roles are coordinated, and situational opportunities are used to teach, train, and develop subordinates. Corequisite: Leadership Laboratory (MIL-209). Prerequisites: Adaptive Tactical Leadership (MIL-220) and Leadership in Changing Environs (MIL-305). (0.75 course credit) (Offered Fall Term; Spring Term by arrangement)

MIL 360 Leadership in Complex World
Explores the dynamics of leading in the complex situations of current military operations in the contemporary operating environment (COE). Students examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. Aspects of interacting with non-government organizations, civilians on the battlefield, and host nation support are also explored. Significant emphasis is placed on preparing students for their first unit of assignment. Case studies, scenarios, and "What now, Lieutenant?"

exercises are used to prepare students to face the complex ethical and practical demands of leading as commissioned officers in the United States Army. Corequisite: Leadership Laboratory (MIL-209). Prerequisites: Adaptive Tactical Leadership (MIL-220), Leadership in Changing Environs (MIL-305), Developing Adaptive Leaders (MIL-350). (0.75 course credit) (Offered Spring Term; Fall Term by arrangement)

MIL 380 Readings Contmp Miitary Issues

Designed for cadets with an interest and experience in military science and to generate interest in the participating students' knowledge of current military and worldwide events. Students prepare novel reviews from a reading list provided by the instructor. The list contains topics ranging from historical battles and campaigns to the global impact of US political policies. Students may opt to write an operations order (OPORD) as it relates to an ROTC event or similar project as it relates to the historical significance of the ROTC Department (the student must work in conjunction with instructor). This course can be taken for 0.25 to 0.75 credit hours based upon the number of reviews completed or the length and value of the final project. Prerequisites: : Leadership and Personal Development (MIL-101), Introduction to Tactical Leadership (MIL-102), Innovative Team Leadership (MIL-103), and Foundations of Tactical Leadership (MIL-104), or completion of Army Basic Training or the Leader's Training Course. (0.25 to 0.75 course credit)

15 ADMISSION

Coe College students are motivated individuals who come from widely diverse geographic regions, economic backgrounds, and religious faiths, and who possess a variety of academic and extracurricular talents, abilities, and interests. When considering students for admission, Coe seeks to admit students who will contribute to, and benefit from, the academic and extra-curricular program. Applicants who have demonstrated strong academic achievement, intellectual curiosity, extracurricular participation, and community involvement are selected for admission.

15.1 Interviews and Visiting the campus

Prospective students and their parents are always welcome at Coe. A campus interview is highly recommended, although not required, to support a student's application for admission. A campus visit gives students an opportunity to determine if Coe is the best college for their particular needs, goals, and interests. Students desiring an interview at the Office of Admission should call (1.877.CALL.COE) or e-mail (admission@coe.edu) at least one week in advance requesting a specific hour for an appointment. Appointments are scheduled between 8 a.m. and 4 p.m., Monday through Friday, throughout the year, and between 9 a.m. and 12 noon on select Saturdays September through April.

15.2 First-Year Applicants

15.2.1 Academic Record

Coe is a selective, private, nationally-recognized liberal arts college whose applicants are evaluated through a competitive admission process. The Office of Admission looks at a number of factors including high school academic record, class rank, standardized test scores, and involvement in high school or community activities.

For regular admission, a student's minimum academic profile is expected to be at or above a 3.0 GPA (4-point scale), and/or 20 ACT (1020 combined SAT), and within the top 40% of his or her graduating class. A student's academic transcript should reflect a college preparatory curriculum with sufficient breadth to enable the student's adjustment to a rigorous college liberal arts program. Four years of English; three years of mathematics, science, and history; and two years of world language are recommended for all students.

This academic profile is a general guideline, and students who have a lower GPA, standardized test score, or class rank may be requested to provide additional information (seventh term grades, personal statement, personal interview, etc.) for the evaluation process. Coe recognizes that many factors or circumstances may have affected a student's high school performance and students who do not meet our regular admission standards are evaluated more thoroughly by the Office of Admission. Supporting recommendations may be provided by high school guidance counselors, teachers, and administrators. Some students may be accepted on a provisional status upon enrolling at the College.

Students accepted with provisional status must register for SKD 125 Learning Lab (0.5 course credit) during their first term at Coe, and maintain a GPA above the College's Minimum GPA Levels (p. 47) to have their provisional status removed. Failure to meet these requirements in the first semester of enrollment will subject students to academic probation for the second term.

15.2.2 Standardized Test Scores

Test-Optional Policy: Under Coe's test-optional policy, ACT/SAT scores are not required for students applying for admission. The test-optional policy gives select students the option to decide whether their standardized test scores (ACT/SAT) will be considered in the application review process. Students applying under the test-optional policy will still be considered for a Trustee Scholarship. Only students applying as first-year applicants with a 3.0 GPA or higher may choose to exclude their test score from the application process. Median SAT scores at Coe are in the mid- to high 500s for both the verbal and mathematical sections. For students' submitted scores, the median ACT composite score is 26.

15.2.3 Methods of Application

Coe provides students with three application options and deadlines:

1. Students have the opportunity to apply for admission using a binding **Early Decision Plan**. It is understood that students will apply under one early decision plan. A completed application must be postmarked or electronically submitted no later than November 15 to be considered for Early Decision. Applicants are notified by December 15 or as soon as possible after their files are complete. Three decisions can be given: admit, deny or defer to regular decision. If an applicant is admitted under early decision, they are expected to submit a $300 non-refundable enrollment fee.

2. Students who wish to learn of an admission decision before the regular admission deadline may apply under the non-binding **Early Action Plan**. Students may apply at any time during the first term of their senior year. A completed application must be postmarked or electronically submitted no later than December 10 to be considered for Early Action. Applicants are notified by January 20 or as soon as possible after their files are complete. All accepted applicants who intend to enroll at Coe must submit a $300 non-refundable enrollment fee by May 1 to reserve a place in the fall class.
3. Students applying under the **Regular Decision Plan** should have a completed application postmarked or electronically submitted by March 1. Applicants are notified on or before March 15 or as soon as possible after their files are complete. All accepted applicants who intend to enroll at Coe must submit a non-refundable $300 enrollment fee by May 1 to reserve a place in the fall class.

Before an admission decision can be made, the Office of Admission must have received the following from each candidate:

1. a completed application for admission,
2. official high school transcripts or self-reported cumulative GPA, and
3. official results of either the SAT or ACT examination or self-reported results of either the SAT or ACT examination if not applying for test-optional admission.

First-year candidates for admission may select either Coe's application or the Common Application. All application forms, as well as instructions, may be obtained online at www.coe.edu/apply.

Admission of high school seniors is contingent upon their maintaining a satisfactory record and completing high school graduation requirements. Final high school transcripts must be submitted to Coe College upon completion of the requirements for a high school diploma. The College reserves the right to withdraw its offer of admission, and refund the $300 enrollment fee when information received after the admission decision indicates the student will not benefit from or contribute to the Coe community.

Following admission, but prior to enrollment, students are required to receive a physical examination from a health professional and to file a health report. The appropriate form is furnished by the College.

15.3 Transfer Applicants

Each year Coe welcomes a significant number of transfer and non-traditional students to the College. Successful candidates for admission will be those students who have been or are in satisfactory academic standing at their former college or university. Students who transfer to Coe from another institution, should see p. 23 and p. 50 for further information.

Admission notification is on a rolling basis. Once Coe receives a completed application for admission, including official transcripts from their high school and all colleges/ universities previously attended, students are notified of their admission status (see Evaluation of Credits in Transfer, p. 50).

New students may enroll at the College at the beginning of the Fall Term or Spring Term. (Students should consult the academic calendar (p. 10) to determine which term is most appropriate for their educational plans.)

15.4 International Applicants

Students from other countries are encouraged to apply to Coe College. Applications should include the following information:

1. completed application for admission
2. official certified translated copy of all secondary school work and college (if applicable)
3. certified copy of all national exam results ('O' levels, 'A' levels, GCE, SLC, WAEC, etc.)
4. results from IELTS, TOEFL, etc. (if English is not first language) and SAT/ACT exams, GTEC CBT
5. completed financial documents (International Student Certification of Finances and certified bank statement)

An English Language Academic Bridge (ELAB) Program is designed for degree-seeking students who meet specific English language proficiency levels, including a TOEFL iBT score between 55 and 67, a minimum TOEFL ITP score of 480, a minimum IELTS score of 5.5, a minimum Duolingo English Test score of 90, or a minimum PTE score of 45. Students admitted to the ELAB Program are required to take two ESL courses in their first term in addition to regular undergraduate courses. The program provides one term of English language instruction to help students develop academic skills in reading, writing, vocabulary, and conversation while earning credits toward their undergraduate degree. Applicants must meet all undergraduate admission requirements except for full English language proficiency. Upon successful completion of the ELAB Program term, students will transition into a full schedule of regular undergraduate Bachelor of Arts courses.

15.5 Post-Secondary Enrollment

Early admission procedures are available for mature, high-ability students wishing to enroll at Coe before completion of a normal secondary school course of study. These students should follow the regular application process and have strong recommendations from both the secondary school principal and counselor.

15.6 Deferred Admission

The deferred admission procedure is available for students wishing to defer their date of enrollment after being formally accepted to Coe College. These students should follow the regular application process indicating the month and date in which they wish to enroll.

NOTE: *The College reserves the right to change admission procedures for any given year. All changes will be communicated directly to prospective students, parents, and counselors for that specific year.*

15.7 Coe Online Applicants

Students are able to expand their knowledge and capabilities at their own pace with Coe College's online Bachelor of Arts degree with a Business Administration major and a Strategic Leadership concentration. All coursework is asynchronous and online. Students will need a reliable internet connection and computer with a webcam.

Terms will start and end with our standard academic calendar. There will be two eight-week sessions in the fall and spring terms and one eight-week session during summer. Course requirements for this program can be found on page 95.

A cumulative high school or college GPA of 2.5 or higher on 4.0 scale is required. If applicants have earned an AA/AS degree, 2.0 or higher on a 4.0 scale is required. International students are not eligible to be fully enrolled in an online program. In addition, since this program is 100% online, Coe's currently enrolled traditional students are not eligible for these online courses.

16 FINANCIAL INFORMATION

16.1 FEES

Rates subject to change.

The Coe College annual fees and student accounts policies can be found in the **Coe Student Accounts Handbook** located at https://www.coe.edu/student-life/student-life-resources/business-office/student-accounts-handbook .

16.1.1 Full-time and Part-time Students

A student is full-time in the Fall or Spring Terms if registered for three or more course credits per term. Students who are taking fewer than three credits are considered part-time.

Part-time students may not participate in the complete program of College activities unless they pay the activity fee. A part-time student cannot be an on-campus resident student, unless special written permission has been granted by the Office of Residence Life.

16.1.2 Enrollment Fee

A $300 non-refundable enrollment fee is paid to the College by the accepted candidate.

16.1.3 Comprehensive Fee

Coe College charges tuition, room, board, and student fees. The student fees include Health Services and an Activity Fee which is allocated to the Student Senate for apportionment among various student activities such as the student newspaper, literary magazine, and social events. Expenses not covered by the Comprehensive Fee include some music lessons, books, linen service, personal expenses, certain specific campus events, and health and accident insurance.

Table 16.1: Comprehensive Fee 2022-23 (For Full-Time Students)

Tution	$50,314
Board	$5,726
Room	$5,194
Student Fees (Health Services & Activity Fee)	$350
Total On-Campus Resident	$61,584

16.1.4 On-Campus and Off-Campus Resident Students

As a residential, liberal arts college, we seek to provide an environment where learning by all members of the community occurs in and out of the classroom and where curricular and co-curricular activities reinforce our commitment to the life of the mind. Such experiences occur best when students are living and learning full-time on campus. The residential life program is an integral part of the education program and support services at Coe College. Residence halls and hall staff provide a structure by which the experience of the classroom is joined with the out-of-class learning experience of the student.

Full-time students are required to live in residence and take meals in the college dining hall and, thereby, are charged for room and board unless exempt for one or more of the following reasons:

1. Married students – must provide copy of signed marriage license
2. Live with parent(s)/guardian(s) within 25 miles of campus (address on file with College is verified)
3. Dependent child (person must provide copy of child's birth certificate)
4. Completed 8 semesters living on campus
5. Students who are 25 years or older.

Other exceptions to the residence requirement must be applied for in writing to the Dean of Students. Approval or denial is determined on a case-by-case basis following evaluation of the extenuating circumstances provided for review. Students are notified in writing of the decision. Permission to live off campus must be on file in the Residence Life Office and must be renewed each year. Students who violate the residence requirement are charged full room and board costs for the entire year. Coe funded scholarships and grants will typically be reduced by approximately 10 percent when a student moves off campus.

16.1.5 ACM and Other Off-Campus Study Programs

Students desiring to study off-campus must first obtain approval from the Director of Off-Campus study. In every case, students are responsible for their own transportation and living expenses. Each student is advised to check with the program's director as to the cost (and other details) of each program. This charge could vary significantly from the cost of remaining on campus. The tuition charged for Fall or Spring Term off-campus programs will be Coe's tuition or the tuition for the off-campus program if greater than Coe's tuition. In addition to tuition, Coe will charge the off-campus program fee as billed by the off-campus program. Students maintain their eligibility for federal and state financial aid; however, Coe financial aid availability is subject to approval by the Committee on Internationalization. Students registered for the optional May Term who desire to study off-campus (except Coe-sponsored programs) are billed a surcharge fee for tuition and/or program costs which are greater than 10% of Coe's annual tuition. Tuition and fees for ACM off-campus study programs or study programs sponsored by other colleges must be paid in full prior to attending the off-campus program.

NOTE: *Students on regular-term Coe-administered programs including exchanges are able to use their Coe College gift aid to pay tuition that term. Domestic students on other providers' programs may be able to utilize a portion of their Coe gift aid. International students may be able to utilize a portion of their Coe gift aid toward tuition for ACM or other providers' domestic but not international programs. In all cases, students in an off-campus program are not charged the student-activity or health fee.*

16.1.6 GENERAL FINANCIAL REGULATIONS

1. Registration is not completed and a student is not enrolled in classes until College charges are paid in full or satisfactory arrangements are made in writing with the Business Office.

2. At the discretion of the College administration, a student may be suspended for non-payment of indebtedness to the College. If the account is later paid, the student may seek reinstatement.
3. No diploma, certificate, official transcript, letter of honorable dismissal, is granted to any student failing to make a satisfactory settlement of any indebtedness to the College.
4. Residence halls are not open for student occupancy during winter and spring breaks. Students living some distance from the campus may make housing arrangements through the Office of Student Life. The residence halls are open during the fall break and Thanksgiving recess. Meals are served during the fall break but not during Thanksgiving recess.
5. The College does not carry insurance on personal property of students and is not responsible for the loss of or damage to such property. Information regarding student health and accident insurance is available through the Office of Student Life.
6. The College reserves the right to revise charges as conditions may warrant.

16.1.7 PAYMENT POLICY

The Net Comprehensive Fee, the Comprehensive Fee less financial aid (with the exception of the work study) is due and payable by August 1st for the Fall Term and January 10th for the Spring Term.

16.1.8 Monthly Payment Plan

The College offers a monthly payment plan for those parents/students who desire to budget the costs of tuition, room, and board in 5 monthly payments per term. Under this plan, the first payment for the Fall Term is due August 1st, and the final payment is due December 10th. The payment plan for the Spring Term begins January 10th and the final payment is due May 10th (graduating seniors' final payment is due the last Friday in April). There is a $50 non-refundable enrollment fee per term to be on the monthly payment plan. Students enroll in the monthly payment plan through CASHNet via their my.coe.edu account.

If, after enrolling in the monthly payment plan, the student's charges or financial aid changes, the student account and monthly payments are adjusted accordingly. All refunds are made in accordance with the refund policy as stated in the *Coe Student Accounts Handbook*. If a student on the monthly payment plan withdraws from Coe, charges and excess payments will be refunded in accordance with the College's refund policy. The $50 enrollment fee will not be refunded. Information on this plan is available on <my.coe.edu>.

To give parents/students as much time as possible to make arrangements for their financial obligation or to take advantage of Coe's monthly payment plan, the Business Office generates an online billing statement in mid-July. Any special fees, such as music lessons, are billed after the start of classes and are payable by the tenth of the following month.

16.1.9 Late Payments

If a student chooses to pay his/her college charges on the semester payment schedule (payment in full is due August 1st and January 10th) late payments are subject to a late fee/finance charge of 1.25% per month (or fraction thereof) on the full amount that is past due. This is equivalent to an annual rate of 15%.

16.1.10 FINANCIAL IMPACT OF WITHDRAWING OR CEASING ATTENDANCE IN ALL COURSES

16.1.11 Official Withdrawal from all Courses

Students who withdraw from or cease attendance in all of their courses have the responsibility of initiating the official withdrawal process (see **?@sec-official-withdrawal-process**).

If a student is unable to complete the official withdrawal process, the intent to withdraw can be communicated to one of the following offices: Registrar, Student Financial Services, Student Life, Student Success and Persistence.

Special consideration is given to students who withdrew due to a call to active duty. Coe's "Military Call Up/Refund" and "Readmission of Service Member" policies are published on the Admission/Financial Aid webpage. Copies of these policies can be requested from the Student Financial Services Office.

16.1.12 Unofficial Withdrawal from all Courses

Students who did not earn credit for any of the courses they were registered for in a given term and did not officially withdraw or otherwise provide notice of their intent to withdraw, must be considered "unofficially withdrawn". Federal regulations mandate that, a federal Title IV refund calculation, using the withdrawal date of either the midpoint of the term or the last date of attendance at a documented academically related activity, must be performed.

A student's withdrawal date is:

The earlier of the date that the student began the official withdrawal process or otherwise provided official notification to a designated office of their intent to withdraw;

- OR If official notification could not be provided because of circumstances beyond the student's control, the date the college determines is related to the particular circumstance;
- OR If the student ceased attendance without providing official notification, the midpoint of the term;
- OR The student's last date of attendance at a documented academically related activity.

16.1.13 Federal Title IV Refund Calculation/Policy

In accordance with federal regulations, a Title IV refund calculation must be performed for students that are recipients of Federal Student Aid (FSA) who cease attendance in all courses, including students who are expelled, or are granted a leave of absence. The FSA programs that are covered by this law are: Federal Pell Grants, TEACH Grants, Stafford Loans, PLUS Loans, Federal Supplemental Educational Opportunity Grants (FSEOG), Iraq Afghanistan Service Grant, and other Title IV Programs. The Coe College Student Financial Services Office determines, based on the federally mandated formula[1], the amount of FSA assistance students have earned based on the date in the term a student is considered to be withdrawn. An example of the refund calculation is published online in the [Financial Aid Handbook] (https://www.coe.edu/admission/financial-aid-scholarships/financial-aid-handbook) and a handout may be obtained from the Student Financial Services Office.

[1] the federal work-sheet used to calculate the amount of FSA assistance earned is available from the Student Financial Services upon request.

16.1.14 Return of Financial Aid Funds Policy Steps

- Step 1: Determine the percentage of enrollment period completed by the student. If the calculated percentage is equal to or greater than 60%, the student has "earned" all aid for the enrollment period and no adjustment in financial aid occurs.

  Days Attended ÷ Days in Enrollment Period = Percentage Completed

- Step 2: Apply the percentage completed to the Title IV aid award to determine the student's eligibility for financial aid prior to the withdrawal.

  (Total Aid Disbursed + Aid that could have been disbursed) x Percentage Completed = Earned Aid

- Step 3: Determine the amount of unearned financial aid to be returned to the appropriate Title IV financial aid program.

  Total Disbursed Aid – Earned Aid = Unearned Aid to be Returned

  - If the aid already disbursed equals the earned aid, no further action is required.
  - If the aid already disbursed is greater than the earned aid, the difference must be returned to the appropriate Title IV aid program.
  - If the aid already disbursed is less than the earned aid, a late disbursement may be made to the student.

- Step 4: Determine if the institution and/or the student must return the unearned funds.

  - Total Aid – Earned Aid = Unearned aid that must be returned
  - Unearned Aid > assessed charges = Unearned aid that must be returned by the student
  - Unearned Aid assessed charges = Unearned aid to be returned by the College

The Coe College Student Financial Service Office is required to return any unearned FSA funds that were applied towards institutional charges within 45 days in the following order: + Direct Unsubsidized Stafford Loan + Direct (Subsidized) Stafford Loan + Direct Graduate PLUS Loan (for graduate students) + Direct PLUS Loan (for parents of undergraduate students) + Pell Grant + SEOG + TEACH Grant + Iraq Afghanistan Service Grant

The student will be informed by the Student Financial Services Office of the type and amount of FSA program funds that are being returned on their behalf and of the amount the student must return. If the student's portion of aid to be returned is a loan, the terms of the original loan repayment agreement will apply. The amount of unearned grant funds a student must repay is limited to the amount by which unearned grant funds disbursed exceed half of the original grant award by $50 or more. In general, the Student Financial Services Office will return the grant funds to the appropriate federal program and charge the student's Coe account, which will result in debt to the college.

- Step 5: Determine earned FSA assistance that has not been disbursed.

  Total Aid Earned – Total Aid Disbursed = Earned Aid not Disbursed

Grant aid that was earned, but had not been applied before the student withdrew, will be applied to the students account within 45 days. Loan proceeds that could be disbursed after the student withdrew will only be disbursed if the student requests a disbursement within 14 days of receiving notice from the Student Financial Services of their eligibility of a post-withdrawal loan disbursement.

16.1.15 Institutional Refund Calculation/Policy

The Student Financial Services will follow the federal Title IV Refund Calculation/ Policy in determining the amount of earned and unearned Coe scholarships and grants and state assistance.

Tuition, Board and Student Fees will be charged pro-rata based on the percentage of the enrollment period completed up to the 60-percentage point in time of the term. Room charge will not be refunded after Date of Record for the term. Please see the Coe *Student Accounts Handbook* to review the institutional refund policy for tuition, fees, room and board.

16.1.16 May Term (optional)

The first May Term course taken by a student is a non-tuition charge term for all Coe full-time degree-seeking students enrolled in the Spring Term, therefore, no institutional aid is awarded to students. A $1000 fee per May Term course will be assessed for subsequent May Term courses taken by a student. Please see the *Coe Student Accounts Handbook* for more information about May Term.

16.1.17 Enrollment Status Changes

Changes in enrollment status from full-time to part-time may affect a student's financial assistance. In general, the amount of financial aid a student is eligible to receive is based on the enrollment status as of the College's official date of record. Federal direct loans will no longer be in an in-school deferment status for a student who drops below half-time at any time during the term Students should consult with the Student Financial Services to discuss how enrollment changes will affect their financial aid eligibility and loan deferment status.

16.1.18 Part-Time Students

A part-time student withdrawing from all courses in the Fall or Spring Terms shall be subject to *Return of Title IV Funds/Institutional Refund Policy*, see Section 16.1.13 for more information.

16.1.19 Summer Students

A summer student withdrawing from class will be subject to Return of Title IV Funds/Institutional Refund Policy (see Section 16.1.13) which credits earned aid and assessed charges on a prorated basis predicated on the term/session enrolled.

17 FINANCIAL AID AND SCHOLARSHIPS

Coe College provides comprehensive need-based and merit-based financial aid programs designed to help qualified students attend Coe regardless of their family financial situation. Detailed information about financial aid programs and financial aid policies and guidelines are published in the *Coe College Financial Aid Handbook*. New students must accept their financial aid award by submitting a $300 enrollment fee by May 1st for the Fall Term. Extensions may be requested by contacting the Student Financial Services. If a student does not respond by the stated deadline, Coe College cannot guarantee the availability of any funds offered in the financial aid award.

17.0.1 Academic Scholarship and Awards

Coe College offers academic and competitive scholarships to recognize the talents and achievements of students applying for admission. Academic scholarships require no separate application.

- **Trustee Scholarships and Heritage Awards** Academic scholarships and awards are based on high school academic record and test scores (ACT or SAT), if desired by the student. Consideration may be given to leadership abilities, letters of recommendation, and/or community involvement, as well. Additional information can be obtained from the Office of Admission.
- **Legacy Award** Awards are available to children or grandchildren of Coe alumni.
- **Sibling Award** Awards are available to siblings of current students or siblings of Coe alumni.
- **Transfer Scholarships** Transfer students who have at least a 3.0 GPA may qualify for academic and talent-based scholarships. Students may be eligible to compete for full and partial scholarships.
- **Visual and Performing Arts Scholarships** Students with outstanding ability in art, music or theatre may compete for a scholarship. These scholarships are available to participating students.
- **Merit Recognition Award** Full-tuition Merit Recignition Awards are designated for students who hold finalist standing with the National Merit Scholarship Corporation in the National Merit Scholarship Program.
- **Global Leadership Scholarship** The Global Leadership Scholarship will be given to one student who demonstrates high academic achievement and financial need. This award is equal to the full-time tuition of the recipient's entry year and renewed yearly at the same rate.

17.0.2 Williston Jones Full-Tuition Scholarships

Several full-and partial-tuition scholarships will be awarded. Finalists are invited to interview or audition on campus.

- **The Impact Award** The Coe College community values the ability each student has to make an impact on campus. This award recognizes this relationship the student has with the campus community. Eligible students are notified of the requirements to receive this award upon admission to the College.

Renewal Criteria

- All scholarships are renewable on an annual basis. Renewal is contingent on full-time study and will not exceed eight terms of full-time study.

- The renewal for the Williston Jones, Trustee, and Visual and Performing Arts scholarships will be based on Satisfactory Academic Progress (SAP). See @satisfactory-academic-progress-policy for SAP GPA and pace standards. Winners of music and theatre scholarships must meet participation criteria as specified in their award letter. Full criteria for renewal of all scholarships are outlined in scholarship notification letters.
- Students who fall below the required academic scholarship criteria or determine that should contact the Student Financial Services to determine if they are eligible for an extension to meet the GPA requirements or if other funds may be available to assist with offsetting the loss of a scholarship.
- Because these scholarships are awarded on merit, students do not have to demonstrate financial need to qualify.
- Coe College reserves the right to make any adjustments deemed necessary to the selection criteria, eligibility requirements, or award amounts of these scholarships. Questions regarding Coe scholarships should be directed to the Office of Admission.

17.0.3 NEED-BASED FINANCIAL AID

Need-based financial aid is available to students who are admitted to Coe College and file the Free Application for Federal Student Aid (FAFSA). These assistance programs are based on the premise that students and parents should pay for college to the extent that they are able. Need-based financial aid is used to help make up the difference between the cost of college and what a family can afford.

When a FAFSA is filed, a standard formula is used to calculate the expected family contribution – the amount that the student and his or her family are expected to pay. The Student Financial Services Office compares the expected family contribution (EFC) to estimated cost of attendance. If the costs exceed the amount of the EFC, the student is eligible for need-based financial aid. A typical financial aid package will contain a combination of gift aid (scholarships and grants) and self-help aid (low-interest educational loans and employment). Information released to Coe College through the FAFSA application is kept confidential.

Application for all need-based financial aid programs must be made for each year the student is enrolled. The FAFSA is available online at Federal Student Aid.

Verification Process

Federal regulations require that some applicants who are eligible for need-based financial aid complete the verification process. Students may be chosen for verification by the U.S. Department of Education or by Coe College. Applicants selected for verification are required to submit supporting documentation to the Student Financial Services. These supporting documents may include, but are not limited to, copies of student and parent IRS tax transcripts from a prior tax year, verification of untaxed income received, family size and the number of family members attending college during the next academic year. Returning students selected for verification will not receive a financial aid award offer until all requested documents are received and reviewed by the Student Financial Services Office. Prospective students will receive a preliminary financial aid award offer prior to completion of verification. In order to finalize the awards offered, all requested documents should be received by the Student Financial Services Office at least one month prior to the end of the award period. A financial aid award is subject to change if verification results in a change to the Expected Family Contribution (EFC). During the verification process the Student Financial Services Office will contact students if clarification is needed on any of the information reported on the FAFSA or if it is necessary to make corrections to the FAFSA data.

17.0.4 NEED-BASED GIFT AID

Gift aid does not have to be repaid by the student. Need-based gift aid is available through federal, state, institutional and outside sources.

The value of a Coe Grant is influenced by a student's financial need. The amount of the Coe Grant can vary from year to year, depending on changes in family income, room and board charges, and the availability of funding.
Coe has many endowed scholarships that have been established by generous alumni and friends of the College. Income from these scholarships is used primarily to support Coe funded merit- and need-based aid. Students awarded Coe aid may be asked to complete an 'Endowed Scholarship Application.' The Financial Aid Office will use information from this application to match students with endowed scholarships. Students designated to have their Coe aid funded by an endowed scholarship may be contacted by the Coe College Advancement Office with information about their donor. (**Note**: Endowed scholarships funds support Coe funded aid already granted to the student. Under no circumstances will the student receive additional funding beyond what has already been listed on the financial aid award letter.) Endowed scholarship funds are vital sources of assistance for many of our students. It will be requested that each student receiving funds from an endowed scholarship write a letter of thanks to the donor or the designated official. Donor information and letter suggestions will be provided by the Office of Advancement.
The **Federal Pell Grant** program is designed to provide financial assistance to eligible undergraduates. Application is made by filing a Free Application for Federal Student Aid (FAFSA). The Federal Pell Grant program provides grants to full- and part-time students and may be used at any eligible college or university that the student attends as an undergraduate or until the student receive a first baccalaureate degree. The award amount may vary according to the cost of the institution and the number of hours for which a student is enrolled. A student may receive no more than the equivalent of 12 full-time term awards. Students must be enrolled for three or more course credits per term to receive the full award. The **Federal Supplemental Educational Opportunity Grant (SEOG)** program provides financial grant assistance to Pell Grant eligible undergraduates with exceptional financial need which, for the purposes of this program, is defined as those with the lowest EFC. The grants are made from funds provided by the federal government to Coe College. The College, in turn, selects needy students who have applied for financial aid and meet awarding criteria established by the federal government. SEOG awards at Coe are based on the availability of funding and can range from $100 up to $1,000 per academic year. These funds are limited and not all students who qualify can be assured that they will receive a SEOG grant.

State-Funded Grants and Scholarships
Iowa Tuition Grant (ITG)
All Iowa Oppurtunity Grant
Education and Training Vouchers (ETV)

National Presbyterian Scholarships are offered to members of the Presbyterian Church (U.S.A.) who plan to attend one of the participating Presbyterian colleges, including Coe College. Students must file a separate application to the Presbyterian Church (U.S.A.) by December 1st. Only incoming first-year students may apply for these need-based renewable scholarships. (Applicants must complete the FAFSA to renew the scholarship.)

17.0.5 Non-Need Based Gift Aid

The **Education Assistance for College and Higher Education (TEACH)** program is designed to provide financial assistance of up to $4,000 per academic year to current and prospective teachers. To qualify for a TEACH Grant a student must have scored above the 75th percentile on any portion of the ACT or SAT (including composite scores) or have a 3.25 cumulative grade point average. First-year students must have a final cumulative high school grade point average of at least a 3.25 and upperclassmen must maintain a minimum cumulative GPA of 3.25 each Term. In addition, a recipient must serve as a full-time teacher in a high-need field, in a school serving low-income students for at least four academic years within eight years. If a student does not complete the required teaching obligation, the grant must be repaid as a Direct Unsubsidized Federal Direct Stafford Loan with interest from the time the grant was disbursed.

- **Active Duty Military Benefits** An individual who is currently serving in the military or who is the spouse or dependent child of a service member who is currently serving on active duty, may be eligible for funding

offered through the Department of Defense Tuition Assistance program. Applicants are encouraged to check their eligibility status and amount for which they qualify with their service prior to enrolling.

- **Iowa National Guard Educational Assistance Grant** The Iowa National Guard Educational Assistance Grant (NGEAP) provides annual awards to Iowa National Guard members who attend eligible Iowa colleges and universities. Eligibility is determined by the Iowa Adjutant General. Maximum individual awards cannot exceed the current average resident tuition rate at Iowa Regent Universities. **GEAR UP Iowa Scholarship**

- **ROTC Scholarships and Grants** ROTC Scholarships and Grants are available through Coe College. The College ROTC program provides on-campus leadership training in conjunction with a student's current curriculum. The scholarship provides payment of up to full tuition and fees for a given academic year and approximately $600 per term for books, and a subsistence allowance of up to $500 per month up to 10 months per academic year. ROTC-eligible students should contact the Student Financial Services to determine the impact this scholarship will have on their total financial aid package.

- **Veterans' Educational Benefits** The Veterans Administration administers programs for veterans and service people seeking assistance for education and training. A veteran or dependent of a veteran who plans to receive educational benefits, as determined by the Department of Veteran Affairs, should contact the Registrar's Office well in advance of enrollment to request certification. Additional information about veterans' benefits at Coe College, such as the application process for the various programs, available resources, as well as withdrawal and readmit policies for service members, can be found on the Veteran and Military Student webpage (https://www.coe.edu/admission/financial-aid-scholarships/resources/veterans-and-military-benefits).

- **The Yellow Ribbon GI Educational Enhancement Program** The Yellow Ribbon GI Educational Enhancement Program is a provision of the Post-9/11 Veterans Educational Assistance Act of 2008. The program is designed to supplement the Post-9/11 tuition benefit, which is limited to the highest public in-state undergraduate tuition. Under the Yellow Ribbon program, Coe College entered into an agreement with the Department of Veterans Affairs to jointly pay the portion of an eligible veteran's net tuition and fees that exceed the maximum amount otherwise provided by the Post-9/11 GI Bill. Veterans are encouraged to visit the VA's Yellow Ribbon webpage to determine their eligibility. While not required to file a FAFSA, applicants are strongly encouraged to do so in order to potentially maximize federal and/or state benefits.

- **Vocational Rehabilitation Benefits** The Division of Vocational and Rehabilitation of the Iowa Department of Public Instruction or a similar division in other states make assistance available to physically and mentally challenged students who are residents of the state. More information is available from the Division of Vocational Rehabilitation, 801 Bankers Trust Building, Des Moines, IA 50309, or the student's home state office.

- **Veterans Benefits and Transition Act of 2018 Compliance** Coe College abides by Section 103 of the Veterans Benefits and Transition Act of 2018. Our educational policy ensures that no penalty will be imposed including: 1) the assessment of late fees; 2) the denial of access to classes, libraries or other institutional facilities and /or 3) the requirements that a Chapter 31 or Chapter 33 recipient borrow additional funds to cover the individual's inability to meet his or her financial obligations to the institution due to a delayed disbursement of payment by the U.S. Department of Veterans Affairs provided we have a current Certificate of Eligibility (C.O.E.) on file.

17.0.6 Tution Discount

Tuiton discounts cannot be combined with Coe scholarships and grants.

- **Continuing Student Discount** Undergraduate and Post-baccalaureate students who do not qualify for Coe scholarships and grants may contact the Office of Student Financial Services to determine whether they qualify for a tuition discount.

- **Teacher Education Discount** Qualifying education students enrolled in Coe's Ninth-Term/Fifth-Year programs may obtain an application from the Education Department for a discount of up to 60% of regular full-time tuition charges. Students should contact the Education Department for detailed instructions and deadlines for applying (rates subject to change).

- **Accounting Discount** Full-time students who are pursuing a major in public accounting, have not completed their degree requirements in four years, and are in good academic standing receive a tuition discount of 60% of regular tuition charges in their fifth consecutive year of study (rates subject to change).

17.0.7 Federal Self-help Aid

Self-help aid may be need or non-need-based. Students apply for these funds by completing the FAFSA. Once awarded, the Student Financial Services will provide any additional paperwork that may be necessary. Self-help aid requires work for compensation or repayment of low-interest student loans. Eligibility for these programs is determined yearly and requires that the FAFSA be filed each year.

- **Work-Study Awards** provide part-time employment on campus, at area non-profit agencies and in local schools.

- **William D. Ford Federal Direct Stafford Loans** William D. Ford Federal Direct Stafford Loans must be repaid by the student. The Federal Direct Stafford (FDS) loan program allows students to borrow low-interest loans directly from the federal government. To qualify for an FDS loan, a student must file the FAFSA, be admitted to a degree or certificate program, and be enrolled at least half-time (2.0 course credits).

- **Loan Types**

  There are two types of Federal Direct Stafford loans: Subsidized and unsubsidized. A student must have financial need to receive a subsidized loan. Financial need is not required to be eligible for an unsubsidized loan. During the time that a student is enrolled on at least a half-time basis (two course credits per term) the federal government will pay the interest on a subsidized FDS loan. Interest will accrue during the in-school periods on an unsubsidized FDS loan. A student has the option of paying the interest during in-school periods or adding the interest to the principal of the loan. Principal payments begin after the six-month grace period.

  Once a student is no longer enrolled at least half-time, repayment begins after a six-month grace period. During the grace period, the student will receive repayment information from the loan servicer, including the first payment due date. Information on the servicer assigned to a student's loans can be looked up on Federal Student Aid

- **Federal Direct Parent Loan for Undergraduate Student's (PLUS) Parents** who can demonstrate good credit may borrow the difference between the student's costs of attendance less financial assistance. Both custodial and non-custodial. Repayment begins 60 days after the loan is fully disbursed unless the borrower requests to defer payment while the student is enrolled.

17.0.8 Private/Alternative Student Loans

Financial Aid Satisfactory Academic Progress Policy

The Student Financial Services Office is required to monitor students who receive federal financial aid to determine if they are making satisfactory academic progress (SAP) toward their degree program.

SAP standards apply to all students receiving federal, state, and institutional financial aid. These standards apply to a student's entire degree program including terms for which financial aid was not applied or for which enrollment was less than full-time.

SAP of federal financial aid recipients is measured each term of the academic year[1] for which a student is enrolled. The specific criteria of SAP, and the consequences to the student if progress is not achieved, is outlined in the following SAP Policy. Students should contact the Student Financial Services with questions regarding the intent or the interpretation of these standards.

SAP is measured in three components: Cumulative Grade Point Average (GPA); Pace (Completion Rate); and Maximum Time Frame Limitation.

1. **GPA:** A student in an undergraduate program must meet minimum GPA standards.

Total Course Credit Attempted[2]	Cumulative Minimun GPA
0 – 4.99	1.5
5 – 7.99	1.75
8 – 11.99	1.8
12 – 15.99	1.9
16 and above	2.0

2. **Pace:** A student must complete an incremental percentage of all cumulative credits attempted.

Total Course Credit Attempted[3]	Minimum Percentage of Attempted Course Credit Completed
0 – 7.99	58%
8 – 15.99	64%
16 and above	70%

3. **Maximum Time Frame:** A student must complete his or her educational program within 150% of the published length of the program measured in attempted course credits or credit hours. For example: the majority of undergraduate programs at Coe College require 32 course credits for graduation. A student can receive federal financial aid for a maximum of 48 attempted cc (32cc x 1.5). A student pursuing a double major/minor or a student who changed majors will normally be expected to complete all degree requirements before reaching 150 percent of attempted cc required to complete a program.

[1] An academic year for the purpose of administering federal financial aid is defined as minimum two 15-week terms for a total 30 weeks during which the average undergraduate student is expected to complete a minimum of six (6.0) course credits. Enrollment in a minimum of three (3.0) course credits per term is required in order to be considered a full-time student.

[2] **Course Credit conversion to Semester Hours** One Course Credit = 4 semester hours

[3] **Course Credit conversion to Semester Hours** One Course Credit = 4 semester hours

Financial Aid Warning A student who does not meet the minimum SAP standards for GPA and Pace will be placed on Financial Aid Warning for the subsequent term. Federal financial aid can be received during a Financial Aid Warning Term. A Financial Aid Warning notice is sent to the student by the Student Financial Services Office at the beginning of the warning term.

Financial Aid Suspension A student who fails to meet SAP during the warning term is no longer eligible to receive federal financial aid and is placed on Financial Aid Suspension. The Student Financial Services Office will notify the student of his or her financial aid suspension; the notice will include information on the financial aid appeal process.

Financial Aid Appeal A student may appeal his or her financial aid suspension by completing the SAP Appeal Form. The appeal must be submitted to the Student Financial Services Office as soon as possible and must include an explanation of why the student failed to meet SAP and what has changed in the student's situation that would allow him or her to meet SAP standards during the term. Circumstances are limited and cannot be based upon a student's need for assistance or the lack of knowledge that financial aid assistance was in jeopardy. Examples of possible situations include documented serious illness, severe injury, death of a family member, or other circumstances that prevented the student from meeting SAP standards. The Financial Aid Appeal Committee will review the appeal and notify the student of the outcome within 14 days of the receipt of a completed Financial Aid Appeal Form. A student whose appeal is denied will be granted a 100 percent refund of tuition charges if they officially drop all courses.

Financial Aid Probation A student who successfully appeals his or her financial aid suspension is placed on Financial Aid Probation. Federal financial aid can be received for the term a student is on Financial Aid Probation.

Academic Plan In most cases a student must complete an academic plan. An Academic Plan is generally developed based on a student's individual needs and is completed with Learning Commons staff. A student whose appeal has been granted based on an Academic Plan must continually meet the terms of the plan in order to receive federal financial aid. If a student fails to meet the terms of the plan, the student loses financial aid eligibility and is placed on Financial Aid Suspension.

Regaining Eligibility when a Financial Aid Appeal has not been granted If a Financial Aid Probation Appeal is denied or an appeal was never submitted, the student may regain eligibility to receive financial aid by completing a number of courses without receiving federal financial aid. It is the student's responsibility to contact the Student Financial Services Office if he or she can demonstrate that SAP standards are being met or that an academic plan has been developed that, if followed, will ensure the student is able to meet SAP standards by a specific point in time.

17.0.9 Impact on SAP of certain types of status marks and credits

- **Audited Courses** Audited courses do not count towards degree requirements and do not impact SAP.
- **Status Mark of I** Courses for which a grade has not been reported at the time of the SAP evaluation will be counted as attempted credits. Credit is not earned and GPA is not impacted. It is the student's responsibility to inform the Student Financial Services once a grade has been reported.
- **Pass (P) – Not Pass (NP) Graded Courses** Grades of "P" count as attempted credits and credits earned. Grades of "NP" count as attempted credits, but not credits earned. Grades of "P" and "NP" do not impact GPA.
- **Transfer Credits** Courses that are transferred from another institution and **accepted toward a degree program** count as attempted and earned credits, but do not impact the cumulative GPA. Courses that are taken at another institution that are **not accepted towards a degree program** do not impact SAP standards.

- **Updating Coursework Successfully completed courses** that are repeated are counted as attempted credits but not credits earned. The grade earned in a repeated course will replace the previously earned grade and may impact the cumulative GPA. A student must report any grade changes/updates that affect aid eligibility directly to the Student Financial Services Office.

  Failed courses that are repeated are counted as attempted and earned hours and therefore impact the cumulative GPA.

- **Status Marks of W and WF** Courses for which a grade of "W" is recorded count as attempted credits. Courses for which a grade of "WF" is recorded count as attempted credits and impact GPA.

- **Part-time Students** Coe grants and scholarships are not available to students who are enrolled part-time (fewer than 3.0 course credits). Federal and state grants and loans are available to part-time students at pro-rated amounts. Students changing their enrollment status from full-time to part-time must contact the Student Financial Services Office. To be eligible for a federal Direct Stafford Student loan, a student must be enrolled for a minimum of two course credits. Students who are enrolled for fewer than two course credits do not qualify for an in-school deferment status on existing federal loans.

- **Fifth Year of Study** Financial aid beyond eight terms is generally limited to federal and some state aid. Students are encouraged to file a Free Application for Federal Student Aid (FAFSA) for federal and state financial aid, although both types of financial aid also have statutory limits. For students who received a federal Pell grant, the equivalent of 12 full-time terms is the maximum. For students receiving the Iowa Tuition Grant, eight full-time terms are the maximum. Federal and state financial aid eligibility ends once students have satisfied all requirements for their particular areas of study. (See Financial Aid Satisfactory Academic Progress Policy, Section 17.0.8 for additional restrictions.)

  Students who received eight terms of Coe aid are not eligible for Coe-gift funds. However, students pursuing a fifth year of study may be eligible for a continuing student discount. Students who wish to apply for the continuing student discount should contact the Student Financial Services Office. Education and accounting majors who are in their fifth year of study may be eligible for a fifth-year tuition discount. Contact the respective academic departments and the Student Financial Services Office for more information.

- **Withdrawal and Leave of Absence from the College**

When a student withdraws or takes a leave of absence from all classes during a term, it is the responsibility of the college to calculate a return of Title IV funds according to federal policy. (See Return of Title IV Funds/Institutional Refund Policy, Section 16.1.13) Students who are granted a leave of absence, and are not attending college elsewhere during the leave, generally are eligible to have their academic and talent-based scholarships renewed upon their return. Renewal of these scholarships is contingent upon meeting Satisfactory Academic Progress, see Section 17.0.8 . Students who are returning from a leave of absence and have attended college elsewhere may have their scholarship eligibility reevaluated.

- **Reporting Changes and Other Assistance** Any change in a student's enrollment status, financial circumstances, or residential status must be reported immediately to the Student Financial Services Office. Such a change may have an effect on the calculation of financial need and the resulting assistance offered. It is in the best interest of students to contact the Student Financial Services Office prior to an enrollment or residential status change.

- **Outside Scholarships and Loans** All aid received from sources outside of Coe College must be reported to the Student Financial Services Office. Outside assistance may include, but is not limited to: scholarships, tuition reimbursement, private student loans, etc. These funds may cause a change in financial aid eligibility.

- **Appeals** A student has the right to appeal any decision concerning financial aid eligibility or award in writing to the Director of Financial Aid. To do so, contact the Director of Financial Aid.

- **Off-Campus Study** Coe-administered financial aid, with the exception of the National Tuition Exchange (NTE) Program benefits, may be used for off-campus study if approved by the Committee on Internationalization. Students are responsible for any additional costs of the programs. Applications to use Coe aid should be filed with the Director of Off-Campus Studies. Enrollment in an off-campus study program approved for credit by Coe qualifies the student to be considered for assistance from federal and state grant and loan programs. Contact the Student Financial Services Office for more information.

18 DIRECTORIES

18.1 The Faculty

18.1.1 Full-Time Faculty

MARIO AFFATIGATO
Professor of Physics.
B.A., Coe College; M.S., Ph.D., Vanderbilt University.

UGUR AKGUN
Professor of Physics.
B.S., Middle East Technical University, Turkey; Ph.D., University of Iowa.

BRIE SWENSON ARNOLD
Professor of History.
B.A., Concordia College; M.A., Ph.D., University of Minnesota.

KATE ASPENGREN
Assistant Professor of English.
B.A., M.F.A., University of Iowa.

LARRY D. ATWATER
Assistant Professor of Kinesiology.
B.A., Coe College; M.A., Northeast Missouri State University.

MARIE BAEHR
Special Assistant to the President; Professor of Physics.
B.A., Denison University; M.S., University of New Hampshire; Ph.D., The Ohio State University.

MICHAEL BAKER
Professor of Psychology.
B.A., Coe College; M.S., Ph.D., Iowa State University.

RYAN BARANOWSKI
Associate Professor of Stead Department of Business Administration and Economics.
B.A., Coe College; M.A., Ph.D., University of California, Irvine.

DENNIS BARNETT
Professor of Theatre Arts.
B.A., Indiana University; M.F.A., Florida State University; Ph.D., University of Washington.

LISA A. BARNETT
Associate Professor of Sociology.
B.S.J., Northwestern University; M.A., Ph.D., Washington State University.

LYNDA BARROW
Professor of Political Science.

B.A., Albion College; M.A., The Johns Hopkins University; M.T.S., Wesley Theological Seminary; Ph.D., Syracuse University.

ALISSA BOGUSLAW
Assistant Professor of Sociology
B.A., 2007, University of Minnesota; M. A., M.Phil., The New School for Social Research.

CAIO BARCA BRAGATTO
Assistant Professor of Physics.
B.A., Universidade de Sao Paulo; M.A., Ph.D., Universidade Federal de Sao Carlos.

ABBIE BREWER
Assistant Professor of Music
B.M., Wartburg College; M.M., Azusa Pacific University; D.M., University of Iowa

SAMANTHA BROWN
Assistant Professor of Psychology.
B.A., Creighton University; Ph.D., University of Iowa.

DEREK N. BUCKALOO
Professor of History.
B.A., Stanford University; M.A., Ph.D., Emory University.

ALLISON CARR
Associate Professor of Rhetoric.
B.A., Coe College; M.A., Ph.D., University of Cincinnati.

WILLIAM S. CARSON
Professor of Music.
B.A., Macalester College; M.M., Southern Illinois University; D.M.A., Arizona State University.

PAMELA J. CARSTENS
Professor of Business Administration and World Affairs.
B.A., Coe College; M.B.A., Ph.D., University of Iowa.

VANESSA CASTILLO
Assistant Professor of Psychology.
B.A., Concordia College; M.S., PhD. Iowa State University.

JOHN BRADLEY CHAIMOV
Associate Professor of World Languages, Director of Off-Campus Study.
B.A., University of California, San Diego; M.A., Ph.D., University of Chicago.

JOHN M. CHANDLER
Assistant Professor of Kinesiology
B.S., University of Wisconsin, Madison; M.A., University of Northern Iowa.

JIA-YUH CHEN
Professor of Stead Department of Business Administration and Economics.
B.S., National Taiwan University; M.B.A., University of California, Irvine; Ph.D., University of California, Santa Cruz.

BENJAMIN CHIHAK
Associate Professor of Psychology.
B.A., Macalester College; Ph.D., University of Minnesota.

JOSHUA CHRISTENSEN
Associate Professor of Stead Department of Business Administration and Economics.
B.A., Wartburg College; J.D., University of Iowa College of Law.

RANDOLPH N. CHRISTENSEN
Professor of Biology.
B.S., Brigham Young University; Ph.D., The Ohio State University.

ZEN COHEN
Assistant Professor of Art and Film Studies
B.F.A., California College of the Arts; M.F.A., University of California at Davis

CASSY COZINE
Associate Professor of Biology.
B.S., University of Southern Mississippi; Ph.D., University of Iowa Carver College of Medicine.

GAVIN MORRISON CROSS
Professor of Statistics.
B.A., B.S., Miami University; M.S., University of Missouri-Rolla; M.S., Ph.D., University of Iowa.

ANNA DREXLER
Assistant Professor of World Languages and Director of International Student Affairs.
B.A., Coe College; M.F.A.,University of Oregon.

FIRDEVS DURU
Associate Professor of Physics.
B.S., Bosphorus University; M.S., Ph.D., University of Iowa.

RICHARD G. EICHHORN
Professor of Stead Department of Business Administration and Economics.
B.S., University of Tulsa; M.A., Ph.D., Colorado State University.

JESSE ELLIS
Associate Professor of Biology and Director of the Coe Wilderness Field Station.
B.A., Lewis & Clark College; Ph.D., Cornell University.

JULIE FAIRBANKS
Associate Professor of Anthropology.
B.S., Georgetown University; M.A., Harvard University; Ph.D., Indiana University.

MARC FALK
Professor of Music, Associate Dean for Faculty Development
B.A., Macalester College; M.M., University of Minnesota; D.M.A., University of Iowa.

SARA K. FARRELL
Professor of Psychology.
B.A., University of Iowa; M.A., Minnesota State University, Mankato; Ph.D., Northern Illinois University.

STEVEN FELLER
Professor of Physics.
B.S., Clarkson College of Technology; Sc.M., Ph.D., Brown University.

JENNY FERGUSON
Assistant Professor of Creative Writing.
B.A., York University; M.A., University of Windsor; Ph.D., University of South Dakota.

SHARON GUTHRIE
Associate Professor of Nursing.
A.A., A.S., Kirkwood Community College; BSN, MSN, Ph.D., University of Iowa.

SHAWN P. HARMSEN
Assistant Professor of Communication Studies.
B.A., Wartburg College; M.A., University of Northern Iowa; Ph.D., University of Iowa.

CHRISTOPHER HATCHELL
Associate Professor of Religion.
B.A., Columbia University; M.A., Ph.D., University of Virginia.

GINA HAUSKNECHT
Professor of Literature and Creative Writing.
B.A., Oberlin College; M.A., Ph.D., University of Michigan.

DAVID HAYES
President, Professor of Business Administration.
B.A., Coe College; J.D., University of Iowa; L.L.M., University of Iowa College of Law.

STACY HAYNES-MOORE
Assistant Professor of Education.
B.A., Truman State University; M.A.T, Ph.D., University of Iowa.

WILLIAM KENT HERRON
Professor of Mathematics.
B.A., University of Dubuque; M.S., Ph.D., University of Iowa.

JEFFREY L. HOOVER
Professor of Philosophy.
B.A., Eastern Mennonite College; M.A., Ph.D., University of Notre Dame.

TERRY R. HOSTETLER
Professor of Mathematics and Computer Science.
A.B., Augustana College; M.S., University of Illinois; Ph.D., University of Iowa.

DANIEL F. HUGHES
Assistant Professor of Biology.
B.S., Humboldt State University; M.S., Shippensburg University; Ph.D., University of Texas at El Paso.

STEPHEN B. HUGHES
Associate Professor of Computer Science.
B.S., Dickinson College; M.S., Indiana University; Ph.D., University of Pittsburgh.

JOYCE M. JANCA
Associate Professor of French.
B.A., Southern Illinois University-Carbondale; M.A., Ph.D., Indiana University at Bloomington.

CHRISTOPHER JOHNSON
Associate Professor of Education and African-American Studies.
B.S., Florida Agricultural & Mechanical University; M.E., Ph.D., The University of Georgia.

BETHANY A. KEENAN
Associate Professor of History.
B.A., Douglass College, Rutgers; M.A., The State University of New Jersey; M.A., Ph.D. University of North Carolina – Chapel Hill.

SCOUT KELLY
Associate Professor of Psychology.
B.A., University of Puget Sound; M.A., Ph.D., Kent State University.

MEIRA Z. KENSKY
Professor of Religion.
B.A., Sarah Lawrence College; M.A., Ph.D., University of Chicago Divinity School.

ALEESA KITTRELL
Assistant Professor of Nursing
B.S.N. Mount Mercy University; M.S.N., Clarke University; D.N.P., Capella University.

SARAH KRESS
Assistant Professor of Education.
B.A., Coe College; M.S., Drake University.

ROBERT D. KUENNEN
Assistant Professor of Stead Department of Business Administration and Economics.
B.A., University of Notre Dame; M.B.A., University of Iowa.

KIMBERLY RAE LANEGRAN
Professor of Political Science.
B.A., Grinnell College; M.A., Ph.D., University of Florida.

KAYTI LAUSCH
Visiting Assistant Professor of Film Studies.
B.A., Cornell University; M.A., University of Texas at Austin; Ph.D., University of Michigan.

ELLEN LEE
Assistant Professor of Psychology.
B.S., Loyola University, Chicago; M.A., Ph.D., Northern Illinois University.

MARGARET LEMAY
Assistant Professor of English.
B.A., Barnard College; M.F.A., University of Iowa Writers' Workshop.

JOHN PAUL LEMOS
Professor of Philosophy.
B.A., University of the South; Ph.D., Duke University.

CHELSEA LENSING
Assistant Professor of Stead Department of Business Administration and Economics.
B.A., Coe College; Ph.D., University of Iowa.

MICHAEL R. LEONARDO
Professor of Biology.
B.A., Knox College; M.A., Ph.D., Southern Illinois University, Carbondale.

CHAD LIBBY
Assistant Professor of Kinesiology.
B.S., Morningside College; M.S., Louisiana State University.

LUKE LOVEGOOD
Assistant Professor of Music
B.M., Coe College; M.M.E., VanderCook College of Music

RANELLE KNIGHT LUETH
Assistant Professor of Art History.
B.A., South Dakota State University; M.A., Ph.D., University of Iowa.

NEAL McNABB
Assistant Professor of Social and Criminal Justice.
B.A.; M.A., University of Central Oklahoma; Ph.D., University of Oklahoma.

CARRIE MELCHER
Associate Professor of Stead Department of Business Administration and Economics.
B.S., The Ohio State University; M.P.H., Drake University.

BRITTNEY MILLER
Associate Professor of Mathematics.
B.S., University of Southern California; Ph.D., Purdue University.

JONATHAN MITCHELL
Assistant Professor Biology
B.S., Appalachian State University; Ph.D., University of Chicago.

LAISSA RODRIGUEZ MORENO
Associate Professor of Spanish.
B.A., Universidad Nacional de Colombia; M.A., Ph.D., University of Wisconsin – Madison.

BRUCE F. NESMITH
Professor of Political Science.
B.A., North Central College; M.A., Ph.D., University of Illinois.

JANE NESMITH
Assistant Professor of Rhetoric, Director of Writing Center.
B.A., The College of Wooster; M.A., Indiana University; Ph.D., University of Iowa.

VINH Q. NGUYEN
Professor of Stead Department of Business Administration and Economics.
B.A., National Economics University, Vietnam; M.B.A., Asian Institute of Technology, Thailand; Ph.D., Mississippi State University.

DAVID A. NORDMANN
Associate Professor of History.
B.A., Coe College; M.A., University of Kansas; Ph.D., Indiana University.

OLUWADAMILOLA OPAYEMI
Assistant Professor of Communications Studies.
M.S., Central Connecticut State University; Ph.D., University of Alabama.

NIALL PEACH
Assistant Professor of Spanish.
B.A., St. Aidan's College- Durham University; M.A., Ph.D., Purdue University.

AMY PERRY
Assistant Professor of Stead Department of Business Administration and Economics.
B.B.A., M.A., University of Iowa.

KARA RECKER
Assistant Professor of Psychology.
B.S., Arizona State University; Ph.D., University of Iowa.

LAURA RISKEDAHL
Director of Library Services.
B.A., University of Northern Iowa; M.A., University of Iowa.

KATIE RODGERS
Associate Professor of Sociology.
B.A., Coe College; M.A., Rutgers University; Ph.D., University of Oregon.

JENNIFER ROGERS
Associate Professor of Art.
B.A., Coe College; M.F.A., University of Minnesota.

AMY RUSSELL
Assistant Professor of Education.
B.S., Mount Mercy College; M.A., University of Iowa.

ELAINE CARR RYDZE
Assistant Professor of Kinesiology.
B.S., Michigan State University; M.A., University of Iowa.

PAULA J. SANCHINI
Professor of Biology.
B.A., Hartwick College; Ph.D., University of Colorado – Boulder.

BENJAMIN SCHMIDT
Instructor in Theatre Arts.
B.A., University of Iowa.

STEVEN SHANLEY
Professor of Music.
B.M., University of Northern Iowa; M.E., University of Minnesota; M.A., Ph.D., University of Iowa.

AMBER SHAW
Associate Professor of English.
B.A., Rhodes College; M.A., Ph.D., University of Georgia.

KELLY SIEMS
Assistant Professor of Nursing.
B.S.N., Mount Mercy College; M.S.N.-Ed, Regis University; D.N.P., Clarke University.

STEVEN SINGLETON
Professor of Chemistry.
B.S., Fort Lewis College; Ph.D., University of Denver.

MELISSA SODEMAN
Professor of English.
B.A., University of Washington – Seattle; M.A., Ph.D., University of California – Los Angeles.

ANTONIO SPIKES
Assistant Professor of Rhetoric.
B.S., Georgia Southern University; M.A., Ph.D., Southern Illinois University.

CHRISTOPHER STEAD
Assistant Professor of Chemistry.
M.S., University of Manchester Institute of Science and Technology; Ph.D., Medical College of Georgia.

MICHAEL STOBB
Assistant Professor of Mathematical Science.
B.A., Humboldt State University; M.S., Humboldt State University; Ph.D., University of California.

PAUL STORER
Associate Professor of Biology.
B.S., Allegheny College; M.S., Duquesne University; Ph.D., Loyola University, Chicago.

SCOTT J. STOUDT
Associate Professor of Chemistry.
B.A., Pennsylvania State University; Ph.D., Michigan State University.

MICHELLE UMBARGER-MACKEY
Associate Professor of Nursing.
B.S.N., M.S.N., Ph.D., University of Iowa.

DREW WESTBERG
Associate Professor of Economics.
B.A., Coe College; M.S., Ph.D., University of Missouri - Kansas City.

JONATHAN J. WHITE
Professor of Mathematics.
B.A., Coe College; M.S., University of Iowa; Ph.D., University of Oklahoma.

SUSAN WOLVERTON
Professor of Theatre Arts, Associate Dean for Student Academics
B.A., Carleton College; M.F.A., University of Iowa.

HONGBO XIE
Instructor and Head of Library Technical Services.
B.S., Nanjing Institute of Meteorology, Nanjing, China; M.A., University of Iowa.

ANGELA ZISKOWSKI
Provost and Dean of the Faculty; Associate Professor of History.
B.A., University of Cincinnati; M.A., Ph.D., Bryn Mawr College.

18.1.2 Faculty Emeriti

(Dates in parentheses indicate years of active faculty service.)

CHARLES WILLIAM AUKEMA, M.F.A.
Professor of English, Emeritus (1971–2016).

JOHN A. BECKELMAN, M.F.A.
Robert O. Daniel Professor of Art, Emeritus (1978–2015).

JOHN E. BROWN, PH.D. President, Emeritus (1982-2001).

EDMUND BURKE, Ph.D.
Professor of Humanities, Emeritus (1974–2012).

HEIDI BURSCH, Ph.D.
Associate Professor of Nursing, Emerita (2014-2023).

ROSEMARY F. CARROLL, Ph.D.
Henry and Margaret Haegg Distinguished Professor of History, Emerita (1971–2001).

JAMES P. COTTINGHAM, Ph.D.
Professor of Physics, Emeritus (1989–2011).

MARIA A. DEAN, Ph.D.
Professor of Chemistry, Emerita (1984-2020).

RICHARD D. DOYLE, M.A.
Professor, Emeritus; Director of Library Services and Director of Technology (1972-2010).

ROBERT DANIEL DREXLER, Ph.D.
William P. and Gayle S. Whipple Professor of English, Emeritus (1974–2016).

WENDY DUNN, Ph.D.
Professor of Psychology , Emerita (1980–2020).

ALLEN P. FISHER, Ph.D.
Stead Family Professor of Sociology, Emeritus (1978–2011).

LUCILLE GOODSON, M.F.A.
Associate Professor of Art, Emerita (1985-2023).

HARLO HADOW, Ph.D.
Heins-Johnson Professor of Biology, Emeritus (1977–2019).

JEANNINE HAMMOND, Ph.D.
Joanne M. Pochobradsky Professor of French, Emerita (1973–2006).

TERRY L. HELLER, Ph.D.
Howard Hall Professor of English, Emeritus (1975–2013).

GLENN ALFRED JANUS, Ph.D.
Henrietta Arnold Professor of History, Emeritus (1971–2011).

ROGER P. JOHANSON, Ph.D.
Professor of Education, Emeritus (1986–2015).

DEAN MEREDITH KARNS, M.A.
Professor of Mathematics and Music, Emeritus (1960–1999).

BARBARA LAREW, Ph.D.
Elnora H. and William B. Quarton Professor of Business Administration and Economics, Emerita (1981–2017).

JAMES BRIAN LARKIN, Ph.D.
Professor of Spanish, Emeritus (1961–1990).

DONALD JOHN LISIO, Ph.D.
Henrietta Arnold Professor of History, Emeritus (1964–2001).

MARGIE VATHAUER MARRS, M.A.
Pearl M. Taylor Professor of Music, Emerita (1978–2014).

ROBERT L. MARRS, Ph.D.
The Esther and Robert Armstrong Professor of Rhetoric, Emeritus (1986–2014).

MICHAEL McDONALD, M.A.
Professor of Business Administration and Economics, Emeritus (1981–2005).

DAVID W. McINALLY, E.Ed.
President, Emeritus (2013-2021).

TERRY FUELLING McNABB, Ph.D.
Professor of Education, Emerita (1995-2016).

EVELYN J. MOORE, Ph.D.
Professor of Nursing, Emerita (1983–2014).

THOMAS B. MOYE, Ph.D.
Professor of Psychology, Emeritus (1989–2017).

JERRY MICHAEL OWEN, Ph.D.
Alma A. Turechek Professor of Music, Emeritus (1969–2006).

JAMES R. PHIFER, Ph.D.
President of the College, Emeritus, and Professor of History, Emeritus (1985–2013).

JAMES H. RANDALL, M.A.
Stead Professor of English, Emeritus (1969–70; 1971–2010).

KURT E. REDBORG, Ph.D.
Professor of Biology, Emeritus (1988–2017).

MARTIN ALAN ST. CLAIR, Ph.D.
Professor of Chemistry, Emeritus (1993-2023).

MICHAEL L. SANDBERG, Ph.D.
Louie J. And Ella Pochobradsky Professor of Business Administration, Emeritus (1976–2007).

FLOYD SANDFORD, Ph.D.
Professor of Biology, Emeritus (1971–2005).

PETER JOHN THOMPSON, M.F.A.
Marvin D. Cone Professor of Art, Emeritus (1993-2023).

CALVIN VAN NIEWAAL, M.S.
Professor of Computer Science and John F. Yothers Professor of Mathematics, Emeritus (1981–2018).

STANLEY READ WATKINS, Ph.D.
Professor of Chemistry, Emeritus (1958–1993).

PETER PETTINER WICKHAM, Ph.D.
Henry and Margaret Haegg Distinguished Professor of Chemistry, Emeritus (1969–2000).

MICKEY TAI CHUIEN WU, Ph.D.
George R. Baker Professor of Business Administration and Economics (1979-2019).

NŰKHET D. YARBROUGH, Ph.D.
Stead Family Professor of Psychology, Emerita (1985–2019).

18.1.3 Adjunct Faculty

MATT CALMAN
Adjunct Lecturer in Business Statistics.
B.A., M.B.A., Georgia State University.

GEOFF CHAPLIN
Adjunct Assistant Professor of Religion.
B.A., Oberlin College; M.A., University of Chicago.

BRIAN CHRISTOFFERSON
Adjunct Assistant Professor of Education.
B.A., University of Northern Iowa; M.A., Universoty of Texas at San Antonio.

EMILY GANFIELD
Instructor in Theatre Arts; Costume Shop Manager/Supervisor.
B.A., Coe College; M.F.A., Purdue University.

JOE HALL
Instructor of Stead Department of Business Administration and Economics.
B.A., M.A., M.F.A., University of Iowa.

SHERIF IBRAHIM
Adjunct Assistant Professor of Chemistry.
B.S., University of Maryland; Ph.D., University of Iowa.

TOM JAVOROSKI
Adjunct Assistant Professor of Philosophy.
B.A., University of Wisconsin-Whitewater; M.A., Ph.D., University of Iowa.

KARLA KEYES
Instructor of Biology.
B.A., Coe College; M.S., Washington University School of Medicine.

JOSHUA LANGSETH
Adjunct Instructor in Humanities.
B.A., Concordia College; M.A., Ph.D., University of Iowa.

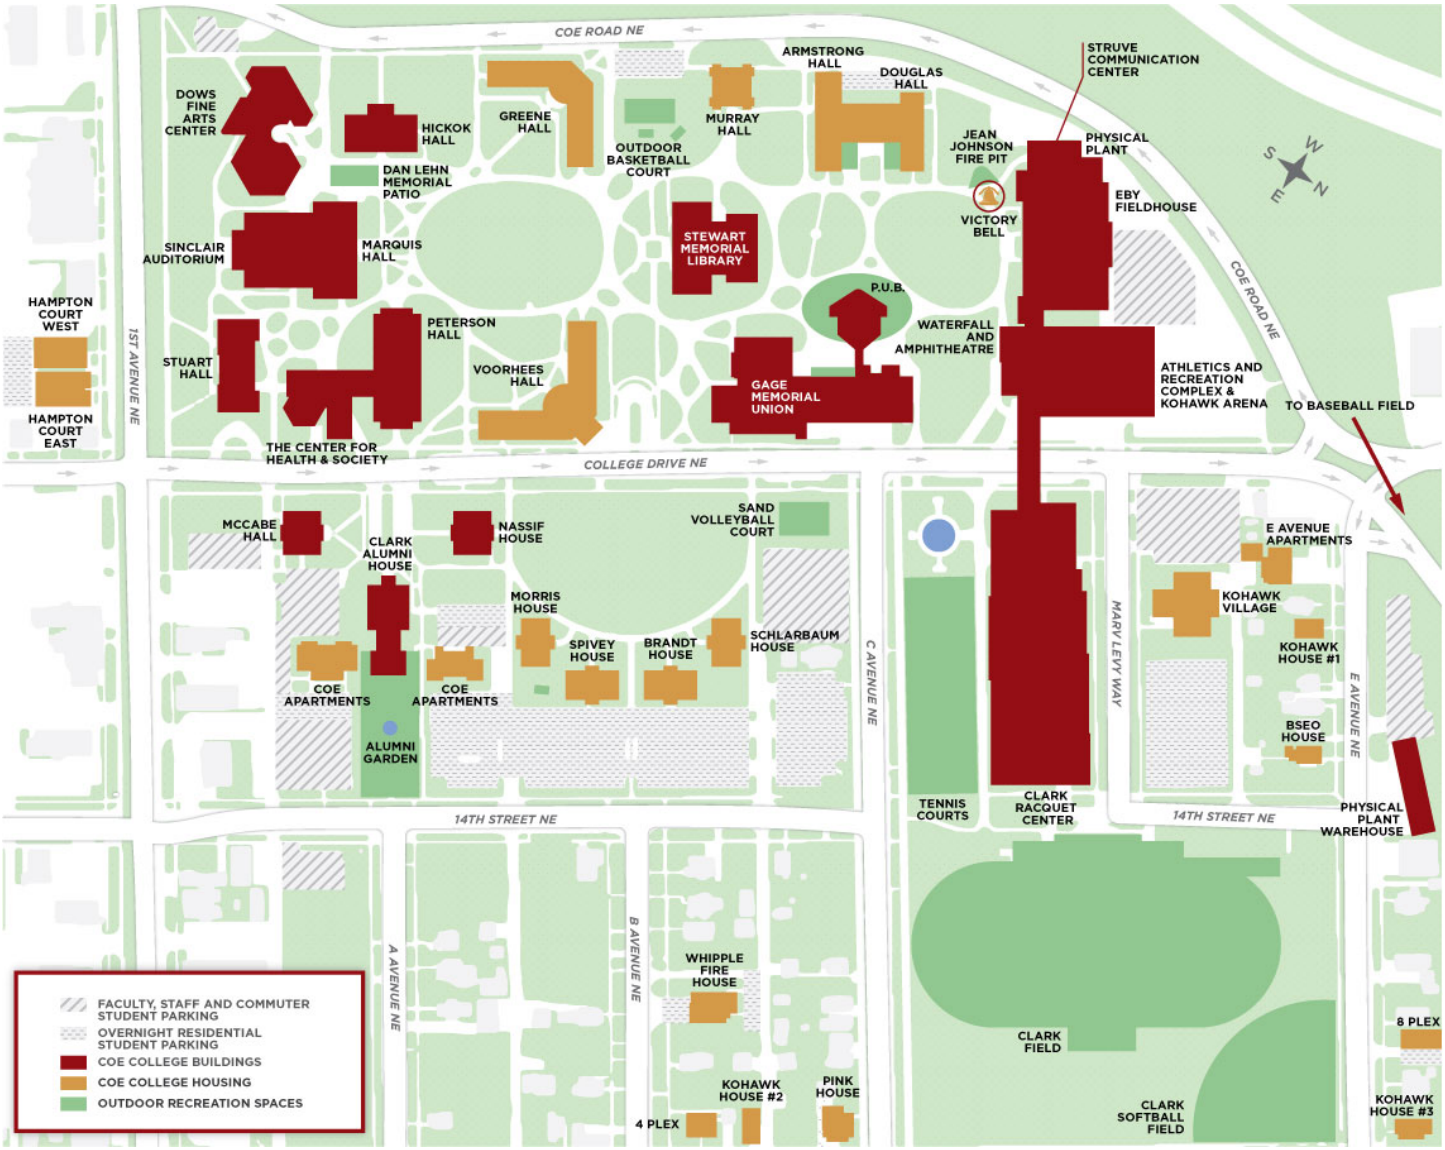

AMY LUTTINGER
Adjunct Assistant Professor of Biology.
B.S., Massachusetts Institute of Technology; Ph.D., Princeton University.

JENNIFER LUTZ
Adjunct Instructor of Accounting.

MELINDA WESTPHALEN
Adjunct Assistant Professor of Music.
B.A., Ohio Wesleyan University; M.A., Ph.D., University of Iowa.

JAMES WETZEL
Adjunct Instructor of Astronomy.
B.SC., University of Iowa.
